

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XV.

NEW ORLEANS, SATURDAY, JANUARY 1, 1870.

NO. 50.

NEWS OF THE WEEK.

DOMESTIC.

NEW YORK, Dec. 23.—It is understood here to-night that a demonstration will be made by the Roman Catholics against the use of the Bible in the public schools before the first of January, without waiting for the action of the Board of Education in regard to the question. Great excitement prevailed in the city to-day, it having been expected that a demonstration of the kind would be made at the exhibition in the up-town public school, but it was off quietly. It is believed that the movement will extend through the length and breadth of the Union, and that the sentiments announced by those in favor of the demonstration are precisely similar to those publicly preached by Dr. Thomas S. Preston, who is the recognized leading Catholic divine in this city.

WASHINGTON, Dec. 24.—Ex-Secretary Stanton died this morning of heart disease, aged fifty-four years.

JACKSON, Miss., Dec. 25.—General Ames has ordered the Legislature of Mississippi to convene on the eleventh of January, 1870. The following named officers, elected at the late election, are appointed by General Ames provisional officers until their installation by regular process: James L. Alcorn, Governor; James Lynch, colored, Secretary of State; Henry Minsgrove, State Auditor; Joshua S. Morris, attorney general. About four-fifths of the Legislature elect are Radicals.

WASHINGTON, Dec. 26.—Stanton will be buried to-morrow. At the request of Mrs. Stanton, the coffin was closed and no one allowed to see the face of the corpse. No military honors will be permitted to appear in the ceremonies.

WASHINGTON, Dec. 28.—The following names were recently suggested to the President as capable and eligible men for the vacancy on the Supreme Bench: Erskine, of Georgia; Henry Boyce, of Louisiana; John Hancock and Judge Paschal, of Texas. The Southern Senators are determined to secure the appointment of a Southern man, if possible.

A prominent Republican Senator, who has been for the last three months quietly ascertaining the opinions of Senators and Representatives on the Cuban question, informed a member of the Junta that the vote according to the rights would pass both Houses unless the members have changed their views since the opening of the session.

The treasury warrants drawn during the present month are very heavy and the revenue returns from all sources have been very light. The debt statement, it is expected, will show a small decrease.—*Times.*

Rufus R. Wade has been reappointed a special agent at large on mail depredations of the post office department.

No cabinet meeting to-day.

Gold in the Treasury Department \$107,000,000; gold certificates \$37,000,000; currency \$10,500,000. The debt statement will show a decrease of probably \$7,000,000.

The New York Tribune says: A test case, selected by the Board of Brokers, has just been decided by the Court of Appeals in this city, reversing a previous judgment of the Supreme Court and fixing the principle that when a broker buys stock on a margin for a customer, he is not at liberty to sell it, because it falls below the margin, without giving notice of the time and place of sale, considering the stock as the property of the customer.

The court in this instance makes the broker who sold under such circumstances liable for the highest price the stock may have reached, even to the date of this trial. This will be new doctrine to Wall street.

It is stated upon undoubted authority that Treasury Agents J. W. Bell and J. Elders were discharged by the Treasury Department because there was no further use for their services at New Orleans.—There are no charges whatever against them at the Treasury Department.

BAYOU SAHA, Dec. 28.—The steamer Tempest, with about three hundred bales of cotton on board, was burned near Trinity yesterday.

The boat and cargo will be an almost total loss. No lives were lost.—*Times.*

MEMPHIS, Dec. 28.—A bold attempt was made Saturday night to assassinate John Creer, who lives a few miles from the city. While he was sitting by the fire, a shot was fired from the yard through the window, striking him on the head.

All attempts to discover the perpetrator of the deed have been fruitless. Creer lies in a very critical condition.

Ice is passing to-day in large quantities.

Two hundred and fifty Chinese laborers, en route for New Orleans, arrived at Omaha on the twenty-eighth ultimo.—*Times.*

ST. LOUIS, Dec. 28.—Nearly five hundred Chinese will arrive here to-night. They will immediately proceed to Texas to work on railroads.

MEMPHIS, Dec. 28.—A negro named Steve Judson, who had brutally murdered another negro, was taken from the officers at Bell's Station, on the Memphis and Louisville Railroad, last night, by a party of maskers, and shot.

NEW YORK, Dec. 28.—It is reported that E. J. Oakley has been embezzling the funds of the Merchants' Exchange Bank for a long time, and that the deficit will reach \$200,000. The surplus of the bank will amount to \$80,000 after paying dividends.

The investigation into the affairs of the Merchants' Exchange Bank irregularities shows a deficiency already of \$150,000, and will probably prove much larger. The bank claims it has the ability to meet its liabilities.

In the Twigg's sword case of Roman Lawrence against General B. F. Butler, a motion was made to vacate the order of arrest, on the ground that the taking was done under orders of the United States government, and that there was no conversion. The decision of the court reserved.

The post office authorities are negotiating with the Inman, Anchor and several other lines to carry the mails at reduced rates. The negotiations are not yet concluded.

There are ten Spanish gunboats still at the quarantine, awaiting full crews. Their departure is improbable under ten days.

The following statement in regard to mails for Great Britain has been published. The Postmaster General has agreed to the postal concession with Great Britain by which postage between the two countries will be reduced from twelve to six cents per letter.

Without making any arrangements whatever for carrying the mails on the twenty-third of December, the lines now carrying the mails from this port were notified that after the first of January they would only get two cents per letter, or six cents an ounce, for carrying the mails. The lines immediately informed the department that they could not perform the service.

The steamship San Jacinto, from Savannah, passed two of the Spanish gunboats, which were supposed to have been accidentally separated from the main fleet.

Augusta, Ga., Dec. 28.—There was a serious row at Dearing, Columbia county, yesterday afternoon, in which A. N. Hods and Ellis Adams were shot and killed, and Diah Hods wounded. Whisky was the cause of the difficulty. No politics in the quarrel.

CHICAGO, Dec. 28.—Governor McDougall is about to abandon north-west Canada, and leave the insurgents in quiet possession.

SAN FRANCISCO, Dec. 28.—A heavy earthquake in eastern California and throughout Nevada. The shock was felt in the lowest levels of mines. The vibrations were from north to south.

The steamship China brought three thousand six hundred cards of silkworm eggs from China and Japan, for Lyons, France. They will be sent overland to New York, and thence by steamer.

Protestant and Catholic mission houses were destroyed at Nankin by a mob, the inmates barely escaping.

A new translation of Burlingame's credentials show that he was accredited to lesser powers, and that no plenipotentiary powers were accorded him.

REMOVAL OF DISABILITIES.—The Washington correspondent of the Baltimore Gazette, in his letter of the eighth instant, has the following concerning the question of the removal of political disabilities:

"Mr. Ferry this morning, in the Senate, incidentally remarked that he should at an early day ask action upon the bill to remove all political disabilities imposed by the fourteenth amendment. He said that this measure was demanded by the country at large. Subsequently the bill for that purpose, introduced yesterday by Mr. Stewart, was taken up and referred to the Judiciary Committee, when the author made a similar announcement. From what

I learn I think it probable that the bill may pass both Houses during the present session. But there is strenuous opposition to it among the extremists, headed by Sumner. I learn that the subject was discussed in caucus yesterday, and great diversity of views and very bitter feeling exhibited. The very introduction of the bill by Mr. Stewart, however, is evidence that the measure is beyond the control of a Radical caucus. There is a certain sort of honor, it is said, even among thieves; and I hear it is not usual to spring the caucus trap upon members of the Radical faction after they have been fully committed upon a given matter.

A BLOW AT THE MORMONS.—Senator Cragin's bill, now pending in the Senate, for the overthrow of the polygamous Mormons, provides for putting the whole machinery of the courts of Utah Territory in the hands of the United States officers; providing that judges of Territorial courts shall be appointed by the Governor, and that all officers of militia shall be appointed by the Governor. The portion of the section on marriage is as follows:

"Marriage, so far as its validity is concerned, in the said Territory, is hereby declared a civil contract, to which the consent of the parties capable in law of contracting is essential. No man, resident of said Territory, shall marry his mother, his grandmother, granddaughter, stepmother, grandfather's wife, son's wife, grandson's wife, wife's mother, wife's grandmother, wife's daughter, wife's granddaughter, nor his sister, his half-sister, brother's daughter, sister's daughter, father's sister or mother's sister. No woman shall marry her father, grandfather, son, grandson, stepfather, grandmother's husband, daughter's husband, granddaughter's husband, husband's father, husband's grandfather, husband's son, husband's grandson, nor her brother, half-brother, brother's son, sister's son, father's brother or mother's brother."

Other sections of the bill strike at every feature of Mormon custom in regard to marriage, and prescribe heavy penalties for violation. Section eighteen of the bill disapproves and annuls a large number of Territorial acts granting springs, timber land and water powers to leading men of the Mormon Church, and the last section declares null and void all laws passed in the special interest of the Mormon system.

JUSTICE GRIER.—I was passing through the corridor that passes the consulting room of the Supreme Court, one afternoon of last week, when the door opened, and an aged man came freely forth, supported on each side by a servant. As he hobbled away I turned to look upon him, when a bystander said, "Judge Grier." It was the veteran of the judiciary, who lags reluctant on the public stage, loth to leave, and too feeble to remain. He has at last sent in his resignation, I am assured. And one regrets that the bill now offered is not the law, so that the old judge might retire on full pay, and pass to his final resting place in peace and comfort.

I confess to a profound respect for this old court of ours. No one can enter their beautiful court room, the fittest and fairest chamber in the entire building, and look upon the grave men, in their gowns, deliberating upon great legal questions, without feeling that in this tumultuous period of excitement and change that there is a beautiful and firm fragment of the government left us, to which we may cling. The noble head and form of the Chief Justice make a perfect finish to the bench. One would regret to see him moved to any other position. Time was, in what we feel to have been an olden time, when Salmon P. Chase, then a prominent lawyer in Ohio, filled with the pride of profession, told me that his only ambition was to reach the Supreme Court before he died. It was an honorable ambition. But since then he has had great authority in the political arena, and now Chief Justice of the very court he once sighed for, and a shining light and an illustrious name. Common rumor says that he is dissatisfied, and looks anxiously to the Presidency. I can hardly believe the report.—*Washington letter to the Cincinnati Commercial.*

THE NEXT CENSUS.—The House of Representatives has passed a very important bill providing for taking the next census of the United States. Its provisions are numerous, yet unambiguous, and give promise of great thoroughness and completeness in the work. It pro-

poses that the work, instead of extending, as heretofore, over five months, shall be fully accomplished in one, namely, in July next. Heretofore the census has been taken under the direction of the marshal; the present bill directs that it be taken by officers specially appointed for this work, consisting of one general superintendent, a local superintendent in each congressional district, and a sufficient number of enumerators, to be selected by the latter, to collect all the statistics in a single month. The general superintendent and his clerks and subordinates at Washington are to hold their offices for three years, within which time the whole work of collecting, ranging, digesting and publishing the results is required to be completed, in order that Congress and the country may have the advantage of the statistics while they are still fresh. The subjects on which information is collected are to be greatly extended, embracing almost everything relating to the multifarious business and diversified industries of the country. The expense incident to the enlarged census will be well laid out, and our citizens everywhere will look for the statistics which will be produced with great interest.

FOREIGN.

PARIS, Dec. 28.—The Emperor accepts the resignation of the ministry. The Emperor, in a letter to Olivier, requests him to name persons who, with himself, will form a homogeneous ministry, faithfully representing the legislative majority and resolved to apply in letter and spirit the *Senatus Consultum* of September 8.

The Emperor counts on the devotion of the Corps Legislatif to the great interests of the country, no less than on Olivier, to aid the Emperor in the task he has undertaken of putting into operation a constitutional regime.

LONDON, Dec. 28.—The new Austria-Chinese treaty forbids consuls engaging in trade.

PARIS, Dec. 28.—The new French ministry, under the leadership of Olivier, will probably soon be announced.

BIRMINGHAM, Eng., Dec. 28.—At a theatrical panic last night eighteen persons were killed and many hurt.

PARIS, Dec. 28.—The new session of the Corps Legislatif commenced to-day. Schneider was re-elected by a vote of 190 to 40.

The liberal Paris journals, commenting on the letter of the Emperor to Olivier, say: "Personal government is at an end—the letter is the first chapter of a liberal empire."

ROME, Dec. 28.—It is certain that in the questions thus far submitted for consideration to the committees of the Ecumenical Convention, nothing has been said on infallibility. The Pope expresses the opinion that members have no voice in the regulation of that body.

DR. LIVINGSTONE.—*Faint, yet Pursuing.*—In the recent letter of Dr. Livingstone, describing the sources of the Nile, he adds a postscript, referring, not complainingly, of his difficulties in preventing his attendants and helpers from deserting him. "The fact is," he adds, "they are all tired of this everlasting tramping, and so, verily, am I. Were it not for an inveterate dislike to give in to difficulties without doing my utmost to overcome them I would abscond too. I comfort myself by the hope that by making the country and people better known I am doing good, and by imparting a little knowledge occasionally I may be working in accordance with the plans of an all-embracing Providence." A "triumphal reception" awaits the great traveler on his return, which, probably, will not now be long delayed.

THE SCHOOL-BIBLE QUESTION.—The Methodist State Convention of Massachusetts has adopted the following in regard to the school-Bible question:

Resolved, That regarding the Bible as the only sufficient rule of Christian faith, and the palladium of our liberties, we look on all attempts to exclude it from our public schools, or to break down its authority, as a blow at the foundation of republicanism.

NEGLECTED COUGHS AND COLDS.—Few are aware of the importance of checking a cough or "common cold" in its first stage; that which in the beginning would yield to a mild remedy, if neglected, soon proves upon the lungs. Brown's Bronchial Troches, or Cough Lozenges, afford instant relief.

TO AGENTS.—A straight pencil mark in the above calendar indicates the date of a money-letter received; a circle the amount of dollars received, and a half circle the amount of cents.

Minutes of the Montgomery Conference.

Mrs. Edron: The Montgomery Annual Conference convened in Union Springs, Alabama, December 8, and adjourned at eleven o'clock on Tuesday night, December 14. Bishop Paine presided.

The following resolution was adopted in reference to the publication of the minutes:

Resolved, That for the purpose of defraying the expenses connected with the publication of the minutes of this Conference, there shall be in future an advertising department connected therewith.

To carry into effect the above resolution the following committee of nine was appointed to procure advertisements:

J. R. Rogers, Union Springs, Alabama; M. B. Locke, Union Springs, Alabama; W. S. Baker, Mobile, Alabama; W. F. Joseph, Montgomery, Alabama; J. B. Gorde, Montgomery, Alabama; J. H. Swearington, Opelika, Alabama; William Lowther, Columbus, Georgia; W. W. Wilkinson, Greenville, Alabama; S. H. Dent, Enfield, Alabama.

There will be four thousand copies published for gratuitous distribution. These will be sent to every member of the Conference, both clerical and lay, and be distributed by them.

All good business men will readily perceive what an admirable opportunity this is to advertise their business, and thus bring it prominently before an intelligent public, in a permanent form. Those minutes will be read and preserved for future reference.

Send in your advertisements promptly, before the first day of February next.

The cash must, in every instance, be paid in advance, at the following rates:

One page, 4x7 inches..... \$25 00
Three-quarters of a page, 4x7 inches..... 20 00
One-half page, 4x7 inches..... 15 00
One-quarter of a page, 4x7 inches..... 10 00
One-eighth of a page, 4x7 inches..... 5 00

No advertisement will be inserted for less than \$5. We solicit advertisements from each and every State in the Union.

Persons living at a distance will please address the undersigned at Union Springs, Alabama, or any other member of the committee, if more convenient. Respectfully,

J. R. ROGERS,
Union Springs, Alabama.

N. B.—Each member of this committee is expected to make known this opportunity to the enterprising men of his acquaintance, collect the money in advance, and forward both money and advertisement to me or to John W. Mathews, secretary of the Conference, promptly.

J. R. R.

A NEW HAMPSHIRE clergyman returned the Governor's Thanksgiving proclamation because he was going away, and therefore couldn't read it with his congregation.

SOUTH CAROLINA CONFERENCE.

We clip the important items of this Conference below from the *Southern Christian Advocate*:

The statistical secretary reported 42,752 white members—increase, 2,357; colored members, 2,411; local preachers, 174—decrease, 8; infants baptized, 2,060; adults baptized, 1,651; number of Sunday schools, 513—increase, 49; officers and teachers, 3,481—increase, 426; pupils, 22,027—increase, 3,111.—Collected for pastors, \$56,684 50—increase, \$13,311 35; for presiding elders, \$7,466 10—increase, \$1,238 10; Conference collections, \$4,440 06—increase, \$1,238 10; for missions, \$2,868 91—increase, \$248 27; for Sunday schools, \$4,368 23—increase, \$966 96; for education, \$2,317 94—increase, \$976 09; for Bishops, \$1,000.

Jesse A. Clifton, George T. Harmon, Christian V. Barnes, J. Marion Boyd, William D. Lee, Joseph F. England, Thomas P. England, William T. McLellion, Albert G. Gantt, Benjamin F. Dixon and James T. McElhany—a blind man from his birth—were received on trial.

The election of delegates to the General Conference resulted as follows:

Clerical—A. M. Shipp, H. A. C. Walker, W. Smith, W. P. Moulton, W. H. Fleming, F. M. Kennedy. Reserves—S. H. Browne, A. M. Christberg, J. W. Kelly, Lay—W. J. Montgomery, G. W. Williams, A. A. Gilbert, J. H. Carlisle, S. Bobo, H. T. Wright. Reserves—J. S. Moore, B. Stokes, E. T. Rembert, T. S. Moorman, D. R. Barton, K. F. Simpson.

The Missionary Society held its meeting on Saturday night, before a full house.

After an eloquent report from the board, through Rev. W. T. Capers, Bishop Kavanaugh, A. A. Gilbert, Esq., and Dr. Whiteford Smith addressed the very large meeting on the general subject of consecration to missionary work, and a collection was taken for missionary debt—\$318—which, together with the collections of the year for this debt, makes \$558 75 obtained on this account. The collections for domestic missions were \$2,868 91.

Bishop Andrew addressed the Conference most feelingly—glad to meet with his co-laborers and the young men of this body once more. He is looking better than we expected to see him. Surely, if any living man deserves to be loved by a Methodist preacher, he is that one. "In labors more abundant," he has stood upon the watch towers of the church for nearly sixty years, having been received into the South Carolina Conference in 1812. Among the preachers there was certainly no tearless eye when he took his seat.

TEXAS.—Immigration.—The *San Marcos Pioneer* hears of a number of immigrants on their way to that fine section of our State.

The *Gonzales Inquirer*, of the eighteenth, says: During the past week about thirty families passed through, with the intention of settling in the western portion of this county.

The *Gonzales Inquirer* mentions several trains of emigrants arriving in town. During last week about thirty families passed through with the intention of settling in the western portion of Gonzales county.

The *Paris Press* says a constant tide of immigration is passing through that place.

The *Advocate* says that a goodly number of the new-comers from the States are settling in Anderson county.

The *Ledger* says that the streets of Fairfield are almost daily crowded with immigrants from the older States, seeking homes in this.

The *Waco Register*, of the eighteenth ultimo, has a letter from Bell county, saying: Immigrants still continue to come. There is not a house in the place but what is full, and many have to seek shelter in tents.

The *Bryan Appeal* says: Never before in the history of Texas has such a tide of immigration poured into our State as during the present year. We hear it estimated that in the month of November at the rate of fifteen hundred a day crossed into our borders.

The *Wahatchie Argus* says: During the last week a perfect stream of "movers" have passed through our town, most of whom are going to the regions lying between the Trinity and Brazos rivers; a few, however, are stopping in this county.

The Christian Advocate.

SATURDAY, JANUARY 1, 1870.

TRUST.

I know not if dark or bright
Shall be my lot;
If that wherein my hopes delight
Be best or not.

It may be mine to drag for years
Till heavy chains;
Or, day and night, my meat be tears
On bed of pain.

Dear faces may surround my hearth
With smiles and glee;
Or I may dwell alone, and mirth
Be strange to me.

My bark wafted from the strand
By breath divine,
And on the helm there rests a hand
Other than mine.

One, who has known in storms to sail,
I have on board;
Above the raging of the gale
I have my Lord.

He holds me when the billows smite:
I shall not fall.
If sharp, 'tis short; if long, 'tis light;
He tempers all.

Safe to the land!—safe to the land!
The end is this!
And then with Him go hand in hand
Far into bliss.

—Dean of Canterbury.

Are Doctors Responsible for Drunkenness?

NUMBER TWO.

This disposition in physicians to prescribe alcoholic stimulants in every variety of disease received severe rebuke from Dr. Samuel Wilkes, in a lecture to his large class of students, delivered in a London hospital two years since. We regret that we can present only brief extracts. He said: "I should be sorry to say that the doctor panders to the public taste, since he is too often in accord with it. But this agreement between doctor and patient resolves itself into this: An extra stimulant is prescribed. It matters little what is the nature of the disease, since the reasons for the treatment are applicable to all complaints, and are founded on this simple proposition: All persons who are ill are weak. They have lost strength; they require it to be restored. Alcohol is a supporter and tonic; therefore alcohol is a remedy for all diseases. This is no parody, for I constantly hear medical men say they give brandy to all their patients, for they always find them low. Moreover, it is a medicine of which the patients approve, assuming, as they do, its supporting and strengthening power. You cannot, therefore, do better if you have no compunctions in converting your profession into a mere trade, than to say to all your patients, after feeling their pulse, that they are very low; that you are sure that they do not take enough, and order them several glasses of wine daily. Should they be exceedingly ill with some desperate organic complaint, you must turn your remarks to the friends, and speak of the necessity of supporting the patient by giving him as much brandy as can be poured down his throat. By this method you are sure to give satisfaction, for should the patient die without such treatment, you may be blamed for letting him slip through your fingers, whilst if he die with it, you have done your best (in their opinion.) This would be a comfortable and lucrative mode of practice."

In addition to the regular prescriptions by medical men, of alcohol, the use by their advice of Tinctures, Plantation Bitters, Schnap, Schnapps, Stomachics, Cordials, etc., all of which are strongly alcoholic, is almost universal. They produce the exhilarating effects of moderate intoxication and engender an appetite for rum. In all the land we seem to have but one sanitary institution in which alcoholic drinks are regarded as always a cause and never a remedy for disease. They are used lavishly in nearly all our hospitals, jails, almshouses and asylums, as is shown by the reports from those institutions. *

The use of alcoholic liquors by physicians seems to be founded on the popular doctrine and belief that they nourish the body by supplying plastic material or heat material, or else indirectly support the system by diminishing metamorphosis or atomic change; hence this class of remedies is spoken of as supporters of vital heat, food for the nerves, generators of force, etc. The mind is filled with a vague idea that strength and increased health are the results of their use by persons in health, thus warding off disease; and that in the sick, in whom, they say, the vital force is always depressed, they aid in sustaining it. This is a popular doctrine, and were it not that it has led to so fatal results, it would be amusing to witness the satisfied air of those who so triumphantly prate about giving brandy and whisky as food for the nerves, to build up the system, to prevent metamorphosis, etc. We utterly repudiate this doctrine. We deny that alcohol increases vital force, is food for the nerves, or is

indispensable in sickness or in health.

Dr. T. Kennard, of St. Louis, in an article, in the *Medical Archives*, on alcohol, says: "Whatever may be the exact nature of the deleterious agent in alcohol acting upon the human organism, we know that it affects different individuals in very different degrees, but always by deranging the nervous system. Some persons are injured by it in even the smallest quantity, some are rapidly poisoned by its abuse, while others are very slow to experience its baneful effects. It creeps upon them slowly and unconsciously, and its temporary soothing and exhilarating effects delude its victims with the belief that it is the deficiency, and not the excess of amount taken, which gives rise to all the miserable symptoms of chronic alcoholism." Prof. N. S. Davis, who has with much propriety been called the Father of the American Medical Association, in an Essay on the Effects of Alcohol, writes: "It is probable that a very large majority of the people, even at the present time, regard alcoholic drinks, when taken with moderation, as tonic, nourishing, warming and life-sustaining, the conservators of strength in manhood and the milk of age. These popular notions are strengthened on the one hand by the direct exhilarating effects of alcohol on the nervous system, and on the other by certain theoretical dogmas promulgated by Liebig, Johnston, Hammond and others, who have boldly proclaimed alcohol to be respiratory or accessory food. This class of chemico-physiologists simply point to the fact that alcohol in its chemical relations belongs to the class of hydrocarbons; and that those substances out of the living body are capable of undergoing combustion by uniting with oxygen; and they straightway jump to the conclusion that, when taken into the system, they actually enter into like combination with oxygen, and thus become respiratory food. And yet we search in all their writings, in vain, for the first item of proof that their more theoretical deductions are correct. A more recent modification of the theories emanating from this school of writers makes alcohol not respiratory, but accessory food. It having been clearly proved by the experiments of Boker and others, that the presence of alcohol in the system lessened the atomic changes and secretions in such a way as to diminish the sum total of eliminations in a given time, it was at once assumed that the diminution of atomic changes in the tissues of the body was equivalent to just so much nutrition or addition of new matter through digestion or assimilation; hence the alcohol was declared to be accessory or indirect food, a fallacy which will be exposed hereafter." He continues: "We have thus stated fairly the theoretical doctrines of this class of men, because their names are continually quoted as authority throughout all departments of our literature. Let us now see how their theoretical assumptions and popular notions are sustained by a wide range of experiments and carefully observed facts."

"1. Numerous chemical analyses of the blood and different tissues, made by different experimenters, show that, when alcoholic drinks are taken, the alcohol enters the blood and permeates with it every part of the body. This position is acknowledged to be correct by all classes of observers.

"2. An equally reliable series of experiments have shown that alcohol undergoes no chemical change in the system, but is eliminated through the excretory organs, more especially the lungs and kidneys, within a few hours after being taken. This position, though long disputed, was fully established by the results of the well devised and carefully executed experiments of Lallemand, Perrin and Duroy.

"3. While in the blood and circulating in the system, the alcohol diminishes the sensibility of the brain and nervous system in the same manner as other anesthetics, and also retards the active changes in all the tissues; and consequently diminishes the sum total of eliminations or excretions in a given period of time. The numerous and patient experimental investigations of Prout, Sandras and Bouchardat, Boker, Hammond and others, have removed all doubts in regard to the truth of this proposition.

"4. By diminishing the atomic changes in the tissues of the body and the sensibility of the nervous system, the alcohol, by its presence, also diminishes the temperature, the strength and the power of endurance. That its presence in the system reduces the temperature was first fully established by the results of a series of experiments performed by myself in 1850, some of which I repeated in 1867. These experiments consisted in testing the actual temperature of the body every half hour, with a delicately graduated thermometer, for three hours, after a moderate drink of alcoholic liquor. The tests were applied to both wine

and whisky. These results are confirmed by the observations of Magnus and others in Europe. That the presence of alcohol directly diminishes the strength and power of endurance is proved not only by the foregoing scientific investigations, but also by a large number of carefully observed facts in relation to the results of labor in civil and military life, and by the statistics of sickness and mortality."

Prof. Davis also presents numerous facts, and the authority of great names, among whom may be found Dr. Benjamin Rush, Dr. Frank H. Hamilton, and others as eminent, to prove the truth of his position. In conclusion he says: "It were easy to fill a volume with facts and statistics showing that, in every relation of life, the use of alcoholic drinks diminishes man's capacity to endure both mental and physical labor; increases his predisposition to disease, and shortens the average duration of life. And although we have had our attention directed to this subject for thirty years, we have not found, either in the records of medicine or of general literature, a single statistical item calculated to prove the contrary. We have seen an abundance of opinions expressed, but opinions are not facts. It is very common to hear that some sick or injured person has been kept up, or kept alive, on brandy, or whisky, or wine. But do those who testify have any reliable means of knowing whether the sick person was actually kept alive by the potion, or whether he lived in spite of it? *

"Those who imagine that to diminish the waste of tissues, by diminishing the atomic changes, is equivalent to the actual assimilation and addition of new atoms, forget that all the phenomena of life in the physical organism are the direct result of such atomic changes; and whatever diminishes these actually diminishes physical life—and to stop them is to stop life." Such are the opinions of Prof. N. S. Davis, one of the most eminent of American medical men, and against whom lies no charge of radicalism in temperance. Against the use of alcohol as accessory food, by its power of diminishing or retarding metamorphosis or atomic change in the system, allow us also to quote from *Chambers' Renewal of Life*. On page 31 he says: "There cannot be too active a metamorphosis of tissue—the most active metamorphosis of the body possible, the highest possible development of life, is health; the complete cessation of metamorphosis, death; the partial cessation or arrest is disease."

If, then, as these authors have proved, alcohol always, and in whatever dose used, permeates the system unchanged, and arrests in degree the natural atomic changes, on which health depends, why shall we not believe with those whom we have already quoted that it is always a producer of disease, and never valuable as a remedy; and with Dr. Day, the distinguished physician of the Inebriate Asylum at Binghamton, New York, and with Dr. Joseph Parrish, the enlightened and philanthropic physician of the Sanitarium at Media, Pennsylvania, "that even the appetite for alcohol is the result of a disease produced by its use," and with Dr. Kennard, of St. Louis, "that it always acts by deranging the nervous system."—*Arthur's Home Magazine*.

The word "ecumenical" comes from two Greek words meaning "the habitable world," and an Ecumenical Council ought to embrace representatives of the church from all parts of the globe. The Pope's council aims at that, but will not accomplish it.

The term "ultramontane," so frequently used in speaking of opinion in the Romish Church, comes from two Latin words signifying "beyond the mountain." In France there has prevailed a liberality of opinion far ahead of the High Churchism that obtains beyond the mountains in Italy and Spain. Hence extreme, bigoted, bitter Romanism, such as prevails in Ireland, Italy and Spain, is called ultramontane.

MEMORIZING.—It is a remark of Bacon's that if we wish to commit anything to memory we will accomplish more in ten readings if at each perusal we make the attempt to repeat it from memory, referring to the book only when the memory fails, than we could by a hundred readings in the ordinary way, and without any intervening trials. The explanation of this fact is that each effort to recall the passage secures to the subsequent perusal a more intense degree of attention; and it seems to be a law of our nature not only that there is no memory without attention, but that the degree of memory is, in a great measure, proportioned to the degree of the attention.

A man might frame and let loose a star to roll in its orbit, and yet not do so memorable a thing before God as he who lets go a golden orb of thought to roll through the generations of time.

COMING EMPTY.

How easy it is to lift up an empty vessel compared with one full of earth, or one which cannot be lifted without the muddy dregs, stirred up, telling of many impure admixtures, and much exposure and spend-thrift luxuriance! The heart of man is truly a wondrous vessel that can hold so much while seeming to contain so little, that can seem so abounding full even while it is worse than empty. But the great evil of it is that even in regular ordinances we so often go up to God with our vessel already full of impure water, or even of more solid substances, so that nothing fresh and pure and Christ-like can come in unto us. We take our dirty water to the well's mouth, and instead of emptying it out, we fall to admiring our own faces therein as the mild sunshine of ordinances makes our image visible on the surface, and, forgetting ourselves and our duty, we carry back with us the self-same commodity which we took thither. For, though in ordinary circumstances some apparent satisfaction may be derived from this muddy liquor of our own preparing, severe tests come upon us when Providence would move our vessel out of its place, and then the dregs, shaken up, are presented to our sick and weary palate. While it is permitted us to sit still, we may deceive ourselves into the idea that our water is pure, because it gives back a dim reflection of our own faces, in spite of the lumps of iron and gold, and chalk and clay that lie at the bottom, breeding poison. If we have aught of our own—any of the world's shiny loes in our vessel—this trial and that trial is sent to shake it up and show us our delusion, and give us another chance of proceeding swiftly with empty vessel to the well. But how often do we instead go wandering on the desert of our own delights, our heart faint, our vessel empty—cheated by vain will-o'-wisp, and all kind of false night lights that lead to no water? Oh, the folly of the natural man which makes so poor exchange, and throws away so much labor; and, less wise than the patient camel in the desert, keeping its store of water at least for wise use, we thirst and have not wherewith to slake our thirst. Our behavior is surely too often like that of the heir of a great estate, who, to gratify his self-will, has gone abroad, and, having spent his means, seeks a lodging now here and now there, little knowing that the demise of his fathers has become his, and is waiting for him, and that he has but to turn homeward to be served heir, and take possession, and enjoy all the rights and privileges of the same. And will it not be an element of added enjoyment to the youth that he has known want, and has felt the emptiness of the pleasures in which he once thought to find a better estate? And so it is, verily, with men in their wanderings from God.

The soul is not at home and cannot be at home till it has cast out all such false and material things. To attempt to raise it up whilst these are within is simply to mix up more hopelessly what is scarcely felt to be unpalatable and poisonous. So like a frightened bird in a cage, it beats its breast in vain against the strong wires it has made to prison itself withal, and restlessly moves to and fro seeking repose, but cut off from the freedom it longs and yearns for. Its home is outside—sometimes seen from the shining golden perch, and sometimes not; but it cannot yet mount up on free wing and leave all its claims and toils behind it. And yet, as it cannot sink down contented into mere self-gratification, is not its very discontent an earnest of better things? So God brings severe trials upon us, to the end that in our sore need our vessel may be emptied of its impurities and deceitful draughts from the gleaming founts of sin—that in the shock the door may be thrown open, and we may fly free to the covert offered in the gospel.

Oh, the fullness of bliss, and of healthful, refreshing joy, that comes into our emptiness when the vessel of the soul is thus held under the cool springs of Christ's plenteous delight. It is as though the new wine of the kingdom already poured clear through the whole being.—*English Magazine*.

THE MADDENING MECHANISM OF THOUGHT.—Our brains are seventy-year clocks. The Angel of Life winds them up once for all, then closes the case, and gives the key into the hand of the Angel of the Resurrection. Tic-tac! tic-tac! go the wheels of thought; or will cannot stop them; they cannot stop themselves; sleep cannot still them; madness only makes them go faster; death alone can break into the case, and seizing the ever-swinging pendulum, which we call the heart, silence at last the clicking of the terrible escapement we have carried so long beneath our wrinkled foreheads. If we could only get at them, as we lie on our pillows and count the dead beats of thought after thought and image after image, jarring through

the over-tired organ! Will nobody block those wheels, uncouple that pinion, cut the string that holds these weights, blow up the infernal machine with gunpowder? What a passion comes over us sometimes for silence and rest—that this dreadful mechanism, unwinding the endless tapestry of time, embroidered with spectral figures of life and death, could have but one brief holiday? Who can wonder that men swing themselves off from beams in homely lassos?—that they jump off from parapets into the swift and gurgling waters beneath?—that they take counsel of the grim fiend who has but to utter his one peremptory monosyllable, and the restless machine is shivered as a case that is dashed upon a marble floor? Under that building which we pass every day there are strong dungeons, where neither hook, nor bar, nor bed cord, nor drinking vessel from which a sharp fragment may be shattered, shall by any chance be seen. There is nothing for it, when the brain is on fire with the whirling of its wheels, but to spring against the stone wall and silence them with one crash. Ah, they remembered that—the kind city fathers—and the walls are nicely padded, so that one can take such exercise as he likes without damaging himself. If anybody would really contrive some kind of a lever that one could thrust in among the works of this horrid automaton and check them, or alter their rate of going, what would the world give for the discovery? Men are very apt to try to get at the machine by some indirect system or other. They clap on the brakes by means of opium, they change the maddening monotony of the rhythm by means of fermented liquors. It is because the brain is locked up and we cannot touch its movements directly, that we thrust these coarse tools in through any crevice by which they may reach the interior, alter its rate of going for a while, and at last spoil the machine.—*Oliver Wendell Holmes*.

THE WARTBURG.—The road from Erfurt to Eisenach is very beautiful. On our way up the Wartburg, at Eisenach, we passed the new and stately mansion of the celebrated Low German poet and novelist, Fritz Reuter. In less than an hour afterward we were in the small, plain room where Luther worked day and night, from May 4, 1521, to March 6, 1522, on his translation of the Bible. The guides have become ashamed of inking over the place where he threw the inkstand at the devil's head. Indeed, it would now consume a good-sized bottle of ink to carry out the practice, for the spot has grown into an immense patch, covering a good section of one of the walls. The relic hunters have, therefore, not been idle of late years, for, not very long since, the plaster had been pulled from a spot only about a foot square. The low bedstead has suffered some additional knocking, but the Reformer's table is so heavily bound in iron that its proportions will probably suffer but little diminution in future. On the table there is a good supply of photographic views and pocket Testaments (Luther's translation,) and after making a selection from them, and viewing Cranach's picture of the Reformer's parents, we left the memorable little room. Other interesting parts of the castle (if there is anything interesting after seeing Luther's room) are the hall where the Minnesingers met in 1207, for a trial of their skill, the curious armor, and the tasteful chapel, of interest alike to Catholics and Protestants—to the former, because Luther used to preach in it, and to the latter, because of its association with St. Elizabeth, the apostle to Thuringia.

The Grand Duke of Weimar-Eisenach has lately subjected the entire castle to a thorough renovation. The breaches that time had made in its storm-beaten walls had been widening for centuries, and every room in the majestic pile, save only Luther's, has been so restored and beautified that any visitor who saw it a few years ago would hardly recognize anything more than the general outline of the great structure, and the magnificent hill on which it stands.

BRING SOMEBODY.—"What is the use of being in the world unless you are somebody?" said a boy to his friend.

"Sure enough, and I mean to be," answered the other. "I began this very day. I mean to be somebody." Ashton looked George in the face. "Began to-day! how? what do you mean to be?" "A Christian boy, and so grow up to be a Christian man," said George. "I believe that is the greatest somebody for us to be." "George is right. There is no higher manhood than Christian manhood; and it is the power of every boy to reach that. Every boy cannot be rich; every boy cannot be President; every boy cannot be judge; but God asks you all to a Christian manhood—to be his sons, and so with his son Jesus Christ to be heirs of heaven."

GOD'S PRESENCE WITH US!—According to God's command to Abraham to walk before him, i. e., live in his continual presence, a correspondent of the *Advance* says:

Our common labor, and even our pastime, should be engaged in, under a deep, abiding sense of God, as present, beholding, desiring in his heart of love our highest welfare, and ready, in all such ways as may seem good to him, to promote it. So far from this being an unpleasant restraint, or adapted in any way to mar our pleasures, as some may suppose, it enhances them; provided only that the heart is right toward God. Such is the effect, as all understand from the presence of a beloved companion or friend. And why not in a still greater degree, when our best and most loved friend is apprehended as present?

To act as in the presence of God insures a proper carefulness on our part to please him. We dismiss all hard thoughts of our neighbor or brother. We forbear sharp criticism upon slight deviations from rectitude and slanderous utterances, and have our speech pervaded by charity. Temptation is robbed of its power to harm us, and victory is made easy. In the words of a distinguished writer on practical Christianity, this is "a sovereign remedy against temptations." And it makes our most common acts acceptable to God. Says Fenelon: "Whoever walks as in the presence of God, in the most indifferent things, does not cease to do his will, although he may appear to do nothing of much importance." The aged and the feeble may seem to themselves, and to others, as living an almost useless life; but if they speak and act habitually in this manner, doing what they are able, there is doubtless acceptable service to God. Let no one who thus lives for one moment give place to the disheartening idea that he lives in vain. It is no way improbable that God is using his influence in accomplishing his designs of mercy to a greater extent than he has ever imagined. Life after this pattern has a dignity even in the lowly, which must be wanting to those in the highest positions who live without God in the world.

But to live after this fashion is by no means a thing of course. There must be a faith, which is the evidence of things not seen, which takes firm hold of Christ, unites the soul to him and receives of his fullness. Such a faith, connected with proper care and effort, will make this easy and delightful.

DR. WILLIAM PARKER says that those who are much addicted to the use of tobacco, or who work in the manufacture of snuff or cigars, never recover soon or healthily from injury or fever. The Emperor Napoleon had his attention called in 1862 to the effect of tobacco on the mind by a report which showed that the cases of paralysis and insanity had increased quite regularly with the increase of the revenue from the tobacco tax. This led him to order an examination of the effect of tobacco on the students in schools and colleges. It was found that those who did not use tobacco were stronger, better scholars, and had a higher moral record than those who used it. The result was that an edict was issued forbidding its use in the national institutions.

It is a little interesting to notice the attitude of Romanists toward the question of church "disendowment" in different countries. In Ireland it is well known that they are its warmest supporters, and generally so throughout the British empire, though even there they are opposed to receiving subsidies and Maynooth grants. In this country it is plainly seen that they are not opposed to endowments if they can be the favored party, and the New York State Legislature, and the government of New York city, are steadily and rapidly settling the sect into the condition of a regular endowed State church, and of Protestant people, who comprise three-fourths of the population of the State, and probably pay nine tenths of the taxes, permit it to be so.—*New York Christian Advocate*.

POPULATION OF CUBA.—There has been no enumeration of the inhabitants of Cuba since the census of 1862, by which there were 764,000 whites and 594,488 colored, or total of 1,358,238. Of the whites 729,957 were of European stock and 34,000 Chinese, among whom were but 25 females. Of the colored population, 221,417 were free, and 368,550 slaves. The free colored were about equally divided between the two sexes, but of the slaves 220,305 were males and only 148,200 were females. The present population of the island may be assumed to be about one and a half million, which estimate leaves a sufficient margin for persons exiled by political and insurrectionary disturbances.

"What a little child!" said a friend. "Ah," replied Hood, "parents never made much of

SATURDAY, JANUARY 1, 1870.

THE CHANGING YEAR.

Ah! feeling year, that will not pause a day,
To leave a picture of thy changed moods!
Glorious scenes shown, and seen and snatched
away.

Of sunsets, flushes, roses, field and woods,
The early blossoms leave the rugged thorn.
The purple lilacs wither in the lanes,
The violet's breath, sweet for one April morn.

The chrome-gold dandelion stars of spring
Burn out in ashy globes ere June is passed;
Too soon the hidden thrushes cease to sing—
Too soon the summer leaves hear autumn's blast.

And, ere we know, the locust's long-drawn
trill
Swells in the August noon—and nights
grow cool.

And see—saw katydids foretell the chill!
Of leafless forest and of icy pool.

And flaming golden rods and cardinal
flowers,
And drooping golden helmets skirt the
streams;

And sighing winds give warning, and the
honors
Of sunshine waste in cloudy twilight
gleams.

Yet palat thy pictures, Time, and sing thy
songs!

Thy pictures fade—thy songs die on the air;
Thou canst not take what to the soul be-
longs—
Beauty's immortal essence everywhere.

The summer goes—brown autumn treads be-
hind—
White winter scowls afar upon my rhyme;
I feel a presence that is unconfined—
I hear a voice whose music fills all time.

THE SUEZ CANAL.

THE PROGRESS OF THE GREAT OPENING CELEBRATION.

Port Said, Nov. 16.—Leaving Alexandria at four in the afternoon of Monday, November 15, we were in sight of Port Said at half-past seven Tuesday morning. Perhaps earlier, but it was at half-past seven that I first saw the low coast line, the long ranges of buildings, and the great fleet of ships which are the Port Said of today. We were just in time for a beautiful and grand spectacle, to which half the nations of the globe and the four elements contributed their best.

The Aigle, armed steam yacht of the French Empress, had left Alexandria a half hour before us. As she is a fast ship and the Guienne is not, we resigned ourselves to losing the ceremony of her arrival; but it happened that we were just in time. Perhaps it was all the more impressive that we saw the whole from such a distance that it passed before us like a panorama.

THE SPECTACLE OF SHIPS.

Far out to sea as we approached, far beyond our course, and miles away from the harbor, lay two Austrian iron-clads. Half way between them and the heads of the two piers, making out seaward for Port Said, a fleet of ten great ships of war lay anchored. In the harbor itself, another fleet, counting by hundreds instead of tens, and including ships of war and ships of peace; vessels of every nation and of every build. These ships, which I thus divide into three squadrons, were dressed every one in dancing flags; flags from stem to stern; flags from deck to main-top; flags from the tops up to the truck; flags from truck to mastsheads; flags again from stem to flying jib-boom, and up along fore-stay and shrouds. Never were ships so covered with flags. Ships and flags lay waiting. From along the coast line, steaming straight from Alexandria, lying low in the water, a sharp, black, three-masted side-wheel, armed schooner of a couple of thousand tons or so, at half speed, steers for the central squadron. The three squadrons lie in a crescent. Furthest from Port Said and nearest to a vessel coming from the west are the iron-clad Austrians. They begin the salute as the Aigle approaches. The glass shows us the Austrian yards manned, and it needs no glass to see the clouds of white smoke and flashes of fire which dart from the sides of the great ships, and presently clothe the hulls, and then steal up the rigging until the topmost flag is lost in the white wreathing mists, and you see no longer either ships or masts, but clouds clinging to the surface of the sea. The Aigle goes slowly past, the guns cease, the white clouds lift, the Austrians are still there, and the panorama is again complete. For a moment. For the Aigle nears the central squadron, which is a squadron of ten. There are French, Prussian, English, Italian—I know not what else, and the scene of the first squadron of ten repeats itself, broader and grander, and hiding a greater expanse of sea, with the blazing guns and the rising clouds of the squadron of ten. And the Aigle goes slowly past. If she returns the salutes, it is from her port guns, which we cannot see, while their smoke, which we might see, is lost in the smoke of the others. It clears, and the bow of the Aigle is turned for the entrance

of the harbor. Before she can reach the onmost breakwater, the harbor and the ships in the harbor, and the line of long buildings on shore, and the shore itself, have veiled and covered themselves before the approaching ship. The sky has come down to the sea, and the Aigle plunges into the white obscurity, and is lost for the third time from sight. Only the summit of the lighthouse, standing on one side of the harbor, is still visible, sole pilot to the entering ship. Again the smoke lifts, and the brilliant spectacle of sea and harbor and ships unrolls itself once more.

PORT SAID AND ITS HARBOR.

It is not easy to conceive in a moment the vastness of the preparations for the festival that begins to-day; or rather let me say the vastness of the work of which the ceremonies this week are meant to be only a kind of hint or symbol. To begin to understand the Port Said of to-day, look at the Port Said of ten years since. For engineering reasons this spot was pitched upon as the northern entrance of the canal. One of the earliest writers in April, 1859, says, in a letter before me: "Imagine a belt of sand from one hundred to one hundred and fifty yards wide, scarcely above the level of the Mediterranean sea, which bathes it on the north, and of Lake Menzaleh, which does as much on the south. If the weather is the least bad the waves cover this wretched strip, sometimes from one side, sometimes from the other. Its sole sources of supply are Alexandria, two days' journey distant, inaccessible if the wind blows hard, and Damiette, forty miles off, equally unapproachable in a gale. Nothing more!" And ships of a moderate draft had to anchor three miles out to sea for want of water to approach nearer.

That was the Port Said of 1859. To-day the strip of sand upholds a thriving town laid out in streets and squares, and within its harbor huge three-deckers from all the navies in Europe lie safely beside the great vessels conveying through the Mediterranean the cargoes and passengers from India. Whatever may have been done or left undone along the interior line of the canal to Suez, it is the simple fact that here at its beginning the promised work has been well and completely accomplished. The two piers of the breakwater project, one two thousand seven hundred and the other one thousand eight hundred yards into the sea. The access by them to the interior harbor is safe and easy. Where only a coasting brig could anchor in 1859, to-day ships drawing twenty feet and more sail in with keels free from the bottom. The dredging out of the basin leaves nothing to be done. It is vain to try to count the multitude of vessels that have entered the harbor before us. That they are there is the bodily verification of the work achieved at Port Said.

ABOUT TO ENTER THE CANAL.

The Guienne steams slowly in. We are still in the same state of uncertainty what we are to do, where we may go, where we can go, and what place belongs to our ship and to us in the festival to come. We are the guests of the Viceroy, the Guienne is under his charter, but she is a big ship. Can she enter? Can she go through the canal? Or are we to be transhipped into a smaller craft—we and our luggage which once already has been fished up out of the hold for the debarkation at Alexandria, which we did not after all have to make. Other ships are showing us the way, but while we are looking eagerly to follow, down goes the anchor of the Guienne; and there we are, just outside the promised land. Before we have time to scold much about it, the signal for a pilot is aloft, and our captain, who is by no means a Mephistopheles, but tells us all the truth he knows, pledges his word we shall go in as soon as the pilot comes to point out our berth. Meanwhile the Delta slips past, a Peninsular and Oriental ship, filled with excursionists, on whom we look down with due contempt as people who have paid their passage, and have no rights which we, as guests, are bound to respect. The Thabor follows, first of the Messageries Impériales new through line from Marseilles via the canal to Bombay. With characteristic prudence, as we note, the company has picked out one of its smallest craft for the first experiment. Then comes an Italian steamer, the Sicilia, of Genoa, with her crowd of passengers breakfasting *à fresco* on deck under an awning—charming example, which we vainly hope our ship will follow. But, at any rate, we follow the ship. Our anchor is up again, the wheels revolve once more; in five minutes we are inside the enchanted waters. Not precisely inside the canal, which properly begins with the lake and not with the basin, which is the *débouchement* of the canal into the Mediterranean, its enlargement forming the harbor of Port Said. The two piers are not parallel, but form a kind of trapezium, irregular in shape, and

having an extreme breadth of perhaps one thousand yards. It may be more. One could not be at the pains of judging distances accurately in the midst of the dazzling splendors which encompassed us.

THE ROYAL PROCESSION.

At quarter to three the salutes from the frigates recommenced, and were echoed back from the battery on shore. Straining our eyes toward the arch we could see the head of a procession advancing to the causeway. The guns thundered, the yards of the ships of war were manned, the troops presented arms. A parasol and a silk dress were seen in the centre of a glittering throng, and the cry ran along the line "L'Impératrice." Unhappily for the impatient enthusiasm of the crowd, it proved to be the Princess of Holland, a blonde, wholly unlike the French Empress, who is a brunette, and thought handsome—formerly. The Princess, with her cortege of Dutchmen in orange cockades, passed on and mounted the tribune. Five minutes later came a troop of English naval officers, then Spanish, then more English, the procession splitting itself into sections, and the real great people not yet coming. Twenty minutes had elapsed. The shore battery grew tired of presenting arms, and our party tired of standing on chairs to watch a lot of walking uniforms.

But we had not long to wait. In five minutes more the guns opened fire once more, shore again answering to ship, and this time there was no mistake. A big Turk, with a dangerous sabre, came swinging up the planks, clearing away an imaginary crowd between the two lines of red-towered troops. We climbed upon our chairs. Sundry functionaries at the head of the procession half hid the Empress, but she was there. She walked, leaning on the arm of the Emperor of Austria, the Empress in lavender silk and a black velvet hat, with black feathers and lace—if you care to know that fact. With them came the Viceroy, a stout gentleman with a good-natured countenance, and too much gold lace. The Crown Prince of Prussia came next, and then more people than there is room to mention. Pashas, generals, admirals, ambassadors, ministers, consuls—I know not who else.

ENTERING THE CANAL.—A SENSATION.

We are under way in the Peluse at half-past nine; at ten we enter the canal—the ninth ship in the line. To-day's sole celebration is to be the passage of the ships—so many as can pass—from Port Said to Ismailia. There were to be seventy; there will be—who knows how many?

I declare to you that the entering into the canal is a sensation for a lifetime. In itself it is a simple matter—what could be simpler than the mere passing of a line of ships through a canal! Yes, but this is the canal. This is the realization of the dreams of thirty-six centuries. We are crossing the track of immortal armies. We are accomplishing a problem long believed insoluble. We have witnessed only yesterday a fete which contradicts every tradition of the East. We are on the eve of an event which is to revolutionize the commerce of the world. Well, how do we meet such a moment? For the first moments in a dazed, wondering, half incredulous silence. Great events break slowly on the mind. No voyager, entering with adventurous keel on unknown seas, has a more thrilling sensation of novelty, of the unforeseen, than we. Experimental ships have gone before us; our going is a triumphal progress—as we hope, a proof to the world that the Suez Canal is no longer a problem. Correspondent of New York Tribune.

THE GENESIS.—Prof. Agassiz denies that he, as has been publicly charged, recently opened a lecture with the statement that he wanted no one to listen to his lectures who believed in the first chapter of Genesis. This charge bears on its face the evidence of its falsity, yet Prof. Agassiz deems it worthy of notice. He says in a letter to a friend:

"I am little in the habit of noticing things of this kind, being convinced that often it is useless; and having become from long habit somewhat callous to misrepresentation. Something in the tone of your letter makes me answer, and unwilling to leave it unanswered, I write to say that the statement you sent me is false. In some opening remarks of a course on geology, which I am now delivering at the University, I said that the 'theological interpretation of the Book of Genesis, giving six thousand years as the age of the world, was a hindrance to the understanding of geological evidence, and no one who started with this idea, and allowed his researches to be influenced by it, could be a geologist.' I do not remember my exact words, the lecture being extemporaneous; but this is the substance, and I know that I did not say what your newspaper extract reports."

CONSCIENCE-STRIKEN.—Some time ago Jacob K. Bear, telegraph operator and express agent at Brownsville, Nebraska, absconded one night with \$12,000 left in his hands as agent. He directed a letter to the paper of that place, stating that there were ninety-nine chances of his arrest to one of his safe escape with his plunder, but for that \$12,000 he would take one chance in a hundred. He wrote: "Won't this affair of mine make you a nice little local item?"

When the company learned of their loss they at once set active measures afoot to capture Bear, but failed. Lately, however, he has sent another letter to the *Brownsville Advertiser*. In it Bear states that losses in gambling led him to commit the theft. He states that one of the packages he stole contained \$8,600, and writes:

"But the best matured plans often fail; and now comes the most incredible part of my statement.—The package of \$8,600 was soldered up in a zinc box the exact size of the package, and I also had about \$1,000 besides that. It is natural to suppose that I was very much excited when leaving, which was true, for as I was getting into a skiff my foot slipped and I dropped the box containing the \$8,600 in the Missouri river."

"In conclusion I will say this: I am where I am making money fast, and before the expiration of ten years every dollar of that money will be returned to the United States Express Company. If I die, my life is insured in favor of the United States Express Company for an amount greater than what they have lost."

"I ask the sympathy of no one, but I am already fearfully punished, not knowing what moment I will be arrested for my crime. And what then? The State prison, or suicide, if I prefer it. I will also state why I wrote the note to Holladay & Cahoun in the brigadoise style that I did. I wanted to kill all the love and respect that my wife ever entertained for me, and thereby lessen the sorrow or anxiety that she might feel for me after she became aware of what I had done. You who have up to this time thought or imagined what a luxurious life I am no doubt leading, are for once disappointed, as I am one of the most miserable criminals on the face of the earth!"

EXTEMPORÉ SPEAKING.—An English writer on this subject says, with great truth and propriety, that no amount of self-reliance ought ever to lead any one to dispense with due preparation and a well digested outline of what the subject should embrace. For thus it comes to pass that many men who fancy that they have attained the acme of preaching when they can talk on any subject at a moment's notice, are the very men the world points at when it wants to find illustrations for the theory that even clever men become tedious in extemporé sermons, and that therefore it should be abandoned. One of the greatest proficients in extemporé speaking—one whose reputation rests on many years' experience—bore testimony to this, saying that homilies which seemed to flow so easily from his lips as to appear to the listener to be born on the occasion, had cost him many hours' laborious preparation and earnest prayer. "The coinage cannot be good if the mint be empty."

Dr. Arnold says the teacher's mind should resemble a lake fed by a running stream, and never allowing itself to lie stagnant. "If a full man," says Prof. Blunt, "is required anywhere, it is in the minister of the church, who is fixed to the same spot the whole year around. Nothing short of a large magazine to draw from will suffice for these frequent demands; without it the thread of his speech will soon run out the staple of his argument, and, instead of a preacher, he will become a spin-text."

IDEA OF DEATH.—That death and sleep are very much alike, the sages all tell us; but see how attractively Leigh Hunt describes the latter: "It is a delicate moment, certainly, that of being well nestled in bed, and feeling that you shall drop gently to sleep. The good is to come—just past; the limbs have been just tired enough to render the remaining in one position delightful; the labor of the day is done. A gentle failure of the perceptions comes creeping over one; the spirit of consciousness disengages itself more and more with slow and hushing degrees, like a mother detaching her hand from that of her sleeping child. The mind seems to have a balmy lid closing over it, like the eye; 'tis closing, 'tis closing—'tis closing. The mysterious spirit has gone to take its airy rounds."

TO RUN BETWEEN GOD AND THE WORLD is the sure way to be disappointed in both, and to have no rest either in the one or in the other.

The product of a single Scuppernon vine in Jacksonville, Florida, has been sold for \$192.

THE POOR BLIND MAN.—There is a poor blind man in London who loves his Saviour very much, and he is very anxious to do all he can to win others to love him. So he goes out into some of the crowded by-ways and alleys of this great city, and reads aloud from his Bible, with its raised letters. Many crowd around him to listen, and he always carries with him a supply of Bibles and Testaments for sale. In this way he goes from place to place, and has sold a large number of copies of God's blessed book. Last Good Friday he went into the country and began to read aloud. Some little girls came around him. One of them listened most attentively. Her companions urged her to come away, but she said: "No; I like this." They tried to persuade her to buy some oranges at a stall close by; but she said: "No; I like this reading much better than oranges." When the man had finished reading she bought a little copy of one of the gospels for herself, and also one for each of her companions.

Now, why do you think I told you this? I think this little girl teaches us all a lesson. She said: "I like this better than oranges;" but she did not stop there. She proved that she really meant what she said by what she did. We may say we love Jesus; but do we love him better than our own pleasures? If we do, let us prove it by thinking at once: "What can I do for him? What can I do to spread the knowledge of him and his name?"—*English Magazine*.

WALKING.—If you will hold yourself erect, with your chin close to your neck, swing your arms freely and move rapidly, you will find walking the very best exercise. Few muscles escape work, while you enjoy fresh air, sunshine, and a constant change of scene.

I have taught gymnastics as a profession for many years, but as a source of health I believe walking is superior to any of the artificial exercises.

The best hour during the autumn and winter, for people of average strength, is from seven to eight in the morning; for invalids from ten to eleven.

Mrs. Lewis and myself have walked around our common more than a thousand mornings, with the happiest results upon health and spirits. By the way, is it not a curious fact that while our people are clamoring for a large park, which must be located several miles away, this most beautiful park, which lies at their very doors, should never be visited by them. During these years of morning walks we have never, that we can recall, met a single person out for a "constitutional." With the exception of the children of toil hurrying across to their tasks, we have it all to ourselves.—*Dio Lewis, M. D., Boston*.

GOING TO JESUS.—Nearly three years ago a noble steamer was sinking with hundreds of persons on board. Only one boat load was saved. As a man was leaping into the tossing boat a girl, who could not be taken into the boat and who knew that she would soon be swallowed up in the deep, deep sea, handed him a note, saying: "Give this to my mother!"

The man was saved. The girl, with hundreds of other persons, was drowned. The mother received the note. What do you think the little girl had written in it? Here are the words:

"Dear mother, you must not grieve for me. I am going to Jesus."

Dear girl! What faith and courage she must have had to write that note!

She was going to Jesus through the stormy waves of the angry sea, yet she was not afraid. That's the kind of faith you need, my reader. Well, Jesus will give it you if you ask him, for he says: "Come unto me." "I will give you rest."

HOW TO BE HAPPY.—Said a venerable farmer, some eighty years of age, to a relative who lately visited him: "I have lived on this farm for over half a century. I have no desire to change my residence as long as I live on earth. I have no desire to be any richer than I now am. I have worshipped the God of my fathers with the same people for more than forty years. During that period I have rarely been absent from the sanctuary on the Sabbath, and never lost but one communion season. I have never been confined to my bed by sickness a single day. The blessings of God have been richly spread around me, and I made up my mind long ago that if I wished to be any happier I must have more religion."

PRESS NOT MODERN.—A collection of twenty-five pins, very well made, has just been placed in the Louvre in France. They were found in the subterranean vaults of Thebes, and were made more than three thousand years ago, showing that the modern invention is only a reinvention.

The Farm and Garden.

THE CONCORD GRAPE.

Joseph Hobbins, president of the Wisconsin Horticultural Society, writing for the *Wisconsin Farmer*, says:

Some three or four years ago, when I had become tolerably well acquainted with the habits and character of this grape, I ventured to predict that it would be the grape for general cultivation in this State, and gave it, accordingly, the name of the *Farmers' grape*. That this prediction has proved true, all will admit who read horticultural matters as they pertain to the Northwest and to Wisconsin in particular. Our State Horticultural Society places it first on the list for general cultivation. The Madison Horticultural Society had done the same some time before, and still retains it at the head of its list. In this preference the members of both societies are perfectly unanimous. The horticultural societies of other States are giving it the same rank and preference. My own experience in experimental grape growing leads me to prefer it to all other native or hybrid grapes. I express this opinion decidedly, and without the least reservation—after comparing it again and again with what are called "the best varieties," nearly all of which are growing in my garden.

Some of your readers will undoubtedly like to know my reasons for this preference. I will give them in the simplest and plainest manner, trusting that they will effect the object I have in view, inducing every farmer and lot owner to plant this vine, even if they should plant no other.

1. It is large enough, both in berry and bunch, to satisfy everybody. It is of full size.

2. It is a profuse bearer. I do not know any kind that bears more. So much for size and quantity, which are great considerations, especially to young beginners.

3. In quality, according to my taste, it is as yet unsurpassed. When thoroughly ripe its juice is more like wine than that of any other grape that I have grown. It satisfies a wine appetite. It is a grape that will please every family, young and old.

4. It is an early and a sure bearer, and in this State is not subject to any disease.

5. It thrives under all modes of treatment, good or bad, which cannot be said of any other grape. With taste and knowledge it is the grape; with ignorance and negligence it is still the grape, because it still thrives.

6. It will thrive in all soils, best in our clay, on high or low land, and with almost every aspect. Give it, if you can, the southeast, south or southwest.

7. It is the safest, simplest, surest, cheapest and least troublesome of all luxuries.

Where can you buy it? From respectable nurserymen, more particularly from those who have made grape growing something of a specialty. Never from peddlers or agents, unless they can show you a certificate of reliability from the president or secretary of the State Horticultural Society.

What will it cost? From thirty to fifty cents for a good vine, of course cheaper by the number. Is there any difference in the vines? There is a great difference in the vines. Your vine should be grown not from layers, but from a strong cutting. Never buy or plant a weakly, small looking vine. Order one that is two years old. This you may not always obtain, as there is a practice among nurserymen of selling strong one year old vines for the two years old. It matters, however, very little, if the vine is strong. How shall you plant it? If the vine is newly taken up, a single glimpse at it will indicate how it should be planted. Plant it just the same as it was growing, the same depth, letting the roots take the course they had already taken. The soil needs no more preparation than a spading some twenty inches deep. It needs no pressing down with your foot. The first shower of rain will bring it into contact with the rootlets better and sooner than all the pressing you can give it. Place no manure in the soil, but a little on it, in the shape of mulch.

It needs no particular care for the first year, unless it should happen to throw out a strong growth, in which case you are to pinch off all the growth but one cane, which you will tie, as it grows to a stake.

One of the most essential preparations for eternity is delight in praising God; a higher requirement, I do not doubt, than even delight and devotedness in prayer.—*Chalmers*.

WE should act with as much energy as those who expect everything for themselves; and we should pray with as much earnestness as those who expect everything from God.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. L. Church South.

SATURDAY, JANUARY 1, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KREMER, 112 Camp street, New Orleans, La.
ADVERTISE—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.

FOR LOUISIANA CONFERENCE:

REV. J. C. KREMER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remittance the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

LOUISIANA CONFERENCE.

The preachers and lay delegates, on their arrival at Shreveport, will please report themselves at the office of Brother Trippett, in the rear of the Methodist church, where they will be assigned to homes during the Conference.

R. S. TRIPPETT, P. C.

HISTORY REPEATING ITSELF.—We received in good time for Christmas, from Mrs. Doctor Robertson, of Terrebonne, a barrel of fine oranges. Just such another lucious gift as that of last year, and from the same source. The brother in Tennessee, we suppose, is just about receiving his annual supply of "socks." We hope that he is as grateful as we feel.

REVIVAL.—In a letter from Rev. John Pipes, dated Mansfield, Louisiana, December 16, 1869, there is a cheering P. S.—"We are in the midst of a gracious revival of religion."

SUNDAY SCHOOL UNION.—There will be a meeting of all the Methodist congregations and Sunday schools of New Orleans on Sunday, January 2, at seven o'clock P. M., in Carondelet street Methodist church, in behalf of the interests of the New Orleans District Sunday School Union. Addresses will be delivered by William Walker, Esq., and Rev. J. B. Walker, D. D., and concert music by the choir and the Sunday schools.

H. H. PRICE, Sec.

STONEWALL INSTITUTE.—The principal, the Rev. D. C. B. Connerly, is a Methodist preacher, and has been for years. He was a true soldier during the war, and has been employed successfully in teaching for years past. Those who have sent to him have spoken of us of him in flattering terms as a thorough instructor. See advertisement.

GEORGIA.—This State has been recommended to the military status. Having complied with all the prescribed conditions for admission, and having been admitted, she is now placed under a district commander, until she votes for the fifteenth amendment. This vote secures a constitutional change which affects Ohio fully as much as Georgia. If a change in the United States Constitution is effected by the bayonet, avowedly and openly, the conditions of liberty are thereby fatally invaded, and this manifestly ceases to be the government of the people, as established by the declaration and the war of 1776.

MONTGOMERY CONFERENCE.

The sixth session of this body met in Union Springs, Alabama, on December 8, 1869.

The Bishop not having arrived, the Rev. Theophilus Moody was called to the chair, and opened the Conference with reading the Scriptures, singing and prayer. Bishop Andrew came in during these opening services, and after prayer took the chair.

Sixty-six clerical members answered to their names, and thirteen lay members. A committee was elected to nominate standing committees. According to a resolution of the last Annual Conference, the order of the day was the report of a committee determining a plan for the distribution of funds among claimants of the Conference. A minority report was also presented. Neither report was adopted. The following persons were, by motion, constituted the Legal Montgomery Conference: O. R. Blue, William H. Ellison, William M. Motley, William A. McCarty and M. S. Andrews.

SECOND DAY.

Bishop Paine in the chair. Sixty-nine preachers and twenty laymen present. Reports from the Tuskegee Female College, the East Alabama Male College and the Summerfield Centenary Institute were read. The following distinguished ministers of the Methodist Protestant Church were introduced to the Conference: Rev. Dr. S. K. Cox, Rev. F. L. B. Shaver, Isaac Spangler, M. D., and J. M. Scott. Dr. Cox addressed the Conference in an earnest and highly appropriate speech, announcing that himself and associates proposed to unite with the Methodist Episcopal Church South. After him the others briefly spoke to the same point, and presented certificates of their good standing in the Methodist Protestant Church, signed by David B. Smedley, president of the Alabama district; whereupon the Conference adopted unanimously, by a rising vote, the following resolution:

Resolved, That we greet most heartily and affectionately the brethren who purpose to identify themselves with us from the Methodist Protestant Church, and welcome them as true yoke-fellows in the service of the Divine Master.

They were received into the body by the Bishop in due form, and their names entered upon the roll. The names of E. C. Oden and R. F. Perdue were also presented, by certificates of good standing in the Methodist Protestant Church, to be received hereafter, when they comply with the disciplinary forms.

Dr. Mitchell, of the Mobile Conference, made a statement in regard to Conference boundaries, and a committee of one member from each presiding elder's district was created to consider the whole subject.

The examination of character was begun, and at the call of the name of Rev. E. J. Hamill it was announced that he had withdrawn from the church.

THIRD DAY.

A plan was adopted for publishing the Conference minutes. A communication from the secretary of domestic missions was read; also one from General Joe Johnson on life assurance. We wonder whereunto this thing will grow. Last year the Conference had an Artesian applicant, long, lank and persistent, all-persuasive and penetrating, who represented the moral and financial aspects of a particular phase of some undying life insurance enterprise that greatly excited our attention. What has become of that modest stranger, who was here, there and everywhere, in the Conference, in the cabinet, and in the Bishop's room as late as ten o'clock on Sabbath morning? Does he still live? And that company—does it still thrive?

The following persons were confirmed as trustees of the East Alabama Male College: Rev. J. M. Motley, C. M. Howard, M. B. Lock, Rev. E. S. Smith, T. L. Mount, S. H. Dent, G. P. Harrison, William H. Barnes, William Lowther and J. C. Meadows.

At the close of this morning's session Bishop Andrew, our venerable father in God, addressed the Conference. He briefly reviewed the

past, gave us his counsel for our future guidance, and with much encouragement assured us of his fatherly love for us, and his abiding interest in the church of God and his hope of heaven. After which the Rev. Dr. Ellison led the Conference in prayer that God would mercifully bless and keep his servant in peace to the end of his days.

Afternoon.—Opening services by Dr. Spangler. W. R. Talley was located without his consent—too secular.

The following persons were admitted into full connection and ordained deacons:

Hugh M. Gillis, Millard J. Law, Joseph H. Ledbetter, William R. Williams.

FOURTH DAY.

The following local preachers were elected and ordained deacons:

Matthew T. Leach, John M. Brown, A. M. Gillespie, R. D. Sellans, D. M. Banks.

The credentials of Enoch Bolton were restored.

The following traveling preachers were ordained elders:

E. A. West, Robert E. Cary.

The following are the names of local preachers who were ordained elders:

Robert H. Harris, Wilbur F. Norton, William S. Price and W. B. Thomason.

Among the strangers present are the Revs. Dr. Evans and J. W. Simmons, of the South Georgia, and Rev. Dr. J. B. Walker, of the Louisiana Conference. A resolution was passed requesting Dr. Evans to publish, in a permanent form, his articles in the Southern Christian Advocate on the Episcopal controversy.

The Committee on Boundaries reported, recommending that in case the next General Conference adopts the policy of State lines for Conference boundaries, that delegates be instructed to claim the whole of Alabama, and that four Conferences be formed out of the territory. This was laid on the table for the present. The report of the Committee on Church Relations was referred to the General Conference. A series of resolutions was reported by the Committee on the Religious Condition of the Colored People, to the effect that our preachers shall aid them, in all possible ways, to a healthy ecclesiastical development, and afford them facilities for worship wherever practicable. The formation of an Alabama Colored Conference of the Methodist Episcopal Church South was strongly advised and supported. Bishop Paine urged the necessity for the hearty co-operation of the preachers in this important work. The Committee on Sunday schools reported, urging every member to double his efforts in this vital interest of the church.

Afternoon.—The Committee on Education reported resolutions:

1. Recommending every preacher to preach on the subject of education and take up a collection in behalf of the East Alabama Male College.

2. Recommending the reappointment of the Rev. T. J. Rutledge as agent of that institution, and welcoming him to the pulpits of the Conference.

3. Commending the Tuskegee Female College, and the Centenary Female College at Summerfield, to the patronage of the church.

SUNDAY.

Bishop Paine preached in the Methodist church in the morning and ordained the deacons. The Rev. Dr. Walker, of Louisiana, preached in the afternoon; after which the Bishop ordained the elders.

MONDAY.

The delegates to the General Conference were elected, as follows:

Clerical—O. R. Blue, M. S. Andrews, John Mathews, W. A. McCarty, William Shapard and J. B. Cottrell. Alternates—S. H. Cox, W. M. Motley and W. H. Ellison.

Lay delegates—W. H. Chambers, William Garret, J. E. Groce, R. H. Powell, J. P. Rowls and William Lowther. Alternates—J. R. Rogers, C. Howard, Rev. T. O. Dawson.

A resolution was passed, ordering all the preachers in charge to take up a collection, in March or April next, for defraying the expenses of delegates to the General Conference,

to be forwarded to the nearest delegate.

Afternoon.—The Conference stewards reported, in answer to Question 19, that \$6,275 were necessary to pay the allowance due to widows, orphans and supernumeraries, and that \$3,741 28 had been collected therefor—about fifty-nine per cent. of their claims. The children of Brother Benjamin Williams, deceased, donated to the Conference the sum of \$55 85, which was divided among its claimants.

The following persons were admitted on trial: Albert C. Baker, Alexander Stacy, Douglass, Robert H. Harris, Matthew T. Leach, Jere S. Williams, George R. Lynch, Robert T. Nabors, John M. Brown, Zachary T. Morris, Wilbur F. Norton—a fine list.

[We introduce the above as a supplement to the items from Doctor Walker last week.—EDITOR.]

APPOINTMENTS.

MONTGOMERY DISTRICT.—M. S. Andrews, P. E. Montgomery station, John Mathews; Herrou street, A. Stacy Douglas; Mount Meigs, Sam'l K. Cox; Auburn, William Shapard; Tuskegee, E. B. Smith, L. F. Dowdell, supernumerary; Tuskegee circuit, B. B. Ross, J. A. Wetters, supernumerary; Opelika, William H. Wild; Oak Bowery, M. C. Turrant; Russell, John H. Lockhart; Crawford, Robert H. Harris; Hurtville, to be supplied by J. C. Carter; Loachapoka, William B. Neal; Isaac Spangler, agent Sunday schools; T. J. Rutledge, agent East Alabama Male College; E. D. Pitts, principal Opelika High School.

WETUMPKA DISTRICT.—W. S. Turner, P. E. Wetumpka, Robert T. Nabors; Prattville, R. S. Woodward; Autaugaville and Ivy Creek, William A. Edwards, G. A. Talley, supernumerary; Autaugaville circuit, Thomas L. Denler, R. S. Perdue, supernumerary; Lowndesboro, Hayneville and Union, S. A. Pilley; Carolina, W. C. Rowland; Pleasant Hill, B. F. Blow, P. R. McCarty, supernumerary; Prattville colored district, J. T. Talley, supernumerary.

GADSDEN DISTRICT.—T. G. Slaughter, P. E. Gadsden station, R. A. Timmons; Gadsden circuit, P. K. Brindley; Cedar Bluff, R. E. Carey; Van Buren, W. L. Clifton; Center, John G. Walker; Little River mission, James A. Neely; Coloma mission, to be supplied; Cross Plains and Bethel, Thomas Moody; Ashville, E. A. West; Bible agent, T. H. Whitby.

TALLADOGA DISTRICT.—O. R. Blue, P. E. Talladoga station, Anson West; Talladoga Collegiate Institute, A. D. McVoy; Talladoga circuit, William R. Kirk; Jacksonville, F. T. J. Brandon; Alexandria, John C. Duncan, E. B. McClelland, supernumerary; Coosa River mission, Rufus Nicholson; White Plains, E. B. Norton; Harpersville circuit, L. M. Wilson; Shelby Iron Works, D. S. McDonald; Blue Mountain mission, C. S. D. Lassiter; Fayetteville, E. C. Odom; Montevallo, J. H. Ledbetter; Montevallo circuit, Daniel Duncan.

LAFAYETTE DISTRICT.—F. L. Shaver, P. E. Lafayette, Joseph T. Curry; Frodonia, W. D. Nicholson, J. M. Towles, supernumerary; Dadeville, G. R. Lynch, J. N. Dupree, supernumerary; Tallahassee, Jore S. Williams; Seaport, R. J. Sampler; Pinckneyville, L. R. Bell; Marble Valley, Henry Young; Lineville, G. J. Masou; Arbachoocha mission, C. M. Livingston; Wedowee mission, to be supplied.

EUFAULA DISTRICT.—William A. McCarty, P. E. Eufaula station, A. J. Briggs; Greenville, R. B. Crawford; Clayton and Louisville, W. H. Ellison; Hamiter, E. L. Loveless; Villula, J. W. Solomon; Perote, M. M. Graham; Enou and Midway, W. K. Norton; Lawrenceville, C. L. Dobbs; Channahatchie, to be supplied by J. L. Oliver; Choctawhatchie mission, J. M. Brown.

MARIANNA DISTRICT.—W. B. Dennis, P. E. Marianna, Albert C. Baker; Greenwood, H. P. Wangh; Calhoun mission, W. R. Williams; Campbellton, R. Seales; Gordon, L. Patterson; Sylvan Grove, W. P. H. Connerly; Westville, W. A. Sampey; Geneva, Z. T. Morris; Ozark, T. S. Armistead; Cerro Gordo mission, A. M. Gillespie.

PENSACOLA DISTRICT.—J. A. Parker, P. E. Pensacola station, J. A. Pace; Pollard, R. F. Mountain; Black Warrior mission, to be supplied; Yellow River mission, to be supplied.

CAMDEN DISTRICT.—D. M. Hudson, P. E. Camden, M. J. Law; Oak Hill, N. Gillis; Snow Hill, J. W. Jordan; Farmersville, J. M. Scott; Sepulga, J. L. Scipper; Evergreen, D. J. Wright; Monroeville, H. J. Hunter; Mount Pleasant, to be supplied; South Butler, B. L. Selman; Black's Bend, T. K. Armstrong.

UNION SPRINGS DISTRICT.—J. W. Shores, P. E. Union Springs, J. B. Cottrell; Mount Hilliard, W. C. Robinson; Line Creek, C. A. King; Pine Level, Wilbur F. Norton; Rocky Mount, J. F. Dickinson, W.

B. Adams, supernumerary; Fort Deposit, J. W. Glenn; Sandy Ridge, W. G. Perry; Greenville, W. M. Motley, W. H. Morris, supernumerary; Rutledge, W. W. Graham; Troy, Angus Dowling; Brundidge, A. S. Dickinson; Elba mission, H. M. Gillis.

M. T. Leach transferred to East Texas Conference.

MOBILE CONFERENCE.

SATURDAY NIGHT.

The missionary meeting came off in the Methodist church—a beautiful building, with a very fitful supply of coal gas. We mention this item because we think that this meeting, and several others during the Conference, were disastrously affected by water in the gas pipes, or some other obstruction that filled the house with exceeding dim religious shade. The treasurer read the amount collected from the several circuits and stations of the Conference for missions, giving a total

For foreign missions..... \$750 00
For domestic missions..... 1,768 62
2,518 62

After the reading of the secretary's report the meeting was addressed by the Rev. A. S. Andrews and the editor of the Conference paper, and a collection was taken up, which amounted to some \$300.

ON SABBATH

The Sabbath schools were addressed by Prof. Starke. Bishop Paine preached in the morning a sermon of marked power and eloquence. In the afternoon Dr. Hamilton preached and stirred the whole audience with the emotion of his whole heart. It was an hour of gracious influences. At night the sacrament of the Lord's Supper concluded the delightful day, which was so full of good things. We hear a good report from the sermons which were preached at the other Protestant churches by the members of the Conference, and we doubt not an excellent impression was made upon the town in favor of Methodism.

MONDAY.

The Conference opened with the consideration of certain difficult cases. The affairs of the Southern University came up. Most earnest speeches were made. The Conference was rallied to its support. This institution is essential to the welfare of the Methodist Church in Alabama. It is her main reliance for recruiting its ministry with educated men. The Conference, by resolution, requested the Bishop to appoint the Rev. Dr. Hamilton as agent for the Southern University.

TUESDAY MORNING.

The Conference meets this morning in an unusual hurry. When a body of men begin to be nervous they become by just that much incapable of wise legislation.

The following persons were ordained:

Deacon—U. B. Phillips.
Elders—C. W. Culhoun, William Hullet, E. M. Turner.

The Joint Board of Finance reported for the Conference, supernumeraries, and the widows and orphans of preachers, a dividend of seventy-four per cent. upon their claims. This is a claim that, throughout the Southern Church, ought to be paid in full, if, to do so, it left every man in it hungry for a month.

The report of the committee appointed to consider the commission of Rev. Dr. Meredith, of the Cumberland Presbyterian Church, was received, and on motion adopted. That report provides for the sending of two messengers (Rev. E. M. Bounds and Rev. J. M. Boland) to the next synod of the Cumberland Presbyterian Church, to convey our Christian salutations and fraternal greeting to that body.

An excellent report from the Committee upon the Religious Condition of the Colored People was read. It was sensible and to the point. The white people in this country are deeply interested in the moral condition of these people. They are at our front and back doors. We are in the midst of them, and the elevation of their religious and moral characters is an imperative demand upon the church.

On motion of Dr. Hamilton, A. S. Andrews was substituted for T. W. Dorman, deceased, on the Com-

mittee of Publication of the New Orleans Christian Advocate.

The Joint Board of Finance was appointed as follows:

Clerical—J. Bancroft, J. F. Evans, J. A. Peables, J. W. Rush, W. E. Cameron, J. D. Cameron, O. P. Thomas.

Lay—A. W. Lampkin, Dr. Charles Reneher, W. L. Lipscomb, P. G. Wood, William Wilson, W. E. Kennedy, T. P. Bell.

On motion, the following were elected as the Legal Conference for the ensuing year:

J. Hamilton, A. H. Mitchell, J. T. Heard, A. S. Andrews.

The Conference confirmed the nominations of Rev. A. S. Andrews and Colonel A. C. Jones as trustees of the Southern University.

The statistics of this Conference have not only been collected, but so promptly that they are now ready to be reported to the body. The work of a preacher is thus exhibited in concrete form, and should be weighed at the session of the Annual Conference. The plan of only bringing out, after the body has adjourned, the results of the year's labor will, we hope, be abandoned. We give this table as a specimen of what can be done by a laborious committee:

REPORT OF MEMBERS.			
	White.	Col'd.	Incr.
Members.....	18,541	1,553	2,458

We notice gratefully the increase in the membership of two thousand six hundred and forty-nine members.

The report on periodicals was presented, and we send it forward to speak for itself. One important fact was brought out, that one of the oldest men in the Conference had been most active and successful in selling books and distributing periodicals.

Columbus, Mississippi, was determined to be the place for the holding of the next session of the Mobile Conference.

Various reports were introduced, and resolutions; among them the following, to be presented to the next General Conference:

Resolved, That the General Conference be and is hereby memorialized to take into consideration the propriety of adopting the policy of conforming Conference boundaries to State lines; and if in their judgment they shall deem it best to do so that they inaugurate the policy at as early a day as practicable.

Resolved, That unless this policy shall be adopted, we protest against any change in our present boundary.

Resolved, That the delegates from this body to the General Conference be instructed to oppose all change in regard to the office of presiding elder.

THOMAS RAMSEY.

T. C. WEIR.

Resolutions of thanks were offered to the citizens of Selma for the princely way in which the Conference has been entertained. It has been our good fortune to be an inmate of the family of General J. T. Morgan during the past week, which has added one more to the many delightful Methodist homes which we have found during our pilgrimage. We shall ever remember those kindnesses, which may well claim the promise of the Saviour to all those who are mindful of the wants of his servants.

Resolved, That the preachers in charge be instructed to take up collections for defraying the expenses

of delegates to the General Conference, and to forward the said collections to the nearest delegate.

A vote of thanks to the *Schna Times* was passed, for courtesies and facilities extended to the Conference.

The Committee on Obituaries reported, and the names of the deceased came again before the Conference. At half-past one the business of the session concluded, when the Bishop stood up to read the appointments.

In his introductory remarks he avowed his conscious belief that in the fear of God he had done this delicate and difficult work. There are hard appointments; but this must be, for we must not confine ourselves to the rich districts and cities, but to the poor, thinly settled regions of the State. The system was a sublime one, in which an hundred men resigned their right to choose their field. "I believe the Methodist itinerants," said he, "to be the most noble, self-sacrificing men in the land. It is an honor to work in such a cause, such an one as angels might covet—to go forth to ameliorate society by preaching the word of God. Suffer one who has for fifty-two years followed this vocation, to say that this is the happiest employment in which a mortal can be engaged." And with many other such like words of inspiring thought the good Bishop prepared them for receiving at his hands their allotted fields for 1870. He then read out the

APPOINTMENTS.

MOBILE DISTRICT.—S. H. Cox, P. E. Franklin street, J. Bancroft; St. Francis street, A. S. Andrews; St. Paul's, J. E. Foust; City mission, to be supplied; Cottage Hill, R. Y. New; Eastern Shore, J. E. Treadwell; Whistler, J. J. Grace; Citronelle, R. S. Powers; Green mission, to be supplied; Pascagoula and Bay Shore, A. J. Coleman; West Pascagoula, U. B. Phillips; St. Stephen's, J. M. Jones, J. G. Rush, supernumerary; Suggsville, C. C. Ellis; Jackson, W. H. Morris; Coffeeville mission, to be supplied; J. Hamilton, agent for Southern University.

MERIDIAN DISTRICT.—J. T. Heard, P. E. Meridian, J. Barker; Livingston, C. D. Dubose; Belmont, John S. Evans; Gaston, S. M. Thomas; Butler, E. M. Turner; Bladon Springs, C. W. Callum; Clark and Shubuta, W. H. Leith and J. Shanks; Pierce's Springs, to be supplied; Enterprise and mission, W. Spillman; Enterprise circuit, J. C. C. Black.

MACON DISTRICT.—J. B. Stone, P. E. Macon, E. V. Levert; Summerville, J. F. Randall; DeKalb, U. F. Thompson; Marion, J. C. Brogan; Secona and Gainesville, O. P. Thomas; Brooksville, H. Ugarhart, C. P. Crimes, supernumerary; Trinity, W. Murrell; Crawford, George W. Brown; Cooksville, L. Massingale; Cuba, to be supplied by George Bancroft.

COLUMBUS DISTRICT.—T. C. Weir, P. E. Columbus, T. Y. Ramsay; Columbus circuit, G. Shaeffer; Carrollton, J. M. Gann; Gordo, T. Cameron; Oaledonia, V. O. Hawkins; Athens, J. T. M. Gregory; Yorkville, J. A. Peebles; Bexar, J. D. Bash; Yellow Creek, Nathaniel Thomas; Fayetteville, G. Hawkins; Eutaw, C. J. Nugent; Green circuit, J. M. Patton; George Shaeffer, superintendent of colored work.

JASPER DISTRICT.—J. M. Boland, P. E. Jonesboro, J. B. Powers; Warrior mission, to be supplied; Cahaba, C. L. Kirksey; Elyton and Cromwell's chapel, J. B. Anthony; Elyton circuit, T. P. Roberts; Murphree's Valley, R. W. Coons; Blinnville, J. E. Andrews; Jasper, W. E. Cameron; Fairview mission, to be supplied; Pikeville mission, to be supplied; North Port, E. Nicholson; Jones Valley colored circuit, J. G. Gurley.

TUSCALOOSA DISTRICT.—J. L. Cotton, P. E. Tuscaloosa, C. D. Oliver; Havana, W. Ira Powers; Greensboro, John S. Moore; Newberne, to be supplied; Forkland, T. A. S. Adams; Brush Creek, J. W. McCann; Morgan Springs mission, W. A. Montgomery; Maroon, John W. Rash; Summerfield, M. E. Butt; Ocmulgee mission, to be supplied; Perryville, E. D. Gale; Randolph, W. M. Wynn; Selma and Water street, E. M. Bonds.

DEMOPOLIS DISTRICT.—A. H. Mitchell, P. E. Orville, E. Phillips; Rehoboth, C. L. Farrington; Uniontown, F. T. Mangum; Hamburg and Marion Junction, J. W. Vest; Dayton, J. D. Cameron; Demopolis, A. Hood; Linden, J. C. Huckabee; Rehoboth Hills, J. M. Brown; Choctaw Corner, G. F. Ellis; Lower Peach Tree, J. F. Johnson; T. O. Summers, general editor; E. Wadsworth, professor in Southern University; S. P. Richardson, agent American Bible Society.

J. A. Adams transferred to Cali-

fornia Conference, James A. Heard to Memphis Conference, W. A. Mahary to Tennessee Conference. W. H. Armstrong withdrawn. W. H. Riley and T. S. Abernathy, Jr., located.

1870.

Writing this new date—this new indicator of the march of time—brings to mind that another year has winged its returnless flight to the eternity of the past; tells us that we are standing upon the utmost verge of time's solemn shore, beyond which roll the dim, the mysterious waters of the immeasurable future. A year of time marks too considerable a portion of our brief but invaluable lives to let it pass unheeded away.

How many possibilities had the past year—how many opportunities for improvement, moral and intellectual, for usefulness, domestic and social?—possibilities and opportunities that can never more return. Like the aged and illustrious apostle to the Gentiles, we should, from the point to which we have attained, look upon the field of conflict, and determine whether we have fought the fight well or ill. Few of us, alas! we fear, can look back without misgivings and regrets. Golden opportunities came, but we delayed, and like the waters of a river, they rolled away into the ocean of the past. The good work was left undone. Regrets, like wishes, are vain; but we should at least reap wisdom from the well-ripened fields of the past, and from our failures and mistakes avoid disasters in the future. Let us all look at the possibilities and opportunities of this new-given year.

Herald of the Cross! fifty-two Sabbaths, with their rest from toil and freedom from care, are before you, when the listening throngs may hear from your lips the "glad tidings," and be pointed to the Lamb, the crucified, all-powerful savior. What prayerfulness, what studiousness and what zeal becomes you, in view of your dread responsibilities and the tremendous destiny that so soon expects your hearers! Well may you say, in the language of the greatest of preachers: "Who is sufficient for these things?" No unassisted man.

But remember your Master has said: "All power in heaven and earth is mine. Lo! I am with you always." "My grace is sufficient for thee." Go forth, then, bearing precious seeds. Cry everywhere and to all: "Behold, behold the Lamb!" Sabbath school teacher! fifty-two Sabbaths, with their chiming bells and gathering companies of "the little children," are before you. What precious opportunities are yours. You have the virgin soil in which to sow the precious seeds of truth, that may bear fruit unto holiness, that the end may be everlasting life. The fair pages of life's volume lie open to your eye. What will you indite? What lessons of truth and love? Remember, as you work, what "you have written." The impression will be as imperishable as the tablets on which you have inscribed it. It is a trembling trust. What prayerfulness for wisdom, and what study for mental food, is needful that you may lead the little ones to God's fold and to Christ's sovereign cross.

Father, mother! three hundred and sixty-five days are before you—days for holy precept and godly example, days for domestic worship with your household, when prayers for mercy by day and invocations for safety by night may make hallowed and happy your home as the house of Obed Edom, where once rested the ark and the blessing of God. Mother! three hundred and sixty-five holy twilight hours will come, in which you may gather the little ones with bowed head and folded hands at your chair-side, and teach them that grand embodiment of all sublimity and all tenderness—"Our Father." Remember, mother, that long after your gentle breast has sunk to rest in final dust, and your spirit has been homed with the good, these lessons of holiness and love shall be remembered, and follow your boy like the holy presence of a guardian angel, whether he lives in the land of his birth or roams to the Californian, Australian or Indian shores.

But we have been assuming that all the coming year shall be ours. Alas! we dare not boast ourselves of to-morrow. The coming Sabbath may be the last that shall ever smile upon us, or invite us to feast upon its holy, spiritual delights. Then let us heed the Master's solemn exhortation: "Work while it is called to-day."

Brother Christian, coasting near the eternal shore, bethink thee! this is your last year of temptation, last year of self-denial, and last year of pains and sorrow. Ere the chroniclers shall write down 1871 you shall have found anchorage in the haven of eternal repose, where winter clouds and storms shall gloom, gather and burst no more. Then take courage, and thank God that now is your salvation nearer and surer than when you first believed.

PAPER MONEY.—The government has everything its own way now in the gold room, and greenbacks have been steadily pressed up to 119½. The people at present have no right to demand specie for treasury notes, and at an auction stand no chance with the Secretary. But if he will "clear them of the law," and meet them upon the fair field of specie payment, they will show him in twenty-four hours the real worth of a currency that now lifts and falls with the surging, uneasy motion of a balloon about to be cut loose.

NEW PUBLICATIONS.

THE HEARTH AND HOME, for January 1, 1870, is on our table, with various suggestive and beautiful illustrations, and a table of contents of forty articles, embracing a wide range of subjects.

THE SOUTHERN REVIEW for January, with its grand freight: What is Moral Science? The Life of Garfield; The Legend and the Literature of the Wandering Jew; Newton's First Law of Motion; Anglo-Saxon Literature; Hugh S. Leggarre; The Cotton Interest; The Ware Theory of Physics; Scientific Ballooning; Daphnes: a Poem. We shall dwell more minutely on this number hereafter.

THE OLD GUARD FOR JANUARY.—Political principles of 1776 and 1860.

THE OLD AND NEW.—The first number of this well gotten up monthly is before us. It gives two articles which are significant: one on the National Lincoln Monument—a bronze, "seventy feet high triangular, with truncated angles, and at the base six equestrian bronze statues of the great generals," etc. The second article is an ingenious indorsing of the various dogmas of Jesuitism, very nicely put by a Roman Catholic—under the style of the Ecumenical Council. Boston: 135 Washington street.

Read the advertisement on our last page, headed "For City, Village and Country." The journal thus referred to is without doubt one of the best and cheapest in the world.

DR. DAVIS ON DEAFNESS.

Now ready, a pamphlet entitled NOTES ON DEAFNESS, by W. L. Davis, M.D. Eighth edition. Price, Forty cents. To be had of Steel & Co., 72 Camp street; Elyton, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, No. 9 Basin street. Sent post-paid on receipt of price. Direct all communications to Glass Box 399, Post Office, New Orleans.

DR. DAVIS.—Dr. D. gives his whole attention to Auricular practice.

TO CONSUMPTIVES.

The advertiser, having been restored to health in a few weeks by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption, is anxious to make known to his fellow sufferers the means of cure.

To all who desire it he will send a copy of the prescription used, free of charge, with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthma, Bronchitis, etc. The object of the advertiser in sending the prescription is to benefit the afflicted, and spread information which he conceives to be invaluable; and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blessing.

Parties wishing the prescription will please address

REV. EDWARD A. WILSON, oct6 3mP Williamsburg, Kings Co., N. Y.

TOOL CHESTS AND LATHES.—ARE ELIGIBLE, useful and instructive. Suitable for boys, amateurs and mechanics. Illustrated catalogue free. Address

GEORGE PAIR, Buffalo, New York.

NEW ADVERTISEMENTS.

STONEMAN INSTITUTE.

Located 13 Miles North of Selma, Ala.

After a week's recess for Christmas the exercises of this school for boys will be resumed on MONDAY, JANUARY 5, 1870.

It affords the Principal peculiar pleasure to announce three facts:

1. He has engaged the services of that thorough teacher and master of his art, with ten years' experience as an instructor, Mr. JOSEPH J. WILLIAMS, to assist him in imparting to his pupils a perfect knowledge of all the Mathematics usually taught, including Book-keeping and Field Surveying.

2. He has on hand at the Institute, and has had since October last, the manifest and most substantial boys that for two years have been under his instruction.

3. Three of his pupils of 1868 have taken premiums this year in three different Universities—the first in the South—a fact furnishing the highest possible endorsement of his ability and skill.

Two features of this School distinguish it from most others: Its teachers are on the ground all the time, and actually give instruction nine hours per day; and each instructor is limited to twenty pupils.

The habits and morals of its inmates are carefully cared for, being treated as gentlemen, and all being required to act as gentlemen, the honor of young men being constantly cultivated in all particulars. And to aid in establishing these results, the Bible is reverenced as authority, its truths being studied and taught in uniform lessons each Sabbath, with ministerial services regularly performed; and the feeling of home is infused into the mind and heart of every student.

Larges from January to July 1, 1870, for board and tuition, with \$1.75, paid on entering, or in a thirty days' acceptance of the school, with \$10 on delivery of books. Payments may be made to W. S. KNUX, Selma, Alabama, or Foster & Gardner, Mobile, Alabama.

The elementary parts of education, even in writing, spelling and reading, which are taught to all—this School does comparison and invites scrutiny. Thoroughness in every department is the basis of progress.

Location of the Institute is in the quiet country, and is distinguished for its healthfulness. There no clear shops or liquor saloons distract the minds or corrupt the morals of the students. This gives its pupils great advantages in learning books and acquiring habits of close thinking. Its patrons are invited to visit, and see for themselves the admirable daily schedule of duties and to be executed by both teachers and pupils.

As the number of students will be limited, those intending to send will please at once address the undersigned.

D. C. B. CONSERVATIVE, President.

THE MASON & HAMLIN

CABINET ORGANS ARE THE BEST. As proved by the ALMOST UNIVERSAL PREFERENCE of musicians, the uniform award to them of highest premiums at Industrial Exhibitions, including the Paris Exposition, and a claim to the public, pledging to that public to give his constant and undivided attention to the interests of his charge.

The great demand for these celebrated instruments has enabled their manufacturers to so greatly increase their facilities for manufacture that they now offer them at prices of inferior work. Price Five Organs, with Five Stops, Tremulant and Knee Swell, and the Mason & Hamlin Improvements, found in all the organs, \$125. Other styles in proportion.

A Testimony Circular, with the testimony in full to the superiority of these Organs, from a majority of the most eminent musicians of the country and many in Europe; also an illustrated and Descriptive Circular, with correct drawings, descriptions and prices, will be sent free of all expense to every applicant. Any one having any idea of buying an instrument of any kind should at least send for these circulars, which will cost him nothing, and contain much useful information. Address

AMBIGUOUS—HOW OFTEN WE HEAR this expression from persons availing themselves of Patent Medicines, and in cases out of ten they may be right. It is over twenty-two years since I introduced Dr. Tobias' Venetian Linctus to the public. I had cause to advertise it, so I left it for sale with a few druggists and stockholders through a small section of the country, many of whom with great reluctance, but I told them to let any one have it, and if it did not do all I stated on my pamphlet, no one need pay for it. In some stores two or three bottles were taken on trial by persons present. I was, by many, thought crazy, and that would be the last they would see of me. But I knew my medicine was no humbug. In about two months I began to receive orders for more. Linctus, some calling it a receipt, when I left it at their store. Now my sales are millions of bottles yearly, and all for cash. I warrant it superior to any other medicine for the cure of Croup, Diarrhea, Dysentery, Colic, Cholera, and all such diseases, as an internal remedy. It is perfectly harmless, and takes internally—see each accompanying card bottle—and externally for Chronic Rheumatism, Headache, Mumps, Frosted Feet, Brui- ses, Sprains, Old Sores, Swellings, Sore Throat, etc.

Price, fifty cents. Sold by the Druggists, Depot, 10 Park Place, N. Y.

ONE DOSE OF DR. SHALENEBERGER'S

FEVER AND AGUE ANTIDOTE

ALWAYS STOPS THE CHILLS.

This medicine has been before the public fifteen years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and is the only medicine that will

Care immediately and Permanently every form of Fever and Ague, because it is a perfect Antidote to Malaria.

Sold by all Druggists.

LOVE FOR JESUS.

A group of dear children, one warm summer day,
Were seated most cozily, chatting away,
Beneath the cool shade of the evergreen trees,
Whose branches were waving with every breeze.

They talked of their dollies, with rare, pretty names,
Their schools and their lessons, their plays
and their games;
And the dear little creatures "built castles in air,"
And their dreams of the future were lovely and fair.

Strange questions were started, and answered as well;
But the strangest of all—just hear while I tell;
Said Willy: "If Jesus were here, and should say,
'Just ask what you will, you shall have it straightway.'"

"Pray what would you ask?" and he called name by name.
And the answers each cheerfully, readily came;
All child-like in nature—some simple, some wise,
Some looking a smile, and yet others surprise.

I said all replied. There was one modest child,
Whose voice was last heard—so sweet and so mild;
Dear Mary! her answer, so unlike the rest,
Was an outburst of love to the Friend she loved best.

She said: "I would ask Him for nothing at all,
But tell him my love, as before him I'd fall;
I could think of nothing else but the love that I owe—
From the first to the last, nothing else could I know."

"For hath He not given his life for the lost,
And with it given all things at marvelous cost?
Love, love for my Saviour, 'tis all I can give;
Love, love is my song, and shall be while I live."

Dear child! like the friends of the Saviour of old,
Thou hast chosen that part which is better than gold;
And O, may the lesson thy words here impart
Leave its imprint on many a young, tender heart!

—N. Y. Observer.

STORIES FOR THE YOUNG.

SCARED ALMOST TO DEATH.

"The celebrated Henry, first Viscount Melville, was on a visit to Edinburgh shortly after the passing of some unpopular public measure to which he had given his support. On the morning after his arrival he sent for a barber to shave him at his hotel. This man, a considerable humorist, resolved to let his lordship know what he thought of him as a legislator. Having decorated him with an apron, he proceeded to lather his face. Then, flourishing his razor, he said: 'We are obliged to you, my lord, for the part you lately took in the passing of that odious bill.' 'Oh! you're a politician,' said his lordship; 'I sent for a barber.'"

"I'll shave you directly," added the barber, who, after shaving one-half of the beard, next came to the throat, across which he rapidly drew the back of his instrument, saying: 'Take that, you traitor.' He then hastily withdrew. Lord Melville, who conceived that his throat had been cut from ear to ear, placed the apron about his neck, and with a gurgling noise shouted 'murder.' The water immediately appeared, and, at his lordship's entreaty, rushed out to procure a surgeon. Three of them soon came; but his lordship could scarcely be persuaded to expose his throat, around which he firmly held the barber's apron. At length he consented to an examination; but he could only be convinced by looking into a mirror that his throat had been untouched. His lordship was vexed by the merit which the occurrence excited, and speedily returned to London. That was rather hard on his lordship."

"Imagination is sometimes as terrible as reality, as far as the feelings are concerned," says Mr. Civil.

THE WOUNDED WOODMAN.

"I once heard of a man who was out in the woods cutting down trees, when his ax slipped and cut his foot open. He instantly fell to the ground, and on looking at his foot, which by this time pained him very much, he saw the boot gashed open, and through the opening a blood-red substance which he took to be a severe wound in his foot. He dragged himself as well as he could to his sled and started the oxen, and slowly went home. When he reached there he shouted for help; and as soon as his wife dragged him into the house he nearly fainted. He told her he had cut a great gash in his foot, and she must hurry and bind it up or he should bleed to death."

"She began to get his foot off carefully, and then suddenly burst into a loud laugh. The man's foot was not hurt in the least, only slightly bruised by the ax; but the skin was not broken, and not a drop of blood had come out. What he

had taken for the bloody gash was a piece of red flannel which he had wrapped around his stocking that morning to help keep his feet warm. Of course he didn't faint when he found this out."

"We should think not; there was nothing to faint about. What's that, Dr. Beetle?"

"Let me tell you about a man who was really wounded, and also about one of his best friends."

"FAST FRIENDS."

"One of the most pleasing stories of the affection shown by a dog took place not many years ago. An Austrian officer was seen driven through Vienna with a dog lying on his breast. Though the officer was brave and fearless, he seemed very anxious to live a little longer, and this rather surprised his friends. But twice the dog now with him had saved his life, and he wished to do all he could for his faithful friend. In the last European war, which caused so much sorrow, this officer had been wounded, but his own regiment could give no further tidings of him. His groom thought perhaps if he took his dog to the battle-field he might discover his master. He did so, and after a long search the dog set up a piteous cry. Under a heap of dead the faithful creature had found him. He was indeed badly wounded, but not dead; and with careful nursing he at length recovered, and loved his dog more than ever. Seven years passed away, when once more the same thing occurred. The captain's brother officers, having heard what had happened once, thought they would try it again. They did so, and with the like result; and the captain was anxious to live a 'little longer' that he might make a will, in which he left a legacy to a certain relative, on condition that he would take charge of his best friend, his little dog. Having done this, the gallant officer exclaimed: 'Now, if it be God's will, I am content to die!' I hope all the boys and girls who hear this will try to be as grateful as this Austrian was."

That was certainly grateful and right in the Austrian officer. We wonder if he knew anything about a friend who once died for him—whose blood was shed that he might be saved? This is the best friend of the world. He was wounded for us, and we ought to love him.—*New York Methodist.*

Scientific.

STEAM PLOWING IN AMERICA.

The time is coming when in many portions of the United States the steam plow will be permanently adopted. If, in a country of small farms like England, it can be made so useful as to render profitable lands which, without it, can only be worked at a loss, how much wider is its scope on our broad plantations, wide prairies and river bottoms which are devoted to grain production.

The period is ripe for the introduction of a Yankee steam plow. Some inventors in this field have had the misfortune to live some years too early. But the inventive genius of the country is now fairly turned to the solution of the problem, and the steam plow of the time to come is now imperatively demanded.

In aiming at the production of a good steam plow, we think inventors have confined their efforts too closely to the imitation of the work of the common plow. Is it not quite possible that some other method of loosening the earth may be found to answer all the purposes of the furrow, without rendering large tractive power necessary?

The early and still favorite method with gardeners is forking or spading up the ground, and there can be no doubt that in this way the soil is better prepared for the reception of seed than by the use of the plow.

No mowing machine inventor has ever succeeded in applying other than human strength to the working of swinging blades or scythes, though many have sought to do so. It was not till the shearing principle, as used in the common cutter bar, was adopted that mowing machines found an abiding place.

But it may be objected that in plowing green sward it is essential to not break the earth to pieces but to turn it over neatly, grass side down, so that the vitality of the grass roots may be destroyed and the turf may rot. We do not think the continuous furrow the only means whereby this may be accomplished, and we believe the plowing machine of the future will demonstrate the truth of our views.

A new locomotive plowing machine, capable of drawing a gang of plows through a stiff soil, was recently tried at Rochester, it is said, with highly satisfactory results. The locomotive weighs scarcely more than two tons, but its tractive power is gained by a series of out-thrusting flukes in the traction wheels, which penetrate the earth, and are withdrawn by machinery inside as the wheels revolve. By this means

the flukes only project from the wheels as they approach the earth on the under side of the wheel. There are springs attached to the flukes to relieve them when they come into contact with stones or other impenetrable substances. The plows are attached to this traction engine by chains, and at the trial three plows, each held in the usual manner by an attendant, were drawn in this way through a stubborn soil.

So much for the Rochester machine.

From New Albany, Indiana, we learn of a new steam plow, the invention of a citizen of that place, and which is described at length in the *Daily Ledger*: "The framework, in fact the entire machine, is of pipes. The driving wheels are geared positively, and are driven by vertical cylinders, the pistons of which are attached by an irregular eccentric motion, direct from the engine. In addition to this motion eight toggle joints joining levers, which simulate the motion of a horse's leg, assist the driving wheels when they fail in their traction."

The description given in the *Daily Ledger* is not so clear as to give a very distinct idea of this plow; but we gather that the plows proper are attached to beams, which are raised or lowered at will, and move along with the traction engine.

A California inventor has also recently taken out a patent for a steam plow, the general principle of which, like those described, is the drawing of plows by a traction engine. We are not aware that the English method of drawing gangs of plows across fields by a wire rope and drum finds much favor with American mechanics; but if plows must be drawn through the earth after the old fashion, it seems a more economical plan than the use of traction engines for that purpose.—*Scientific American.*

ANIMAL MECHANISM.—Students of natural history have a perpetual feast in the contemplation of the economy they discover in the structure and lodgment of the various organs which give perfection to the body. The packing of the liver, to have it occupy least room, but, above all, the manner of stowing the brain so as to have it exactly fill the skull, excites the highest admiration of those most familiar with this system of economizing room in nature's handicraft. The human brain, for example, is supposed to be made up of distinct cords, lying side by side, too numerous and too delicately small to ever be clearly displayed, but rolled up in balls, under the name of ganglia, lobes and hemispheres, occupying the least possible space consistent with their appropriate functions. If each cord were carried out in a straight line they might be from fifty to a hundred feet in length! There is one important characteristic gland in a man which is scarcely larger than a nutmeg, wholly made up of parallel tubes exceeding thirty feet in length. In the nasal cavities of carnivorous animals, which hunt their prey by the sense of smell, the olfactory nerves, occupying apartments hardly the size of the little finger, if they could be unrolled and unfolded would present a broad sheet of nervous surface several feet square. These are but a few examples of the curious arrangements discoverable in animal organization, where important and complicated machinery is put into the smallest imaginable space, so as to insure compactness, security and symmetry by economy in packing. Birds present very marked examples of this kind of animal perfection, but especially in an additional contrivance by which the weight of their bodies when at rest acts upon a compound lever, the arrangement of their legs being such that their toes cling to a limb while they are unconscious or asleep. *Harper's Weekly.*

IMMIGRATION STATISTICS.—The following report of passengers arriving in the United States from foreign countries, for the quarter ending September 30, has been received from all the customs districts. The total arrivals were 116,371 persons, of whom 101,342 were permanent emigrants, 11,900 citizens of the United States returning from abroad, and 3,039 foreigners not intending to remain. Of the immigrants 60,959 were males, 40,383 females; 23,291 were under fifteen years of age, 65,070 between fifteen and forty, 12,881 upwards of forty; 70,986 arrived at the port of New York, 10,621 at Port Huron, 10,238 at Boston, 5,392 at San Francisco, 1,441 at Detroit.

The remaining arrivals were at Philadelphia, Portland, New Orleans and Key West. As usual of late the German element predominates, although the immigrants from the Scandinavian countries are increasing. The Chinese arriving at San Francisco numbered 5,104, showing a slight decrease from last quarter. Rather a larger portion than usual of the immigrants is made up of professional men, tradesmen and skilled mechanics.

Glass windows were first used for lights in 1180.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also the extra height of the Oven under the fire chamber, the Patent Air Emulated Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

the Extended Back with cast Iron Enamelled Reservoir and Exhaust. The Venting Closet, Griddle Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as is the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by
G. W. W. GOODWYN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove FOR BITUMINOUS COAL OR COKE ever invented. In the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care. Oven Doors lined with tin, and furnished with William Rosser's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,

62 Camp street,

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Fowler Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

is made of a superior quality of iron, very heavy, of neat design, and the best finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABIE & DALTON,

No. 115 Poydras street.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements, and so far as been invented. Has a new arrangement for boiling; also an ash-pan. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charter Oak, True Kentucky Mail, of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPMAN,

no 13 6m 133 Poydras st., New Orleans.

THE CHARTER OAK COOKING STOVE.

From and after this date I shall keep a full stock of the celebrated

CHARTER OAK COOKING STOVES,

so universally approved by all housekeepers, and by special arrangement will be able to fill all orders as low as they can be had.

Orders for this celebrated Cooking Stove solicited, and satisfaction guaranteed.

J. BONTEMPS.

DYER AND SCOURER,

182..... POYDRAS STREET..... 182

Between Carondelet and Baronne streets.

(Formerly of Bourbon street for a great number of years.)

Mr. J. Bontemps informs his friends and the public in general that he has re-established himself in the business of Dyeing and Cleaning business at

The Christian Advocate.

SATURDAY, JANUARY 1, 1870.

When Mr. Thomas Jefferson was President of the United States he received a present of wine from the Spanish ambassador at Washington. Jefferson thought him that the ambassador had introduced this wine free of duty, as was his privilege, and that he (Jefferson) had no such privilege, and no right to drink imported wine without paying duty thereon according to law. So he addressed to the collector at Philadelphia a letter, which we print from the original, verbatim, as follows:

"WASHINGTON, Feb. 6, 1803.—Dear Sir: Monsr. d'Artois, the Spanish minister here, has been so kind as to spare me two hundred bottles of champagne, part of a large parcel imported for his own use, and consequently privileged from duty, but it would be improper for me to take the benefit of that. I must therefore ask the favor of you to take the proper measures for paying the duty, for which purpose I inclose you a bank check for \$22 50, the amount of it. If it could be done without mentioning my name it would avoid ill-intended observations, as in some such way as this, 'by duty paid on a part of such a parcel of wines not entitled to privilege,' or in any other way you please. The wine was imported into Philadelphia, probably about midsummer last. Accept assurances of my great esteem and respect.

TH. JEFFERSON.

To General Muhlenberg.

Will the gentlemen who serve the United States at home and abroad "read, mark and inwardly digest" the above letter? Those who do so may possibly learn why Mr. Jefferson was the most popular and powerful statesman this country has ever known.—*New York Tribune.*

The Ecumenical Council.—Much opposition is expected when the council resumes its sittings. This opposition is no longer a mere rumor; it is a fact. France has taken decided ground; and the example of France is approved and adopted by all the Catholic governments. The French government has notified the council that the declaration of the infallibility of the Pope is religiously inopportune, that politically it nullifies the Concordat and releases France from her obligations to the Holy See. This is a heavy blow. This, however, is not all. The majority of the French Bishops are opposed to the infallibility dogma. So, it is certain, are all the liberal Bishops of Germany. We do not wonder that it has been found necessary to adjourn the council. The Pope, it is said, is somewhat alarmed; but he counts with confidence on the support of the American Bishops. When we remember that the Council of Trent sat at irregular intervals, from 1545 to 1563, a period of eighteen years, and during which the chair of St. Peter had five successive occupants—Pius the Third, Julius the Third, Marcellus the Second, Paul the Fourth and Pius the Fourth—we cannot help attaching some importance to this first adjournment. The end of the council may be near; but it may be afar off; and no one can foresee its history.—*New York Herald.*

An Esolan paper says that the Jews have at length, after much negotiation with the Russian government, obtained permission to erect a synagogue in St. Petersburg. This will be the first building of the kind that has ever existed in Russia. Hitherto the Jews have legally had no right to reside in the empire, and were consequently obliged to account for their presence under various pretexts, for the admission of which by the authorities they had to pay large sums. M. Galkin, the governor of Esthonia, has ordered all the German officials in that province who are Protestants to go on holidays to the Russian Church, in order to listen to the Russian hymn, "God save the Czar." The officials protested against this order, on the ground that they have hitherto always prayed for the Emperor in their own churches, and that they cannot conscientiously attend the services of another religion. The governor, however, remained obdurate, and the officials have now appealed to St. Petersburg.

SCARLET FEVER.—Dr. Charles T. Thompson reports in the *Lancet* his method of treating scarlet fever. In the early stage of the disease the patient is immersed in a warm bath, and this repeated frequently, as often as the strength of the patient will allow. This has at first a soothing effect, but is followed soon after by such an eruption—upon the surface—of so vivid a color, as greatly to astonish those who have never seen it before. After the first or second bath the appetite begins to return, and nutritious food is given. Dr. Thompson states that he has used this treatment now for fifteen years, and has not lost a single patient by scarlet fever.

MEDICINE—MEDICINE.

BRAN NEW LETTERS!

FRESH TESTIMONIALS!

DARBY'S PROPRIETARY FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 28, 1869.

Messrs. J. DARTY & CO., 161 WILLIAM ST., N. Y.—Gents: Yours of the 23d is before me, and has attention. It gives me pleasure to say that my belief is that your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted to a skeleton by the effects of teething, and an affection of the bowels therewith. I had never seen any one reduced so low to recover.

Physic had been tried in vain, until the physicians stated it was useless. A friend recommended your Fluid, or Ozone, which he stated was one of the component parts of it. I did so, and the effect was like magic, plainly discernible in one hour in its good effects, producing quiet and sleep almost at once, where irritation and sleepless restlessness had previously possessed the child to nearly entire exhaustion.

I at first administered it in a small way, two and three drops in a spoonful of water, and increased it to six and ten drops. It completely checked the bowels, and had the happiest effect, the child rapidly recovering.

I have tried your Fluid on animals, with the same effect—both horses and cows—mingling more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Chronic Diarrhea, or any violent affection of the bowels.

I would not be without it in my family under any consideration. Yours truly,

WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Somerville, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Palmer, of the Methodist Episcopal Church South:

190 Broadway, N. Y., July 29, 1869.

Messrs. J. DARTY & CO., 161 WILLIAM ST., N. Y.—Gents: About the 10th of June last one of my children was taken with Scarlet Fever, in that malignant form, and as soon as I could I procured your valuable Disinfectant, Darby's Proprietary Fluid. Although it was several days after the appearance of the disease before I began using the Fluid, still by a free use of it the disease was not only confined to the one case, but the malignity of that case somewhat mitigated.

During the use of the Fluid as a disinfectant in my family it was also tried in a case of headache and one of toothache, the results in each case being instantaneous relief. It was afterward tried in a case of Erysipelas, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Erysipelas in question, being located in the feet, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, to the utter discomfort of said corn, for upon subsequent examination it had disappeared, and though it was sought for diligently, it could not be found.

I hand you this, hoping it may be the means of inducing others of earth's poor sufferers to test for themselves as I did, the great merits of this great remedy.

Very respectfully yours,

FRANK SAUNDERS.

Never was a medicine so universally esteemed and extolled. It never fails. It may be depended on.

1870. "THE RIVERSIDE." 1870.

THE MOST DELIGHTFUL OF ALL MAGAZINES for Young People. Crowded with entertaining and instructive reading matter. Illustrated in the finest manner by our first artists. At the head of its contributors is HANS ANDERSEN, the most eminent living writer for the young. Jacob Abbott, Paul H. Hayne, Porter Crayon, and a host of witty and sensible writers, contribute to the magazine. It is not too young for the old nor too old for the young. For every new name, with \$2 50, which a subscriber sends, the publisher will send \$1 worth in books from a list of \$200 worth published by them. A capital chance to lay in reading for the long evenings, and to procure valuable books to give away for holiday presents. The magazine is for nothing. Any boy or girl who will send the names of four subscribers, with \$10, shall receive a copy for one year free.

HURD & HOUGHTON, Publishers,

439 Broome street, New York.

Published monthly. Single numbers, twenty-five cents. Regular subscription, \$2 50 per year. To teachers and clergymen, \$2. Specimen copies, twenty cents. Catalogues and prospectuses free. do14 4m

THE MAGIC COMB WILL CHANGE ANY colored hair or beard to a permanent Black or Brown. One Comb sent by mail for \$1. For sale by merchants and druggists generally. Address

KNIT-KNIT-KNIT-AGENTS WANTED everywhere to sell the American Knitting Machine, the only practical Family Knitting Machine ever invented. Price, \$25. Will knit twenty thousand stitches per minute. Address AMERICAN KNITTING MACHINE CO., Boston, Mass., or St. Louis, Mo. del1 4m

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. H. Walker, of New Orleans, has charge of the Mathematical department. Terms—Ten to twenty per cent. less than other colleges in this city.

A liberal education made when three or more attend together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN,

sell ly

New Orleans.

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

5. Fine Scientific apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has shown less animation since our last issue, the demand from country merchants having fallen off, and business in most branches of the wholesale trade being restricted accordingly. The demand for the higher grades of sugar has continued brisk, but the poorer qualities have been rather neglected, and molasses has been active, the receipts meeting a ready sale at fuller prices. The movement in Western produce has been mostly confined to the local trade.

The accounts from the country present no new feature. The rise in the tributarities has at last enabled us to show a trifling excess in our receipts proper over last year, but it is by no means settled that we shall not be disappointed in our anticipations of an increase of 100,000 bales. Nothing has transpired to indicate that the sugar crop will exceed 80,000 hogsheds.

The river has risen since our last, and is now seven feet four inches below high water mark.

COTTON.—The following are the arrivals since the twenty-fourth instant:

Louisiana and Mississippi..... 19066

Arkansas..... 3202

Lake..... 281

Mobile..... 227

Texas..... 192

Total..... 22968

On Saturday, all the banks and public offices being closed, and business generally suspended, most factors covered their samples, but a few buyers, nevertheless, came forward and took 1,500 bales at full prices, low middling commanding 23½ to 23¾, and strict 23½. On Monday, the weather and holiday having delayed sampling, the supply was only moderate, and factors raised their pretensions, but the demand being lively 4,500 bales changed hands, mostly on the basis of 23½ to 23¾, for low middling, and 23½ to 23¾, for strict, showing a net advance on Tuesday's rates of ½ to ¾. On Tuesday the market opened under the depressing influence of discouraging telegrams from Liverpool, but the demand being fair a moderate business was done during the morning, part at previous rates and part at a decline of ¼, after which, foreign exchange giving way ½ to ¾ per cent, factors met the demand more freely, but without imparting much spirit to the movement, and the entire sales were confined to 3,500 bales, the closing rates showing a falling off of ¼ in low middling and middling, and ½ to ¾ in the lower qualities. The recent receipts have included a considerable quantity of low ordinary and ordinary, which have sold at a considerable range, according to quality.

This makes an aggregate for the past three days of 9,500 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 424,782 bales, against 419,958 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 109,362 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 129,805 bales to Great Britain, 20,535 to other foreign ports, while to France there is a decrease of 3,235 bales.

Referring to our remarks above, we quote as follows:

Ordinary..... 21½ to 22½
Good ordinary..... 22½ to 23
Low middling..... 23½ to 24
Middling..... 24 to 24½
Strict middling..... 24½ to 25

MOLASSES.—The demand has again continued active, with prices well sustained since our last review.

WHEAT.—There is a stock on hand here of about 256,000 bushels. Some supplies are offered at \$1.05 per bushel for No. 2 and No. 1 spring, in the barges.

MONEY.—Gold opened on Tuesday at 120½ to 120¾, (against 120¼ at New York), and closed at 120½ to 120¾, (against 120 at New York).

No sales of silver have been reported excepting \$1,200 in American half dollars on Tuesday at 119½, and \$500 at 120.

We have very little movement to notice in stocks, the only sales reported being 5 shares New Orleans City Railroad on Monday at \$165, and 15 shares Southern Bank at \$87.50.

Special Notices.

The Publishing Committee of the New Orleans Christian Advocate.

This committee has not been called together since the meeting of the General Conference, because in the financial state of the office there was nothing it could do. To be able to support an editor was one of the conditions necessary to the electing one. Then the expenses of such a committee should be borne by the office—another question of finance. These are simply the reasons why this call has not been made yearly. There was really nothing to do, or that could be done by the committee. As the Advocate feels somewhat like standing on its legs, or at least like stretching them in a preparatory way, we give notice that there will be a meeting of the Publishing Committee directly after the patronizing Conferences shall have all adjourned—say on the second Saturday in February next.

To the Members of the Mississippi Conference.

DEAR BROTHERS: Your committee has decided to publish the Minutes in Jackson. It is just as cheap and more convenient. The work will go forward at once. One thousand copies are to be published for \$100. Only \$80 have as yet been paid in. Please send your orders and the money immediately to me, at Jackson, Mississippi, at the rate of ten cents per copy, stating how and where you want them sent. If they are to go by mail, allow something for postage.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XV.

NEW ORLEANS, SATURDAY, JANUARY 8, 1870.

NO. 51.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Jan. 2.—Boutwell sells one million gold and purchases one million bonds on alternate weeks during January, on account of the sinking fund; also sells one million gold and purchases two million bonds on alternate weeks, and alternating with sales and purchases on account of the sinking fund, for the special fund. Result for the money sold and bonds purchased, \$1,000,000. The purchase of six million bonds, on both accounts. The Treasury will also anticipate interest on coupons payable in sixty days from presentation upon rebate at six per cent.

A tremendous gale of wind has been blowing here all day.

WASHINGTON, Jan. 4.—The following dispatch has been received:

HEADQUARTERS, AUSTIN, TEXAS, January 3, 1870—7.40 P. M.

To General F. T. Dent, Secretary to the President.

All the counties in the State have been heard from officially, except four, and those heard from unofficially, but reliable. Davis' majority in the whole State is seven hundred and seventy-five. An official report through the adjutant general, for the President, will be sent as soon as those four counties are made official.

J. J. REYNOLDS.

MEMPHIS, Jan. 4.—The Mississippi, with the cargo of Chinese laborers, arrived this morning; she departs this evening. She added two hundred tons of freight at Belmont, principally corn and flour, and she has two hundred horses and mules, two hundred hogs, three thousand barrels of flour, and seven hundred barrels of pork for New Orleans.

Her Chinese passengers are here, as well as at points above, the great attraction. Over one thousand persons visited her this morning to get a glimpse of the Celestials, who are safely stowed away aft, not wishing to be observed. The levee in front of the steamer is crowded with negroes, who, for some unknown reason, have formed a great dislike to the Mongolians, and are open in their threats to demolish any of the usurpers who step upon shore.

No serious disturbance is anticipated, but to preserve order and facilitate loading and discharging the Mississippi's freight, an extra police force has been placed on the boat and levee.

WASHINGTON, Jan. 5.—By a general order (No. 1) just issued from the adjutant general's office, the President directs that so much of general order No. 103, dated Headquarters of the Third Military District, Atlanta, July 22, 1868, and so much of general order No. 55, dated Headquarters of the Army, July 28, 1868, as refer to the State of Georgia, are hereby countermanded, and General Terry is ordered to exercise, until further orders, within that State, the powers of a commander of a military district, as provided by the act of March 2, 1869, under his assignment by general orders No. 83, dated Washington, December 24, 1869.

HARRISBURG, PA., Jan. 5.—Governor Geary, in his message to the Legislature, favors the recognition of Cuba, and says it geographically belongs to the United States. He advocates the expansion of the currency by the establishment of new national banks.

NEW YORK, Jan. 5.—The cotton market continues firm. Low middling is quoted at 25½c, holders being confident.

The report of Mr. D. A. Wells, special commissioner of the revenue, delivered to Congress on Monday, is able and exhaustive but gloomy document. He reviews the condition of the finances of the country at great length, and tells a checked tale of good and ill. The progress of the country, the commissioner says, "is undiminished, the revenue exceeds the expenditure by nearly \$50,000,000, immigration is constantly increasing, the crops have been above the average, and we have paid nearly \$88,000,000 of the debt during the past year alone, or over \$300,000,000 since September, 1865. Besides this, taxes which would have yielded \$200,000,000 have been remitted. The Southern States have made immense strides toward recovery from the effects of the late war—a war which, the commissioner estimates, cost the country nine thousand millions of dollars—three times as much as the slave property of the country was ever worth." But the balance sheet has two sides. Our prosperity is not so great as it appears to be on the surface. If we annually increase in wealth

it is rather by reason of our great national resources than from the intelligent direction through legislation of our national economy, and our rulers hinder us from reaping the full extent of our national advantages. Large numbers of our countrymen have abandoned those pursuits which are chiefly productive of national wealth, and sought employment in commercial and speculative channels. A spirit of discontent with their condition and prospects has seized artisans and laborers. Mr. Wells' explanation of this unwelcome phenomenon is that "a vicious currency and unequal taxation" have debilitated the energies of the working classes. In both agriculture and trade we appear to be getting worse off instead of better. Our manufacturers cannot compete successfully with other nations. The price of labor is so high that they are like men contending in a struggle with their hands tied behind them. The export of manufactured cotton, for instance, instead of increasing, steadily diminishes. Add to this the fact that the accumulation of new capital in the country is comparatively slow, and that our foreign indebtedness reaches the amount of \$1,465,500,000, Mr. Wells urges the policy of reducing taxes rather than applying the surplus to the liquidation of the debt. He is also in favor of retaining the income tax at three per cent. He is of opinion that out of the two thousand articles now taxed, at least one-third might be placed upon the free list without materially diminishing the revenues. The report is viewed with disfavor by the Radical press and the advocates of a stringent protective tariff, but meets the qualified approbation of Democratic journals.

FOREIGN.

HAVANA, Jan. 2.—Intense excitement prevails here in consequence of an announcement in Havana journals, this evening, that the revolution has terminated.—According to published statement, editors of journals here have seen a copy of circular, signed by members of the Cuban Junta in New York, ordering insurgents to lay down their arms for the present, giving as a reason for the abandonment of the insurrection the failure of a recent filibustering expedition, and inability of the Junta to send more men, and further disheartening action of the American government in permitting gunboats to sail from New York. The circular severely attacks the course of Grant. The Junta advises Cubans to submit to the Spaniards, in order to save further bloodshed.

ROME, Jan. 3.—The efforts to improve the acoustic properties of St. Peter's is failing. The council hereafter meets in Quirinal.

PARIS, Jan. 3.—Olivier's combination is entirely breaking up. It is reasserted that Dorn and Buffet, of the left, and Talhonet and Segris, of the right center, will be called to the cabinet.

LONDON, Jan. 3.—The Times, discussing the demise of the London Star and Morning Herald, asserts that party organs are now obsolete.

ROME, Jan. 3.—The *Cavilla Catholica* published a long article on the relations of the different nations of the world to the council now in session in this city. It is stated that the different governments generally have neither favored nor hindered the meeting of the council, except Russia's schismatic, which was prevented by the Bishop of Poland, who was not killed or exiled to Siberia, but was kept from being present to relate the misfortunes of that martyred country. The only one nation is France, who has given a proof of her solicitude in keeping a garrison here to protect the tranquillity of the council.

MADRID, Jan. 4.—There have been several important conferences lately between Prim and Olazaga. It is rumored that ministerial changes are likely to result therefrom, and to have in view a prolongation of the provisional government.

PARIS, Jan. 4.—The Emperor, in reply to the usual addresses of the Corps Legislatif, addressed himself to the president of that body in the following language: "The assurances of devotion which you address to me, in the name of the Corps Legislatif, render me most happy. Never has our good understanding been more necessary than at the present time, as new circumstances have augmented your prerogatives without diminishing the authority given me by the nation, and in sharing the responsibility with the great bodies of the State, I feel more con-

fident of overcoming all difficulties in the future.

"When a traveler has gone a long journey and lays aside a portion of his burthen, he is not weakened, but gains new strength to continue his march subsequently."

In reply to the address of the Archbishop of Paris, the Emperor replied: "I accept with much gratitude the good wishes of the clergy of Paris, and receive in return my felicitations upon the zeal you have shown in promulgating among the masses the doctrines of abnegation and charity."

MADRID, Jan. 5.—It is rumored that the Regent Serrano will be invested with supreme power, but it is said the Cortes hesitate to adopt such extreme measures.

LONDON, Jan. 5.—The Times, in an editorial on the Spanish crisis, deplores the downfall of Prim, and attributes the disaster to the unreasonable prolongation of the provisional regime.

A SCENE FROM THE PROCEEDINGS OF THE CONGRESS LEGISLATIF.—President M. Rochefort has the floor. (Sensation.)

Voices on the extreme right—*La clôture! La clôture!* (Close the debate.)

Eugene Pelletan—Silence! silence! Are you afraid of the member from the first district of Paris?

A member of the right—We despise him, and—

Pelletan—Everybody ought to despise you!

Cries—Order! order!

President—All this is out of order. M. Rochefort has the floor. (He rings the bell.)

Rochefort (ascending the tribune)—Gentlemen, why would you try to choke me down? I have listened patiently to tirades from your side which would be tiresome, if they were not insincere. (Loud interruptions.)

Granier de Cassagnac (ironically)—You are sincere, are you not? What of the oath you took?

Rochefort (laughing)—I never was a police spy.

Granier—Nor I either.

Voices—*Si! Si! (Yes! Yes!)*

President—I shall call to order the first member that interrupts again.

Granier—Mr. President—

President—Sit down, sir, let M. Rochefort speak. You can reply to him afterward. M. Rochefort, proceed.

Rochefort—I beg the chamber to take notice that whenever I want to speak, systematic efforts are made to drown my voice. Men who come here solely owing to the influence which the government has exercised in their behalf, would do well to respect the rights of real representatives of the people a little more. (Cheers on the left, and laughter on the right.)

According to the *Morning Post*, Dr. Lushington's continued silence on the Byron mystery is in no respect attributable to his age or state of health, his intellect being remarkably clear and vigorous for his age; nor does he shun allusions to the topic, although he declines to state whether Lady Byron did or did not make the specific charge in question.

A second edition of the *Quarterly Review* contains a postscript avouching the genuineness of the letters from Lady Byron to Mrs. Leigh, published in the current number of that review, and adding on authority that the charge now published by Mrs. H. B. Stowe was distinctly disclaimed by Mr. Wilmot Horton, on behalf of Lady Byron, at the burning of Byron's autobiography.

The reviewer has no doubt Lady Byron told the story as Mrs. Stowe tells it; but she must either have been guilty of the grossest hypocrisy or have been a monomaniac.

COLONEL CARTER.—The course of Assistant Alderman Carter, one of the appointees of the Governor, in refusing to vote with his associates in favor of a manifestly irregular and illegal proposition to annul the organization of the council in reference to committees, etc., is a healthful manifestation of opposition to the system of partisan plunder which has so long prevailed in our city government. The accession of so intelligent and capable a gentleman as Colonel Carter to a seat in the council is an event which gives promise of an improved intelligence and spirit in the legislative department of the city government. —*New Orleans Times*.

The Bible is a matchless volume; it is impossible for us to study it too much, or esteem it too highly.

Minutes of the Montgomery Conference.

Mr. Editor: The Montgomery Annual Conference convened in Union Springs, Alabama, December 8, and adjourned at eleven o'clock on Tuesday night, December 14. Bishop Paine presided.

The following resolution was adopted in reference to the publication of the minutes:

Resolved, That for the purpose of defraying the expenses connected with the publication of the minutes of this Conference, there shall be in future an advertising department connected therewith.

To carry into effect the above resolution the following committee of nine was appointed to procure advertisements:

J. R. Rogers, Union Springs, Alabama; M. B. Locke, Union Springs, Alabama; W. S. Baker, Mobile, Alabama; W. F. Joseph, Montgomery, Alabama; J. B. Gorde, Montgomery, Alabama; J. H. Swearingen, Opelika, Alabama; William Lowther, Columbus, Georgia; W. W. Wilkinson, Greenville, Alabama; S. H. Dent, Enfield, Alabama.

There will be four thousand copies published for gratuitous distribution. These will be sent to every member of the Conference, both clerical and lay, and be distributed by them.

All good business men will readily perceive what an admirable opportunity this is to advertise their business, and thus bring it prominently before an intelligent public, in a permanent form. These minutes will be read and preserved for future reference.

Send in your advertisements promptly, before the first day of February, next.

The cash must, in every instance, be paid in advance, at the following rates:

One page, 4x7 inches	\$25 00
Three-quarters of a page, 4x7 inches	20 00
One-half page, 4x7 inches	15 00
One-quarter of a page, 4x7 inches	10 00
One-eighth of a page, 4x7 inches	5 00

No advertisement will be inserted for less than \$5. We solicit advertisements from each and every State in the Union.

Persons living at a distance will please address the undersigned at Union Springs, Alabama, or any other member of the committee, if more convenient. Respectfully,

J. R. ROGERS,

Union Springs, Alabama.

N. B.—Each member of this committee is expected to make known this opportunity to the enterprising men of his acquaintance, collect the money in advance, and forward both money and advertisement to me or to John W. Mathews, secretary of the Conference, promptly.

J. R. R.

A Scotch paper offered prizes varying from £2 10s. down to a book for the best poem, the best tale, and the best letter written by a boy or girl; and it received in response four hundred and twenty of the first, one hundred and fifty-six of the second, and fifty-seven of the third. These effusions were protected from the inquisitive tendency of the Postmaster General and his subordinates by methods of security in which great ingenuity in the use of rural resources was displayed, the fastenings employed including "sealingwax, common beeswax, resin, weavers' dressing, glue, gum, tape (red, white and blue,) cords of all sizes, from common twine to cat-ropes, and brass wire."

One of the French papers tells of a novel combat between two women. Their weapons were eggs, of which they had a large number (being in a market place), and they bespattered each other about the face and neck with yolk and shell. An elegantly dressed young gentleman in the crowd that had gathered to witness the scene, making himself somewhat prominent by inappropriate mirth, the combatants turned upon him and so vigorously bombarded him with the remaining eggs that his immaculate linen after the contest proved to be in anything but an enviable condition.

There are six thousand printing houses in the United States.

TRINITY ANNUAL CONFERENCE.

We extract the subjoined items from the *Texas Christian Advocate*:

On Wednesday, at nine o'clock A. M., in the town of Paris, Lamar county, Texas, assembled the Trinity Annual Conference of the Methodist Episcopal Church South, in its third annual session. Present and presiding, Bishop William M. Wightman.

Conference opened with the usual religious services, conducted by the Bishop.

The roll being called by the secretary of the last session, thirty-five ministers and eleven lay members answered.

John P. Stanfield, transferred from the Northwest Conference, came, and was introduced to the Conference.

The transfer of D. M. Procter, from the Missouri Conference, was announced, and he came and was introduced to the Conference, and his name was placed upon the roll.

The transfer of Joseph M. Stevenson, from the Little Rock Conference, was announced, and his name was placed upon the roll, and his character was examined and passed. Brother J. W. Piner, presiding elder of the Paris district, returned the parchments of James Hill as local deacon in our church, and the same were filed in the office of the secretary of this Conference.

Brother William C. Young, presiding elder of the Dallas district, returned the parchments of James E. Scott as a local deacon and a local elder in our church, and the same were filed in the office of the secretary of this Conference.

Brother R. Lane, presiding elder of Jefferson district, returned the parchments of William Chappell as a local deacon of our church, and the same were filed in the office of the secretary of this Conference.

QUESTION 1.—Who are admitted on trial? The following were admitted on trial, viz:

Jesse J. Hummeltt, Alexander C. Mayer, Eugene T. Bates, Thomas E. Sherwood and James C. Rogers.

The following local preachers were elected and ordained deacons:

John W. Wheeler, John W. Crabtree, Charles S. Black, Robert M. Smith, Thomas S. Ballard, James P. Rogers, Andrew J. Burrows, a colored man.

One local elder was ordained—J. M. Cooper. Aaron H. Brewer, an elder, was admitted into full connection from the Louisiana Conference of the Methodist Protestant Church, and R. E. Taylor, from the same church, as a local deacon. From the Congregational Methodist Church, the Rev. Jesse Hightower was recognized and received as a local elder. John H. Lowe was readmitted, also William R. Davis and G. S. Gatewood.

The transfer of John W. Field and R. S. Finley, from the East Texas Conference, was announced, and their names were placed upon the roll.

The following preamble and resolution were adopted, viz:

WHEREAS, The General Conference of our church, at its last session in the city of New Orleans, passed an act providing that the East Texas Annual Conference should be authorized, at any subsequent time thereafter, to divide its territory and form it into two separate and distinct Annual Conferences, under the jurisdiction of the said General Conference; and

WHEREAS, Afterward the said East Texas Annual Conference, at its session held in the town of Marshall, Texas, determined and did actually divide its territory and form the two Annual Conferences, known and designated as the Trinity Annual Conference and the East Texas Conference; and

WHEREAS, The boundary line between the two said Annual Conferences was agreed upon and determined by the action of the said East Texas Conference, in pursuance of the said act of the General Conference, at the time of the separation and formation of the two separate organizations; now, therefore,

Resolved, That we do pledge ourselves to stand to and abide by the settlement of the said boundary line agreed upon at the time of the separation aforesaid, and we do most solemnly deprecate and protest against any attempt to invade our jurisdiction with the view of disturbing the boundary line hitherto agreed upon between the two Conferences before the final separation, and that we do hereby instruct our delegates to the next General Conference to give their entire influence to sustain the said compromise line in their action in the General Confer-

ence in all questions involving our jurisdiction and boundaries.

The Conference then went into the election of two clerical delegates to the next General Conference.

Upon the first ballot Richard Lane and J. M. Binckley received a majority of all the votes cast, whereupon the chair declared them duly elected.

Resolves—J. W. P. McKinzie, J. T. P. Irvine.

Two lay delegates were elected, Asa Holt and W. J. Clark. Alternates—W. H. Christen and J. R. Cole.

QUESTION 22.—When and where shall the next session of this Conference be held? was considered. The city of Jefferson having received a majority of the votes given, was duly elected; the time to be fixed by the Bishops. * * *

The following preamble and resolution were adopted:

WHEREAS, The Rev. Richard Lane has been a faithful itinerant minister in our church, and has given the vigor of his youth and the mature strength of his manhood for the public good; and

WHEREAS, In the providence of God he is, in consequence of an affliction in his throat, no longer able to serve the church in the active itinerant field; and

WHEREAS, He is still solicitous to serve the church in some appropriate field, he has, by the advice of his brethren, determined to engage in the purchase and sale of Bibles and other religious books; therefore,

Resolved, That we will give him our influence, and cordially co-operate with him in furthering the interests of this worthy enterprise. * *

Resolved, That as Brothers Neal and John have pledged themselves solemnly to the interests of the *Texas Christian Advocate*, we will sustain them by our influence.

Resolved, That each preacher, voting for this resolution, will use his utmost endeavors to send at least ten new subscribers by January next.

Resolved, That we request our delegates to the General Conference to use their influence in that body to secure the re-election of the Rev. T. G. John as the editor of the *Texas Christian Advocate*.

Maj. Gen. H. W. Halleck on the South.

In his report to the general of the army this commander of the division of the South says of his department generally:

Good order has generally prevailed throughout this department, and except in assisting the revenue officers in enforcing the revenue laws, there have been very few cases where the interference of the military authorities was necessary or proper. * * *

After a careful examination of all the evidence I have been able to collect from official reports and the statements of officers and citizens, unbiased by partisan feelings, I am forced to the conclusion that the amount of crime committed in the several States of the division is very little greater than before the rebellion, and certainly no greater than was reasonably to be expected at the close of an embittered and prolonged civil war, when large numbers of lawless and desperate characters, both at the North and in the South, were turned loose upon society without any legitimate means of support. Certain districts of country may, and probably do, form exceptions to this general remark; but even of these exceptional cases, very few have any partisan character or political significance. Those who murder and rob do so simply as murderers and robbers, influenced by the motives which ordinarily incite men to commit these crimes.

One of the worst desperadoes in Kentucky served in the Union army during the war; but he and his band now rob and murder rebels and loyalists alike, as may best suit their purposes—at one time claiming to be Ku-Klux, and at another to be Anti-Ku-Klux. Although there may be special organizations of outlaws, in particular localities, under the name of Ku-Klux, I am of the opinion that no such general organization now exists in the Southern States. It is probable, however, that outlaws not unfrequently assume this name in order to intimidate the weak and credulous, especially when calculated to increase their own importance.

We put this upon record as a statement of facts as they are. It seems a pity that it could only be ascertained as late as November, 1869.

The Christian Advocate.

SATURDAY, JANUARY 8, 1870.

VESPER HOME.

BY MRS. E. M. OLNEY.

O silent house, in bloom embowered,
How sadly sweet thy twilight fall;
While through the chestnuts, many-dowered,
The robin sings its plaintive call.

What time my footsteps turned of yore
To linger in thy pleasant shade,
The form of one I see no more
Thy beauty and enchantment made.

The rose its leafy blossom sheds,
And leaf by leaf its royal bloom
Falls on her doorway, and bespends
The path we followed to her tomb.

Sigh, grieving plies, she will not hear
The mournful music of your leaves;
The fragrance of your nightly tear
The whispering wind alone receives.

Cling, closer cling, dear chambering vines,
This was the home her heart enshrined;
And here, in faded vision, shines
The genial soul, the radiant mind.

Bright seraph, from that mansion blest
Which love, redeeming made for thee,
The halo of thy heavenly rest
Illumes death's dreary mystery.

—Independent.

LETTER FROM CHINA.

SHANGHAI, CHINA, Oct. 13, 1869.

Wm. H. Foster, Esq., Sup't. Felicity
street Sabbath School—MY DEAR
BROTHER: The remittance you in-
structed us to expect, soon after
receipt of your letter of June 15,
has come to hand in the shape of
an order for eighty clean Mexican
dollars, forwarded by William Booth,
Esq., of San Francisco.

We are always glad to hear from
you, and rejoice to know that you
have learned the "direct" route to
China. Your action in the matter
may be censured as irregular, but it
certainly has large excuse and am-
ple compensation. Indeed, I am
not sure but that the correspondence
to which your method of remittance
gives occasion is altogether unex-
ceptionable, and a source of benefit
both to us and your school but lit-
tle less, if any, than that derived
from the contributions themselves.
It is certainly gratifying to us to
have letters from you, and assur-
ances of your sympathy and pray-
ers, and it must be pleasant to you
to be able to make your own dis-
bursements and follow them up with
inquiry. Sending money to China
through a "go-between," as we call
them here, is like preaching through
an interpreter, while direct remit-
tance, such as you have adopted, is
like personal contact, and kindles
life in both parties.

We are greatly encouraged by
your example, and hope that other
schools, to whom it has been com-
mended, will not long hesitate to
let us hear from them; for though
we are in labors abundant, and have
but little time for correspondence,
their communications would not
pass unheeded, nor their contribu-
tions be without appreciation and
valuable use.

How true it is that a heavy heart
frictionizes the whole soul, while
cheerfulness makes all nature move
as by magic. Experimentally I have
encountered both states of mind,
but I am happy to say that the lat-
ter, at present, prevails. Evidences
of friendship give us assurance that
we are not exiled beyond the pale of
social life, nor altogether denied its
privileges. We once felt outcast,
alone, forgotten; but, thanks to you
and others of like mind in the Mas-
ter's work, we are no longer so either
in fact or feeling.

I am very sorry your efforts to
assist us should be discounted so
heavily, but the fact is your "green-
back currency" is greatly below par,
while our Mexican currency is at a
commanding premium. Hence it is
that of the \$120 forwarded by you
to San Francisco we got only \$80
Mexican.

In reference to my part of the
money previously received from
you, it was handed to Brother Lam-
buth to assist his school, for the
reason that I had not enough to
carry on a school without contrib-
uting out of my own pocket nearly
half the funds, which I did not feel
able to do. I hope, however, with
the funds just received from you and
from another school in Baltimore,
to have enough to support a good
school during the coming year with-
out the burden of it falling on me.
For a time I was encouraged, while
supporting myself by daily labor,

for which I was paid wages, to un-
dertake supporting a school by my-
self, in the hope that such a burden
would soon be relieved; but not un-
til now have sufficient funds been
received to authorize the attempt at
independent organization. Next
year, therefore—for it is too late now
—I hope to organize a school, to be
known by the name of Felicity
School, if you will accept it. The
expenses of such a school will aver-
age from eighty to one hundred
Mexican dollars per annum, includ-
ing teachers' wages and all incidental
expenses. For the present, at
Shanghai, we have house room,
which will economize rent, which
would otherwise require from \$2 to
\$3 more per month, say from \$25 to
\$30 per year.

We are very anxious to see our
school interests revived, and better
attended to; and as the board makes
no provision for such, we heartily
welcome from private sources any
contributions designed for their sup-
port and maintenance.

But I must cut short this strag-
gling letter, for I am overburdened
with work, pressed on all sides, and
not a little confused by haste; be-
sides, we are deeply plunged into
affliction. We have just lost our
darling boy of seven years old, and
now our youngest boy of three years
is quite sick, and in the midst of
grief and anxiety I cannot write
more. I hope, however, to hear
from you again, and will endeavor,
at some future time, to interest you
more. God bless you and your dear
school. Pray for us.

Your brother,

YOUNG J. ALLEN.

BIOGRAPHICAL.

"She seeketh wool and flax, and worketh
willingly with her hands."—Prov. 31: 13.

"She stretcheth out her hand to the poor;
yea, she reacheth forth her hands to the
needy."—Prov. 31: 20.

Mrs. JANE R. WILLIS, the only
daughter of Rev. B. M. Drake who
survived him, was born in New Or-
leans, January 22, 1833, and dedi-
cated to God by baptism during the
following February by Rev. W. Wi-
nans.

Most of the family having suffered
in health from the epidemics which
prevailed in the city, the Confer-
ence appointed her father, the en-
suing year, to the then Coles Creek
circuit, and the family resided at
the home of her mother's parents,
in Jefferson county, Mississippi.

Being appointed, for the year
1835, to the Natchez district, and
being unsuccessful in his efforts to
rent a house in Natchez, and vari-
ous other circumstances making it
more convenient, Dr. Drake put up
a cottage—intended at the time as
a temporary residence—near that
of his late mother-in-law, but which
was destined to be the nursery
where most of his children were
trained.

The daughter who is the subject
of this notice was very delicate in
infancy, but improved in health as
she grew in years, and at a very
tender age evinced a love of study
and great admiration of the beau-
ties of nature. "Birds and stars
and flowers," she said, "are the pret-
tiest things in the world." She also
developed a reverence for sacred
things; and though possessing by
nature a strong will and a conscious-
ness right to have an opinion, submitted
readily to religious training, and
was docile and obedient to all law-
ful authority. Realizing that she
was born in sin and needed a change
of heart, she sought the altar of
prayer, and united herself with the
Methodist Episcopal Church when
scarcely ten years old, and after a
time professed that change. Un-
fortunately, perhaps, she was prone
to look more at her own unworthi-
ness than the all-sufficiency of the
atonement, which prevented her be-
ing as joyful in her religious experi-
ence as many others, though natu-
rally of a cheerful temperament.

While studying at home, in ac-
cordance with her father's wishes
she gave attention to whatever
would be useful in domestic or culi-
nary affairs, and soon rendered ef-
ficient aid in these departments.
When about twelve she was placed
at the Port Gibson Female Aca-
demy for education, where she re-
mained for four years, a diligent

student, and then returned home to
assist in the care of the younger
members of the family, assuming at
times so much of the household
burdens as almost to reverse the or-
der of nature as to mother and
daughter. Generous, to the full
amount of her ability she aided the
poor and sympathized with the sor-
rowing. Ardently attached to her
father, his death was a shock from
which she never fully recovered.
The war immediately following, she
felt, with other Southern women,
the urgent pressure for labor which
followed in its train; and though
regarding it abstractly as it was
conveyed to our first parents, and
much preferring to employ her time
in reading and study, she saw, nev-
ertheless, that there was virtue in
submitting to those necessities which
were unavoidable, and without mur-
muring waived her own pleasure
that she might minister to the com-
fort of others.

She spent some days with a neigh-
bor, who taught her to spin, and
then with another, from whom she
learned to warp and weave cloth,
which knowledge she imparted to
servants, giving them assistance,
and afterward cutting and making
coats and garments sufficient in
number to clothe from four to five
soldiers for two or three years, be-
sides several other persons.

Though unobtrusive and retiring,
she shrank not, when questioned by
Federal soldiers, to avow her true
sentiments, addressing to their con-
scious sense of right the impossi-
bility that she could sincerely do
otherwise than sympathize with her
own section. Though exceedingly
sensitive to ridicule and anxious for
the good opinion of others, the firm-
ness of her Christian principles de-
veloped with her years, and she was
courageous enough to avow them
and defend religion in any company
where they were assailed.

She wore no jewelry, because her
parents understood the Scriptures
as they were once construed by the
Discipline, and preferred, if in er-
ror, that it should be on the safe
side. This subjected her to criti-
cism, even from members of the
church, whose esteem for her filial
piety should have secured commen-
dation instead. She never know-
ingly attended dancing parties, even
absenting herself from the mar-
riages of friends when it was avowed-
ly their purpose to indulge in such
recreations.

On the twenty-eighth of Novem-
ber, 1865, she was married to Mr.
J. B. Willis, who had long been at-
tached to her, and removed with him
to his residence in Claiborne county.
In the summer of 1868 she had an
attack of fever, and while conva-
lescing told her friends of a pre-
sentiment that she had not long to
live. They expressed the hope that
it was attributable to depression of
spirits in consequence of debility.
Still, however, from that time the
impression that death was not dis-
tant often returned.

She had not fully recovered when
she was informed that a neighbor
was ill of typhoid fever, and had no
friends at hand. Her sympathies
were immediately enlisted, and she
nursed her tenderly, not sparing
herself. After returning home she
was brought near the gates of death
with the same disease. From that
time, with the exception of three
months, she was subject to spells of
chills and fever, but was in the in-
tervals so energetic in household
employments, and made such efforts
to contribute to the comfort and
cheerfulness of others, that few saw
how stealthily disease was under-
mining the citadel of life. Mr. Wil-
lis hoped that change of air would
improve her, and was preparing to
remove to Jefferson county. Her
home was remote from places of
public worship, and it was not in
her power to attend them often, but
she eagerly embraced those oppor-
tunities which offered, and was in-
creasingly devoted in the use of
more private means of grace.

It is not best to rely upon dreams,
yet there are circumstances in
which they will have an influence.
About ten days before her death
she dreamed that her Grandmother
Magruder (who died before she
could remember) came for her. Her

appearance made a strong impres-
sion. A few days later she dreamed
that she was walking in a terraced
garden, having vases of beautiful
flowers ranged on either side, which
bent over their branches so as al-
most to interlace each other, and so
low that at times she had to stoop,
almost creep, to pass down the walk,
at the other end of which she saw
her father.

On the morning of the ninth of
November, after conversing for a
while as usual, she complained of
nausea, and at about nine o'clock
symptoms of a congestive chill ap-
peared. Being aware of this, she
said: "It's all over." The doctor
was sent for, and every effort imme-
diately made to restore warmth, with
partial success. But the cold symp-
toms returned, and all human help
was unavailing. Being encouraged
to prayerfulness, she answered: "I
have prayed a great deal. I've pray-
ed a great deal lately in the silent
watches of the night." To love and
be loved was the great desire of her
heart. The Scripture being repeat-
ed, "God is love," she inquiringly
said with eagerness: "Do you say
God is love?" At another time she
said: "I hope the Lord will let
father come for me." At about four
o'clock she said: "Doctor, am I go-
ing to die to-night? Tell me. I
want to know." Receiving an eva-
sive answer, of which she under-
stood the import, and seeing her
husband in tears, she expressed
solitude for their little boy. The
disease then increased in violence.
Her sufferings, she said, were be-
yond description, and prevented her
from saying much more.

At six o'clock her breathing be-
came rapid and suffocating. The
dark hazel eye, which had through-
out life reflected from the heart such
earnest affection, such sympathy for
the sorrowing, and such pleasure in
social and intellectual conversation,
was east fixedly upward, and the im-
mortal spirit passed to him who
gave it. The cold and pallid lips
which respond not to the call of the
orphan child, the absence from the
busy scenes of life, the vacant chair
at the family board and hearthstone,
expressed more deeply than lan-
guage could the eloquence of sor-
row for this irreparable loss to the
survivors. The longing desire of
friends could not rescue the beloved
form from the weakness, dishonor
and corruption of the tomb; but
thanks be unto God for the promise
that this corruptible shall put on
incorruption, and this mortal im-
mortality, and death shall be swal-
lowed up in victory.

We cannot claim for her such tri-
umph in death as would give most
consolation to her friends, nor fully
solve the question whether the joys
of the departed are most to be in-
ferred from that triumph or by the
fruits of a living Christian faith.
We read that a book of remem-
brance is written before the Lord
for them that feared him and they
thought upon his ways, and they
shall be his when he makes up his
jewels. And we trust that when
the vision of our loved one failed on
earth it was but "turned away to
gaze on other scenes more bright;
that her sin will no more go down,
neither shall her moon withdraw it-
self, but the Lord will be her light,
and the days of her mourning are
ended."

A GOOD DEED.

MANFIELD, December 12, 1869.

REV. J. PIPES—Dear Sir: I pre-
sent to the Manfield Methodist
Episcopal Church South the accom-
panying communion service.

Very respectfully yours,

Mrs. J. M. B. DE MICHELLY.

Mr. Editor: We were made glad
on last Sabbath, in the next new
church at Manfield, to receive the
above note, accompanied by a beau-
tiful and substantial silver com-
munion service, presented by Madam
Michelly, the teacher of French and
music in the college. In behalf of
the church we tender to her our
grateful acknowledgments and sin-
cere thanks.

Respectfully yours, etc.,

JOHN PIPES, Pastor.

God has three houses—one for
instruction, another for correction,
and a third for destruction.

Resolutions on the German Work by the Texas Conference.

Resolved, That the Evangelical
Apologist, published at New Orleans
by our German missionaries, be and
the same is hereby recommended to
the notice and favorable considera-
tion of our next General Conference
as a suitable and necessary organ
of the church for our German work,
and that its publication and man-
agement be taken in hand by the
General Conference.

Resolved, That the Board of Do-
mestic Missions, with the advice
and consent of our Bishops and book
agent, be and they are hereby re-
quested to publish a suitable cate-
chism first, and subsequently a hymn
book, in the German language, for
the use of the German members of
our church.

Resolved, That we recommend
that the General Conference, at its
coming session, will unite the Ger-
man work in Texas and Louisiana
in a mission conference or district,
as its judgment may direct, in order
that this work may be placed under
the immediate care of the Parent
Board of Domestic Missions, and be
supported by the entire connection,
and also that each field may derive
the benefit from the interchange of
preachers, under episcopal direction,
which such an arrangement will se-
cure.

The latter resolution was adopted
by the Board of Domestic Missions
of the Texas Annual Conference,
and endorsed by the unanimous vote
of the Conference.

J. G. JOHN,

Sec. B. D. M., Texas Conference.

Religious Life in the Sunday School.

BY REV. A. C. GEORGE, D. D.

A number of things are essential
to the largest success of a Sunday
school. Brains, money, energy,
tact, consecration, are required. The
school should be held in the best
part of the day; it should enlist
the best talent of the church; it
should be disciplined to perfect
regularity and order; it should be
provided with all useful appliances
for doing Sunday school work; it
should have the warm sympathy and
earnest co-operation of the pastor;
it should be held strictly to the dili-
gent study of God's word; it should
be inspired with enlivening songs;
it should be enlivened in the pro-
gress of the church; and, chiefest
of all, it should have a definite, re-
cognized purpose and mission. It
should be a church institution, a
missionary institution, and a thor-
oughly beneficent institution. We
do not mean to say now that the
Sunday school should be sustained by
the church, that it should be the object
of missionary labors, or that it
should be the recipient of charita-
ble gifts. The church ought, of
course, to sustain the school by its
labors, contributions, sympathies
and prayers; and the school must
often be established, especially in
deserted and neglected portions of
the land, by missionary zeal, and be
maintained, built up and rendered
efficient by the toils and sacrifices
of a practical beneficence. These
things are granted; but in order to
a large and permanent prosperity a
Sunday school must have a life of
its own. Its heart must throb with
a purpose; its brain must be work-
ed to an end; its nerves must thrill
with an inspiration, and its house
and mind must be tasked for the
production of a result. In other
words, the religious life of a Sunday
school is the very soul of the or-
ganization. Without this all else is
a dead form and a useless display of
machinery. The form is desirable
and the machinery useful, just to the
effect that they help the consumma-
tion of the chief object—the reli-
gious life; but when they obscure,
another and destroy that life, they
become a blight and a curse.

A result worthy of Sunday school
efforts is only secured when pastor
and superintendent, church and
teachers, all interested and engaged
in the exercises, regard the school
as a means of grace, and expect to
be enlightened and sanctified,
through Scripture lesson, prayer
and song of praise, by the power of
the Holy Ghost. Then the conver-
sion of the children is anticipated
and direct efforts made to bring
them into the church. Then the
divine presence is manifested in the
school room, and a sacred charm
gathers about the place. Then both
teachers and pupils are attracted to
the school, they know not how, and
absence is attended with a pang and
felt as a loss. Our Sunday schools
will not die out if the salvation of
God be in them. If the children
are converted in the school they
will be bound to it by the strongest
of ties and the most delightful
memories. They will grow up in
the school to become teachers in
their turn, with holy sympathies and
sanctified aims, bringing others also
to Jesus.

A school must often get along as
best it may, without many of the
conveniences and appliances which
are so desirable and which may
often seem to be indispensable. But
it need not be without a spiritual

aim, an evangelical purpose and a
longing desire for the conversion of
the children. The hearts of the su-
perintendent and teachers may be
hungry for the outpouring of the
spirit and the salvation of the school.
In other words, it may have a genu-
ine religious life and the manifest
tokens of the divine presence. And,
though many other things may be
wanting, such a school will have
abounding prosperity.

How shall this religious life be
realized?

1. Get your own heart full of
Christ. Linger at a throne of grace till
baptism from on high comes on your
own soul. Think of the importance
of these children being good now
till your heart is ready to break for
their conversion.

2. Have a teachers' meeting, in
which the chief exercises shall be pray-
er for the religious life of the school.

3. Conduct all the exercises of the
school as if you intended that the
lessons, prayers and hymns should
be the means of grace to some souls.

4. If at all practicable have a
prayer meeting at the close of the
school for teachers and parents, in-
viting scholars to remain, in which
direct efforts may be made for the
conversion of the children. "Would
adults be converted if we did not
make more direct efforts to bring
them to Christ than we are accus-
tomed to make for the salvation of
children?"

5. Visit the children at their
homes, talk with them personally
regard to the salvation of their
souls, and show them that your chief
desire is to lead them to Jesus.

6. Endeavor to bring your Sunday
school scholars into the church, not
only to its sanctuary and services,
but to its altars and covenants, that
they may be united with God's peo-
ple in the work of faith and in the
hope of heaven.

Do these things diligently, and
your success, with God's blessing,
will be assured, and your school
made pleasant and prosperous, will
be as the gate of heaven to many
young immortal souls.—*American
Sunday School Worker.*

ROME AS A SHOW.—If I had found
a prosperous, free, contented people
associated with all these objects of
interest—a people well educated,
intelligent and enterprising, with
respectable present and a hopeful
future—my stay in Rome would
have been one of great delight;
but I did not find such a people. In
the midst of the grand memorials of
a grand age, and with all the stimu-
lants of a great history at its back,
touched at every point by the in-
fluences which come from the fine-
creations of art; brought into con-
tact every year with the refined and
learned of all Christendom; living
at the very center of those influences
which have done so much to shape
the destiny of the world—living,
indeed, in what I heard Archbishop
Manning call "The City of the Im-
mortal," with wealth enough to
their churches to make all Italy
rich, I found this people poor, dis-
contented, ignorant and hopeless.
Rome is nothing but a show. Its
antiquities are a show. The Pope
and the various pageantries in which
he takes a part are a show. The
public museums do not assume to
be anything but a show. The
churches are a show, and are visit-
ed ten times as much in consequence
their character as show places as
they are for the purpose of worship.
The private palaces and villas are
show. Almost the entire income of
Rome is drawn from the pockets of
those who come to Rome to see
shows. The Rome of to-day is a
dead, nothing but a great museum
of curiosities, pupal and pagan
living and dead. The lovers of
light and liberty are pining in
political prisons; her multitudinous
beggars are licensed like porters
and go around the streets with
tickets hung to their necks. The
Jews are still confined mainly
their dirty quarters, by him who
assumes to represent the love
of God in the Jew Jesus. There is
such thing as liberty in Rome, or
religions. The people groan
under a despotism more intense
hated than those who are not
acquainted with its spirit and op-
pression can possibly conceive.

SCIENTIFIC men attribute the
severe summer and autumn weathers
the storms, floods and earthquakes
that have prevailed in various places
to the influence of the sun, and
they assert it is in a highly agitated
state. It is also asserted by them
that the body of magnetic light
shooting from the sun in every
direction will, by the beginning
next year, have extended far enough
to exercise material influence upon
the earth, and then it is said we
expect that phenomena will be ob-
servable such as have not yet oc-
curred under the notice of the human race.

The Bible, so little in bulk,
the five barley loaves and two fish
what thousands in every age it
fed! And what multitudes it
fed, in every land of Christendom,
till the end of time.—*Protestant
Churchman.*

The Christian Advocate.

SATURDAY, JANUARY 8, 1870.

SOWING IN HOPE.

My words are poor and weak," I said; "they pass like summer wind above the summer grass."

"To utter them seems idle and in vain; I cannot hope to gather them again."

"And yet, impelled by some deep inward voice, I must work on—I have no other choice."

"But, oh! my words are poor and weak," I said; "the truth is quick—the utterance cold and dead."

"Say, nay, not so," he answered; "sow thy seed, thou sower of life—God knoweth there is need!"

"For every grain of truth in weakness sown he watches over, who protects his own."

"Though buried long, it shall spring up at length, the seed of truth, the seed of strength."

He said, and left me, while I pondered o'er the holy truths so often heard before.

And while I pondered, unawares there stole a strange, sweet, subtle strength through all my soul.

I rose and went my way; I asked no more if words of mine had any fruit in store;

Content to drop my patient seed, although my hands shall never gather where they strew;

Leaving the harvest, be it great or small, to his dear keeping who is Lord of all.

Are Doctors Responsible for Drunkenness?

NUMBER THREE.

Having thus disposed of the first part of the resolution, we come now to consider the latter clause, in which it is asserted that a practice based on common sense and a sound clinical experience and observation, must take its place, and thus bring healing and blessings on its wings to the nations of the earth. There are hosts of physicians in this country, and many in this society, that have unbounded faith in the present stimulant treatment, and exhibit the utmost scorn toward those who are inclined to believe that alcohol is not essential to the treatment of disease. It is our duty then to examine this part of the resolution, to see whether a modified, regenerated practice—a practice that dispenses light with the use of alcoholic stimulants—would not only be safe, but be so stimulant—advantageous as to "bring healing and blessings on its wings to man—the kind," for we are not disposed to allow the author of this declaration to escape one iota of the responsibility which he has invoked.

The eminent Prof. Benjamin Rush was one of the first in this country of the teachers in medicine to speak against the use of alcoholic stimulants; and Prof. Chapman, one of the brightest ornaments of our profession, near the close of life, and after a long medical experience, said: "It is the sacred duty of every one exercising the profession of medicine to unite with the moralist, the divine and the economist in discouraging the consumption of those baneful articles, and, as the first step in the reformation, to discontinue the baneful notion of their remedial efficacy."

Prof. Seward, of Washington city, says: "While we are convinced that there is no case in which ardent spirits are indispensable, and for which there is not an adequate substitute, we are equally assured that as long as there is an exception allowed, and men are permitted to use it as a medicine, so long we shall have invalids and drunkards among us."

The eminent Dr. Muzzey, of Cincinnati, declared: "To a place among preventives of disease, spirituous drinks can present but the most feeble claims. The best protection against disease is derived from a natural, healthy, unobscured state of vital action, sustained by plain articles of nutriment unadorned by any immoderate drinking of stimuli which operate on the whole nervous power. There is the most appalling evidence of the pernicious influence of intoxicating liquors in preparing the constitution for an attack of cholera. Tipplers, exposed to the exciting causes of inflammatory, epidemic and contagious diseases, are liable to attack and die in great numbers. Witness the results in epidemic pleurisy, pneumonia, the severe forms of influenza, pestilential fevers and cholera."

Thus spoke this great medical practitioner; and yet so universal has the belief in the preventive and remedial powers of alcohol become, so universally is it prescribed, that Dr. John Bell, one of the oldest and most learned physicians of Philadelphia, during the last visitation of cholera to this country, at a meeting of the College of Physicians, called upon to denounce their use in that disease as murderous. He said: "Cholera results from an atmospheric poison. The alcoholic

practice is murderous. Too much attention has been paid to the prevention, and this has induced a belief that stimulants are necessary in the treatment. The proportion of deaths from this practice is perhaps nine out of ten. The idea that alcohol is a preventive of disease is a most popular one, and one which," he feared, "was encouraged by the profession. It was a most fallacious, and, he might add, pernicious doctrine that the use of alcoholic drinks was a preventive of disease. It was argued some years ago that a fever might be kept off by their use, but the fallacy of that argument had been conclusively shown."

Dr. Bell was followed by Dr. Nebinger, so well and favorably known to us all as a conscientious and learned physician and a prominent member of this society. He said: "I deeply regret that the previous speaker has objected to the publication of his remarks (in the public papers) in reference to the pernicious effects of the use of alcoholic drinks as preventives of cholera, and his well-attested denunciation of the practice, for they are not only well worthy of publication, but deserve to be published in letters of gold, that they might attract and be read by every eye. The terrifically bad effects of the recommendation by the faculty of Philadelphia and other places, in 1832 and 1849, of the use of alcoholic beverages as preventives of cholera, were well known. Dr. Bell had wisely raised his voice against a practice which, while it was well calculated to contaminate the morals, so disordered the body as to produce a predisposition to an attack of the malady it was improperly used to prevent."

To these bold, manly utterances of these scientific physicians, made in the presence of their fellows, there was no dissenting voice, and still the murderous practice goes on. We have already shown that fevers are cured better without than with them. If, then, in the fearful prostration of fevers and cholera they are not needed, where shall we use them? The eminent surgeon of Nottingham, Mr. Higginbottom, writes: "If all intoxicating drinks were banished from the earth, it would be a real blessing, and in a few weeks they would not be missed, even as a medicine. For the first twenty years I ignorantly gave alcohol in some diseases, as was customary; yet as early as 1813 I discontinued it in typhus, typhoid and other fevers, with the most marked beneficial results. For thirty years I have not prescribed alcohol as a medicine. I have discovered a great truth and made a great discovery—that alcohol in every form may be dispensed with in medical and surgical practice, and is not required in a single disorder or disease."

* * * * * Dr. L. M. Bennett says: "I for one believe that there is no curable disease but may be treated and cured better without alcohol than with it."

Dr. R. L. Barclay, of Stonebridge, writes: "I have banished them from my practice since 1841. During these twenty-one years I have not made fewer than one hundred and eighty thousand visits, and I am free to say that the recoveries have been more numerous and more rapid than they were during the five years I followed the usual practice and gave brandy, wine and beer. Of these numerous patients, many were laboring under the most aggravated forms of typhus and other malignant fevers, smallpox, cholera, malarial fever, large exhausting abscesses and many other diseases in which alcoholic stimulants are usually administered and thought to be essential. I have attended, likewise, the patients of two large hospitals for many years—one in town, the other in the country; the paupers of a populous parish for sixteen years; the members of nine benefit clubs for many years, some of them numbering three hundred members—and in all these different cases, and under all these different circumstances, I have not found it once necessary to prescribe either spirituous, vinous or malt liquors."

Says Dr. Henry Mudge: "Having published short notices of over forty forms of disease, including accompaniments by the hundreds, hemorrhages, shock, typhus fever, consumption, purulent discharges, large burns and indigestions, cured without alcohol, I have some right to claim equal explicitness from those who prescribe them."

Dr. W. W. Townsend, of the Chester County Almshouse, in a letter to the chairman of this committee, says: "There has not been a pint of alcoholic liquors, in the form of brandy, wine, whisky, beer or ale, used in this house as an internal remedy for twenty months; and very little since I have had charge of it, and the little that was used, I am certain, did harm. My patients got well sooner and better when none was used. I have treated malarial fever, typhoid fever, dysentery, pneumonia and surgical cases, and I appeal to the record for the evidence of the success of my practice. There have been fewer deaths than in any period of the same

length of time for twenty years—I have examined the records no further—and I am so well satisfied of the correctness of the practice that I shall never resort to those kinds of stimulants in the treatment of any kind of disease that may come under my care."

Dr. T. W. Guirauder, in a late number of the *Glasgow Medical Journal*, in an able article on Alcoholic Stimulation, says: "It is an error to conceive of alcoholic stimulation as a proper substitute in febrile diseases for ordinary food. Even beef tea (so much favored by Dr. Todd in conjunction with alcohol) is of very inferior nutritive value to milk, and of secondary importance. To give brandy and beef tea every hour or half hour for days and nights together, even waking up the patient (as is recommended by Dr. Todd) in order to give him his food and stimulants, is the surest of all ways to destroy what remains of natural appetite. It is an error to suppose that patients affected with very severe symptoms of acute disease are capable of tolerating indefinitely greater amounts of alcoholic liquor than can be given in health."

"It is almost certain, from facts already observed, that in young persons the mortality of fevers is greatly increased by the continuous administration of alcoholic stimulants; and it may be confidently anticipated, as a result of improved consideration given to the subject, that the profuse and continuous administration of alcoholic stimulants, with a view to alimentation in acute disease, will ere long be abandoned as inconsistent with an enlightened physiology and a sound practice. A subordinate, though very important consideration, bearing on this profuse and continuous stimulation, is that such liberal doses of wine and spirits given habitually under medical advice, tend to give a wrong bias to public opinion, and (even apart from the grave moral consequences arising from the abuses of alcoholic liquors) to involve the whole medical practice of the country in a system of unnecessary and, therefore, wasteful expenditure. It is as nearly as possible a demonstrated fact, that much of what is spent in wines and spirits for the sick in hospitals (and probably also in private practice) is unnecessarily, if not injuriously, spent."

But again we are met by the almost universal demand for whisky as a cure and preventive of consumption. There is scarcely a single person in the whole country, threatened with or suffering from that disease, who is not dosed daily with either brandy or whisky, in large doses, by advice of the physician, who conscientiously regards them as the great remedies to increase vital force, and thus avert the disposition to tubercle. We have, for several years, had occasion to deplore this system of treatment, and from most careful observations made in a large region of country, where the history of every case of phthisis which occurred could be ascertained from week to week, we have failed to discover the least benefit derived from the use of alcohol, either as a preventive or remedy in that affection."

In 1859 the Rhode Island Medical Society offered a prize of \$200 for the best essay on "The effect of the use of Alcoholic Liquors in tubercular disease, or in constitutions predisposed to that disease, to be shown, as far as possible, by statistics." The prize was awarded to John Bell, M. D., of New York. Seldom have observations been more thoroughly made, more carefully conducted through a long period of time, and embracing every condition and circumstance which could conduct to reliable conclusions; and what are the results?

1. That the opinion prevalent as to the use of alcoholic liquors having a marked effect in preventing consumption, is without any solid foundation.

2. Their use, on the contrary, appears rather to predispose to tubercular deposition.

3. Where tubercle already exists, alcohol has no obvious effect in modifying its usual course.

4. Neither does it mitigate in any considerable degree the morbid effects of tubercle upon the system at large.

Such are the conclusions of an extended investigation of the subject by the man to whom the Medical Society of Rhode Island joyfully awarded the medal of merit; and we are happy to oppose it to the alcoholic practice of Anstie, Bennett, Todd, Chambers and others, who have placed alcohol at the head of the list of remedial agents. They have sung praises to the healing virtues of alcohol. Their songs have been heard in every family, and now, throughout the length and breadth of the land, in palace and in hovel, the word has passed that the young child, the delicate school girl, the slender apprentice, the studious youth, the nursing mother, the anxious merchant, the girls in the store, the tailor on the bench, all who take exercise, and those who take none, can have immunity from

consumption only by the daily use of whisky. To oppose this popular practice is to call down on our heads the anathemas of those who are ever ready to stifle free discussion. We have conscientiously and prayerfully desired to make a just report on the resolution, and are constrained, in view of the facts bearing on the subject, to declare that there exists a terrible practice of stimulation which "sends its victims daily, by thousands, prematurely to the grave, and fills the land with drunkenness and crime"; that a modified, regenerated practice, based on common sense and a sound clinical observation, should take its place to bring healing and blessings on its wings to the nations of the earth.—*Arthur's Home Magazine*.

JOHN CHINAMAN.

SOME OF HIS CHARACTERISTICS.

What manner of man is he? Very black of hair, very low of stature, and not a thing of beauty. In laughter he shows his gums, horribly. But he is seldom the Man WhoLaughs, except among his own mates. With Americans, when he is not addressed, he is immovably serene, silent and serious.

He is a born gambler. Whatever his age or position, games of chance—with ludicrously trifling stakes—possess a wild fascination for him. Every California town has its Chinese quarter; every Chinese quarter abounds in gambling houses. On the subject of opium, too, the variance between his theory and his practice reveals the human nature strong upon him. Opium smoking, he invariably avers, is bad, very bad; and yet six out of every seven idlers whom one meets on an evening walk through the Chinese quarter bear indelible evidence of the habit written on their jaded, ghastly features.

He is gregarious. He must have not one but several friends, to whom to whisper "Solitude is sweet." No practicable pecuniary temptation will induce him to come to the Eastern States, unless half a dozen or a dozen of his comrades are to accompany him and live with him. He loves to dwell in towns. Even as a house servant he does not sleep under his master's roof, if he can possibly avoid it, but goes to the Chinese quarter to spend every night with his comrades. He will work as late as he is wanted, however, without complaint, and he will be on hand at any required hour in the morning. He is a great night-bird, and his turn is convivial. He and his mates join in frequent little suppers, which they keep up until nearly daylight. The materials for these banquets are believed to be contributed, unwittingly, by John's employer, and brought away surreptitiously in John's basket. His mistress often keeps her most valuable stores locked up and issues only a week's supply to him at a time, but he is frugally embodied, and can make gleanings enough for the midnight supper, and sometimes, perhaps, for supplying himself with pocket money besides.

Ask him why he will not lodge in his employer's house, and he replies that he and his friends like to meet at night, and tell each other what they have learned during the day. It is doubtless their custom to instruct newly arrived servants in household matters. Just as he is going away at night, John will often question his mistress as to how she compounds a particular kind of cake, or accomplishes some other triumph of cookery; and in answer to her inquiring look, will explain that he wishes to tell a friend who has not been here long.

John prizes the pennies. An offer of half a dollar more per month may take him away from a household to which he seemed warmly attached. But his people are so numerous in California that it is easy to fill his place. Agents of the Chinese Company, on furnishing a servant, warrant him for a year, and if he runs away, or proves dishonest, send a substitute instead. Still, ladies who wish to avoid changes often keep John's half a dollar or a dollar in arrears to make sure that he will not leave without fair notice. Girls in California, for general house work, receive, in gold, \$20 per month and upward. Chinamen obtain about the same prices, though some skilled cooks obtain from \$25 to \$40, and boys are hired as low as \$10. Governor Blaisdel, of Nevada, tells me that he leaves his house for weeks and sometimes months under the sole charge of his Chinese steward, without the least apprehension. Such trust is not uncommon, though of course it is sometimes abused. A firm in San Francisco lately found that a Chinaman, who had been with them for years and was trusted as fully as the partners themselves, had stolen several thousand dollars' worth of goods little by little. Still, on the whole, the Chinese compare favorably in honesty with house servants of any other nationality obtainable in America. In general morality they seem to be superior to every other class of masculine servants. Some ladies fear to trust them with their little daugh-

ters; yet, with their almost universal employments, I have only heard of a single instance in which any impropriety was attempted by them. In quietness, tractableness, teachableness—and imitableness—they are certainly unequalled.—*Atlantic Monthly for December*.

A ROMAN DINNER.

SOME OF THE CUSTOMS OF EATING AND DRINKING IN THE OLDEN TIME.

The ordinary Roman dinner party was not large; the rule was that the guests should not be less than three; the number of the guests, nor more than nine, the number of the mimes. The tables were made of rare woods, finely carved, and sometimes entirely of precious metals. Table cloths were unknown. Those who dined neither used knives nor forks, but helped themselves with their fingers; nevertheless, as sons could not be eaten in this primitive way, necessity, the mother of invention, devised spoons. To handle a hot dinner without burning the fingers required as much dexterity as the juggler displays in playing with heated poker. Gentlemen with tender digits and impenetrable appetites were metallic finger tips, like thimbles, which enabled them to put a finger into the hottest pie with impunity. After each dish they prepared themselves for the next course by dipping their fingers into ewers of water, carried round by servants, and drying them on napkins, each guest bringing his own napkin with him. Wealthy persons are said to have used a very costly kind of asbestos napkin, which, when soiled, they threw into the fire; the fire cleansed it without consuming. Refined epicures sometimes wiped their hands on the long hair of the cup bearers, a custom that is very common in the Orient, and recalls the office performed by Magdalen to the feet of Jesus. The Romans began the day with an early breakfast of bread, seasoned with salt and eaten with olives, dried grapes or cheese. At noon they took a warm lunch of eggs, fish, etc., together with their favorite beverage, called calda, a sort of punch composed of water and wine, seasoned with spices and sweetened with honey. This drink was to the Romans what tea and coffee are to us. The wine in the mixture being considerably diluted, possessed only very mildly intoxicating qualities, so that it could be used quite freely without unpleasant effects; and Cowper's description of a tea party, where

"The bubbling and loud hissing urn Throws up a steamy column, and the cups That cheer but not inebriate wait on each,"

would correspond very well to a calda party of Roman ladies nineteen centuries ago. Several caldariums of bronze have been found at Pompeii. The principal meal (called *cene*) was eaten at about four o'clock, and lasted several hours. People, like the elder Pliny, who dined only three hours, were considered remarkably frugal and time-saving. In Pompeii there are numerous paintings of feasts, which give considerable information as to the bill of fare. In the center of the table, for example, is a large dish containing four peacocks, so arranged as to form a stately dome with their tails; here and there are lobsters, each holding something in its claws; one has a blue egg, another an oyster, a third a stuffed rat, a fourth has a little basket of grasshoppers, or some similar appetizing delicacy. There are also several pheasants, hares and squirrels, each holding its head between its paws; besides peaches, melons and other fruits, a variety of vegetables, fantastic forms of pastry and different kinds of wine. In order to equip the table as magnificently as possible, many articles were provided, not because they were agreeable to the palate, but because they added to the splendor and costliness of the banquet. Dishes, too, which would excite in us the most intense disgust were held in high esteem. A man is represented as drinking from a cow's horn, pierced at the snout end so as to allow a thin stream of wine to flow into the mouth as he holds it up at arm's length—a method of imbibing still practiced by the common people of southern Italy. Other cups were fashioned, by the whimsical fancy of the potter, into the head of a pig, a ram, a stag or some other animal; many of them are of cheap material (clay), but all show by their excellent workmanship that they were made by good artists. One advantage of such a drinking vessel in the eye of a veteran tippler would be that, owing to its peculiar shape, it could not stand upright, and when once filled it must be emptied before it could be set down again on the table. Among the Greeks it was not customary to invite women to dinner parties, though the Scharites did so, and, according to Plutarch, used to send the invitations a year beforehand, in order to give the ladies ample time to dress for the occasion. But among the Romans women were not only admitted to banquets, as is

evident from several Pompeian paintings, but, if we may believe what cotemporary poets say of them, were also especially proud of their drinking; and Shakespeare is true to Roman customs when he makes Cleopatra boast of such triumphs over Anthony:

"Ere the ninth hour I drink him to his bed; Then put my three and twelve on him, whilst I wore his sword Philippan."

THE VATICAN COUNCIL.—We give below the most important among the cable dispatches concerning the progress of the council. They contain little more than gossip, much of which will undoubtedly prove to be incorrect:

Letters from Rome report that the Pope urges the appointment of Gallican bishops on the leading committees. It is generally understood that the object of the recent decree of the Pope, dissolving the council in case of his death, is to prevent the election to the papacy of any but an Italian.

Advices from Rome state that the council have as yet been unable to frame a commission to regulate the relations between Church and State and define the rights of each. Several votes were taken, but they were indecisive.

The report that the French government had sent a note to the Holy See, declaring that the proclamation of the dogma of papal infallibility would release France from the political obligations of the Concordat, is a fabrication.

Another reason is given by the Ecumenical Council for the adjournment of the sittings to January 6. The Bishops were under the necessity of abandoning the Cathedral of St. Peter on account of the acoustic imperfections of the hall, and have, therefore, resolved to hold their sessions hereafter at another place, but which cannot be put in order for several days.

The council has not yet named the seventy-two members of the three commissions provided for, namely: Discipline, religious orders and Eastern affairs. The members of the Commission on the Faith have been designated, but their names have not yet been made public.

Several of the Bishops, among whom is Cardinal Mathon, Archbishop of Besancon, France, have obtained leave of absence for the purpose of holding ordinations in their dioceses.

The *Civiltà Cattolica* has published the text of an apostolic letter imposing rules for the government of the council.

The sessions of the Ecumenical Council will be resumed on Wednesday, January 6.

The French Bishops have protested against the Pope's interference in the deliberations of the council. The Spanish Bishops, both home and colonial, sustain the Pope.

THE HIGH CHURCH REVIVAL.—Among the most remarkable movements in the Anglican Church belongs the one made among the High Church and Ritualistic party in London, in November. More than one hundred churches were opened, in which daily services, and several in a day, were held for twelve days in succession. The details varied according to the predilections of the different clergymen. In a few the services might be described as of a strictly evangelical character; in others, and notoriously in St. Barnabas, Piccadilly, it was openly announced that certain clergymen would be in attendance to confess and absolve penitents. It was, in fact, an attempt on the part of the High Church clergy to introduce those revival meetings which have been found so effective among the Wesleyans and some other bodies of dissenters. Wherever practicable the addresses were delivered, not by the incumbents of the churches, but by clergymen from the country, and some of them are described as having produced a thrilling effect. The services were sanctioned, as to their general scope and bearing, by the Bishop of London and the Bishop-designate of Winchester, but we doubt if their sanction extended to the confessional.

AN INTERESTING story is told by one of the *Maux* papers of a diver who was engaged in laying the concrete blocks under water at the pier works at Douglas (Isle of Man) who observed an immense creature, of a fishy nature, eyeing him attentively with extended jaws. Judging from the expression of its features that its intentions were hostile, the diver thrust one of his tools into the creature's mouth. Then commenced a fearful struggle. The superior weight and science of the diver, however, gave him an advantage over the monster, who soon showed symptoms of distress; the diver immediately signaled to the man in charge of the pump and was rapidly drawn to the surface, bearing with him triumphantly the body of his exhausted antagonist, which proved to be a "toad fish" or "fish-frog."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JANUARY 8, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KERNER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:
REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.

FOR MONTGOMERY CONFERENCE:
REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:
REV. W. H. WATKINS, D. D.
REV. JAMES A. GOUFREY.

FOR LOUISIANA CONFERENCE:
REV. J. C. KERNER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

LOUISIANA CONFERENCE.

The preachers and lay delegates, on their arrival at Shreveport, will please report themselves at the office of Brother Trippett, in the rear of the Methodist church, where they will be assigned to homes during the Conference.

R. S. TRIPPETT, P. C.

HALF FARE.

In addition to the Kouns' line of boats, the Lulu D. and the Post Boy have generously agreed to take members to the Louisiana Conference, at Shreveport, at half fare.

PERSONAL.—Bishop Wightman preached at Carondelet street church on last Sabbath morning. He has just returned from the Texas Conference, and is looking remarkably well. He was greatly delighted with his trip through the giant State.

DR. BOND ALIVE.

The following spirited passage from the Baltimore Christian Advocate, upon the epitaph written for him by the Zion's Herald, deserves a place in brass.

Our old acquaintance, Zion's Herald, exhibited more satisfaction at our demise than gratitude for our many, advice and salutary rebukes. His farewell, however, was not unkind, and we are pleased to find it prettily and piquantly expressed: "Rest to his ashes, which, we fear, never had any in their organic state." In this memory of us he was right. What with the necessary cares of material life, the management of our own rebellious spirit that is always clamoring for rest and forming combinations among our laboring members for higher wages and less work; what with the work of the Lord, to do, and the work of Satan to undo, we have no "rest in our organic state." Nor do we expect any. It is not here that "the righteous rest from their labors," and even in the eternal world they "rest not day nor night" from the loving work of the eternal truth. We have no rest even from strife, while Satan walketh about as a roaring lion and church doors are open to him, and aisles are carpeted for his noiseless velvet foot, and Bishops hire his claws to tear the body of Christ, and grand organs cover up his roar in hallelujahs to the pagan God of States and battles and bureau-morality, who, under cover of the thick fog of human passions, has seated himself on the throne of Jehovah. "The organic state" has no rest. Activity is the condition of its life. For it to rest is to die and enter into dust. Zion's Herald has written for us a noble epitaph—let it be put on the tomb of the humblest worker in the cause of God. "In ashes only has he found rest—he knew none in their organic state."

The Christian's cup may be brimful of sorrow; but for him the overflowing drop is never added.

THE NEW YEAR'S WORK.

Nearly all the Conferences have been held, and are already passed long enough to sober the mind of every preacher with the cares and plans of his new situation. A Methodist itinerant is the only one we know of whose year has a definite end. Though sent back to the same field, still at Conference he had fairly terminated his appointment. After the new treatment of fruit trees in England, he is annually taken up by the roots, though it be intended to replant him in the same spot. And by this process the fruit-producing parts of the tree—that is, its finer radicals—are said to be doubled; so that each year is to a traveling preacher as the beginning of old things. The blunders, troubles and toil of the year gone he forgets, as "those things which are behind," and now he reaches forth toward gracious promises, precious opportunities, and expected triumphs as to "those things which are before." From this fresh starting point he calmly surveys the inviting prospect, and with the full energy of a new life sets out upon his Master's work.

The first thing the pastor must look to is the welfare of his own soul. This is the instrument upon the condition of which all else depends. His own faith, his own hope and love will prove to be the measure of his future success. Let him, then, go down into the depths of his own spirit: Is the Master consciously present? Have spiritual things lost any of their reality? How shall greater degrees of God's love be experienced? He should go forth in the spirit and power of the resurrection, for with this power the Saviour anointed his disciples before he sent them forth to the work of the ministry.

"The fellowship of kindred minds" is one of the sources of Christian life. So long as men receive different graces in different measures association with God's people is necessary to the full development of a Christian. Observation has taught us that these spiritual graces he will probably find in their richness among the poorest of his flock. Sometimes one sick couch, one aged invalid, will bring him nearer to the "beatific mount," more immediately within the Saviour's circle, than all the services of the sanctuary. In truth, the way to be filled with holy sentiments, appropriate to his public ministrations, is to visit the poor, not more to do them good than to receive aid from them. And for the same reason he should give special care to the social part of Methodism—that is, to its class meetings, its prayer meetings and love feasts. A pastor can know nothing of the spiritual condition of his flock who does not personally look after this part of the machinery.

He must keep his mind active by forcing himself into new channels of thought. The rich stores of Heaven's word which are being opened every hour, and brought by every mail, in some new and elaborate comment, offer a constant incentive to fresh and vigorous thinking. He must not fondle those old sermons; there is beauty and eloquence in youth, though its features may not be quite regular. He must feel the inspiration of his own freshness; if he would affect others. He should not burn his old sermons—no—but kiln-dry them, and put them away for his grandchildren, or for himself when he shall have attained to second childhood.

He must have financial courage. Our system of Christianity is either weak or strong at the point where it touches earth—we have never yet been able to decide which. Not only is Methodism threatened with an annual collapse, but she comes through her expenses at the close of each year after a style that reminds one of the storming of the Malakoff. Now amid all this smoke and carnage, this rising and sinking of inexperienced minds, it is well to remember that it is simply Methodism repeating itself. This spirit of finance, which begins to gather shape at the start of the year, takes its form and enterprise very much from the front of the preacher. It

is not anything he says, for he must not say at all; but his countenance of hope, and a certain calm attention to the detail of his work, that will inspire all around him with generous and sustained energy. He must not struggle for a bare existence; he must set out to both live and make everything live around him. Recollecting that the people will take care of themselves, he need not fear to bring them to the support of the Saviour's kingdom in all its departments. The question is, Who shall have this substance?—the weevil, the moth, the mildew?—or shall it go forth in mercy for the welfare of the ignorant and the poor? Shall it be used to glorify the Redeemer, or shall it be consumed with "purple and fine linen" in the great fire? If he has any spare power let him reserve it for this point, for just here are "the gates of hell." Fortified in covetousness, the enemy makes his final stand. It is precisely in urging his people to sustain missions, education and the support of the poor that the preacher can train them to that true idea of the Christian use of values upon which the salvation of many individuals and the triumph of the gospel is waiting.

As comprehending all and above all, the minister must consider that he stands nearer to midday glory by just one year; that the glorified Redeemer is certainly "filling all things" with his own life and fullness; that the Holy Spirit is about to baptize with us might and fire every company gathered in his name; that the gift at Pentecost was not the discovery of a mine which is being gradually exhausted, but the kindling of a glory which is to envelop the world. Let him write on his escutcheon: "The ascending prayer and the descending flame." He must see that every soul in his congregation be awakened, every mourner comforted, every saint built up. No dull routine or undisturbed atmosphere must chill the house of God—no, nor emptiness, nor dust; but the place must be as an angel's ladder, full of life and beauty. He must shelter all weak people, and guide all ignorant ones, and tenderly care for the budding youth—even those whose souls are still plastic as clay must be hastened to knead with holy fire. He must not yield this most impressive part of his flock to the sole management of others, but both at their homes, in the Sabbath school and at the church talk to the children and preach to them. "Who is sufficient for these things?"

"RECONSTRUCTION."

There are representative words as well as representative men. But not unfrequently the word survives the idea which it represents, and is used to give weight and description to schemes and conceits wholly foreign to its original use. Under the cloak and confusion of this word "reconstruction" the Congress of the United States is pushing the Republic rapidly forward to its destruction. Having adopted the policy that the party that brought the war to its issue must be kept in power, it is ready to sacrifice every right of the people to this end. But there must be maintained some show of constitutional action, even while the most vital principles of government are being undermined. It is the half serious occupation of making and unmaking States that affords precisely the occasion and the room for the accomplishment of unlawful ends in a seemingly lawful way.

That the party which controlled and concluded the war should hold the reins of the country after the war, and for a long time after, was not only to be expected, but any other result would have brought the heads of its principal managers to the block. They themselves, therefore, if possessed of common sagacity, would see to it that the power and means of self-preservation should not slip through their fingers. If anybody was to be court-martialed or sacrificed to the last spasms of the conflict's dying rage, they preferred, naturally enough, to be the court and not the victim. A few hours of combined force be-

tween Northern Democrats and amnestied Southern representatives would have sufficed to sweep the last Radical leader into the deep. We say, therefore, it was a question of physical comfort, as well as political place, which those gentlemen had to attend to. They were not quite ready to finish up all their sacrifices for the country with their own persons. We take this to be a plain, common sense view of the case. And from this point we are to start in making our deductions from Radical policy, viz: that control of the country must be kept at all hazards.

We can now see how they are doing this. Everything that stands in the way to this end must yield. It may be the terms of capitulation granted; if so, they must be violated. It may be the President's amnesty proclamation, or the still greater obstacle of President Lincoln's system of State restoration, as adopted by Mr. Johnson; if so, both must be ignored. It may be the President himself; then he must be impeached. If executive prerogatives and the power of that department prove to be standing directly across the way, then that department must be shorn of its power or annihilated. Even the last final hold of strength, the Supreme Court, must not be allowed to interfere, and if it cannot be quieted it must be throttled. And this, in fact, is now being done; the bills of Mr. Drake in the House, and of Mr. Trumbull in the Senate, propose to take away from that high department of the government all those most important powers, secured to it by the Constitution, of deciding upon the validity of the acts of Congress.

So the work goes forward in the interest of one single idea—that of keeping in power. Compared with this, all the legislation of the Congress or of the made-up State assemblies is but as child's play. If the regularly elected representatives are not radical, thoroughly so, in their views, they must either be kept out of place, or the whole body admitting them must be remanded into an inchoate military condition, to be remanipulated. We may already see that the Northern States, no less than the Southern, are to be dominated into the great purpose. The passage of the fifteenth amendment is to be carried by force. The negro will then serve to enslave politically the whole country under the guise of a free voter. His vote will carry the South, and serve to hold the balance of power against a divided North.

Meanwhile the country, weary of war and full of its industrial success, suffers this violence with apathy. While the chains are being placed upon its limbs and the bolts riveted, it scarcely looks up from its pursuit of gain. Even sensible men, full of railroad and commercial and manufacturing schemes, think that everything is doing well, and that every warning voice is only the cry of some disappointed politician. The great question of man's capacity for self-government is about to receive its solution on this continent, and another chapter is about to be written in the world's history, that masses of people are not adequate either to perceive, to assert or to maintain their own political rights.

NEW ADVERTISEMENT.—Beaumont, Fakes & Co., cotton and tobacco factors, 77 Carondelet street. We heartily recommend this house to our friends.

GOD'S METHOD OF HEALING.—God did not take up the three Hebrews out of the furnace of fire, but he came down and walked with them in it. He did not remove Daniel from the den of lions; he sent his angel to close the mouths of the beasts. He did not, in answer to the prayer of Paul, remove the thorn in the flesh, but he gave him a sufficiency of grace to sustain him.

EVERY ONE must find out for himself the key to the riddle of life. It is of no use to have it told. Some do not hear, others misunderstand it.

EFFECTUAL prayer brings from heaven's ample chambers the choicest blessings down upon earth.

THE LABOR QUESTION.

We are decidedly opposed to the policy which would remedy the negro with the Chinaman. Two evils do not necessarily neutralize each other. They may greatly aggravate and mutually enlarge each other. That the South needs in every county a few hundred laborers, who can be relied on, is conceded. The question is, where are they to come from? We think that the tide of German immigrants which has hitherto mainly expended itself upon the West and Northwest is about to set toward our own shores. Already many have passed into the Attakapas region, and more are expected. On a recent visit to Montgomery, Alabama, we conversed with parties who have for some time been served by recent immigrants from Sweden and Finland. They give great satisfaction, are neat, industrious and pleasant in their manners. They soon acquire the English language, and, in fact, work very much like Americans. We append a letter below, which will give a good deal of information on this subject.

MISS. CENTRAL R. R. PRESIDENT'S OFFICE, WATER VALLEY, MISS., OCT. 25, 1869.

T. L. MOUNT, TREASURER—Dear Sir: We are in receipt of your letter of the nineteenth instant. You ask on what terms we can furnish you one hundred or more men (Swedes.) You state that women accompanying them can find employment at good wages. Mr. Bergland has just returned from Sweden with many immigrants of both sexes, all of whom were previously engaged. His brother will leave on the fourth or fifth of November for Sweden to provide for numerous orders now on file; would like to have yours before he leaves. We can deliver you the required number by the first of January or February. We have perfected arrangements to furnish from one to ten thousand. We are now preparing to sell, to such as have money and desire to emigrate to the United States, such lands as may be entrusted to our agency—are charging commission on sale of same. The Berglands are natives of Sweden, one of whom settled at this place before the war. They are Lutherans in religion, hence possess superior advantages in getting reliable men and women. All who are here, through their agency, are sober, industrious, economical and civil servants or laborers. They have, without a single exception, so far as we have heard, given entire satisfaction to their employers. We charge for our services, and risk and outlay of money for contracting with a single person, and aiding him or her to reach his or her destination, \$10; for two persons to one order, \$18; for three persons to one order, \$25; for each additional person, not exceeding twenty, to one order, \$7 50; for the number you name in your letter we will charge only \$5 per person; \$36 in gold, or its equivalent in currency, must be sent with the order, to defray the expenses of each immigrant from Sweden to New York city. We will receipt and be responsible for the same. In addition to this advance you will be required to furnish them transportation, and provide them food from New York to place of destination. The money thus advanced to defray their expenses from Sweden to New York, as also the cost of transportation and food from New York to place of destination, will be repaid in labor by the Swedes thus employed, at a rate which shall not exceed \$10 per month for women, and \$15 per month for men, board and lodging included. Should we, from any cause, fail to deliver the number of laborers or servants ordered, we will, of course, refund the money advanced to the extent of the failure—that is to say, \$36 in coin, or its equivalent in currency, for each person ordered and not delivered, less five per cent. the cost of exchange. The ship on which they embark may be wrecked, and the immigrants lost, or they may die from disease before reaching New York city; in either event we will have incurred the expense or risk, under any circumstances, as we, for our own security, will have the lives of the immigrants insured for an amount to recover the remainder of the advance and our outlay. Besides our business connections and financial condition afford, we think, ample security to you, etc. The writer of this, A. M. West, is personally known to Colonel Charles T. Pollard, president of the Alabama and Florida Railroad Company, as president of the Mississippi Central Railroad Company, and also to Mr. B. Pritchard, engineer on the North and South Alabama Railroad. Mr. O. Wallace is acquainted with his general character—all, I believe, citizens of your city. Mr. Bergland settled here before the late war, and by energy, enterprise and promptness in business, has succeeded in

establishing a sash, door, blind and furniture factory, in which are now employed seventy persons. He also contracts to frame and erect houses at any point on the line of this road. Mr. Pritchard has a practical knowledge of his usefulness and worth. The manager of the Mississippi Central Railroad Company, Colonel Sam. Tate, has ordered, through us, two hundred, to be located as laborers on the line of the road. His policy is to supply each section with them, including cooks, furnishing them with comfortable quarters, and two acres for a garden at each section headquarters. We will, as aforesaid, be pleased to receive your orders and remittance before Mr. Bergland leaves for Sweden.

Respectfully, etc.,
A. M. WEST,
G. BERGLAND.

NEW PUBLICATIONS.

THE STATE OF THE DEAD. By the Rev. Anson West. Nashville: A. H. Redford, agent. 1869. 12mo. pp. 258.

This is a well written book. The subject which it discusses is of abiding interest, though but seldom introduced to the attention of the church. The views of the author upon it are at variance with the generally accepted ones of our pulpits and standard writers. He calmly and patiently examines the passages of Scripture upon which the doctrine of a middle state rests, and presents difficulties which, to say the least, are worthy of found study. The church has accepted the early teachings of the first reformers upon this and kindred matters, though nothing is likely as that their earliest thoughts were so deeply colored by the superstitions of Rome as to make them incapable of freeing themselves wholly from their influence. The perusal of this unpretending volume will lead the praying and thinking part of our people to examine much of the notion of purgatory still remains in our creed. For sale by Rev. R. J. Harp, 112 Camp street.

BIBLE ANIMALS. By the Rev. J. C. Wood, M. A., F. R. S., etc. With one hundred designs. New York: Charles Scribner & Co. 1870. 8vo. pp. 651.

This is the book for a Christmas present to young people. It treats of "every living creature mentioned in the Scriptures, from the ape to the coral." The importance of zoology in elucidating the Scripture will readily occur to every Bible student. The author introduces the latest information, derived from Eastern travelers, in illustration of the habits and history of animals. One is surprised at the vast number of beasts, fishes and reptiles mentioned in the Old and New Testaments, and is again impressed with the overflowing wealth of the inspired writers in all knowledge, terrestrial as well as celestial and heavenly. The engravings are well executed, and a large proportion them original. For sale by R. Harp, 112 Camp street.

TEXAS CONFERENCE.

APPOINTMENTS.

GALVESTON DISTRICT.—J. M. Wesson, P. E. Galveston station; L. Lewis; Galveston circuit, I. G. Job Bay mission, R. Alexander; Houston, B. T. Kavanaugh; Houston circuit, H. S. Thrall; Hempstead circuit, to be supplied by U. S. Spencer; Navasota, M. G. Jenkins; Mission, H. G. Horton; Bryan station, supplied by T. T. Smothers, J. Addison, supernumerary; Bryan circuit, H. V. Philpot; J. G. Jones, editor of Texas Christian Advocate.

HUNTSVILLE DISTRICT.—J. G. Jones, P. E. Huntsville, T. B. Bingham; Cold Springs, to be supplied by E. A. Stocking; Dayton and Waverly, G. S. Smidel; Montgomery, to be supplied; Anderson, A. W. Smith; Madisonville, to be supplied by W. Deason.

CHAPPELL HILL DISTRICT.—D. Dashiell, P. E. Chappell Hill; G. Connor; Brenham, F. A. M. Union Hill, to be supplied; Palestine, J. Matthews; Independence, R. W. Kennon; Caldwell and Irvington, W. G. Nelms; Yegua, R. D. G. Bowers; Burleson, H. Porter; F. A. Mood, president; Soule University; W. G. Connor, president Chappell Hill Female College; W. H. Seat, agent Soule University and Chappell Hill College.

COLUMBIA DISTRICT.—J. H. S. ard, P. E. Columbia, to be supplied; Richmond and Wharton, V. Ridley; San Felipe, J. S. Ch. Mutagorda circuit, E. B. Brazos colored mission, A. M. ney; Glover's colored charge,

The Child's Corner.

TIS BUT A DROP.

"Tis but a drop," the father said,
And gave it to his son;
But little did he think a work
Of death was then begun.
The drop that lured him when a babe—
Scarce lisped his father's name—
Planted a fatal appetite
Deep in the infant frame.

"Tis but a drop," the comrades cried,
In transient school-boy tone;
"It did not hurt us in our robes."
It will not now we're grown.
And so they drank the mixtures up,
That reeling youthful band;
For each had learned to love the taste
From his own father's hand.

"Tis but a drop—I need it now,"
The staggering drunkard said;
"It was my food in infancy—
My meat and drink and bread.
A drop—a drop—oh, let me have,
'Twill so refresh my soul!"
He took it—trembled—drank and died,
Grasping that fatal bowl.

Blessed are the Peace-Makers.

It was a dark and dismal night,
and yet scarcely less dreary inside
the little cottage that stood by the
wayside, than without. Snapper had
ended, a quiet, uncomfortable meal,
for fierce passions were at work in
her father's breast, and while it was
so, Amy Brown could not be at rest.
She knew the cause. Her father
had been deeply injured by an un-
principled man in the neighborhood.
It was in such a way as not only to
bring trials to himself—he might
have borne that—but the little cot-
tage might have to be sold, and
then all he had provided for his
only daughter, in case of his death,
would be lost to her. The thought
of this was unbearable. Supper
was over. Amy was washing
the ten things and putting the
room to order. Still her father sat
thinking gloomily over his wrong.
She tried in many ways to turn his
thoughts from it, but all in vain.
At length he rose and paced up and
down the room, with angry, passion-
ate motions. She knew what he
was when his evil temper got the
mastery, and she feared the result.
She felt that when his anger had
cooled he would be sorry for what
he might have done in a moment of
passion, and her heart sank within
her. Her mother's last request:
"Watch over your father, Amy, and
try by all means in your power to
help him to conquer his evil tem-
per," came to her. She inwardly
prayed for strength to do right.

"Where is my hat, Amy?" asked
her father.
"It is such a dreary night, father.
Listen to the storm. Do not, for
my sake, venture out in it; it can do
no good."
"Better that, Amy, than the
storm within. I must go; do not
deter me."

"You may regret it to-morrow,
father."
"That is my own lookout. Let
me alone, Amy; you can do no good."
He was bent on going then, and
she must yield. Oh for some power
stronger than her own to keep him
back. His hand was on the door—
that once passed, and she dared not
think what might happen. Should
she speak again, and thus bring his
anger upon herself? It was a try-
ing moment, but the asked-for
strength was given, and words were
put into her mouth. In a low,
tremulous voice she said:

"Vengeance is mine; I will re-
pay, saith the Lord."

Her father let go the latch, and
sinking into a chair, buried his face
in his hands in deep emotion. Soon
the struggling was over; when he
lifted up his head he was calm again.

"Amy," he said, "you have saved
me. No words like those could have
such power to turn me back from
evil. My mother repeated them to
me when I was a child. Her pale
face, as she urged me always to bear
them in mind, rose up before me as
they fell from your lips, after so
long a time. Had I passed the door
just now I feel that I should not
have entered it again an innocent
man. You have this, through the
blessing of God, kept me from the
commission of a dreadful crime.
Will you not make it your constant
prayer that in the future I may not
be overcome of my evil temper, but
that, through the power of God, I
may become a changed man?"

Great thankfulness filled Amy's
heart that she had withstood the
temptation to remain silent, and
had been strengthened to do even
the little that she was able to keep
back her father from evil.

"Blessed are the peace-makers,
for they shall be called the children
of God."

The prayer which Socrates taught
his disciple Alcibiades deserves a
place in the daily devotions of every
Christian. "That he should be-
seal the supreme God to give him
what was good for him, though he
should not ask it, and to withhold
from him whatever would be hurt-
ful, though he should be so foolish
as to pray for it."

Apples taken for breakfast are
said to be a cure for dyspepsia.

Scientific.

Spontaneous Combustion of the Human Body.

In a former number we spoke of
the belief in the spontaneous com-
bustion of the human body as "a
vulgar superstition." A correspond-
ent calls our attention to articles in
encyclopedias, which refer to "well
authenticated instances" of such
combustion. Let us examine this
matter in the light of what is actu-
ally known.

We must, in the first place, care-
fully distinguish between the notion
of "preternatural combustibility" of
the body under certain abnormal
conditions, and that of its *spontane-
ous combustion*. The former is
not impossible; indeed, there are
tolerably "well authenticated in-
stances" of the kind. The latter,
if not absolutely inconceivable, is
in the highest degree improbable,
and eminent physiologists who have
carefully investigated all the cases
in which it is alleged to have oc-
curred, do not find a single one es-
tablished beyond a doubt.

The earliest case of the kind, which
has a semblance of authority to sus-
tain it, is said to have happened in
1725, and from that time down to
the year 1847, when the last alleged
case occurred, some fifty instances
are recorded. Liebig made an
analysis of all these cases in 1851,
and found that they nearly all agree
in the following points:

1. They took place in winter. 2.
The victims were hard drinkers, and
were drunk at the time. 3. They
happened where the rooms were
heated with fires in open fire-
places or pans of glowing charcoal.
Cases where rooms are heated by
means of closed stoves are exceed-
ingly rare. 4. It is admitted that
no one has ever been present during
the combustion. 5. No one of the
physicians who collected the cases, or
attempted to explain them, has
ever observed the process, or ascer-
tained what preceded the combus-
tion. 6. No one has known how
much time had elapsed from the be-
ginning of the combustion to the
moment when the consumed body
was found.

Out of forty-five cases collected
by Frank, of Berlin, in 1843, there
are only three in which it is assumed
that the combustion occurred when
there was no fire in the neighbor-
hood; and Liebig clearly shows
that these three cases are totally
unworthy of belief. The conclusion
to which he comes is that "spontane-
ous combustion in a living body
is absolutely impossible." Flesh which
has been saturated with alcohol for
a great length of time, as anatom-
ical preparations, is not combusti-
ble; if ignited, the alcohol burns
off, scarcely charring the flesh. The
corpses of drunkards have never
been found to be combustible.

M. Duvorgne has opposed Liebig's
views, and has expressed the opinion
that molecular changes may take
place in the living body, by which
it becomes more combustible from
the absorption of alcohol, or from
its conversion into more inflamma-
ble compounds; but he admits that
the combustion is probably never
spontaneous. Dr. Mare has sug-
gested that inflammable gases, and
possibly even phosphoreted hydro-
gen, which, under certain circum-
stances, inflames on contact with
the air, may be generated in the
living body, and may thus give rise
to its spontaneous combustion; but
this is merely a theory to account
for such cases of combustion, if they
have occurred.

On the whole this idea of spontane-
ous combustion appears to be one
of those old medical delusions which,
having once gained a sort of cre-
dence, are not readily given up. It
is easy to see, as Liebig observes,
that it arose at a time when men
entertained entirely false views on
the subject of combustion, its es-
sence and its cause. It is only since
the time of Davy, or for about half
a century, that combustion has come
to be thoroughly understood. After
people had once got it into their
heads that the body might take fire
of itself, it is not singular that when
a man happened to be burned up,
the case was explained in that way
if it could not readily be accounted
for in any other way; just as him-
reds of fires caused by carelessness,
not easily detected, are charged to
be mysterious "incendiary." Then
again, other things being equal, the
more marvelous explanation of
strange phenomena is usually the
more popular one. The Latin
proverb *omni ignotum pro magno*
est might be read *omni ignotum pro*
mirifico est, with everybody, what-
ever is unknown passes for a mar-
vel. We need not be surprised,
therefore, that this idea of human
combustibility, which was not inco-
sistent with the scientific knowledge
of the age in which it had its origin,
and which consequently came to be
accepted by the scientific men of
the time, should still live as a popu-
lar superstition, and even find an
occasional defender among the sa-
vans of this more enlightened day.

Boston Journal of Chemistry.

The Farm and Garden.

Cotton and the Cereals as Impoverishers of the Soil.

We have shown that there is car-
ried off annually, from the soil of
the South, one hundred and forty-
eight times as much phosphoric acid
in the cultivation of the cereals as
there is in the cotton culture, count-
ing simply the fibre as the only per-
manent loss. Allowing that one-
half of the phosphoric acid is re-
turned to the soil in one way or an-
other, we shall still have seventy-
four pounds for one lost by the cul-
tivation of corn, wheat and oats, as
against cotton fibre. The disparity
against nitrogen is even still greater.

The question then naturally oc-
curs, how is it that cotton seems to
exhaust the soil faster than the ce-
reals, if the two great elements of
nitrogen and phosphoric acid are so
little affected by it? We answer
that there is another essential prin-
ciple called *humus*, which cotton
rapidly exhausts from the soil, and
without which there can be no re-
munerative crops. While the ce-
reals destroy nitrogen and phosphoric
acid rapidly, cotton is equally de-
structive of humus. Not so much
by what it carries off from the soil
as by the process of its culture.

But as so many of your readers
are so little versed in agricultural
chemistry we will say something
more about this important prin-
ciple, humus, without which nitro-
gen and phosphoric acid would ac-
complish nothing. Humus then is
the great source of the wood and
vegetable fibre of all plants. It
does not matter whether Liebig's or
Saussure's theory is true (the one
contending that it feeds plants by
slowly furnishing them with car-
bonic acid, the other that humic
acid is taken by plants without de-
composition,) the fact remains in-
disputable, that it is the great source
of the carbon and vegetable fibre of
plants. True, some contend that
the atmosphere furnishes the bulk
of this principle through the leaves,
without the intervention of the
roots or soil, but though it has been
demonstrated that plants imbibe
carbonic acid from the atmosphere,
it is very clear to our mind that de-
caying vegetable matter is the great
source of carbon to most plants, at
least those which are deciduous.
Else how could they germinate and
grow without leaves, in the first in-
stance? And is it not very rational
to suppose that if the soil furnishes
all the carbonic acid to a plant until
the regular leaves are formed, that
it furnishes the bulk of it after their
formation?

But humus not only supplies car-
bon to the plant to form the wood,
it also supplies carbonic acid to the
soil, which disintegrates its rocks,
setting free potash and silicic acid,
by which silicate of potash is formed,
and also rendering phosphoric acid
soluble so that seed may be formed
in the production of a perfect plant.

But how does cotton exhaust hu-
mus from the soil? We answer,
first, by the vegetable fibre sent off
in the lint, which amounts to two
millions of tons annually. Second,
by clean culture, which destroys
every weed and spire of grass that
comes up during the summer before
it has time to develop into a perfect
organized plant and become a source
of humus. Third, by the plan al-
most universally adopted by farmers
of depasturing their cotton fields
during the winter, by which a good
portion of the scant vegetable mat-
ter left to decay on the soil is carried
off by the hungry cattle. This
process, continued for a few years,
will so effectually destroy the hu-
mus of any soil as to render it
wholly unproductive.

Thus we perceive that cotton is
the great exhauster of humus, and
the cereals of nitrogen and phos-
phoric acid. True, on a farm where
the cotton seed is not returned to
the soil, immense quantities of ni-
trogen and phosphoric acid are lost
to it from cotton culture; but the
application of all cotton seed to the
farm is now universally made. The
heating process through which it
passes, however, loses many tons of
nitrogen annually to our soils. We
will hereafter show how all this may
be saved, and become itself a great
source of humus.

But it may be asked, will not
other salts, as potash, soda, lime
and magnesia, which enter so largely
into the organization of plants, have
equally as good effects as nitrogen
and phosphoric acid? We answer,
no; for we have demonstrated the
fact again and again, by actual ex-
periment. We have applied lime as
a hydrate, carbonate and sulphate,
without the least possible increase
of the cotton plant. As a nitrate
there is a small increase of the weed.
We have used common salt, repre-
senting chlorine and soda, with
scarcely any perceptible effect, and
this owing, no doubt, to the action
of the hydrochloric acid on the in-
soluble phosphate in the soil. We
have used sulphuric acid with some
increase, attributable to the same
cause; and so of potash, which we
think acts more in our aluminum
soils by its solvent power than as a
direct food for plants, but in every

instance and with every kind of
soil, the soluble phosphoric acid
produces the most wonderful re-
sults. Our soils then are exhausted
mainly, if not entirely, by the ab-
straction of three principles as here-
before indicated, viz: carbon (as
represented by humus,) nitrogen
and phosphoric acid.

Having arrived at these conclu-
sions, it is clearly inferable that
proper rotation of crops is essential
to our agricultural improvement.
We want three principles restored
to the soil, which are being const-
antly exhausted—the absence of
either being fatal to the interest of
the farmer. Nitrogen and phos-
phoric acid can be applied to all
lands containing humus, with suc-
cess and remuneration, provided
they are made to sustain the proper
relations to each other as to quantity
and chemical affinity. But on a soil
exhausted of humus, or nearly so,
they will not pay a farthing. Hu-
mus cannot be applied as a fertilizer,
remuneratively, while virgin soils
are so cheap at the South. Our
only hope then for a constant sup-
ply of this valuable principle is in a
proper rotation of crops, rest and
non-pasture. — *Correspondent of*
Southern Farm and Home.

BEESWAX.—It is announced that
England alone consumes every year
at least two thousand tons of bees-
wax, valued at \$2,100,000. With
gold at 130 the best bright pressed
yellow American beeswax is now
selling in England at from forty-five
to fifty-one cents per pound. Wax
candles are used extensively in the
royal palaces of Europe, and in one
palace alone it is stated that ten
thousand wax candles are burned
every night. The method of light-
ing this large number of candles in-
stantaneously is to connect the
wicks by an inflammable and scented
thread of gum cotton. On touch-
ing the end of the thread with a
torch the flame flashes like light-
ning round the connected candles,
and an agreeable odor is emitted,
and the apartments are illuminated
and perfumed as if by magic.

Mrs. STANTON tells us that "nature
is mightier than human law, and
true marriage is beyond the cog-
nizance or sanction of State or
Church." No comments are neces-
sary to show the intent of this new
platform—in the first place a com-
plete rejection of the Bible, and in
the second a universal licentious-
ness under an odious system of Free
Love.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD
NOW IN USE.

THE FASHION.

We call especial attention to this Stove,
which has been produced at great expense,
combining all the new and important im-
provements; also the extra height of the
Chamber, Front Doors, and Patent Air
Inletted Iron Knobs, the improvements in
the covers and centre pipes, all of which
have been covered by Letters Patent, and
are used in no other Stove. They are war-
ranted to stand fire, or others sent free of
charge in all cases. We have all sizes of this
justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,
the Extended Back with cast Iron Enamelled
Reservoir and Faucet, Tin Warming Closet,
Gridiron Cover, etc. The part of the top
above the top plate, instead of below, as is
the case in most of the Stoves now used, and
the heat is forced directly against the whole
surface of the bottom of the Reservoir. The
Reservoir, being detached from the pipe, can
be removed at pleasure, thereby forming a
six-hole Stove—the best in use, as the back
holes will heat as well or better than the mid-
dle ones. For sale by
G. W. W. GOODWYN,

ALSO, THE MOST

Complete and Perfect Cooking Stove
FOR KITCHENS COAL OR COKE

over invented. In the estimation of all who
have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The
advantages possessed by this Stove over all
other Cooking Stoves are so numerous,
and so patent to every sensible observer,
that it is only necessary to examine it in or-
der to be convinced of its superiority.

All of the above Stoves are fitted with ex-
tra care, eleven doors lined with tin, and
furnished with William Resor's Patent Air Cham-
ber, sliding front doors, patent centres, cov-
ers and White Enamelled Knobs.

The operation of every Stove guaranteed.
Directions for putting up and using same
accompany each Stove.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,
with extended Fire Chamber and Feeder Top
—one of the best Baking and most economi-
cal Stoves made.

The Flues are constructed so as to insure
the most perfect draft. The heat of the oven
is so equal that when baking there is no need
for removing anything until done.

THE TIMES

is made of a superior quality of Iron, very
heavy, of neat design and fine finish. The
Top Plate is put together in sections, to per-
mit of the greatest expansion without crack-
ing.

We invite the attention of Housekeepers
to the advantages of this Stove. Remember,
we guarantee them to give entire satisfac-
tion. Duplicate parts can be had at all times,
at small cost, by which repairs can be made
which will frequently save the price of a new
Stove.

STOVES, GRATES AND HOUSE FUR-

NISHING GOODS.

The undersigned would call the attention
of city and country buyers of Cooking Stoves
to the following list of Stoves manufactured
by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of
the latest improvements that have so far
been invented. Has a new arrangement for
boiling; also an Ash-pan. The casing is
heavier than any Stove sold in this market.
Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thou-
sands of this stove are in constant use
throughout the country, which is a very good
recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on
hand the celebrated Cotton Plant, Charter
Oak, True Kentuckian, Maud of Orleans,
Queen of the South, Beauty and others, all of
which I offer at a low price.

J. H. CAMPMAN,
no 13 6m 133 Poydras st., New Orleans.

THE CHARTER OAK COOKING STOVE.

From and after this date I shall keep a full
stock of the celebrated

CHARTER OAK COOKING STOVES,

so universally approved by all housekeepers,
and by special arrangement will be able to
fill all orders as low as they can be had.

Orders for this celebrated Cooking Stove
solicited, and satisfaction guaranteed.

SATURDAY, JANUARY 8, 1870.

A WAR REMINISCENCE.

HOW STANTON SAVED LINCOLN FROM SUICIDE.

Mr. Lincoln was very sensitive of the criticisms of the newspaper press, believing it, as he asserted, the true voice of the people. The failures of McDowell and McClellan and Burnside and Pope with the Army of the Potomac, and the accompanying criticisms of the newspapers, had almost crazed him. Time and again he would free himself from the White House, and seek Mr. Stanton's little office, the only place in Washington, he often remarked, where he was free from bores. He often talked to Mr. Stanton of resigning or pressing on Congress the propriety of giving control of the army and navy to military men. It was during this period that he conceived the idea of putting Hooker in command of the Army of the Potomac, and have him make an effort for success. From the time that Hooker began to march until the smoke of battle had cleared from the fatal field of Chancellorsville he scarcely knew what it was to sleep. It will be remembered the fight lasted three days. During the first two days it looked as if Hooker was about to accomplish what so many had failed to do, but on the third day the usual half hour dispatches began to make matters look worse. That whole day Mr. Lincoln was miserable. He ate nothing, and would see no one but Mr. Stanton. As it grew dark the dispatches ceased coming altogether. The President walked from the White House to the War Department and anxiously inquired for Hooker. The night was dark and stormy—about as mean a night as was ever experienced in Washington. About seven o'clock the President closed his visits to the War Department. An hour afterward a dispatch of an indefinite character was received, and Mr. Stanton hurried with it to the White House. He found Mr. Lincoln walking the room, and, as he entered, the agonizing appearance of the man so terrified him that it was with difficulty he could speak. Mr. Lincoln walked to him like a wild man, and, seizing the dispatch from his hand, read it, and simply remarked: "Stanton, there's hope yet!" At Mr. Stanton's solicitation, he accompanied him to the War Department, where they agreed to spend the time together until something definite was heard from General Hooker. For four hours, the longest and most wearisome of his life, said Mr. Stanton, they waited before the dispatch announcing the retreat of Hooker was received. When Mr. Lincoln read it, he threw up his hands and exclaimed: "My God, Stanton, our cause is lost. We are ruined, and such a fearful loss of life. My God, this is more than I can endure." He stood trembling like a leaf, his face of a ghastly line, the perspiration rolling from his brow. He put on his hat and coat, and began pacing the floor. For five minutes he was silent, and then turning to Stanton, he said: "If I am not about early to-morrow don't feel alarmed. Defeated again, and so many killed. What will the people say?" As he made the remark he went to open the door to go out. His action alarmed Mr. Stanton, and he stopped him and entreated him to return, that they might talk and act like men. With difficulty he had him return, and Mr. Stanton began to try to cheer him. He finally got him to assent to retire to bed, and leave for the army together next morning, which they did. Lincoln afterward told Mr. Stanton that when he spoke to him about not being alarmed if he was not about the next morning, he had fully made up his mind to go to the Potomac and drown himself. Mr. Stanton said he thought at the time he contemplated suicide, and never felt so frightened during his lifetime.—Philadelphia Post.

A WOOD SAWYER, who was piling wood near the railroad track at Edgerton, Ohio, one day last week, noticed, while standing on the pile as the lightning train approached, a large stick of wood lying upon the rail. Without a moment's hesitation he leaped directly before the train and grasped the stick. At that moment the engine struck him and hurled him some distance forward. He fell to the ground mangled and lifeless, but he had saved the train.

THE DOUGLASS TO THE POPE.—A telegram from Rome, December 14, says that the Bishops have brought a great number of addresses and presents to the Pope. It is officially stated that, since 1859, the Holy See had received one hundred million francs from the contribution of Peter's pence.

Vice does not pay; the sin is less sweet than we fancied, and it costs more than we bargained for.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much.
Send for descriptive circular. sec 25 ly

MEDICINE—MEDICINE.

BRAN NEW LETTERS!
FRESH TESTIMONIALS!
DARBY'S PROPHYLACTIC FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 28, 1869.

Messrs. J. D. DARY & Co., 161 William St., N. Y.—Gents: Yours of the 23d is before me, and in reply, I give you pleasure to say that my belief is that your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted to a skeleton by the effects of teething, and an affection of the bowels, which I had never seen any one reduced so low to recover.

Physic had been tried in vain, and the physicians stated it was useless. A friend recommended your Fluid, or Ozone, which he stated was one of the component parts of it. I did so, and the effect was like magic, plainly discernible in one hour in his good effects, producing quiet and sleep almost at once, where irritation and sleepless restlessness had previously possessed the child to nearly entire exhaustion.

I at first administered it in a small way, two and three drops in a spoonful of water, and increased it to six and ten drops. It completely checked the bowels, and had the happiest effect, the child rapidly recovering.

I have tried your Fluid on animals, with the same effect—both horses and cows—relieving more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Cholera Morbus, or any violent affection of the bowels.

I would be without it in my family under any consideration. Yours truly,
WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Somerville, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Palmer, of the Methodist Episcopal Church South:

150 Broadway, N. Y., July 29, 1869.

Messrs. J. D. DARY & Co., 161 William St., N. Y.—Gents: About the 10th of June last one of my children was taken with Scarlet Fever, in its most malignant form, and as soon as I could I procured your valuable Fluid, Darby's Prophylactic Fluid. Although it was several days after the appearance of the disease before I began using the Fluid, still by a free use of it the disease was not only confined to the one case, but the malignancy of that case somewhat mitigated.

During the use of the Fluid, as a disinfectant in my family it was also tried in a case of measles and one of toothache, the results in each case being instantaneous relief. It was also tried in a case of dyspepsia, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Brydella (a question being located in the foot, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, for upon subsequent examination it had disappeared, and though it was sought for diligently, it could not be found.

I hand you this, hoping it may be the means of relieving others of earth's poor sufferers to test for yourselves, as I did, the great utility of this great remedy.

Very respectfully yours,
FRANK SAUNDERS.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.

Open day and evening the entire year.
Penmanship, Book-keeping, Mathematics, and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here specially qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. H. Walker, of New Orleans, has charge of the Mathematical department. Terms: Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address
J. W. BLACKMAN,
sec 1 ly New Orleans.

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term.....\$20 00

Collegiate department, per term.....25 00

Latin and Modern Languages, each.....10 00

Music on Piano and Guitar.....25 00

Use of Instrument.....5 00

Drawing and Painting.....\$20 to 25 00

Contingent fee.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Itinerant ministers charged no tuition in the Literary Course.

Special attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keefer.

For information address the President,
G. H. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, MAON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scientific Apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson system adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

MUSIC DEPARTMENT.—Dr. S. M. Bartlett, principal.—Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, and of the Tuskegee Female College in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market continues to exhibit only a moderate degree of animation. Wholesale dealers complain of a limited demand from country merchants. The local trade, however, is fair. Stocks are ample, and goods are offered at reasonable prices. Sugar has been dull and drooping, but molasses has continued in good request at full prices. We have only a moderate business to notice in Western produce, the sales of which have been mostly confined to the local trade.

The accounts from the country present no new feature. The tributaries are all at a good navigable stage of water, and more liberal receipts of cotton are anticipated. The advances with regard to sugar continue discouraging, and many doubt if the crop will much, if at all, exceed 70,000 hogsheads.

The river has risen since our last, and is now five feet four inches below high water mark.

COTTON.—The following are the arrivals since the thirty-first ultimo:

Louisiana and Mississippi, bales, 1867	10,816
Lake	68
Mobile	300
Florida	146
Texas	146
Total	20,334

On Saturday, owing to extremely inclement weather, and its being a close holiday, the business was confined to 1,000 bales. On Monday the movement was renewed with increased spirit, and although the supply was only moderate and foreign exchange gave way $\frac{1}{2}$ per cent., 7,450 bales changed hands at stiffer prices for the ordinary grades, but previous rates for low middling, and an advance of fully $\frac{1}{2}$ c. in middling and the finer qualities. On Tuesday the market opened with a very good inquiry, especially for the better qualities, which were scarce and held at outside rates, while the lower grades hardly maintained their previous position, and the movement was rather slack, but late in the day buyers came forward with increased spirit, and the sales summed up 6,900 bales, the tendency of prices at the close being rather more in favor of buyers than at an earlier hour. An unusual proportion of the receipts for three or four weeks past has consisted of dusty and stained cottons, which are consequently difficult of sale, and are often disposed of at a fraction under inside figures.

This makes an aggregate for the past three days of 15,350 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 465,323 bales, against 451,611 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 224,823 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 129,698 bales to Great Britain, 12,714 to other foreign ports, while to France there is a decrease of 6,198 bales.

Referring to our remarks above, we quote as follows:

Ordinary	21 1/2 to 22 1/2
Good ordinary	22 1/2 to 23 1/2
Low middling	23 1/2 to 24 1/2
Middling	24 1/2 to 25 1/2
Strict middling	25 1/2 to 26 1/2

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	20,334
Arrived previously	475,729
Exported past three days	3085
Exported previously	331,854
Stock on hand and on shipboard	161,444

SUGAR.—The market has been dull, with a downward tendency in prices, and sales on Saturday and Monday of 400 hogsheads at 8 1/2 to 9 1/2 c. per pound for inferior, 9 to 9 1/2 c. for common, 10 to 11 c. for fair to good fair, 11 1/2 to 12 c. for fully fair, 12 1/2 to 13 c. for prime, 13 to 14 c. for choice, 14 to 15 c. for yellow clarified, and 15 1/2 to 16 c. for white. On Tuesday the market was dull, though the supplies were mostly sold at the foregoing prices, embracing some 600 hogsheads.

MOLASSES.—The demand has been good, with prices pretty well sustained since our last review.

COFFEE.—The market has been quiet but firm, with only a moderate supply offering.

MONEY.—Gold opened on Tuesday at 119 1/2 to 120, (against 119 1/2 at New York,) and closed at 119 1/2 to 119 3/4, (against 119 1/2 at New York.)

No sales of silver have been reported excepting \$1,200 in American half dollars on Monday at 118, and \$500 on Tuesday at 119, and 2,000 Mexican dollars at 2 per cent. premium in gold.

We have no movement to notice in stocks, and no sales have been reported.

Special Notices.

The Publishing Committee of the New Orleans Christian Advocate.

This committee has not been called together since the meeting of the General Conference, because in the financial state of the office there was nothing it could do. To be able to support an editor was one of the conditions necessary to the electing one. Then the expenses of such a committee should be borne by the office—another question of finance. These are simply the reasons why this call has not been made yearly. There was really nothing to do, or that could be done by the committee. As the Advocate feels somewhat like standing on its legs, or at least like stretching them in a preparatory way, we give notice that there will be a meeting of the Publishing Committee directly after the patronizing Conferences shall have all adjourned—say on the second Saturday in February next.

To the Members of the Mississippi Conference.

DEAR BRETHREN: Your committee has decided to publish the Minutes in Jackson. It is just as cheap and more convenient. The work will go forward at once. One thousand copies are to be published for \$100. Only \$80 have as yet been paid in. Please send your orders and the money immediately to me, at Jackson, Mississippi, at the rate of ten cents per copy, stating how and where you want them sent. If they are to go by mail, allow something for postage.

C. G. ANDREWS.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XV.

NEW ORLEANS, SATURDAY, JANUARY 15, 1870.

NO. 52.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Jan. 10.—Major General Charles P. Smith, commanding the Nineteenth United States Infantry, has been appointed to succeed General Mower at New Orleans. General Ayres will succeed General Smith in the command of the Nineteenth Infantry at Little Rock. General Reynolds will assume command of the Twenty-fifth Infantry, vice General Mower, deceased, but he still, however, will retain command in Texas.

There was a bare quorum in the House to-day. Blaine's vote on the motion to order a vote on the main question is considered important. The bill in question is Bingham's, and admits Virginia without any additional conditions.

The original telegraph strikers here still hold out. Their places have been partially filled. The strikers are praying for wet weather.

The reconstruction of Virginia, and the general condition of the South, was discussed in both houses. In the Senate, Stewart, Warner, Sawyer and Fowler advocated admission. Sumner, Wilson, Howard and Pomeroy suggested the obstacle. Warner wanted to go in Alabama with amnesty in one hand and a halter in the other. He would pardon the rebels but hang the murderers.

Fowler would substitute the Bible for the halter. He defended Tennessee against the alleged slanders of her congressional delegation and Brownlow.

An error was found in the vote ordering the main question on the admission of Virginia. The speaker withdrew his vote, and subsequently on the vote, "Shall the main question be ordered?" the vote stood yeas sixty-six, nays eighty. The bill then went over.

Sawyer was confirmed by the Senate for the ninth judicial circuit.

The San Domingo treaty was received by the Senate, and referred to the Committee on Foreign Relations.

General Fremont, president of the Memphis and El Paso Railroad, publishes a card in the *Chronicle* to-day defending the company from the attacks of the French and American press, denying the statement alleging frauds in disposing of the bonds in Paris, and reciting the progress of the work.

He says, under the actual circumstances, it is not too much to say that the future of the road may be regarded as secured, notwithstanding the strength of the combination against it.

The *National Intelligencer* is suspended.

Senate.—Various petitions were presented; many of them were for the recognition of Cuban independence.

The Typographical Union presented a petition for a postage telegraph.

House.—Many bills were introduced to-day, including one from Payne to reconstruct Virginia.

The bill admitting Virginia was discussed. Bingham demanded the previous question, which demand was sustained. A reconsideration of the vote ordering the main question was moved and resulted in a tie vote of seventy-six to seventy-six. The speaker then voted no.

The main question was called up, but the morning hour having arrived the matter went over.

Nashville, Jan. 10.—The Constitutional Convention was organized to-day. John C. Brown, an ex-Confederate general, was elected chairman unanimously.

Memphis, Jan. 10.—The *Avant-courier's* Jackson, Mississippi, correspondent says that Governor Alcorn refuses to be installed until the State is admitted into the Union. The Legislature will meet, ratify the fifteenth amendment, elect United States Senators, and adjourn until the State is admitted.

An injunction was issued against John Johnson, the mayor elect, at the instance of John Donouan, enjoining him from qualifying, on the ground that Johnson is not a citizen of these United States, he never having been naturalized.

Washington, Jan. 11.—Mr. Fitch, of Nevada, prepared a resolution recognizing the Cubans as belligerents, which he will press to a vote in the House.

Sumner will introduce in the Senate, on Thursday next, an elaborate bill providing for the resumption of specie payments.

Information has reached here that Missouri has probably ratified the fifteenth amendment.

The investigation in the House of

the gold panic will commence to-morrow.

Pierre Bonaparte, implicated in the recent tragedy, is a son of Lucien Bonaparte by his second wife.

The *Star* says: "The difficulties in regard to appointments in the New Orleans customhouse have been settled, the congressional delegation having agreed to leave it to the Central Committee of the Republican party of Louisiana. The doubtful names of the present incumbents will be investigated by them. Collector Casey agreed to abide by their decision, and left for New Orleans last night."

Senate.—Sumner introduced a bill funding and consolidating the national debt.

The bill exempting from tax canned and preserved fish passed.

Virginia resumed. A motion to postpone was defeated.

The discussion of the amendment to remand Virginia to her present condition in case of the retarding of her assent to the adoption of the fifteenth amendment, was discussed to adjournment.

House.—The Reconstruction Committee reported a bill for the admission of Virginia, which was made the order for to-morrow. It contains Butler's preamble.

Furness, referring to the bill from the Reconstruction Committee for the admission of Virginia, said the instructions were to allow a liberal latitude in every amendment and debate.

Bingham offered his bill as a substitute, but both were postponed until to-morrow. The indications point to a considerable debate.

Cox will move to cancel all the Reconstruction Committee bills, making the action on Virginia irrevocable. Wood will move to strike out after the first section. Eldridge remarked of the Virginia bill, that the conditions imposed were abominable.

Jackson, Miss., Jan. 11.—The State Legislature met at twelve o'clock to-day and effected a temporary organization. The oath was administered by the judge of the Supreme Court. The test oath was not required.

New York, Jan. 11.—Thirty wholesale liquor establishments were seized for violation of the revenue laws.

Washington, Jan. 12.—The annual report of the Commissioner of the General Land Office devotes much space to the Gulf States.

Referring to fifty or sixty millions of dollars expended in mining operations in Nevada, the commissioner says: "If an equal sum were expended in reclaiming lands along the Mississippi and its tributaries, not nine million acres only, but double that quantity might be prepared for the plow. That sum would be sufficient to complete levees on the parent stream, to subject the lower banks of Red river. Atchafalaya, Bayou Lafourche and Teche to the same treatment, to construct a dyke along the Gulf coast, and rescue four thousand square miles of salt marsh from the sea, leaving an unexpended balance sufficient to lower the level of Lake Okechobe, and drain some five or six million acres of tropical lands in the swamps of Florida, and on the banks of the Kissimee."

After demonstrating the value of the unreclaimed lands, the report continues:

"It may be asserted, therefore, as a proposition that cannot be successfully controverted, that opportunities for the employment of capital are to be found in the overgrown and marshy lands of Arkansas, Mississippi, Louisiana and Florida, not exceeded in the profits that would be realized by any of the great enterprises of the day."

General Banks has arrived from a European tour.

Judge Wood, a circuit judge under the new law, commences a session of court this week in Mobile.

Drake's amendment to the Virginia bill will fail, and the original bill will pass the Senate. The result in the House is more uncertain, as new members are constantly arriving, and the discussion will probably be prolonged two or three days.

The Senate is considering Sumner's finance bill, the object of which is the early restoration of specie payments. Sumner said: "There were more important matters pending than the complete restoration of the South."

The many yards question is being considered. The Virginia bill will be up in both houses presently.

Senate.—Sumner presented a protest signed by thirteen persons against the admission of Virginia. Thurman said every one of them were office-holders who would lose

their offices upon the admission of the State.

The Virginia bill was discussed to adjournment. The discussion was quite bitter, involving crimination and recrimination among the Republicans, without, however, coming to any definite action.

House.—The resolution of the New York Legislature withdrawing their assent to the adoption of the fifteenth amendment was presented, and tabled.

Garfield introduced a bill for the abolishing of the Bureau of Refugees, Freedmen and Abandoned Lands.

A bill was introduced repealing the act of June, 1862, defining additional causes of challenge, and prescribing additional oaths to grand and petit jurors in the United States courts.

The Virginia bill resumed. Furness, in discussing the bill, said: "It would almost be better to follow the Bible recommendation, and not swear at all, than to have this eternal repetition of oaths, which excluded the intelligence and worth and wealth from public office."

Paine, another member of the Reconstruction Committee, favors the bill.

ATLANTA, Jan. 12.—Both houses of the State Legislature adjourned to-day after swearing in a few members.

General Terry to-day issued an order placing Warren, Takafarro, Wilkes, Lincoln, Columbia and Glascock counties as a sub-district, under command of Major Kline, with instructions to arrest persons violating the laws and disturbing the peace. Also an order removing the present sheriff of Warren county, and appointing J. C. Norris as sheriff for that county.

ALBANY, N. Y., January 12.—The striking telegraphers here resumed work to-day, declaring they had been deceived regarding the matter at issue.

FORTRESS MONROE, Va., Jan. 12.—There are twelve gunboats in Hampton Roads to-day; they will probably sail to-morrow.

FOREIGN.

PARIS, Jan. 10.—The report that the Pope will allow no discussion on the article of infallibility, unless he is sure of a favorable result, is confirmed.

MADRID, Jan. 10.—The ministerial crisis is over. Ruizers, the president of the Cortes, has accepted the ministry of the interior, Topeto the ministry of marine, and Sogosta minister of State.

PARIS, Jan. 11.—Rocheport's *Marseillaise* newspaper, attacked Prince Pierre Bonaparte. Two editors of the *Marseillaise* visited the prince to arrange preliminaries for a duel, but during the interview Bonaparte becoming enraged fired twice, killing Victor Noir. The tragedy caused the greatest agitation. Bonaparte has surrendered himself.

A rumor prevails that a coup d'etat occurred at Madrid last night.

LONDON, Jan. 11.—The Anglo-American and French Cable Companies are partially consolidated.

PARIS, Jan. 11.—Rocheport's paper, *Marseillaise*, has been seized. Prince Bonaparte states that he received a slap in the face, from Noir, before firing.

A decree has been issued, convoking the chambers from the High Court of Justice. A prince belonging to the Emperor's family can only be tried before it.

Prince Bonaparte's version of the affair between himself and Fonville and Victor Noir is as follows: He states that they came to his residence with menacing airs and hands in their pockets, and presented a letter of Pascal Grasset, and I said: "It is Rocheport, and not his creatures, that I seek."

"Read the letter," replied Noir. (I had my hand on my pistol, in my pocket.) "Are you responsible for it?" I asked. At this I received a slap in the face from Noir, when I drew my revolver and fired at him. Fonville crouched behind a chair, and from the protection that afforded, aimed his revolver at me, but he could not get it to go off. I fired at him while he was in that position, when he ran out of the room. He stopped in the next room and again turned his pistol toward me. I fired at him again, and he fled.

PARIS, Jan. 12.—In the Corps Legislatif a motion was made regarding the Emperor's family amenable to the law.

Rocheport said that Noir was one of the people, and the people should judge his murderer, who, although a cousin of the Emperor, must not escape the penalty of the law.

Ollivier promised them justice, saying, in the course of his speech: "We are justice, law and moderation, but if you force us we will be power."

The entire edition of Rocheport's paper, the *Marseillaise*, was seized by the authorities to-day.

Rocheport's *Marseillaise* says, in large type: "Murder committed by the Prince Pierre Napoleon Bonaparte upon the citizen Victor Noir. The attempt at murder made by the Prince Pierre Napoleon Bonaparte upon the citizen Ulrie De Fonville. I have had the weakness to believe that a Bonaparte could be other than an assassin; I have dared to imagine that a fair duel was possible in that family where in order and waylaying are traditional and habitual. Onr Paschal Grasset had shared my views, and to-day we mourn our dear friend Victor Noir, assassinated by the ruffian Prince Pierre Napoleon Bonaparte. For eighteen years past France has been in the blood-stained hands of these cut-throats, who, not content with their gripe, are shooting Republicans in the streets and allure them into baited traps for the purpose of slaughtering them at home. People of France! have you not had enough of this?"

HENRI ROCHEPORT.

LONDON, Jan. 12.—Violent dissensions exist in the Austrian cabinet. HAVANA, Jan. 12.—Telegraphic communication is re-established with Santa Spiritus, Ciego, Ovilae and other points in the Ciego Villas district, from whence the insurgents seem to be moving toward Principe.

STONEWALL JACKSON.

WHO KILLED HIM?—A REMINISCENCE OF THE WAR.

We find the following very interesting communication in the New York Herald of December 19:

MORRISTOWN, N. J., Dec. 16, 1869.

To the Editor of the Herald: Having observed your remarks on the subject of the death of the rebel general, Thomas Jonathan Jackson, I take the liberty of asking you to add my testimony to that of others, so that there can remain no reasonable doubt but that he was killed by his own troops, and I will make my narrative as short as possible for your columns.

At the battle of Chancellorsville I commanded the second brigade of the second division of the third army corps, and our division was held in reserve, near the Chancellorsville House, until about five o'clock on Saturday afternoon, the second of May, 1863, which was the time of the furious attack made on the right of our line by Jackson, which broke the eleventh corps, hurling it back in disorder. We were almost immediately ordered to the front, to check the attack of the enemy, and deployed in line of battle to the right of the Orange Court House plank road, not far from our first position, the enemy stopping any further advance at that time. As soon as my line was formed and pickets thrown out in front of it, I rode to the front to inspect the picket line, as it was my invariable habit to do, to rectify its positions if necessary. It was now twilight, and a little later the moon's light aided the vision to pierce the darkness of the dense forest in which was our position. While engaged in changing the posts of some of the sentinels covering the left front of my line, in a comparatively clear place near the plank road, I heard the sound of an approaching cavalcade from the side of the enemy, which soon appeared, and the foremost horseman detaching himself from it came on alone, so near that the soldier nearest me leveled his rifle for a shot at him; but I stopped him from firing, not wishing to reveal our position, and judging him an officer making a reconnaissance, in which case it would have been a needless thing to kill him in the uncertain light. After a few moments, spent apparently in trying to pierce the gloom, this person slowly turned his horse, and the whole party returned toward the Confederates at a gallop. The clatter of the hoofs became fainter in the distance, when suddenly the darkness in that direction was lighted up by a flash, succeeded by one well known rattle of a volley of musketry from at least a battalion, on the right of the road, and after the interval of about twenty seconds came another volley from its left. Being apprehensive that some of our troops might possibly be in that direction, I determined to ride forward alone and satisfy myself, as I called into action, there might be

danger of firing upon our own troops. I did so, leaving my orderly within my picket line. Emerging from the thick undergrowth upon the road a riderless horse dashed past me toward our lines, and I reined up near a group of three persons, two of whom were supporting the third, who was stretched on the ground, apparently grievously hurt. A horse, or perhaps more than one, were near by, as I saw indistinctly, but whether they were tied to trees or held by other persons I could not make out. I saw at once that these were Confederates, probably officers, and visions of the Libby began to flit through my mind at finding myself so near them; but reflecting that I was well armed and mounted, moreover that I wore a private's gray overcoat and slouched hat, which were common to both parties, I sat still, regarding the group in silence, but prepared to fly, if necessary, at the first warning. The silence was broken by one of the persons, who seemed to regard me with surprise, and, as one having authority, he directed me "to ride up there and see what troops those were," indicating the direction of his army, to which I gave a sign of assent, and, too happy to escape, I rode in that direction until out of sight of the group, when, making a circuit, I returned within my own lines. Just as I reached our picket line the Federal section of artillery posted on the plank road commenced firing; and I could plainly hear the grape crashing through the limbs of the trees near the point I had left. I found my brigade engaged in strengthening their position by a ride line of abatis in preparation for the battle. That night two intrepid officers of my brigade, Lieutenant Colonel Holt and Captain Hugo, of the Seventieth New York, crawled on all fours within the enemy's lines and captured several prisoners, from which I exacted the information that Rhodes' division of Jackson's corps lay in our front, and one of them, an officer, gave me, upon a sort of cross-examination, some interesting details. At early daylight the next morning, Sunday, May 3, the enemy commenced a vigorous attack upon our line, which being unsupported, although thousands of fresh troops lay within half musket shot, was forced, after a gallant defense and heavy losses, to retire and yield the ground to them.

About a fortnight afterward, at the camp at Falmouth, I saw the Richmond *Inquirer*, giving a detailed account of the death of Stonewall Jackson, and the circumstance of his receiving his wound, which made it clear that the man I saw lying on the ground was himself, and that he was killed by his own men. Other accounts mention "some one was sitting his horse by the side of the wood, coolly looking on, motionless and silent." The unknown individual was clad in a dark dress strongly resembling the Federal uniform, but it seemed impossible that he could have penetrated to that spot without being discovered, and what followed seemed to prove that he belonged to the Confederates. Captain Wilbourne directed him "to ride up there and see what troops those were," upon which the stranger slowly rode in the direction pointed out, but never returned with any answer. "When this silent personage was left to posterity," etc. As I well knew Stonewall Jackson from the time of the Mexican war I could not have failed to recognize him had I "interviewed" him on this occasion, which would, however, have resulted most disagreeably to at least one of the parties—a finale for which I avail myself of the present occasion to heartily thank "Captain Wilbourne" for having availed by his opportune command, hoping he will excuse me for having "never returned." As to Jackson having met his death at the hands of the First Massachusetts, that is impossible, as that regiment occupied a position on the left of our division, near the plank road, and completely out of sight and range of the spot he advanced to while reconnoitering.

While upon the subject of the battle of Chancellorsville, if I do not intrude too much upon your valuable space, permit me respectfully to protest against the statements charging my late gallant and able friend, General Sedgwick, either directly or by implication, with having been the cause of the loss of that great battle, while glorifying other generals engaged in it, although the former achieved the only great exploit of the five days' campaign—the successful storming of the heights of Fredericksburg. The military student who impartially examines the details of this battle must, I think,

inevitably come to these conclusions:

That the plan, strategy and field tactics of the campaign were well conceived and infinitely executed by the commanding general up to the period of the occupation of Chancellorsville, on Thursday, April 2, and of a field of battle some miles nearer Fredericksburg, and his left wing (Sedgwick) in open ground, where our superiority of numbers, equipment and artillery could not have failed to have given us the victory.

That the voluntary and incompressible relinquishment of this position, in spite of the remonstrances of Generals Couch, Warren and others, was the first mistake of the Federal general, which inevitably begot a succession of blunders as is usual in war, leading ultimately to the discomfiture of our arms.

That in this abandoning all offensive movements at the outset, and standing on the defensive, the commanding general gave up all the advantage of his role as the attacking party and damped the ardor of the troops, who truly imagined themselves in the prosecution of an aggressive campaign.

That the complete and inglorious inaction of two whole days—Sunday, the third, and Monday, the fourth—during which our army, in a position which could not have been carried, lay covered by entrenchments, with both flanks resting on a river, of which the river was the chord, and listened to the sound of the guns in an action between Lee and Sedgwick, and guarded as it was by a greatly inferior force, until that action should be successfully gained by its opponents, was the final cause of its defeat, and not Sedgwick's failure to form a junction, which was impossible. Precisely at the moment that Hooker had apparently lost all stomach for offensive operations, we find Lee, recovering from his first surprise at finding his powerful enemy right on his flank and endangering his communications, assuming the offensive, and inaugurating a series of daring maneuvers which more than equaled the disparity of his numbers, and resulted in victory at last.

I cannot presume to ask for space here to give even a summary of these grand tactics, during the execution of which Lee more than once exposed his army to destruction, but which desperate risks he was forced to take, apparently divining that his opponent would remain impassive, and their study involves a great lesson in the art of war.

If I have succeeded in throwing any light upon that most important episode in the war—the death of Jackson—by my communication, I shall be happy to subscribe myself, very respectfully,

JOSEPH W. REVERE,
Ex-Brigadier General.

LATELY John Stebaleski, a shopkeeper at Pesth, discharged a pistol into his heart. He had previously written the following letter to a friend:

"I have decided to kill myself to-morrow. Life is insupportable. I adore my wife, but she has grown so stout—she that was of so ravishing a figure when I married her. Adieu, my friend; tell my wife that I prefer to die rather than be unfaithful to her, or to separate myself from her by means of the law. Farewell, and pity me."

PRAYER BREAKING A BAD HABIT.—A minister once prayed in the pulpit that "the Lord would bless the congregation" assembled, and that portion of it which was on the way to the church, and those who were at home getting ready to come, and that in his infinite patience he would grant the benefit of the benediction to those who reached the house of God just in time for that. The clergyman succeeded in breaking up a bad habit which had resisted all legitimate appeals.

WHAT THEY COST.—Here is a sermon short enough to satisfy any one. The most busy mortals in this most busy age find time to read it. But to fathom its significance will require more time and profound thought than falls to the lot of many individuals. The clergymen cost the United States \$12,000,000 annually; the criminals, \$40,000,000; the lawyers, \$80,000,000; intoxicating beverages, to satisfy and increase depraved appetites, \$500,000,000.

As the ancients held those places sacred that were blessed by lightning, we ought to pay a tender regard to those visited with affliction.

The Christian Advocate.

SATURDAY, JANUARY 15, 1870.

A NEW POEM BY TERNYSON.

NORTHERN FARMER.

NEW STYLE.

I.
Don't thou 'ear my 'erse's legs, as they can-
lers away?
Propriety, propriety, propriety—that's what I
ears 'em say.
Propriety, propriety, propriety—Sam; thou's an
aw for thy pains!
There's moor sense 'n' one o' 's legs nor lu all
thy brains.

II.
Woe—there's a crow to pluck w' 'tha. Sam:
yon's parson's 'onse—
Don't thou know that a man unun be cather
a man or a mouse?
Time to think on it, then; for thou'll be
twenty to weak.
Propriety, propriety—woe, then, woe—let m
ear mysen speak.

III.
Me an' thy muther, Sammy, 'as bean a-falkin'
o' thee.
Thou's been takin' to muther, an' she bean a
telling 'n me.
Thou'll not marry for munny—thou's sweet
up' parson's lass.
Noa—thou'll marry for luvv—an' we both
on us thinks 'tha an ass.

IV.
See'd her to-day goa by—Saalnt's-day—
she was ringin' the bells.
She's a beauty thou thinks—an' soa is scoora
o' gells.
Them as 'as munny an' all—wot's a beauty?—
the flower, as blaws.
But propriety, propriety sticks, an' propriety,
propriety graws.

V.
Doan't be stant 'n' take time; I knows what
maakes 'tha as mad.
Wan't I crazed fur the lasses mysen when
I wur a lad?
But I know'd a Quaker feller as often 'as
fowd 'n this:
"Doan't thou marry for munny, but goa wheer
munny is!"

VI.
An' I went wheer munny war; an' thy muth-
er coom to 'and,
W' lots o' munny laad by, an' a niceish bit
o' lands.
Maaybe she wan't a beauty—I dived giv 'n a
thout—
But wan't she as good to cuddle an' kiss as
a lass as 'ant nowt?

VII.
Parson's lass 'ant nowt, an' she want 'a nowt
when 'e's dead,
Mun be a guvness, lad, or summat, and ad-
dled her bread.
Why fur 'e's nobbut a curate, an' wean't
nivr giv 'naw lighter.
An' 'e maade the bed as 'e ligs on foor 'e
coom'd to the shire.

VIII.
And 'thin 'e coom'd to the parish w' lots o'
'Varsity debt,
Stook to 'nail they did, an' 'e 'ant got shut
on 'em yet.
An' 'e ligs on 's back 'n' the grip, w' noan to
lend 'n a shove.
Woots nor a far-weller'd yowe; fur, Sam-
my, 'e married fur luvv.

IX.
Luvv? What's luvv? Thou can luvv thy
lass an' 'er munny too,
Maakin' 'em goa togither, as they've good
right to do.
Couldn't I luvv thy muther by cause o' 'er
munny laad by?
Naay—fur I luvv'd 'er a vast sight moor fur
it reason why.

X.
Ay, an' thy muther says thou wants to marry
the lass,
Cooms of a gentleman burn; an' we both
on us thinks 'tha an ass.
Woe, then, propriety, will'tha—an' ass as near
as mays nowt—
Woe, then, will'tha!—the bees is as
fell as owl."

XI.
Break me a bit o' the esh for 'his 'ead, lad, out
o' the fence!
Gentleman burn! what's gentleman burn? Is
it shilling an' pence?
Propriety, propriety's 'erything 'ere, an', Sam-
my, I'm blest
If it isn't the same oop yonder, fur them is
'as it's the best.

XII.
Th'n thou 'as 'as munny as brooks into 'onses
an' steals,
Them as 'as coats to their backs an' takes
their regular meals.
Noa, but it's them as niver knows wheer a
meal's to be 'ad.
Tanke my word for it, Sammy, the poor in a
loomp is bad.

XIII.
Them or thir feythens, 'tha sees, mun 'a beam
a laazy lot.
Fur work mun 'a gone to the giff'n whinlver
munny was got.
Feyther 'ad amost nowt; leastwaays 'n
munny was 'ad.
But 'e 'ard an' moul'd 'n seen dead, an' 'e died
a good un, 'e did.

XIV.
Look thou theer wheer Wrigglesby beek
comes out by the 'ill?
Feyther run up to the farm, an' I rids up to
the mill,
An' I'll run up to the belz, an' that thou'll
live to see;
And if thou marries a good un I'll leave the
land to thee.

XV.
Thim's my noatons, Sammy, wheerby I
means to stick.
But if thou marries a bad un, I'll leave the
land to Dick.
* This week. † Obsolete. ‡ Eard.
§ Or fow-weller'd—said of a sheep lying on
its back in the furrow. || Makes nothing.
¶ The flies are as force as anything.

Coom oop, propriety, propriety—that's what I
'ears 'em say—
Propriety, propriety, propriety—cater an' cater
away.
—Every Saturday.

A THEATRICAL PLAY IN CHINA.

San Cong Yan was a red-faced
man, and was employed by the King
to catch robbers. One day, when
on his way to catch robbers, he met
a man stronger than himself, so they
called each other brother, and agreed
not to own either father or mother.

San Cong Yan asked a maid for a
peach, but she told him he could
not have it. She then went in to
tell her mistress what he wanted,
and they being unwilling, he knock-
ed off two peaches from the tree.

They then had a fight about it, but
the men prevailed, and they finally
became their wives. San Cong Yan,
when returning home, met three
robbers, who were brothers of
others who had been caught, and
they attempted to kill him on the
bridge, but San Cong Yan was too
strong for them, and succeeded in
killing them all. San Cong Yan,
after this, met the son of a high of-
ficer under the King, who associated
with robbers, and in order to have
his revenge, he determined to at-
tack his son. He knocked him
down three times, and killed him
by kicking him. After this the
King ordered San Cong Yan to be
caught, but he went up to the tem-
ple on the mountain and hid him-
self. The priest of the temple was
a fortune teller. San Cong Yan
and he had a game of chess to-
gether, when the priest told him
not to be afraid, that he was in no
danger of being caught, and that
he would soon be king himself (San
Cong Yan.) When he left the
mountain he met another priest who
was very strong, and wanted to try
his strength with him. After San
Cong Yan had done many mighty
deeds, had caught and killed many
robbers, the King heard of his fame
and sent for him to come to the
palace and try his strength with his
high officers. San Cong Yan show-
ed to the King what he could do in
overthrowing his officers, and he
then took the spear and with one
thrust killed the King. After the
King's death there were two men
who were said to be stronger than
San Cong Yan, and they determined
to kill him. San Cong Yan had
killed all those who opposed him,
but there was one thing which he
lacked. The laws of the country
were in the hands of another of-
ficer, an old man. San Cong Yan
went to him and asked him to de-
liver up the laws by which the peo-
ple are governed, but he refused.
San Cong Yan told him if he did
not give them up he would cut off
his head too. The old man being
frightened, at last consented, and
the King had a paper written to
show that the old man had consent-
ed to his being King. When San
Cong Yan entered the palace to be
King there was a dragon in a pool
of water in the King's garden, which
came out and tried to kill him, but
he took a bow and arrow and shot
him. So he at last became King.
He reigned but ten years, and was
killed by one of his high officers in
his palace while asleep. The man
kneeling is said to be one of the
devils come to warn him, and tries
to awake him, telling him a man
was going to kill him, and he did
kill him; and thus ends the story.

This is the translation of a play
which is acted in one of the Chinese
theaters. The representation of it
I send to the Felicity street Sunday
school. Please hand this to them,
that they may understand the draw-
ings, etc. They are exposed for
sale on the street in Shanghai. This
man was the Samson of China.

J. W. LAMBERT.

One of the best things said by
Mr. George Peabody is this, spoken
at the reunion in his native town:
"It is sometimes hard for one who
has devoted the best part of his life
in the accumulation of money to
spend it for others; but practice it,
and keep on practicing it, and I as-
sure you it comes to be a pleasure."

Books are masters who instruct
us without rods or ferules, without
words or anger, without bread or
money. If you approach them they
are not asleep; if you seek them
they do not hide; if you blunder
they do not scold; if you are igno-
rant they do not laugh at you.

REBAPTISMS.

At the recent session of the Mis-
sissippi Conference of the Methodist
Episcopal Church South, a resolu-
tion was introduced asking the Gen-
eral Conference to enact a law on
the subject of rebaptism. The resolu-
tion caused considerable discus-
sion and was laid on the table. The
resolution was occasioned by com-
plaints against a preacher who had
rebaptized a lady who was dissatis-
fied with her baptism because she
was not converted before she was
baptized.

The subject is worthy the atten-
tion of the church. In many in-
stances application is made for the
baptism of persons baptized in in-
fancy, or who have changed their
minds as to the form of the ordi-
nance. Our own General Confer-
ence, at its last session, resolved
that rebaptism is entirely inconsis-
tent with the nature and design
of the ordinance, as set forth in the
New Testament. This action, in our
judgment, was wisely taken. And
yet it will impose hardships on se-
rious people, in some instances. It
is a fact that we find conscientious
persons in trouble, every now and
then, through fear that the water of
baptism has not been applied in the
right way or at the right time. They
fall into doubting, and wish to re-
lieve their scruples by submitting
again to the ordinance. If gratified,
they will make useful members;
but if not, they will leave us, and
go where they can be baptized.

What is best to be done?

In approving the action of the
General Conference, we give our
answer. This course may result oc-
casionally in the loss of those we
would gladly retain, and place them
in an embarrassing predicament;
and yet we think adherence to prin-
ciple better than personal accommo-
dation. The ordinance of God is
not to be submitted to the whims of
individuals, however conscientious.
It is not merely a ceremony, but a
covenant act. The outward form is
valueless without the covenant en-
gagement which it implies. The at-
tention of the people has been too
exclusively taken up with the sym-
bol of the rite, and not half enough
engaged upon its covenant obliga-
tions and spiritual significance.

It should be remembered that
baptism is not a commemorative
rite. If it were its frequent repeti-
tion would be proper and beneficial.
It is so in the case of the only com-
memorative rite enjoined in the
New Testament. The Lord's Sup-
per commemorates the death of Je-
sus Christ, and therefore it is to be
celebrated often. But baptism does
not do this. It is not even a sym-
bol of that death. It has no adap-
tation to recall the crucifixion, or to
symbolize the death and resurrec-
tion of Christ. The supposition
that such was its design, has done
more to bewilder and confuse the
people in regard to this ordinance
than any single error that has found
acceptance in the church. It is not
the ordinance of Christ's death, but
of the Holy Ghost. The Lord's
Supper represents and commemo-
rates Christ's death, as a past event,
complete and not to be repeated;
but baptism represents the Holy
Spirit, whose work is not past and
complete, to be recalled by a com-
memorative rite, but present and
continuous, symbolized by water
once for life.

Those who get into trouble on
this subject, and desire rebaptism,
are mostly the victims of early
prejudices or proselyting influences.
We do not blame them. They have
simply read or heard too much from
one direction, and not quite enough
from some other. To their minds
it has become plain that there is but
one way to apply the water—or
rather to apply the person—and
they will not rest; for the moment
they doubt the validity of other
forms; the "safe" argument is plied
with such vigor as to preclude calm
deliberation. A rebaptism is the
only remedy under the circum-
stances, and on the principle that
congeniality of sentiment is neces-
sary to social enjoyment, such per-
sons will find greater happiness, and
possibly better fields of usefulness,
in churches that inculcate the doc-
trines that have bewildered them.

But, if their trouble is only a be-
wildering, why not enlighten them
and save them to the church? It
would be the better plan, if prac-
ticable; but after confusion has in-
sued in error, and particularly such
error as involves exclusiveness,
which always begets bigotry, it is
exceedingly difficult to conquer the
prejudices that bar the way to the
understanding. The habit of look-
ing at a subject in one way dimi-
nishes the power to see it in a differ-
ent light. This is particularly true
where the habit is backed by pride
of opinion, and the dogma has be-
come a favorite. The fact, there-
fore, that we do not expect to be
able to convince every one of the
correctness of our views of baptism,
is no evidence of weakness in our
cause or in our confidence. It is
simply the recognition of a psycho-
logical fact.

Nor is there any truth in the as-
sumption that the fact that our peo-

ple are liable to be troubled about
their baptism, is evidence against
the soundness of our teachings and
practice. Perhaps this is used
against us as constantly and success-
fully as to which appeal is
made. But it is nothing but special
pleading, unworthy the dignity to
which it has attained. It should be
remembered that all our people, and
especially our young members, are
liable to contact with respectable
Christian men and women, who take
peculiar pleasure in making them
dissatisfied with their baptism; who
labor to do it, directly and indi-
rectly; who feel that they are doing
acceptable service to God in
such work, and find a higher satis-
faction in successfully accomplishing
it than in any other department of
Christian effort. When we consider
the labor expended in this direction,
and the appliances used, instead of
being surprised that a few innocent
people are brought into trouble, our
astonishment would be great if none
were entangled.

But why are not others—those
immersed—dissatisfied? Because
nobody tries to make them dissatis-
fied. If we were to imitate immer-
sionists, and seize every opportunity
to disturb the minds of inexperience
members of the church on this
subject, assuring them that they
were unbaptized, out of the cove-
nant, in fearful peril because they
are refusing to obey the gospel, etc.,
we could disquiet the consciences of
as many as they do; but we do
nothing of the kind. We tell them
the manner of baptizing is not the
great thing, but that the covenant
obligations and the religious mean-
ing of the ordinance, as the symbol
of the Holy Spirit, which God pours
out in rich effusion, is the soul of
the rite. In all our theology, much
less in our charity, there is nothing
to authorize any attempt to cause
uneasiness and trouble to others
about the form of administering the
ordinance, and in our inmost heart
we scorn the spirit of proselytism
which too often manifests itself in
connection with this subject.

Another point. We have said
that this ordinance should not be
left to the whim of the candidate.
It comes to us by divine authority,
and must be preserved in its in-
tegrity. But some will ask, Why, then,
give the candidate choice as to mode,
under any circumstances? This is
done on the ground that the modes
are equally valid, and valid because
with either the religious meaning
may be preserved, and neither is so
prescribed in the Bible as to exclude
the other. The manner of using
the water is an incident of the or-
dinance, and the choice is allowed in
view of the fact that the broad com-
mand to baptize does not insist upon
uniformity of mode. But the right
of choice never extends to the es-
sentials of the ordinance. These
are sacredly guarded. Over them
we throw the shield of divine truth,
and around them we gather the af-
fection of devoted hearts. To all
that God has enjoined we rever-
ently bow, and seek only to inter-
pret this hallowed symbol of regen-
eration in the light of eternal truth.
Western Christian Advocate.

A WESLEYAN WATCH-NIGHT.

BY THOMAS GUTHRIE, D. D.

We repaired to their chapel a
little after ten o'clock. The riot of
the streets had already begun; and
it was a great relief to escape from
them, and find ourselves quietly
seated amidst a congregation whose
countenances, as became their po-
sition, bore a mingled expression of
happiness and solemnity. It was
pleasant to see so large an assembly
on such a night and at such an hour,
and to recognize numbers who
though, like ourselves, belonging to
another than the Wesleyan commu-
nion, had gone to unite with their
brethren of that church in the sol-
emn, striking service which I pro-
ceeded to describe.

The minister appeared in the pul-
pit punctually at half-past ten,
robed in gown and bands—a cos-
tume, by the way, not used by the
Methodists in England, though
their Conference has too much good
sense to quarrel with its use in
Scotland, or to insist in such minor
matters on a rigid and unnatural
uniformity. He began the services
by reading out a hymn, which the
people sang with Methodist spirit to
the music of an organ. The full
burst of their earnest and ringing
voices all but drowned the sound of
its pipes, and demonstrated that an
organ, whatever objections people
may have to instrumental music as
an aid to psalm singing, does not
always, and need never, supersede
or interfere with vocal praise—the
song of grateful hearts rising from
hallowed lips. They sang:

"Jesus the conquering reigns,
In glorious triumph arrayed,
He triumphs over all unclean
And bids the earth be glad."

After this Mr. James, the min-
ister, offered up a very impressive
prayer, acknowledging the mercies
and also the sins of the past year—
seeking grateful hearts and pardon
through the blood of Christ—in
view of the year about to enter—
renewing vows and dedications to

God, with earnest prayer for grace
to do its duties, to meet its trials,
to resist its temptations, to bear its
burdens and to be ready for the
death it might bring. Another
hymn was then sung, and the nine-
teenth Psalm, beginning with these
words: "Lord, thou hast been our
dwelling place in all generations,"
read—and read impressively. After
the congregation had again sung,
the minister, choosing for his sub-
ject these words of First Samuel 7:
12: "Samuel took a stone, and set it
between Mizpeh and Shen, and called
the name of it Ebenezer, saying:
Hitherto hath the Lord helped us,"
delivered an appropriate address.
At its close the congregation sang:

"How many pass the guilty night
In revelries and frantic mirth!
The creature is their sole delight,
Their happiness the passions of earth;
Far as suffice the season past;
We choose the better part at last."

The minister now descended, and
resigned the pulpit for half an hour
to a local preacher; and I may re-
mark, by the way, that his address,
directed chiefly in warning words to
young men and women, proved that
though a liberal education is of
great value to ministers, he may be
an effective speaker who has never
been at college. A few minutes be-
fore twelve o'clock this worthy man
brought his remarks to a close. Mr.
James returned to the pulpit; and
having addressed the congregation in
a few solemn and weighty words,
he said that there were now only
some two or three minutes of the
old year to run, and these he would
recommend them to pass in secret
communion with God. Then the
whole congregation, following his
example, bowed the head, and fell
on their knees in silent prayer.
During these few minutes an awful
solemnity filled the house—a still-
ness on which the hour, as it struck
one beat on the clock, announcing
that one year was gone and another
begun, broke with startling effect.
At Munchester, when I first wit-
nessed this most impressive service,
the effect was still greater. There
the clock rung out its full twelve
beats; and as they slowly and sol-
emnly succeeded each other, they
sounded like the last dying throbs
of the expiring year. So soon as
the ringing out the old and ringing
in the new year had brought us to
the end of one, and the beginning
of another stage in life's journey,
the whole congregation rose to their
feet; and, like men who spring
forward anew, on a heavenward
race, for a heavenly crown, they
burst out into this song:

"Come, let us anew our journey pursue,
Roll round with the year,
And never stand still till the Master appear—
His adorable will let us gladly fulfill,
And our talents improve,
By the patience of hope, and the labor of love."

Our life is a dream; our time, as a stream,
Glides swiftly away;
And the furthest moment refuses to stay;
The arrow is down; the moment is gone;
The millennium year
Rushes on to our view, and eternity's here."

Ere the echoes of the hymn had
died away the minister rose to pro-
nounce the blessing; and, the service
closed, we went out into the
starry night to hear the sound of
revelry and riot—but to see nothing
incongruous with our devotions in
many of the congregation tarrying
at the door to salute their acquaint-
ances with a "Happy New Year!"
and much hearty shaking of hands.
Sunday Magazine.

A GREAT deal of astonishment is
expressed in Paris at the number of
Spanish orders and decorations
which have recently made their ap-
pearance on the breasts and in the
buttonholes of very obscure indi-
viduals. The secret has recently
been explained by the curious fact
that one of Queen Isabella's courtiers,
who has more debts than he can
pay, liquidates his bills by tell-
ing the merchants that, if they will
give him receipts in full, and some-
thing to boot, he will procure them
crosses of the various Spanish or-
ders at the disposal of Queen Isabella
the Second.

FUNERAL style in Paris consists in
not issuing the billet de mort till a
month after the death, and then
inclosing a photograph, the size of a
postage stamp, of the departed, with
scriptural extracts suitable to his
life, and with a request to pray for
the repose of the soul.

The depths of the soul are a laby-
rinth, and dark without the torch
of religion. Left to ourselves, we
are like subterranean water—we re-
flect only the gloomy vault of hu-
man destiny.

It is not a good plan, after you
have driven a nail in a sure place,
instead of just clinching and leaving
it, to keep hammering away till you
break the head off or split the board.

Make no more vain resolutions,
but proceed at once to duty. Know
your weakness, trust and pray. God
will help you through and give you
patience.

The coming of the Lord is one of
the principal articles of our faith,
and resting solely upon a promise.
Seoilers will attack it till the very
day of his advent.

THE CHURCH AND REAL ESTATE.

BY THE REV. J. D. MEYER.

About the time the articles with
the above heading, which appeared
in this paper October 16 and No-
vember 27, were preparing, a pleas-
ing and hopeful coincidence was
transpiring.

The presiding elders of Long
Island were providing for an organ-
ization of a society in the city of
Brooklyn for these very objects. A
delegate was appointed by each
Quarterly Conference, who, with the
pastors, were called to meet in the
Sands street lecture room, October
18. The importance and immediate
demand for such a society were re-
cognized, and a committee appointed
to draft a constitution. At an ad-
journed meeting, held in the same
place, November 1, a constitution
was adopted, and means devised for
the completion of an effective or-
ganization. The coincidence, show-
ing that the want is felt and press-
ing for a realization. The wonder is
that it has been so long delayed.

In our rapidly growing cities there
are centers which will be needed,
and should be secured for church
uses. Neither is it difficult to locate
these. The Jewish Church has
shown the possibility and wisdom
of such foresight—often procuring
in most advantageous positions a
whole block for what, in a few years
will be the value of a single lot.

Fortunous incident, in the operation
of the New York City Methodist
Sunday-School and Missionary So-
ciety, illustrates this wisdom. Land
was purchased, and in a little while
lots were sold at such an advance as
to leave the residue, all that was
needed for church purposes, free of
cost.

We cannot afford to wait until
real estate has reached its high
price, and then purchase premises.
Men are continually making their
safest and most profitable invest-
ments by the purchase of lots that
must advance. Shall we not do,
in the interest of the church, what
every one is being so wise to
do for himself?

The results of this neglect are
only the high price paid for in-
cipient premises, and the consequent
embarrassment in which new so-
cieties are involved, but churches
not built until the population is
dense as both to demand them and
give promise of ability to sustain a
heavy expense. The overflow, at
sometimes other causes, are likely
result in building too closely in the
same neighborhood; hence churches
are, as we find them, clustered to-
gether; jealous rivalries are awak-
ened between churches who find it
difficult to support themselves, and
each cannot look upon the prospe-
rity of the other with envying light-
ness—there is a loss of connection,
feeling, and we are without the
strength that comes from union.

Besides, large spaces are left
unoccupied, and fields that should
be supplied with Christian privilege,
and gospel labor are utterly
neglected.

What can be accomplished is seen
in what a Presbyterian brother has
done in Philadelphia the past few
years. This has been his plan:—
saw an unoccupied field, and said
some minister: "Go there and
work. Open a Sunday school, and
preach the gospel. I will foot your
bills, and build a chapel or church
as the case may require." The
suit has been more churches that
have been gained by my determina-
tion in most of our cities for the
last twenty years. An inviolable
surety, for other rich men to go
do likewise, and suggest the need
needed, and how it is to be done.
But we may not wait for individuals
to do this work; the many can
do it, and the largest investments
such a purpose can, perhaps, be
no safer channel or wiser applica-
tion than through a properly organ-
ized and managed society.

The need of such a society is
forward work that should not be
delayed; many of its advantages
depend upon promptness and quic-
ness of movement. Those centers
for the church may see most effec-
tually, and agonize with infertile
seeds, but have no means to
seize the advantage.

Dependence cannot be placed
upon the separate churches col-
lecting; even when a field is found
and pressing, and they are dis-
flowing, they are unwilling to
one who helps to make their finan-
cial, or who will be missed at
prayer meeting.

There is need also of an out-
rigger, judicious and reliable
of locating churches. Unscrupulous
or injudicious zeal may place a
where they are a hindrance rather
than a help. Churches well lo-
cated will attract to their Sunday
and mission work the numbers
are in their neighborhood,
furnish occupation for unemploy-
ed talent.—*New York Methodist.*

The Christian Advocate.

SATURDAY, JANUARY 15, 1870.

THE VATICAN COUNCIL.

THE HALL OF COUNCIL.

This hall of the council has, I dare say, been described to you already by your correspondents who have been in Rome for weeks past, and I will not, therefore, dwell upon its merits or demerits at this time. It is simply, as you know by this time, the right wing of the grand transept of the church, walled off from the rest by a temporary screen painted to resemble masonry, and accessible from the body of the building through lofty doors of wood-work, covered with canvas and painted to imitate bronze. Had the day been favorable, the scene on which I looked down as I took my seat would have been grand and striking enough. In the lofty tribunes erected on either side of the papal altar and throne were assembled a crowd of people of more or less distinction, and of both sexes, arrayed in gala dresses the most various and the most brilliant.

DISTINGUISHED PERSONS.

Among them I made out the Emperor of Austria (strictly incognito), and her sisters, the ex-Queen of Naples and the Countess of Trani, three women whose grace and beauty are worthy of a better fate than the dismal sort of life to which their exalted birth has condemned them; the Count of Gergenti and the ex-King of Naples, two unhappy looking royal personages, just now of a place, but both gotten up quite marvelously in scarlet uniforms, blazoned with orders; a couple of English generals, General Sir Vincent Eyre and General Babington; several German ambassadors and ministers, in abundant gold lace; a knot of French officers; a Spanish grandee, wearing the golden tresses about his neck, and of Roman dignitaries and Roman ladies. I know not how many, nor in what strange and splendid varieties of costume they were clothed.

THE PRELATES SEATED.

On either side of these tribunes, and a little below them, ran beneath the great rustling throng of prelates, archbishops, bishops, mitred abbots, and there were seating themselves, to the number, as nearly as I can make anything like accuracy determine, of about eight hundred and forty. Of seats prepared and numbered, there were in all seven hundred and sixty-five precisely. These were all occupied, and the unexpected influx of ecclesiastics during the last two days had compelled the emperor's chargé with preparing the hall to add a double row of unnumbered seats below those, which also were filled to-day with august and pious personages.

SOLLENN AND TERRIBLE SPECTACLE.

All as I have said, were in motion when the spectacle first broke upon me, and had but a single ray of sunlight flickered down through the dome upon the motley and magnificent mass, it had indeed been a brilliant and memorable vision. But for the first time within my observation of this incomparable building, St. Peter's to-day was as dark as St. Paul's on the solemn eve of the funeral of the Iron Duke. An awful gloom brooded over the whole scene. Vast as is the capacity of the church, it was, like the piazza without, literally filled to the utmost, and the darkness, which made it difficult to distinguish the faces of persons who sat but a few paces from me within the inclosure of the council hall, being equally profound and almost appalling upon the huge multitude without. The white mitres and stoles of the bishops alone relieve in a certain measure the gloom, as in an apparently interminable order they advanced two by two to salute first, the pontiff, sitting white-mitred in his narrow, almost Mahometan pulpit throne, and then the great circle of the crimson-robed cardinals behind him.

CEREMONIES, ETC.

This ceremony alone consumed, by the watch, an hour and three-quarters. When it was over the Cardinal Deacon Pafirzi advanced and celebrated a mass at the altar, with singing which I own I thought but indifferently good, and the effect of which, had it been good, must have been sensibly impaired by the acoustic infelicities of the temporary hall. When the mass had ended the Pape del Trento arose and pronounced a discourse, of which it was impossible to hear more than a few words here and there, but which was uttered with an animation and grace of gesture not unworthy the reputation which the Pape enjoys of being the very best preacher known to the Pontifical Court at Rome. A series of ceremonies then followed, which culminated in the investiture of the Pope with the pallium by one of the cardinal deacons, while high and shrill sounded the chanting of psalms by the singers of the chapel. The Pope, once invested, took his seat, and the whole body of the

fathers, assembled in the order of their rank, proceeded to pass before him, making reverential homage as they passed at his throne, and kissing, each in his turn, the Fisherman's Ring on his extended hand.

This ceremony it was impossible to witness without feeling profoundly impressed by the magnitude and the subtlety of the relations to which it bore witness between this ancient seat of dominion and the soul and mind of the whole civilized world. What nation, what zone, what race was here unrepresented? And all these glittering shepherds of so many diverse flocks, each in his fold a prince and a power, came up here humbly bowing himself to the earth before the venerable old man, whose single voice it is the duty of them all to proclaim the voice of heaven, even unto the uttermost parts of the earth. Who shall pretend that science is king, or commerce lord of mankind, in the presence of such a spectacle as this?

ENDURANCE OF THE POPE.

Striking though it was however, the ceremony of the "obedience," ended by being tedious—for it lasted rather more than two hours—and when the Pope arose at the close of it, and after reading a brief prayer, proceeded to deliver his hortatory address to the council, he had already been on foot and in the harness of his functions for more than seven mortal hours. Is it not really noteworthy that at his age, and with his many infirmities, the Ninth should have been able to pronounce, partly from notes and partly, as I can avouch, extemporaneously, an elaborate and earnest address of more than three-quarters of an hour in length, and that not only in a clear and resonant voice, but with positive bursts of really brilliant eloquence? As he drew toward the end of his speech, the pontiff dropped his notes carelessly, and for more than a quarter of an hour, raising his exquisite voice with the fire and vigor of youth, exhorted his hearers to patience and devotion and courage in the great work of reconstituting and re-establishing the faith of the world, which was now laid upon them. The address of his holiness was taken down by the stenographers.

THE POPE'S ADDRESS.

The following is a translation of the Pope's address to the council:

VENERABLE BROTHERS: What we asked of God by many supplications and prayers—that we may be able to inaugurate the Ecumenical Council appointed by us—this has been granted, to our great joy, by the remarkable and singular grace of God. Our heart, therefore, exults in the Lord, and is suffused with inexpressible consolation, because on this most auspicious anniversary of the festival of the Immaculate Conception of the Virgin Mary, mother of God, you who have been called to participate in our solicitude have assembled in greater numbers than formerly in this citadel of the Catholic religion, and we thoroughly rejoice in your presence. Now, venerable brethren, you are assembled here in the name of Christ, that with us you may bear testimony to the word of God and Jesus Christ, that you may teach the way of God in truth to all men with us, and that you may judge with us, under the guidance of the Holy Ghost, of the opposition of science, falsely so called. For ever there was a time when zeal for the divine glory and the salvation of the Lord's flock demanded of us to surround and defend Zion, it is now. For you see, venerable brethren, with what violence the old enemy of the human race has attacked, and still attacks, the house of God. Under his guidance that wicked conspiracy of the impious is widely diffused. Strong in union, powerful in wealth, protected by institutions, and wearing the liberal veil of malice, and full of weakness, it does not cease its most bitter war against the sacred Church of Christ. You know the nature of that war—its power, its arms, its progress, its councils. You have continually before your eyes the trouble and confusion, the grievous perversion of all right, the various arts of bold lying and corruption by which the wholesome bonds of justice, integrity and authority are loosened, the worst passions are inflamed, the Christian faith rooted out from souls, so that the end of God's church might well be feared now, if it were possible for it to be destroyed by the machinations or endeavors of man. But, as St. John Chrysostom said: "Nothing is more powerful than the church—the church is stronger than heaven itself." "Heaven and earth shall pass away, but my words shall not pass." What words? "Thou art Peter, and on this rock I shall build my church; and the gates of hell shall not prevail against it."

His holiness then rising, whilst all the others knelt down, made the following prayer:

We are present, O Lord Holy Ghost—we are present, federal indeed in the magnitude of sin; but specially assembled in thy name.

Of all the coffee consumed in the world, fully one-half is from Brazil. A great deal of the best Brazilian

Come to us and be with us, and deign to abide in our hearts. Touch us what to do, where to go, and show us what we should effect, that with thy help we may please thee in all things. Be our salvation and the guide of our judgments. Thou who alone, with God the Father and his Son, dost possess the glorious name, thou who lovest the most perfect equity, suffer no disturbances of justice; let not ignorance draw us into the wrong path; let no favor wrap us, nor regard for gifts or persons corrupt us, but bind us effectually together to thee, by the gift of thy grace alone, that we may be one in thee, that we may in nothing swerve from the truth; that, assembled in thy name, we may observe in all things justice and piety; that here our opinions may in nothing clash with thee, and that hereafter we may obtain the everlasting reward of our well doing.

The prelates answered "Amen." The address was followed by a season of silent prayer, and that again by a chant, after which the prefect of the ceremonies, less politely than distinctly, bade us all depart who had no part in the council, crying out, with a clear voice: "Ecclesia omnes qui locum non habent in concilio."—*New York World.*

SKETCHES OF BRAZIL.

VISIT TO A COFFEE PLANTATION.

The next morning, under the guidance of our hospitable entertainer, we went over the plantation. With the exception of the garden, in the center of which were the fish ponds and the aviary, and of the orangery, with its rich mass of color—gold, deep orange and pale yellow—blending wonderfully with the green of the hill rising behind it, the entire property reclaimed from the forest was devoted to coffee. The stumps of this plant, with their regularly rounded outlines, glittering foliage and bright scarlet berries, formed a beautiful sight, as covering the hillside, they swept for miles away.

In its wild state the coffee tree is slender, with few branches, and from fifteen to twenty feet in height. In cultivation, however, it is kept down to six or ten feet, and made to assume a rounded, pyramidal form, with horizontal branches, almost to the ground. The leaves are evergreen and very shining; the flowers small, in clusters, and of a snowy whiteness, and deliciously fragrant. The whole appearance of the tree is peculiarly attractive, especially in the flowering season.

Coffee trees are usually raised from seed planted in nurseries. The second year the young plants are set out, pruned to the same height, and carefully cultivated in rows from five to ten feet apart, according to the nature of the soil. In the third year the first crop, a very light one, is gathered. The trees continue in bearing, if properly taken care of, for thirty years, yielding two or three crops annually. We were so fortunate as to be present at one of these annual harvestings, and the sight that we witnessed was certainly a pretty one. The negroes, men and women, were scattered over the plantation, with broad, shallow trays or baskets, made of plaited grass or bamboo, strapped over their shoulders and supported at their waists. Into these trays they were gathering the berries, some already of a brilliant red, others just beginning to dry and turn brown, while here and there were green ones not yet fully ripe. Little black children, singing a monotonous but rather pretty parsonage, were sitting on the ground gathering what fell from the bushes. As the baskets of the harvesters were filled, they came to the overseer, who gave them a little metal ticket on which the amount of their work was marked. A task is allowed to each hand—usually a moderate one, and proportioned to the age and strength of the worker—and all overwork is paid for at the close of the day's labor. When the trees are in full bearing, an industrious man will pick three bushels in a day, yielding about thirty pounds of merchantable coffee.

From the harvesting ground we followed the carts down the winding hillside roads to the drying place. Here the negroes divide the day's gathering into little heaps in the sun. These heaps are frequently turned. When pretty equally dried, the berries are spread out in thin, even layers over the dazzling white cement floor and subjected to a final baking. They are then passed between rollers to remove the dried pulp and the parchment-like membrane in which the seeds are enclosed. The winnowing follows, after which the coffee is ready to be sent to market.

The region of Brazil most favorable for raising coffee extends from Santa Catarina on the south up as far north as Bahia. It can, however, be grown to advantage in the shade of the vast forests of the Amazon, where, with careful attention, it yields two harvests a year.

Of all the coffee consumed in the world, fully one-half is from Brazil. A great deal of the best Brazilian

coffee, says Agassiz, who was at considerable pains to ascertain the fact, is sold under the name of Java, or Mocha, or as the produce of Martinique or Bourbon. Much of the so-called Mocha, especially, is often nothing but the small, round beans of the Brazilian plant, found at the summits of the branches, and gathered with more than ordinary care. And, further, it is claimed that the poorest American coffee will, after ten or twelve years' keeping, be as good, parch and mix as well, and have as high a flavor as the best of Turkish coffee.—*Once a Month.*

DEBT.

When I was a very small boy, in pinafores, and went to a woman's school, it so happened that I wanted a stick of slate pencil and had no money to buy it with. I was afraid of being scolded for losing my pencils so often, for I was a real careless little fellow, and so did not dare to ask at home; what, then, was John to do? There was a little shop in the place, where nuts and tops and cakes and balls were sold by old Mrs. Dearson, and sometimes I had seen boys and girls get trusted by the old lady. I argued with myself that Christmas was coming, and that somebody or other would be sure to give me a penny then, and perhaps even a whole silver sixpence. I would, therefore, go into debt for a stick of slate pencil, and be sure to pay at Christmas.

I did not feel easy about it, but still I screwed my courage up and went into the shop. One farthing was the amount, and, as I had never owed anything before and my credit was good, the pencil was handed over by the kind dame, and I was in debt. It did not please me much, and I felt as if I had done wrong, but I little knew how soon I should smart for it. How my father came to hear of this little stroke of business I never knew, but some little bird or other whistled it to him, and he was very soon down upon me in right earnest. God bless him for it; he was a sensible man, and none of your children-spoilers; he did not intend to bring up his children to speculate and play at what big rogues call financing, and therefore he knocked my getting into debt on the head at once, and no mistake.

He gave me a very powerful lecture upon getting into debt, and how like it was to stealing, and upon the way in which people were ruined by it, and how a boy who would owe a farthing might one day owe a hundred pounds, and get into prison and bring his family into disgrace. It was a lecture, indeed; I think I can hear it now, and can feel my ears tingling at the recollection of it. Then I was marched off to the shop like a deserter, marched into barracks, crying bitterly all down the street, and feeling dreadfully ashamed because I thought everybody knew I was in debt. The farthing was paid amid many solemn warnings, and the poor debtor was set free like a bird let out of a cage. How sweet it felt to be out of debt! How did my little heart vow and declare that nothing should ever tempt me into debt again! It was a fine lesson, and I have never forgotten it. If all boys were inoculated with the same doctrine when they were young, it would be as good as a fortune to them, and save them wagon loads of trouble in after life. God bless my father! say I, and send a breed of such fathers into old England to save her from being eaten up with villainy! for what with companies and schemes and paper money, the nation is getting to be as rotten as touch-wood.

Ever since that early sickening I have hated debt as Luther hated the Pope, and if I say some fierce things about it, you must not wonder. To keep debt, dirt and the devil out of my cottage has been my greatest wish ever since I set up housekeeping; and although the last of the three has sometimes got in by the door or the window—for the old serpent will wriggle through the smallest crack—yet thanks to a good wife, hard work, honesty and scrubbing brushes, the two others have not crossed the threshold. Debt is so degrading that if I owed a man a penny I would walk twenty miles in the depth of winter to pay him, sooner than to feel that I was under an obligation. I should be as comfortable with pens in my shoes, or a hedge hog in my bed, or a snake up my back, as with bills hanging over my head at the grocer's and baker's and the tailor's. Poverty is hard, but debt is horrible; a man might as well have a smoky house and a scolding wife, which are said to be the two worst evils of our life. We may be poor and yet respectable, which John Ploughman and wife hope they are and will be; but a man in debt cannot even respect himself, and he is sure to be talked about by the neighbors, and that talk will not be much to his credit. Some persons appear to like to be owing money; but I would as soon be a cat up a chimney with the fire alight, or a fox with his head at his heels, or a hedgehog on a pitchfork, or a mouse under an

owl's claw. An honest man thinks a purse full of other people's money to be worse than an empty one; he cannot bear to eat other people's cheese, wear other people's shirts and walk about in other people's shoes; neither will he be easy while his wife is decked out in the milliner's bonnets and wears the draper's flannels. The jackdaw in the peacock's feathers was soon plucked, and borrowers will surely come to poverty—a poverty of the bitterest sort, because there is shame in it.—*John Ploughman's Talk, by C. H. Spurgeon.*

BRIDE AND BRIDEGROOM A CENTURY AGO.—To begin with the lady; her locks were strained upward over an immense cushion that sat like an incubus on her head, and plastered over with pomatum, and then sprinkled over with a shower of white powder. The height of this tower was somewhat over a foot. One single white rosebud lay on its top, like an eagle on a haystack. Over her neck and bosom was folded a lace handkerchief, fastened in front by a bosom-pin rather larger than a copper cent, containing her grandfather's miniature set in virgin gold. Her airy form was braced up in a satin dress, the sleeves as tight as the natural skin of the arm, with a waist formed by a bodice, worn outside, whence the skirt flowed off, and was distended at the top of an ample hood.

Shoes of white kid, with peaked toes, and heels of two or three inches elevation, inclosed her feet, and glittered with spangles, as her little pedal members peeped curiously out.

Now for the swain: His hair was sleeked back and plentifully bedowered, while his queue projected like the handle of a skillet. His coat was a sky-blue silk, lined with yellow; his long vest of white satin, embroidered with gold lace; his breeches of the same material, and tied at the knee with pink ribbon. White silk stockings and pumps with laces, and ties of the same hue, completed the habiliments of his nether limbs. Lace ruffles clustered around his wrist, and a portentous frill, worked in correspondence, and bearing the miniature of his beloved, finished his truly genteel appearance.

SEVEN THINGS WANTED.—What is necessary to make the Sunday school both interesting and useful? To this question somebody, who knows, gives the following answer:

1. A live, active, praying superintendent, in full sympathy with the children.

2. Faithful, pious teachers, who will make conscience of being always present and always in time, and fully prepared to give useful and pleasant instruction.

3. Uniform lessons for the whole school. This is essential to a well regulated and useful school.

4. An early hour for meeting. One lesson a day rather than two. One school for the same pupils better than two.

5. hearty co-operation of parents, who will see that their children study and learn something, instead of spending a leisure hour they know not and care not how.

6. A good library is a help and convenience, but suitable text books and helps to the understanding of the Scriptures are a necessity.

7. The first item above implies what is worthy of particular mention: Never keep a school waiting a moment for any exercise, nor a moment after the time appointed for opening. Fill up the whole time so as to interest.

A LITERARY GOVERNMENT.—Victor Emmanuel's government has become possessed of the large libraries of the convents and monasteries of Italy, in consequence of a law, passed in 1866, suppressing the religious houses. There are three hundred and sixty-nine public libraries, with ample provisions for their support. The number of volumes in all is more than a million. As the law proceeds in suppression, four hundred additional convent libraries will fall into the hands of the State. The State stipulates that these libraries shall be open to the public, and that not less than two hundred frames shall be expended annually for such purpose. In addition to printed books, a large number of important manuscripts are brought to light. Those which refer to diplomatic matters or historical events are deposited in the public archives; those of a purely literary character fall to the lot of the great libraries.

ARCHBISHOP LEIGHTON, one day returning from church, saw a funeral coming. On reaching home one who had been confined to the house inquired: "Well, have you heard a good sermon?" "I have met a good sermon," was the reply.

COOKED MEAT is nearly double the bulk of uncooked, yet quart for quart it goes as far. The difference is that much of the food is indigestible unless cooked.

The Farm and Garden.

Lot Planters Raise their own Provisions.

The article of Thomas B. Smith, of Verona, Mississippi, in your October number, suggested the duty of my giving the public the benefit of my experience and observation on the subject of planters raising their own provisions. Being a planter, employing about sixty hands, and also a merchant, furnishing supplies to my neighbors, my opportunities for arriving at the truth in this matter have been very good. I have been furnishing supplies to from forty to sixty of the neighboring planters since the war, taking the produce of their farms in payment in the fall, and I find that those who buy both corn and meat (all they use) never have any surplus money left; that those who buy all their meat, and only a portion of their corn, have money over, in proportion to quantity of corn purchased; and that those who raise all their corn, even when they buy all their meat, make money very fast. Those I know to be facts, in the face of the argument that the same acre that yields fifteen to twenty bushels of corn, worth \$20 to \$30, will yield seven hundred to one thousand pounds of seed cotton, worth from \$35 to \$75. It is difficult to explain why corn purchased costs so much, and that raised on the farm is so cheap; yet I know, and no doubt thousands of observant planters know that he who buys his provisions never has any surplus cotton money.

I am inclined to think that the bought corn does not really cost so much, but that the principal explanation of these facts is that a good planter can raise nearly a full crop of cotton, and at the same time raise an ample supply of corn, because with good management the heaviest of the work in corn crop is past before the heaviest of the cotton crop begins, so that he who plants cotton alone loses enough time to raise his corn, for the simple reason that without any corn crop at all he can raise very little more cotton than he could had he a sufficient corn crop planted. Now if it is a fact that a planter who raises no corn nor meat has never had any surplus money since the close of the war, with cotton ranging high all the time except 1867, how can we expect anything but ruin the very first year our cotton crop is cut off, or the price is low? If our people had raised their corn and meat in 1860-67 they would not have cared a straw for the low prices of cotton in the latter year named, even if the speculators could have controlled the price and kept it down. I live in as good a cotton and corn region as I have seen anywhere, and we are highly favored this year; although our crops are not full, yet they are so much better than they are in most sections, we certainly ought to feel thankful. I traveled over most of the West and North the past summer, and having seen the effects of the drought upon the corn crop, I pity the cotton maker who has not raised (at least) his corn this year.—*Correspondent of Southern Cultivator.*

WATERING HORSES.—A patent has recently been granted for a method of refreshing horses while in harness, which consists in making the bit hollow and having perforations in it. A rubber tube extends from one side of the bit to the carriage, and by pressing a rubber bag, which contains water, the driver is enabled to refresh horses whenever he chooses without stopping. For saddle horses the water bag is suspended from the horse's neck, or upon the pommel of the saddle.

A CHEAP DISH.—Set new, rich milk to boiling; keep it boiling smartly, and thicken it with white winter wheat meal (Graham flour) cut with milk, sugar, cream, molasses or sirup. The milk must be kept boiling as you sift in the meal, or the mush will have a raw taste, which no amount of after-cooking can remove. I particularly entreat poor people to give this article of food a fair trial. I know it is an article which they particularly should not be without.

CANNING EGGS.—When two or three dozen eggs are obtained from the nests, place them in a dish, and pour scalding water over them, and immediately turn it off. This process is repeated three times, by which means the albumen is fixed or coagulated, the pores of the shell closed, and the egg, as it were, canned in its own covering. The eggs thus prepared are then packed in salt, with the apex downward, and they are said to keep perfectly fresh for many months.

BEANS AND COCKROACHES.—Boil one ounce of poke root in one pint of water until the strength is extracted; mix the decoction with molasses, and spread it on plates in the kitchen or other apartments which are infested by these insects. All that have partaken of this luxury during the night will be found "organic remains" the next morning.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JANUARY 15, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHARPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter of our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

ORAPS STREET GERMAN CHURCH.

This beautiful house is finished, and will be dedicated on Sabbath, the twenty-third, at half-past three P. M. Bishop McTyeire will preach a sermon and dedicate the church.

The house is as large as Moreau street church, with a basement and spire. It is beautiful in all its proportions. The seats are of cypress, very comfortable. The color and grain of the wood have been preserved. But we forbear giving a more minute description until after the dedication. To our friends in this city we say: be present and see for yourselves what good taste, devotion to Methodism, energy and poverty can accomplish.

To Captain Robertson and Rev. John Pauley the church is largely indebted for this grand result. Besides the church, a parsonage has been completed, directly adjoining the house.

NEW PUBLICATIONS.

We have from the publishers, J. B. Lippincott & Co., through James A. Gresham, Camp street, a volume of poems, or rather, as the author modestly names it, A WREATH OF RHYMES, by Millie Mayfield; 12mo, pp. 386. This volume consists of detached poems, all of which possess the unequivocal merit of shortness.

We have received this week the NEW ECLECTIC for January. We notice in the table of contents considerable attraction.

Those who have heard of, as well as those who know the high degree of perfection to which the sewing machine of the great original inventor, Elias Howe, jr., has attained, will be glad to learn that the Howe Machine Company have established a Southern office at 207 Canal street, New Orleans. All are invited to call and see the machine operate, or send for a "History" of this household friend. S. P. Farnly & Co. are the general agents.

Industry will make a man a purse, and frugality will find strings for it. Neither the purse nor the strings will cost anything. He who has it should draw the strings as frugality directs, and he will be sure always to find a useful penny at the bottom of it. The servants of industry are known by their livery; it is always whole and wholesome. Idleness travels very leisurely, and poverty soon overtakes him. Look at the ragged slaves of idleness, and judge which is the best to serve, industry or idleness.

LETTER FROM BISHOP MCTYEIRE.

ALABAMA COLORED CONFERENCE.

According to appointment, the Alabama Colored Conference of the Methodist Episcopal Church South was organized in Talladega, Alabama, November 25-28. Having been detained by sickness, I did not arrive until the twenty-sixth; but the Rev. J. T. Curry, the presiding elder of the Lafayette district, Revs. D. Duncan and A. D. McVoy, with Judge Thornton acting as secretary, being present on Thursday, took initial measures by calling the preachers together and receiving the names of the applicants for membership in the new Conference. On Friday morning I found a goodly number gathered in the basement of our church, and ready for the work before them. The Rev. J. T. Curry, acting as secretary, we proceeded to organize by constituting and recognizing, after due examination, the following ordained preachers: Anderson Jackson and Tony Davidson—ordained deacons by Bishop Wightman two years ago, at the Montgomery and Mobile Conferences; Herod Howard, Robert Brooks—ordained by me at the last session of the Montgomery Conference; Henry Sea, an elder, and Lewis Jacobs, a deacon of several years. These were men of ripe age and approved character and intelligence, and have been engaged as pastors of colored churches, under the direction of our Bishops or presiding elders. Before them were brought the following persons, who, upon examination, were elected to deacon's orders and admitted into the Conference, and thereupon took their seats and acted with the original six. I give the names only of those who were elected and admitted, premising that nearly all of them had been furnished with forms of recommendations by the Quarterly Conferences (mostly white) from which they came. A few cases, otherwise well vouched for, I felt authorized, in making a beginning, to act upon without these regular papers:

Ephraim Browning, from Dayton Quarterly Conference; Ezekiel Reynolds, from Havana; Spencer McPherson, from Fayetteville; Moses Pringle, from Meridian; Arnold Boyd, from Oak Bowery (he bore a certificate of election by the Montgomery Conference a year ago); Philip Allison, Oak Bowery; Joseph Durr, Loachapoka; Green Jackson, Russell county; Thomas Bonner, Orrville; James Nanzant, Alexandria; Peter Buchanan, Coosa county; Joe King, Oxford; Caleb Dunn, Talladega county; Nelson Reynolds, Talladega county; Nelson Coleman, Fayetteville; Jabez Evans, Clay county; Hampton Shuford (ordained a year ago,) of Hayneville.

The following were recommended and admitted on trial: Reddick Drake, from Auburn; Ben Kennou, Thornton Patton, Alfred Simpson and George Butler, from Noubex; Anthony Hunter, from Wilcox; Asbury Matthews, from Socopaty; Henry Pickett, from Autaugaville; Dennis O'Driscoll and George Blue, from Eufaula; Anthony Lowry and Perry Hargrove, from Macon; Alvis Williams, from Wilcox; Jack Saddler, from Forkland; Allen Pryor, from Troy; John Smith, from Choctaw.

On Sunday, eleven A. M., after sermon, I ordained as elders—they having been examined and elected on Saturday—Anderson Jackson, Tony Davidson, Herod Howard, Robert Burks and Lewis Jacobs. At three P. M. the deacons were ordained and the appointments read out, after suitable religious services and resolutions of thanks to the citizens for hospitable entertainment, to the white brethren for the use of the basement which had been fitted up for their accommodation, and to the Selma and Rome Railroad for the courtesy of return tickets.

The Conference was a very pleasant, hopeful and religious occasion. The men who composed it, and the policy it represented, grew in favor with citizens and visitors to the end. Our church membership were favorable, and gave facilities to their household servants for accommodat-

ing the colored guests, who fared well—though the local negro population had been much prejudiced (by certain parties, ecclesiastical and political) against the Conference before it met. The moral effect was evident and gratifying. The colored preachers, in intelligence and expression of character, were ahead of what I expected. I believe Alabama will furnish one of the best Colored Conferences in the connection. I take pleasure in advertising to one fact which has contributed to preparation, and will help, under God, to insure success: The preachers of the Mobile and Montgomery Conferences have, for the most part, taken an interest in their colored brethren—directing their labors and helping them to shape out circuits and districts. From Rev. J. W. Shores I received careful accounts of the work within his district—with suggestions as to the formation of circuits and their supplies, which were very useful. Rev. J. L. Cotten, presiding elder of the Tuscaloosa district, rendered special service by letter, as did also Rev. A. West, of the Camden district; Rev. S. H. Cox, of the Macon district, and Rev. W. S. Turner, of the Wetumpka district; Brothers Wilson and Curry, presiding elders, were present, giving valuable counsel and aid; also Dr. Vandiver and Judge Groce. A devoted and useful laborer in this field for a year or two past is the Rev. Samuel W. Harris, of Oak Bowery, a local elder. His labor of faith and love I beg to commend as an example to our brethren everywhere. His influence upon this work in East Alabama has been very happy. The good effects of the labors of Rev. Dr. Murray, in the west, were also evident.

I have organized and sent forth these laborers into the great and wide field that lies before them, with the promise of the continued aid and sympathy of our preachers and people. Let the people help them to build chapels and schools. Let the presiding elders, in places not reached by any of the appointments announced, organize colored circuits and appoint preachers wherever practicable, and put them in communication with the districts to which they should be attached. The work which our church has done in the past for the colored people in Alabama need not be lost—must not be. I am satisfied that this independent, co-ordinate organization, as promised by the General Conference, is the best religious hope of the colored people. Weary of change and drifting, they are looking for stability of religious institutions to those who were the honored instruments of God in their conversion. May the Lord, who redeemed these souls with his own blood, be pleased with what we do for their salvation! *Nashville Christian Advocate.*

EAST ALABAMA MALE COLLEGE.

A resolution was passed at the last session of the Montgomery Conference, obligating every member thereof to preach on the subject of education in all their churches, and to take up collections during the month of April for the purpose of liquidating the debts of the East Alabama Male College.

Having confidence in the pledges of good men, we enjoy the comfortable hope that this institution will soon be clear of debt. This event, though pleasing, is not sufficient. The college must be endowed, in order to make it a great blessing to the church and to the country; in order to fill its chairs with the very best talent, and in order to offer unsurpassed advantages to those seeking the halls of learning. To effect this the agent proposes the following plan: One thousand persons to give each \$10 annually for the next ten years (\$100 in ten payments, or fewer payments, if preferred,) which will make an endowment of \$100,000. It is proposed to appropriate one-fourth of this for endowing a chair of theology. Of course no one is deprived the privilege of a more liberal contribution. Having obtained one hundred names to this plan I avail myself of the kind offer of the good editor of the New Orleans Christian Advocate to publish the list, which I hereto append:

Nashville—Bishop H. N. McTyeire. *Montgomery Conference*—Revs. O. R. Blue, W. A. McCarty, John Matthews, William Shapard, M. S. Andrews, W. M. Motley, J. W. Shores, W. H. Wild, J. B. Cottrell, Dr. S. K. Cox, A. S. Douglas, E. B. Norton, L. F. Dowdell, E. L. Loveless, A. C. Baker, R. A. Timmons, W. B. Neal, E. S. Smith, W. A. Sampey, G. R. Lynell, B. B. Ross, A. Dowling, J. G. Walker, J. T. Curry, W. A. Edwards, S. A. Pilley, J. A. Pace, B. B. Crawford, L. Patterson, R. H. Harris, Z. T. Morris, D. S. McDonald, J. H. Lockhart, E. A. West, J. W. Solomon, B. L. Selman, J. H. Ledbetter, M. J. Law, F. L. B. Shaver, W. L. Clifton, J. L. Skipper, T. J. Armstrong.

Auburn, Alabama—Colonel J. F. Dowdell, Professors J. T. Dinklin, W. C. Stubbs, H. H. Duncan, W. C. B. Perry, E. T. Glenn, W. C. Dowdell, Professors L. A. Dowdell, A. G. Dowdell, Silas Dowdell, A. R. Sullenberger, G. A. Clower, F. M. Clower, T. H. Clower, H. L. Clower, G. C. Dillard, Major J. W. Willis, Colonel F. M. Rase, Doctors F. G. McElhane, G. S. Cobb, A. T. Rowe, Major D. F. Haliday, W. B. Frazer, Captain J. T. Scott, Warren Payne, J. T. Rutledge, A. J. McElhane, Mrs. Isaac Hill, Doctor J. W. Myrick, Simeon Perry, W. H. Lamar. *Glennville, Alabama*—Rev. Dr. F. H. Dawson.

Wetumpka, Alabama—Harris Sterns. *Union Springs*—Dr. J. A. Hayes, Colonel R. H. Powell, Captain J. M. Cary, Mrs. S. A. McRae, Colonel M. B. Locke.

Enon—Rev. D. M. Banks, William T. Davis.

Oak Bowery—Rev. S. W. Harris. *Oswichee*—Colonel W. H. Chambers, Dr. F. A. Johnson.

Talladega—Judge J. E. Groce, E. C. Turner.

Autugaville—Dr. B. F. Davis. *Tuskegee*—General C. A. Battle.

Opelika—J. H. Swearingen, Esq. *Columbiana*—Rev. Bruce Harris.

Montgomery—General J. H. Clanton, Judge David Clifton, Colonel E. A. Edwards, Captain William Fowler, J. H. Lakin, S. B. Brewer. *Smith Station*—William Lowther.

Bishop McTyeire wrote to the agent: "Put me down for Auburn College" (East Alabama Male College,) "and thank you for the opportunity. I think I can pay \$10 a year for ten years, to bring up and put on a grand footing so important an institution to the Church and to the State." Will not many follow his good example?

T. J. RUTLEDGE, Agent,
Montgomery, Alabama.
JANUARY 10, 1870.

WET SUNDAYS.

Speaking of these, the *Sunday Magazine* remarks:

The imprisonment of a wet Sunday may itself prove a means of grace. Wherever attendance on public worship is so habitual that any omission of it is distinctly felt, the feelings associated with the day and its usual occupation may be more powerfully stirred by the sense of void than by any appeal that would have touched them at church. There are thousands who would at any time prefer the buldest service and the dullest preacher, that could just hold their attention, to being left alone with their own thoughts. An unoccupied hour, for which nothing has been provided, is a rare opportunity for conscience. Many a sermon, with a most unmistakable application, is preached while both preacher and hearer are looking through the same pair of eyes into the fire, or on the streaming clouds as they send before the wind.

The enforced leisure of a wet Sunday affords opportunity for gauging the quality and strength of our spiritual tastes. A man has surely some reason to suspect that his ordinary interest in the service of the sanctuary is esthetic rather than religious, more intellectual than spiritual, if he cannot find employment for his unexpected leisure in his Bible. An hour or two with nothing to do, which under other circumstances would have been spent in God's house, is as plain an invitation to read through a gospel, or a group of epistles, or to spend an extra quarter of an hour in prayer, as a man could look for. The higher tastes of the soul must have become vitiated, or never have been formed, if such a way of spending part of a wet Sunday seems irksome.

In a family the head of it may enlarge his functions as priest in his own house, and gather his children about him for an extemporized service that will furnish them with hallowed treasures of memory in years to come; or he may take the opportunity to show the interest he feels in their religious instruction by drawing them into that kind of talk which, to be impressive, must be rare, kept for times which are recognized by common feeling as sacred. Some may think they make an unworthy concession in allowing that a wet Sunday need keep any but the aged and invalids at home. It is admitted that the inconveniences

and risk loom larger in the imagination than they are really found to be when actually encountered. Those whose office obliges them to be in their places in spite of "hail, rain, blow or snow," do not often suffer for their attention to duty. But then they have the excitement of activity to prevent them suffering the chill that may seize those who wait on their ministry. Still, within the limits, one of the uses of a wet Sunday is to test the religious earnestness of a congregation.

More might be said by an advocate for wet Sundays; but quite as much has been advanced in their favor as could be expected from one whose interest and work are so centered in Sundays that he cannot say he ever really desired a wet day. Even when he has felt more unequal to his duty than usual, and might be supposed to be thankful that there would be few who would suffer from his deficiency, there have been the counterbalancing considerations that a depressing atmosphere would make matters worse, and that those who brave inclement weather for the sake of the blessing out of Zion deserve the best ministrations of a minister's hand and heart.

THE GIRLS' HOUSE OF REFUGE.

Mr. Editor: A year ago we called the attention of your readers to this institution, founded by a Protestant, Mrs. Mary Randall, which afterward passed into the hands of the city. The object of this institution is to give a home to girls left in the streets by worthless parents, or caught in some petty act incident to a vagabond life. These girls are taught all kinds of household work, sewing, and reading, writing and arithmetic. But, above all, it is necessary to instill religious principles, to sow the good seed, to bring a Saviour to their mind's eye, that his great love might be the all-constraining principle.

According to the constitution no creed was taught. To make Christians of the girls was the one great object. But, as we informed your readers last year, the City Council named a Catholic board of gentlemen's committee, and these, in turn, named a Catholic ladies' committee. From the first it was known that the object of these committees was to place the institution in the hands of Romish priests. Their first step was without deigning to consult, nay even to notify, the one Protestant lady of the board. One of the City Councilmen coolly writes a note to the remaining ladies' committee, that he thinks he can manage to get a Sister Canoness into the institution as teacher. This is done, contrary to the constitution that no creed is to be taught, only Christianity, as the city has no creed, and the taxpayers are largely Protestant. The dogmas of the Church of Rome are publicly taught.—One would suppose this would be sufficient. But when does that grasping church ever have enough? Self, power and gold are the gods of its priests; and when were these legions ever satisfied?

In a puff which appeared some days ago in the *Times*, calling upon the charitable to give liberally to a largely gorged institution—the House of the Good Shepherd—which can easily count its tens of thousands, and we rather suspect its hundreds of thousands, put aside to build a large and costly edifice, it is coolly asked why the Girls' House of Refuge is not given over to the management of the Sisters of the Good Shepherd. "They, at least, would throw around the unhappy inmates much of the kindness and tenderness which so tend to soften the cares of life." We would like to know if by kindness and tenderness is meant the system of bare feet, coarse and scant clothing, and starving, called penance, which we know is pursued in the House of the Good Shepherd. In contrast to this we appeal to the known facts that the girls at the Refuge are treated with uniform kindness, no invidious, pharisaical distinctions between the girls being allowed, although the Catholic ladies greatly desired this. Witness the kind efforts of the matron, Mrs. Stokes, to afford them enjoyment on Christmas, herself cooking the dinner, and, as far as her means allowed, giving them cakes and fruit. Her object in life is not to get out of the public all the money she can, to put

the same in brick and mortar, thereby increasing the power of a most dangerous set of men—the priests of Rome. She, poor woman, was from June to December without her pittance—\$40 a month. In December both Mrs. Stokes and the teacher received one month's pay.

Further, this puff insinuates that the city will be a gainer in a financial view. A beautiful accountant is our friend, the Puff, that the support of one matron and of one teacher is greater than the support of a swarm of so-called Sisters of Charity and their spiritual fathers. Who picks up a newspaper without seeing announcements of fairs for some Romish institution? Who visits these fairs without becoming aware that Protestants are contributing largely to swell the funds, to fill the coffers, of that hierarchy?

Financial economy to the city to suffer such vampires! They always talk and write of their orphans as being in a starving, naked condition, when the Church of Rome, from its head, the Pope, to the priests and Sisters of Charity, are wallowing in wealth—wealth wrung from the miserably poor as well as from the rich—wrung from their superstitious fears of the future, as of the present.

Look around and see the number of asylums to shelter the lazy women of Europe, who swarm to us in the guise of Sisters of Charity, of Mercy, of the Holy Cross, of the Sacred Heart, of Little Sisters of the Poor, and who do the will of their masters, the priests. It behooves us, as Protestant Christians, to see that the city government and city institutions are not deliberately put into the hands of Rome. Economy! when the popish City Council allow such bills for goods furnished the House of Refuge to be paid, with only a passing remonstrance forced upon them by the exorbitance of the prices; for instance, very common small shawls, retailed at ninety cents apiece, charged \$3 50 apiece. Talk of economy!

Minutes of the Montgomery Conference.

Mr. Editor: The Montgomery Annual Conference convened in Union Springs, Alabama, December 8, and adjourned at eleven o'clock on Tuesday night, December 14. Bishop Paine presided.

The following resolution was adopted in reference to the publication of the minutes:

Resolved, That for the purpose of defraying the expenses connected with the publication of the minutes of this Conference, there shall be in future an advertising department connected therewith.

To carry into effect the above resolution the following committee of nine was appointed to procure advertisements:

J. R. Rogers, Union Springs, Alabama; M. B. Locke, Union Springs, Alabama; W. S. Baker, Mobile, Alabama; W. F. Joseph, Montgomery, Alabama; J. B. Gorde, Montgomery, Alabama; J. H. Swearingen, Opelika, Alabama; William Lowther, Columbus, Georgia; W. W. Wilkinson, Greenville, Alabama; S. H. Dent, Eufaula, Alabama.

There will be four thousand copies published for gratuitous distribution. These will be sent to every member of the Conference, both clerical and lay, and be distributed by them.

All good business men will readily perceive what an admirable opportunity this is to advertise their business, and thus bring it prominently before an intelligent public, in a permanent form. These minutes will be read and preserved for future reference.

Send in your advertisements promptly, before the first day of February next.

The cash must, in every instance, be paid in advance, at the following rates:

One page, 4x7 inches..... \$25 00
Three-quarters of a page, 4x7 inches..... 20 00
One-half page, 4x7 inches..... 15 00
One-quarter of a page, 4x7 inches..... 10 00
One-eighth of a page, 4x7 inches..... 5 00

No advertisement will be inserted for less than \$5. We solicit advertisements from each and every State in the Union.

Persons living at a distance will please address the undersigned at Union Springs, Alabama, or any

other member of the committee, if more convenient. Respectfully,
J. R. ROGERS,
Union Springs, Alabama.
N. B.—Each member of this committee is expected to make known this opportunity to the enterprising men of his acquaintance; collect the money in advance, and forward both money and advertisement to me or to John W. Mathews, secretary of the Conference, promptly.

J. R. R.

A POOR MAN, living on bread and water, because he will not ask for more than bare sustenance requires, and leading a quiet, cheerful life, through his benevolent sympathies, his joy in duty, his trust in God, is one of the true heroes of the race, and understands better the meaning of happiness than we, who cannot be at ease unless we clothe ourselves "in fine linen and fare sumptuously every day," unless we surround, defend and adorn ourselves with all the products of nature and art. His selfishness of outward means is a sign of inward fullness; while the slavery in which most of us live, to luxuries and accommodations, shows the poverty within.—*Channing.*

A white garment appears worse with slight soiling than do colored garments much soiled; so a little fault in good men attracts more attention than grave offenses in bad men.

Married.

At the residence of Mrs. Locky Davis, Lowndes county, Miss., Dec. 28, 1869, by Rev. T. C. Wier, Rev. VINCE O. HAWKINS, of the Mobile Conference, to Miss BELLIE DAVIS.

By the Rev. J. G. Rush, at the residence of the bride's mother, in Washington county, Alabama, ROBERT BURGESS, of Mobile, Ala., to Miss DELLE VACHAN.

Obituaries.

MRS. SUSAN M. HUCKABEE, wife of Rev. J. C. Huckabee, of the Mobile Conference, and daughter of Richard and Isabella Cooke, was born in the State of Virginia, May 10, 1823, and died in Marengo county, Alabama, November 3, 1869.

In the year 1847 she was converted and joined the Methodist Episcopal Church, under the ministry of Rev. H. N. McTyeire, in Demopolis, Alabama. She died as the Christian dies. As a mother she felt concerned about her children whom she was leaving in this world of trial, requesting her husband to instruct them in the truths of the Bible, and train them up to be Christians. She rejoiced in the thought of meeting her children, who had already gone before, in the land of immortal rest.

Mrs. M. C. PLATT, wife of J. E. Platt, and daughter of G. B. and A. J. Grace, was born in Sumpter county, Alabama, July 5, 1801. She was brought up in Choctaw county, Alabama, and moved to Rankin county, Mississippi, in November, 1866. On the twentieth of December last the final summons came for her. Strong in the faith, she quietly "fell on sleep." She was a devoted wife, a kind mother, an obedient daughter, an affectionate sister, and an exemplary member of the Methodist Episcopal Church South. She is gone.

"Where the weary are at rest,"
"She is gathered to her God;
Yea, her pain of life is past,
And all her warfare's o'er;
Let the world bewail their dead,
Fondly of their loss complain,
Sister! friend! by Jesus freed,
Death to thee is eternal gain—
Thou art entered into joy." K.

The triumphant Christian's death is more noteworthy than crowning an emperor.

Mrs. E. B. SCOTT, a native of Kentucky, passed away, a victim over death, January 2, 1870. It was the privilege of her former pastor to visit her several times in the last conflict, and witness her exultation and triumph. Her confidence was unshaken and increased to the last. She dreamed, the night previously, that she "was just stepping out of the Jordan on the bright shore of life immortal." After reading and prayer I sang the words, "O sing to me of heaven," etc., and her eyes sparkling with immortal radiance, she said: "That is the very song I wished to hear." On leaving she said: "Give much love to Sister W., and tell her how happy I am at the prospect of death." She said: "To-morrow will be New Year's; and, just to think, I may be an angel." It was not that day, but the next, that she realized it.

Though the human form divine was wanted and emaciated by long months of suffering and disease, yet there was in every faint utterance and expression of the countenance a radiance that lit up the chamber of death, and spoke of victory and triumph. I never before witnessed such a scene. It is worth a

long lifetime of self-denial and hardship to die such a death.

"O may I triumph so,
When all my warfare's past;
And, dying, find my latest foe
Under my feet at last."

It was a sadly solemn and touching scene, the offering up her children to God, and imparting the last blessing. "Blessed are the dead who die in the Lord."
T. B. WHITE.
NEW ORLEANS, Jan. 9, 1870.

ROBERT F. BURT, son of Harry H. and Elizabeth Burt, was born in Carroll county, Mississippi, February 28, 1840, and died at his residence, near Duck Hill, Mississippi, November 18, 1869.

Mr. Burt was married to Miss Dora Edger, of Grenada, Mississippi, December 17, 1868, with whom he lived only eleven months and one day, when the sacred tie was severed by death's strong arm, and she left to mourn the loss of her beloved. How soon the loveliest flowers fade, and the dearest objects to our hearts on earth depart, and leave us to drop the tear of grief as we tread life's road without them! As a gentleman Mr. Burt possessed a high sense of honor, and was very agreeable in his intercourse with his fellow-men. As a man of business he was energetic, and whatever he purposed to accomplish received his time and attention. As a friend he was ardent in his attachments and warm in the expression of his feelings toward them. As a neighbor he was sympathetic and obliging. As a relative and friend he was very kind and affectionate. As a husband he was perfectly devoted to her whom he chose to go life's journey with him, and bear in common his afflictions and disappointments, and to share in love his blessings and prosperity.

He had strong desires to be religious, and twice joined the church; yet, like a great many others, being young and thinking that he might live to be old, and the world being congenial to his nature, he gave up each time his purpose to serve God now, and withdrew his name from the church record, and went back to taste and drink of the pleasures of the world again.

I talked with him frequently upon the subject of religion during the three years of my ministry here, and his purpose was to be religious some day in the future, when he had consummated the plans which he had laid for his worldly comfort and happiness, not remembering that procrastination is the thief of time. But this he found to be true to the letter.

Thirteen days before he left the world disease seized his house of clay, and sent his quick and fearful arrows through every part of the building, prostrating it at once, and in a very few days perfectly demolished it, and reduced it to dust again. Now he felt the need of time; but his life was just closing its journey, and could not be gathered up again. He felt the great error of the past, but could not correct it. He felt that all worldly ends after which men strive are but so many perishable flowers, which wither from the path that leads to imperishable crowns above. He felt that preparation is necessary to live beyond the grave; otherwise the death of the body will prove the death of the soul. He felt the need of his God to travel with him through the valley and shadow of death to eternal life beyond. Oh! how helpless and dependent now. The angel of death is hovering over him, and day brings him nearer; but God does not suffer him to seize his victim yet, and while he delays the poor sufferer offers prayer to God—that is, the prayer of repentance and faith—the key that unlocks heaven's stores of grace, and God answers with the power and witness of his Holy Spirit, which imparts eternal life to the suffering soul, as well as unfathomable joy and peace; and Jesus, the friend of sinners, comes to bear him across Jordan's cold stream, where his friends and loved ones are compelled to leave him a solitary traveler, and carries him to everlasting rest above. Thus before the messenger of death consummates his work upon this earthly house, the spiritual inhabitant feels that he has "a house not made with hands, eternal in the heavens."

Thus lived and died the subject of this brief notice, after having faithfully warned his friends of the danger to which they are exposed, and exhorted them to turn to God, and no longer pursue the error which he committed. Upon the very same hill-top where he first beheld the light of the sun, and where he grew to manhood, lies his dust, which shall come forth no more until it obeys the fiat of the great I Am, and bounds forth and grasps an immortal existence by being reunited with the spirit.

I would say to his bereaved wife and friends to strive to meet him above by preparing now, while time deals gently with you, and circumstances are so favorable to the consummation of such an end. O that God may sanctify the affliction to the salvation of many of his relatives and friends!

G. W. BOYLE.

DR. DAVIS ON DEAFNESS.

Now ready, a pamphlet entitled NOTES ON DEAFNESS, by W. L. Davis, M.D. Eighth edition. Price, Forty cents. To be had of Sipe & Co., 72 Camp street; Eyrie, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, No. 9 Basin street. Sent post-paid on receipt of price. Direct all communications to Glass Box 399, Post Office, New Orleans.
OBSERVE.—Dr. D. gives his whole attention to Aural practice.
Jal 15.

TO CONSUMPTIVES.

The advertiser, having been restored to health in a few weeks by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption, is anxious to make known to his fellow sufferers the means of cure.
To all who desire it he will send a copy of the prescription used, free of charge, with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthma, Bronchitis, etc. The object of the advertiser in sending the prescription is to benefit the afflicted, and spread information which he conceives to be invaluable; and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blessing.
Parties wishing the prescription will please address
REV. EDWARD A. WILSON,

THE MECHANICS' AND AGRICULTURAL FAIR ASSOCIATION OF LOUISIANA

will hold their NEXT GRAND STATE FAIR in New Orleans, beginning on the twenty-third of APRIL, 1870, and to be continued for nine days.

Premium Catalogues for the Fair can be procured at the office of the Association, or through the Post Office, as desired.

Stockholders holding in their own names ten shares of the Capital Stock of the Association are required to call at the office of the Secretary, Mechanics' Institute, to get their tickets of admission to the Fair Ground for the year 1870, as an entire new class of tickets have been prepared. These tickets will admit the owners with their families and carriages on the Fair Ground at all times, even if said Ground is rented or used for special purposes.

The Directors invite every good citizen to become a stockholder, and to purchase the stock thus required from the Secretary of the Association.

P. S.—Choice rams, scrubby and Bonquets are for sale at the Fair Ground.

STONEWALL INSTITUTE, Located 43 Miles North of Selma, Ala.

After a week's recess for Christmas the exercises of this School for Boys will be resumed on MONDAY, JANUARY 3, 1870. It affords the Principal peculiar pleasure to announce three facts:

1. He has engaged the services of that thorough scholar and teacher of his art, with ten years' experience as an instructor, MR. JOHN J. WILLIAMS, to assist him in imparting to his pupils a perfect knowledge of all the Mathematical sciences, including Book-keeping and Field Surveying.

2. He has on hand at the Institute, and has had since October last, the most beautiful and stylish boys that for two years have been under his instruction.

3. Three of his pupils of 1868 have taken premiums this year at three different Universities—the first in the South—a fact furnishing the most possible endorsement of his fidelity and skill.

Two features of this School distinguish it from most others: its teachers are on the ground all the time, and actually give instruction nine hours per day; and each instructor is limited to twenty pupils.

The habits and morals of its inmates are particularly cared for, all being treated as gentlemen, and all being required to act the gentleman. The honor of young men being constantly cultivated in all particulars. And to aid in establishing these results, the Bible is revered as authority, its truths being studied and taught in uniform lessons each Sabbath, with all material services regularly performed; and the feeling of home is infused into the mind and heart of every student.

Charges from January 1, 1870, for board, tuition and washing, will be \$175, paid on entering, or in a thirty days' accepted draft on the Institute or Selma, with \$10 on deposit for books. Payments may be made to W. S. Knox, Selma, Alabama, or Foster & Gardner, Mobile, Alabama.

In the elementary parts of education, even in writing, spelling and reading—which are taught at the School, the best comparison and invites scrutiny. Thoroughness in every department is the basis of progress.

The location of the Institute is in the quiet country, and is distinguished by its healthfulness. Here no clear snuffs or lighter snuffs distract the mind or corrupt the morals of the students. This gives its pupils great advantages in learning books and acquiring habits of close thinking. Its patrons at all times invited to visit and see for themselves the admirable daily schedule of duties and toll here extended by each teacher and pupil.

As all are vitally interested in sustaining an institution whose standard of morals and thoroughness of scholarship are so unquestioned, the principal cordially promises to the public, pledging to that public to give his constant and undivided attention to the interests of his charge.

As the number of students will be limited, those parties intending to send will please at once address the undersigned.
D. C. B. CONNELLY, President,

A HUMBUG.—HOW OFTEN WE HEAR this expression from persons reading addresses of Patent Medicine men, and in nine cases out of ten they may be right. It is twenty-two years since I introduced Dr. Tobias' Venereal Lintment to the public. I had no money to advertise it, so I left it for sale with a few druggists and storekeepers through out the country, many taking it with great reluctance; but I did not do all I stated on my pamphlet, no one need pay for it. In some stores two or three bottles were sold gratis by persons present. I was, by many, thought crazy, and that would be the last they would say of me. But I knew my medicine was no humbug. In about two months I began to receive orders for more. I continued to sell it my valuable Lintment, who had refused to sign a receipt when I left it at their store. Now my sales are millions of bottles yearly, and all for cash. I warrant it superior to any other medicine for the cure of Gonorrhea, Discharge, Syphilis, Colic, Venereal Swellings and Sea-sickness, as an internal remedy. It is perfectly innocent to take internally—see accompanying each bottle—and externally for Chronic Rheumatism, Headache, Mumps, Frost-bite, Itch, Scalds, Old Sores, Swellings, Sore Throats, etc.

Price, fifty cents. Sold by the Druggists, Depot, 10 Park Place, N. Y.

RASCALITY RAMPANT!—SWINDLERS in Arms!—The "STAR SPANGLED BANNER" is threatened with arrest for its truthful exposures of the "Tricks and Traps" of Swindlers. One rascal offers \$500 to be "let alone." See the December "Banner." Twenty-five swindlers "ventilated." The "Star Spangled Banner" enters upon its eighth year in January, 1870. It is a large illustrated weekly, of the type of "Punch," "Illustrated London News," "Penny Illustrated," etc., and is devoted to literature, poetry, sense, wit, wisdom, and to anything calculated to entertain or instruct. The superb steel engraving, "Evangelical," 14 1/2 feet in size, mounted on a roller, is sent free to every subscriber. Only seventy-five cents a year. Now is the time. Your money will be refunded if you are not perfectly satisfied. Remember, there's nothing like it. You need it. It will save you money. Send news dealers all. Only five cents. Send seventy-five cents and secure it till 1871, and the elegant engraving gratis. December number sent for six cents. Address
STAR SPANGLED BANNER, Hinsdale, N. H.

WANTED.—AGENTS FOR GOD IN HISTORY. The second great book of the age. NOW READY. We hope for this work a sale equal to the

HANDWRITING OF GOD. The grandest Subscription Book of modern times. The above works, with our Pictorial Banners of One Thousand Illustrations, opens a field of surpassing richness to every earnest worker. Copies given to any person securing a good Agent. Eighty pages sent free. Address, stating territory desired,
GOODSPEED & CO., 37 Park Row, New York, 148 Lake street, Chicago.

TO THE WORKING CLASS. We are now prepared to furnish all classes with constant employment at home, the whole of the time or for the spare moments. Business men, light and profitable. Persons of either sex easily earn from fifty cents to \$5 per evening, and a proportionate sum by devoting their whole time to the business. Boys and girls earn nearly as much as men. That all who see this notice may send their address, and test the business, we make this unparalleled offer. To such as are not well satisfied we will send \$1 to pay for the trouble of writing. Full particulars, a valuable sample, which will do to commence work on, and a copy of The People's Library Companion—one of the largest and best family newspapers published—all sent free by mail. If you want permanent, profitable work, address
E. C. ALLEN & CO., Augusta, Maine.

THE DOLLAR SUN.—CHAS. A. DANA EDITOR. The cheapest, smartest and best New York newspaper. Everybody likes it. Three editions: Daily, 5¢; Semi-Weekly, 2¢; and Weekly, 1¢ a year. All the News at half price. Full reports of markets, agriculture, farmers' and fruit growers' clubs, and a complete story in every Weekly and Semi-Weekly number. A present of valuable plants and vines to

The Child's Corner.

THE OLD YEAR.

BY PAUDY.

Last night, when all the village
Was lying white and still,
With starlight in the valley
And moonlight on the hill,
I wakened from my dream,
And hushed my heart to hear
The old clock on the steeple
Toll out the dying year.

They say that when the angels
The blessed New Year bring,
The souls that wake to listen
Can hear them softly sing
The same melodious anthem
Of peace and love on earth,
That told to Judah's shepherds
The dear Redeemer's birth.

No sound came through the silence,
But, waiting there, I thought
Of all the gifts and blessings
The year to me had brought;
And something sang within me:
"O happy heart! to-day
Remember all who sorrow,
And wipe their tears away."

So in that solemn morning,
When first thy feet shall stand,
Where dawn in light unshadowed
The years of God's right hand,
These words of benediction
Thy welcome home shall be:
"Thy deeds of love and mercy
Have all been done to Me!"

—Little Corporal.

PERILS OF WHALE FISHING.

One of the boats being some three miles from the shore, imprudently fastened to a cow whale, no other boat being in sight, the whale very quickly turned the boat bottom up, without saving a plank, and then went off some distance. The men set about righting the boat, but could not free her from water; however, they got the oars lashed athwart, and although the gunwale was level with the sea, commenced paddling (each boat always carrying a set of paddles besides the oars), toward the shore, as I saw, about a league distant. The current was against them, and they did not make much progress; still they were gaining ground, when to their surprise they saw the wounded whale coming toward the boat. As soon as they were convinced the boat was the object of her attention—she either supposing it to be her calf, which lay dead some miles distant, or from a desire of vengeance—the crew leaped overboard, and the irritated monster played its head on the boat and there remained motionless for some time, and then she retired a short distance. The headsman of the boat now swam back to the boat, and got a lance ready, determined to use it if the whale came within reach; she did return, and Frederick Young actually thrust the lance several times into her spout-hole; feeling the smart the whale settled down some fathoms, then came up swiftly, and smashed boat and oars into fragments. There was now no alternative but to strike out for the land. One of the crew, an English sailor, could not swim, but two of our people bid him put an arm on each of their necks, and they would not leave him while life remained. The last time they saw the whale she was in a very weak state from loss of blood. And now for three long weary hours did they exert their energies to the utmost, but the current setting off shore, they had not gained more than a mile. The poor sailors were almost exhausted, and most began to think their ultimate safety doubtful. There was also among them a lad of sixteen, one of our own people, who was beginning to weary so that the other two of the men were obliged to keep up by his side and encourage him. That which seemed to alarm the lad most was the presence of immense sharks, whose fins were constantly coming in contact with his legs. All this time their perilous situation was unknown to the other boats or to us on shore. At length my son Fletcher, who headed one of the boats, seeing nothing of Young's boat for several hours, left off chasing whales, and went in quest of him. After a search of some time he concluded the boat must have landed, and began to think of doing so himself, as what are technically called "the chances of the day" were over. While rowing leisurely along shore, at about a mile from the land, Fletcher, fancied he heard something like a distant shouting or calling; on mentioning this to the crew they ceased pulling, and surveyed the adjacent ridges, which came down nearly to the water's edge, thinking it might be some one desirous of telling them in what direction the other boats were, but they could see no one. Presently they heard the same sounds repeated, and then, after a short interval, a third time. Fletcher and his crew were now of opinion that it was from the seaward, and saying: "Spring boys, there's help needed somewhere," and they went to their work with a will. After pulling nearly a mile the steersman, who had perched himself on the gunwale of the boat, fancied he saw three black spots, about the size and appearance of cocoanuts,

in the water, and quickly became assured they were human heads. Thinking these were all that were left of the crew of Young's boat, he became so affected that he sank down into the stern-sheets, and could not utter a word; this, of course, alarmed the crew, but he quickly recovered, and simply said: "Pull boys, they are just ahead." Soon they had these three on board; but they were actually afraid to ask what had become of the other three, fearing they were drowned or eaten by sharks, till one of the escaped men said: "Pull on, the others are not far off," and about half a mile further on the others were happily met with, but in a most exhausted state; humanly speaking, another half hour would have sealed their fate.

And now for ourselves on shore. Many of us, both male and female, were assembled on the pier, looking at a young whale which had been taken the day before, when a boat appeared rounding the Windmill Point; all eyes were directed toward her, and some one remarked: "There are more than six people in that boat; some accident has happened?" Our faces blanched and our hearts beat quick on hearing this very probable assumption. After a few moments, and as the boat drew near, we attempted to count the number on board. Having no glass at hand we could only perceive nine. "Three are gone," was the mournful conclusion; but whose husband, son or brother? I then ventured to ask with bated breath: "Who's steering the boat?" "Fletcher," was the reply—the only son I had out that day. Did I feel a relief? Was it selfish? I can answer the first query; let caustics decide the second. After a further scrutiny of the quickly approaching boat a tenth person was discovered, and then the eleventh. At last the twelfth was discovered seated low in the stern, with his head resting on the gunwale.

Yes, they were all there; but this last probably injured. Well, the pier was soon gained, and as they came within hail: "All right?" was our half fearful interrogatory. "All right, thank God!" was the subdued but cheerful reply. No one was hurt; and the man leaning on the side of the boat was the English sailor, still weak and pallid; our people had stuck to him to the endangering of their own lives. Some of them had on trousers and no shirt, others a shirt but no trousers; for the swimming party had divested themselves of all incumbrances, even to a state of nudity, and those in the boat had shared with them their garments, which were not many, as the weather was intensely warm. However, here they were, all mercifully preserved; and I am sure "all hands" were unfeignedly thankful for tears of joy and gratitude were plentifully shed by all present.

On the following Sunday a special service was appointed, and, I trust, my sermon from St. Matt. 8: 25, was appropriate and beneficial; and "English Jack," a well behaved but careless fellow, has ever since been a constant attendant at church, and as far as I can learn, has relinquished swearing.—Mission Field.

AN EARTHQUAKE-PROOF church (St. Patrick's) is going up in San Francisco. It is built on a plan intended to prevent loss of life in the event of the sinking down of the walls. The side walls are only thirty feet high, not including the basement. At this height a clear roof rises, which, with the main roof, is supported independently of the walls by two rows of pillars inside of the walls, both roofs are firmly bound to the pillars, and the pillars secured together by iron cross-bars, fastened with heavy iron bolts, the whole forming a network of immense strength. Should the pillars be shaken down, the roof would be launched off outside the walls (perhaps) instead of falling inside, and thus afford some chance for escape from the ruins. If this should occur the roof would be carried aside a distance of eighty feet—the length of the pillar. But the persons in the "wake" of the pillars would perhaps be unable to get out of the way.

In Paris there resides an elderly lady who passes for a countess. She makes a very handsome living by giving characters to servants requiring employment. When ladies visit her to inquire into the antecedents of a domestic, they find an elegantly dressed lady, who has a happy faculty of remembering the person inquired about, and she never knows aught but good of them. This novel mode of making a living by supplying reputations to girls who have none has been discovered, and the occupation of the countess will be seriously injured. The girls employed on account of her testimony as to their capacity gave her a per centage of their wages.

The triumphs of the gospel are unlike every other, for in them both victor and vanquished rejoice together.—Humbler in Langre.

Scientific.

SOMETHING NEW IN WORKING PLASTER OF PARIS.—We find the following in the *Druggists' Circular*:

It is a well known fact that powdered gypsum, when freed by calcination of its water of crystallization, regains to a great extent its original hardness when incorporated with water enough to form a stiff paste. In order to attain this end there is at least thirty-three per cent. of water required, whereas twenty-two per cent. is withheld as water of crystallization. The best evaporates, and thus brings about the porosity of the hardened gypsum. In working up a small quantity of gypsum one has only a few minutes time for using the paste for molding or putting, as it soon becomes hard. With larger quantities, in which case the making of the paste requires a longer time, the mass hardens, sometimes, during the operation of dressing. According to Mr. Puschner, of Nuremberg, this inconvenience may be got rid of by mixing with the dry powdered gypsum from two to four per cent. of finely pulverized althea root (marsh mallow), and kneading the intimate mixture to a paste with forty per cent. of water. In consequence of the great amount of pectin which is contained in the althea root, and which in fact amounts to about fifty per cent., a mass similar to fat clay is obtained. This mixture begins to harden only after a lapse of one hour's time. Moreover, when dry it may be filed, cut, twined, bored, and thus become of use in the making of domino-stones, dies, brooches, snuff boxes and a variety of other things of a similar character. Eight per cent. of althea root, when mixed with pulverized gypsum, retards the hardening for a still longer time, but increases the tendency of the mass. The latter may be rolled out on window-glass into thin sheets, which never crack in drying, may be easily detached from the glass, and take on a polish readily upon rubbing them. This material, if incorporated with mineral or other paints, and properly kneaded, gives very fine imitations of marble. They bear coloring also when dry, and then can be made waterproof by polishing and varnishing. The artisan, in the practice of his trade, will probably find it to his advantage to make use of this prepared gypsum in place of that usually employed by him; the manufacturer of frames need have no fear that his wares will crack if he uses a mixture of the above indicated composition; moreover, the chemist and chemical manufacturer will find that the same does excellent service in luting vessels of every kind. The exact proportion of water to be made use of cannot be given exactly, as it varies within a few per cent., according to the fineness and purity of the gypsum employed. The above mentioned althea root need not be of the very best quality, the ordinary serving the purpose perhaps quite as well.

RANSOME'S INDURATION PROCESS.—We learn from *Engineering* that Mr. Ransome's method of waterproofing walls by means of successive solutions of silicate of soda and chloride of calcium, which has been applied with so much success to many public and private buildings in England, is being used extensively in India to arrest the decay of many brick structures upon railways in that country. Among others it mentions the Waree Bunder Works, upon the Great Indian Peninsula Railway, which were constructed of such inferior material that a rapid deterioration speedily followed the construction of the works, and the crumbling of the bricks left no alternative apparent save that of rebuilding. It was, however, determined to experiment with Mr. Ransome's process, and accordingly, in 1868, it was extensively applied to the failing buildings, with the result of effectually stopping the decay, and of placing so fine and hard a surface upon the bricks that the material, which before could be crumbled by the touch, received a surface so hard as to resist the scratching from a steel point. In this manner extensive workshops and a chimney shaft were, at an insignificant outlay, rescued from destruction, and rendered sound and durable.

PRESERVATION OF EGGS.—The *Journal de Pharmacie et de Chimie* contains an account of some experiments by M. H. Violette, on the best method of preserving eggs, a subject of much importance to France. Many methods had been tried; continued immersion in lime water or salt water; exclusion of air by water, sawdust, etc., and even varnishing had been tried, but respectively condemned. The simplicity of the method adopted in many farms, namely, that of closing the pores of the shell with grease or oil had, however, attracted the attention of the author, who draws the following conclusions from a series of experiments on this method: Vegetable oils, more especially linseed, simply rubbed on to the egg

hinders any alteration for a sufficiently extensive period, and presents a very simple and efficacious method of preservation, eclipsing any methods hitherto recommended or practiced.

POISONED AIR.—No life can exist without a supply of oxygen. Pure air contains it. The heaving of the chest feeds it out to the lungs. The lungs absorb it out of the air, and in its place give out a poisonous gas, carbonic acid. What if you should breathe carbonic acid? It is impossible. The near approach of it causes the windpipe to close spasmodically, and death ensues as certainly as if the throat were held in a vice. When it exists in the air you breathe, in the proportion of one or two per cent., it is depressing and harmful; if the proportion is more than four per cent. drowsiness follows, then insensibility, then death; when the proportion is ten per cent. or more, it is especially destructive to all animal life. How long, then, can you with impunity go on exhausting the air of its oxygen and fouling it with carbonic acid? Put a mouse into an airtight jar and see how long it will live. Are you capable of breathing that which is death to the mouse? The story of the Black Hole of Calcutta is well known. One hundred and forty-six English prisoners were immured in a dungeon eighteen feet square, with two small open windows, and only twenty-three of them were living in the morning; one hundred and twenty-three died from suffocation for want of oxygen, and from the presence of carbonic acid. Everybody has heard of deaths from confinement in close rooms with pairs of burning charcoal. The charcoal is carbon. In burning it takes from the air a certain amount of oxygen; the oxygen and carbon unite and form carbonic acid, which pervades the room and destroys all life. This is precisely the mode in which ordinary breathing poisons the air. The lungs are slower in their operation, but not less sure than the burning charcoal.—Farmer.

According to the theory of M. Henze, peculiarly cold winters occur with almost unvarying regularity every ten years. He presents a long array of statistics to prove this fact, and argues that the present winter will be one of extreme rigor. The winters of 1819, 1829, 1840 and 1859 were seasons of unusual severity, and on the principle of decennial recurrence the winter of 1869 will be a severe one.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove,
which has been produced at great expense,
combining all the new and important im-
provements; also to the extra height of the
oven under the fire chamber, the Patent Air
Chamber, Front Doors, and Patent White
Enamelled Iron Knobs, the improvements in
the covers and centre pieces, all of which
have been covered by Letters Patent, and
are used in no other Stove. They are war-
ranted to stand fire, or others sent free of
charge in all cases. We have all sizes of this
justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast iron Enamelled
Reservoir and Faucet. This Warming Closet,
Grilliron Cover, etc. The part of the top sup-
porting the Reservoir is raised so that the fire
is above the top plate, instead of below, as is
the case in most of the Stoves now used, and
the heat is directly against the whole
surface of the bottom of the Reservoir. The
Reservoir, being detached from the pipe, can
be removed at pleasure, thereby forming a
six-hole Stove, the best in use, as the back
holes will heat as well or better than the mid-
dle ones. For sale by
G. W. W. GOODWYN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR BITUMINOUS COAL ON COKE

ever invented, in the estimation of all who
have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The

advantages possessed by this Stove over all

the other Cook Stoves are so numerous,

and so patent to every sensible observer,

that it is only necessary to examine it in or-
der to be convinced of its superiority.

All of the above Stoves are fitted with ex-
tra care. Oven Doors lined with tin, and fur-
nished with William Besor's Patent Air Cham-
ber, sliding front doors, patent centres, cov-
ers and White Enamelled Knobs.

The operation of every Stove guaranteed.

Directions for putting up and using same

accompanying each Stove.

STOVES, GRATES AND HOUSE FUR-

NISHING GOODS.

The undersigned would call the attention

of city and country buyers of Cooking Stoves

to the following list of Stoves manufactured

by Mr. D. L. Elzey:

The Philanthropist.

A first class Cooking stove, having all of

the latest improvements, this stove is so

well invented, that it gives entire satisfac-
tion; also an Ash-pan. The cooking is

better than any Stove sold in this market.

Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thou-

sands of this Stove are in constant use

throughout the country, which is a very good

recommendation. Sold under full guarantee.

Besides the above named Stoves, I have on

hand the celebrated Cotton Plant, Charter

Oak, True Brunswick, Mail of Orleans,
Queen of the South, and others, all of

which I offer at a low price.

J. H. CAMPBELL,
113 Poydras st., New Orleans.

THE CHARTER OAK COOKING STOVE.

From and after this date I shall keep a full

stock of the celebrated

CHARTER OAK COOKING STOVES,

so universally approved by all housekeepers,

and by special arrangement will be able to

fill all orders as low as they can be had.

Orders for this celebrated Cooking Stove

solicited, and satisfaction guaranteed.

SATURDAY, JANUARY 15, 1870.

DR. LIVINGSTONE.

HIS WORK NEARLY COMPLETED.—AN INTERESTING LETTER.

The *Bombay Gazette*, of November 20, publishes an interesting letter from Dr. Livingstone, dated Ujiji, May 30, 1869, and received at Zanzibar by Dr. Kirk, her majesty's consul, on the second of October last.

My DEAR DR. KIRK: This note goes by Musa Kimaals, who was employed by Koorji to drive the buffaloes hither, but, by overdriving them numerically in the sun and tying them up to save trouble in herding, they all died before he got to Uyanayembe. He witnessed the plundering of my goods and got a share of them, and I have given him beads and cloth sufficient to purchase provisions for himself on the way back to Zanzibar. He has done nothing here. He neither went near the goods here nor tried to prevent their being stolen on the way. I suppose that pay for four months in coming, other four of rest, and four in going back would be ample, but I leave this to your decision. I could not employ him to carry my mail back, nor can I say anything to him, for he at once goes to the Ujijians and gives his own version of all he hears. He is untruthful and ill-conditioned, and would hand off the mail to any one who wished to destroy it. The people here are like the Kilwa traders, haters of the English. Those Zanzibar men whom I met between this and Nyassa were gentlemen, and traded with honor. Here, as in the hands of the Kilwa hordes, slavery is a series of forays, and they dread exposure by my letters. No one will take charge of them. I have got Thani bin Suellim to take a mail privately for transmission to Uyanayembe. It contains a check on Ritchie, Stewart & Co., of Bombay, for two thousand rupees, and some forty letters written during my slow recovery. I fear it may never reach you. A party was sent to the coast two months ago. One man volunteered to take a letter secretly, but his master warned them all not to do so, because I might write something he did not like. He went out with the party, and gave orders to the headman to destroy my letter he might detect on the way. Thus, though I am a good friend outwardly with them all, I can get no assistance in procuring carriers, and, as you will see, if the mail comes to hand, I sent to Zanzibar for fifteen good boatsmen to act as carriers, if required, eighty pieces of mercurino, forty pieces of kinitin, twelve furs of the beds called jasmim, shoes, etc., and I have written to Seyd Mujid, begging two of his guards to see to the safety of the goods here into Thani bin Suellim's hands, or into those of Mohammed bin Sahab.

As to the way to be done by me, it is only to connect the sources which I have discovered from five hundred to seven hundred miles south of Speke and Baker's with their Nile. The volume of water which flows north from latitude 12 south is so large, I suspect that I have been working at the sources of the Congo as well as those of the Nile. I have to go down the eastern line of drainage to Baker's turning point. Tanganyika, Nyige Chowambe (Baker's?) are one water, and the head of it is three hundred miles south of this. The western and central lines of drainage converge into an unvisited lake west or southwest of this. The outflow of this, whether to Congo or Nile, I have to ascertain. The people of this, called Manyema, are cannibals, if Arabs speak truly. I may have to go there first, and down Tanganyika, if I come out unscathed, and find my new signal from Zanzibar. I earnestly hope that you will do what you can to help me with the goods and men. £400 to be sent by Mr. Young must surely have come to you through Fleming & Co.

I am, etc., DAVID LIVINGSTONE.

A long box paid for to Nijiji was lost at Uyanayembe, and so with other boxes.—*London Times*.

France, irreligious as it is, is being held up as a model of sedulous impartiality in the dealings of the State with religious matters. The Roman Catholic Church, being the established church of the country, receives \$10,000,000 annually from the government, while the Protestants have \$298,685, and the Jews \$41,500 from the same source.

A Melbourne paper states that imported rabbits had increased to such an enormous extent in Australia that small armies had to be organized to exterminate them. One man reported to the Provincial Assembly that he had employed one hundred men, several months, at an expense of \$25,000, in the work, and that in that time two millions of rabbits had been destroyed.

MEDICINE—MEDICINE.

BRAN NEW LETTERS!

FRESH TESTIMONIALS!

DARBY'S PROPRIETARY FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 28, 1869.

Messrs. J. Darby & Co., 161 William St., N. Y.—Gents: Yours of the 23d is before me, and has attracted my attention. It gives me pleasure to say that my belief is that your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted to a skeleton by the effects of teething, and an affection of the bowels therewith. I had never seen any one reduced so low to recover.

Physic had been tried in vain, until the physicians stated it was useless. A friend recommended your Fluid, or Dime, which he stated was one of the components of the Fluid. I did so, and the effect was magical, plainly discernible in one hour in its good effects, producing quiet and sleep almost at once, where irritation and sleeplessness, restlessness had previously possessed the child to nearly entire exhaustion.

I at first administered it in a small way, two and three drops in a spoonful of water, and increased it to six and ten drops. It soon completely checked the bowels, and had the happiest effect, the child rapidly recovering.

I have tried your Fluid on animals, with the same effect, both horses and cows, milking more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Cholera, Diarrhea, or any violent affection of the bowels.

I would not be without it in my family under any consideration. Yours truly,

WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Somerville, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Paine, of the Methodist Episcopal Church South:

180 Broadway, N. Y., July 29, 1869.

Messrs. J. Darby & Co., 161 William St., N. Y.—Gents: About the 10th of June last one of my children was taken with Scarlet Fever, in its most malignant form, and as soon as I could I procured your valuable disinfectant, Darby's Proprietary Fluid. Although it was several days after the appearance of the disease before I began using the Fluid, still by a free use of it the disease was not only confined to the one case, but the malignancy of that case somewhat mitigated.

During the use of the Fluid as a disinfectant in my family it was also tried in a case of Louisa's and one of toothache, the results in each case being instantaneous relief. It was afterward tried in a case of Erysipelas, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Erysipelas in question, being located in the feet, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, to the utter discomfiture of said corn, for upon subsequent examination it had disappeared, and though it was sought for diligently, it could not be found.

I hand you this, hoping it may be the means of inducing others of our fellow sufferers to test for themselves, as I did, the great merits of this great remedy.

Very respectfully yours,

FRANK SAUNDERS.

Never was a medicine so universally esteemed and extolled, or never falls: it may be depended on.

Every Druggist and Chemist Merchant keeps it. Manufactured only by J. L. FLEMING & CO., 161 William Street, New York.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE.

61 CAMP STREET.

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Tuition Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN, New Orleans.

sell ly.

METHUEN FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

NEW ORLEANS MARKETS.

NEW ORLEANS PRICE CURRENT.

The general market continues with an improvement, the demand from country merchants being limited, and the local trade showing only a moderate degree of animation. The receipts of sugar and molasses have been on a moderate scale, and although the demand for the former has been slack, they have been mostly disposed of at about previous rates. The movement in Western produce has been mostly confined to the local trade, at rather firmer prices. The stocks of all kinds are light. Among the sales we note 17,000 bushels No. 1 and No. 2 spring wheat in bulk, about one-third former, taken for Liverpool, at \$1.02, round.

The tributaries being at a good navigable stage, the receipts of cotton continue liberal. The accounts with regard to the sugar crop are unfavorable to any estimates much over 70,000 hogsheads.

The river has risen since our last, and is now four feet four inches below high water mark.

Corrosive—The following are the arrivals since the seventh instant:

Louisiana and Mississippi bales, 17,525

Lake, 274

Arkansas, 1466

Mobile, 403

Florida, 120

Texas, 121

Total, 20,091

On Saturday operations were restricted by moderate supplies, it being a legal holiday, and the banks being closed; but there was, nevertheless, a very good inquiry, and 4,000 bales changed hands at about previous rates, factors having been unable to obtain any improvement predicated on the advance in gold. On Monday, with more liberal offerings, and the demand stimulated by an improvement of $\frac{1}{2}$ to $\frac{3}{4}$ per cent. in foreign exchange, the movement was much more animated, and the sales summed up 2,250 bales, at about previous rates, the general advantage, however, being with the buyers, and occasional sales of undesirable lists being made at a fraction off. On Tuesday the market opened with a very fair inquiry, and a limited business was done at previous rates, but on the receipt of discouraging telegrams from Liverpool and New York, factors found it necessary to meet the demand more freely, and quite an active movement ensued, resulting in sales of 8,000 bales, at about Thursday's figures for ordinary and good ordinary, which were in good request, but a decline of $\frac{1}{4}$ in low middling and the higher grades.

This makes an aggregate for the past three days of 20,250 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 506,543 bales, against 477,280 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 310,572 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 135,966 bales to Great Britain, 16,740 to other foreign ports; while to France there is a decrease of 1,557 bales.

Referring to our remarks above, we quote as follows:

Ordinary, 24 1/2 to 25 1/2
Good ordinary, 25 1/2 to 26 1/2
Low middling, 26 1/2 to 27 1/2
Middling, 27 1/2 to 28 1/2
Strict middling, 28 1/2 to 29 1/2

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales, 770

Arrived past three days, 20,091

Arrived previously, 517,725—517,725

Exported past three days, 6070

Exported previously, 588,716—588,716

Stock on hand and on shipboard, 164,300

SUGAR—The demand for the better

specimens is fair, but the lower grades

are difficult of sale. The supplies were

pretty much disposed of, however, at

rather easier prices.

MOLASSES—The demand has been

fair, but at easier prices, since our last

review.

MONEY—Gold opened on Tuesday

at 121 1/4 to 121 1/2, with no opening tele-

gram from New York, and closed at

121 1/4 to 121 1/2, (against 121 1/4 at New

York.)

The sales of silver include \$2,000 in

American half dollars on Monday at

119 1/4 and 120, and 20,000 Mexican dol-

lars at 2 1/4 to 2 1/2 per cent. premium in

gold; and \$5,000 former on Tuesday at

119 1/4.

We have but little movement to notice

in stocks, and no sales have been report-

ed except 100 shares Louisiana State

Bank on Monday at \$16, 40 St. Charles

Street Railroad at about \$61, and

shares Claiborne Street Railroad at \$43.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JANUARY 22, 1870.

NO. 1.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Jan. 17.—There was nothing done by the committees this morning. Many petitions have been sent to the Senate.

The House refused the use of the hall to the president of the committee of the National Labor Union, in which to express their views.

The Hon. Mr. Fish, who was presented to the President on Saturday, is a Maine Yankee.

General Terry's dispatches indicate that three Senators and ten Representatives of the Georgia Legislature are clearly disqualified, and will be expelled by a military order, but still, however, leaving the Legislature in the hands of the Conservatives.

Prince Arthur arrived on Saturday. The festivities in his honor, as far as the programme announces, are confined exclusively to dinners, one of which will be given by Secretary Fish or by President Grant.

General Sherman has telegraphed his approval of General Reynolds' action, and approving the installation of Davis and Flanagan as Governor and Lieutenant Governor of Texas, and the convening of the Legislature.

The friends to the admission of Virginia pure and simple were discouraged to-day. The speeches showed no changes and were mostly of the general-catch order.

Senate.—A petition was presented to-day which urges the reduction of bounties to trained soldiers.

Sumner, from the Committee on Foreign Relations, presented a bill regulating ocean cables; also, a bill providing for the payment of the French claims prior to 1801.

The Virginia bill resumed.

Stewart desired the House bill to be put on its passage.

Sumner refused to allow the bill to be read more than once.

Conkling suggested that the House bill be offered at a proper time as a substitute.

Morrill, of Vermont, declared that Virginia was unfit to be admitted, either with or without conditions.

He would, however, rather trust the rebels of the South than the Democrats of the North, and Governor Walker was not a fit representative of the loyal men.

Morton proposed as an amendment that the restrictions of the fourteenth amendment forever apply to Virginia, and making the acceptance of offices conflicting therewith a penalty.

Stewart's motion finally prevailed.

The Senate bill was laid aside and the House bill considered.

Edmonds moved his amendment, exacting the restrictions of the fourteenth amendment. The discussion was continued quite tamely, Thayer closing with an hour's speech, when he was interrupted by a motion to go into executive session.

House.—Under a regular call a resolution was offered directing the survey and examination of the west bank of the Potomac river, from Georgetown to Harper's Ferry, and to report the practicability of erecting a railroad along the said bank.

A joint resolution was offered by Butler declaring that the acts of the Tennessee Legislature, either judicial or executive, enacted by persons who are disqualified by the fourteenth amendment, as null. Referred to the Judiciary Committee.

The balance of the day was devoted to discussion on the appointment of the Forty-Second Congress.

ATLANTA, Jan. 17.—The committee appointed from both houses, addressed the following to General Terry: We, the undersigned committee, appointed at a meeting of both houses of the General Assembly, irrespective of party, having objected and protested against the manner of organization of the said General Assembly as illegal, unconstitutional and unauthorized by the law or precedent, do most respectfully request the general commanding that, as it has been decided to transfer the question of the eligibility of members from the forum, recognized by the constitution and laws, to that of a military commander; that after an investigation is made, and a record of the facts in the several cases have been completed, the same may be submitted to the judges of the Supreme Court of Georgia, the highest judicial tribunal in the State, for their opinion as to the eligibility of members whose seats are questioned. Trusting, general, that the foregoing request may be granted, we respectfully ask an immediate reply.

St. Louis, Jan. 17.—A terrific thunder, wind and hail storm passed

over the city this evening. A panic occurred at the theaters, resulting in several persons being considerably hurt.

WASHINGTON, Dec. 18.—Advices from the city of Mexico of January 9 say that the affairs of State of San Luis Potosi are in a serious condition. The Governor and members of the Legislature are still held prisoners. Some of the Federal generals have joined the insurgents. The Federal commander reports himself not strong enough to attack the insurgents.

The South Carolina election cases will be up soon before the Election Committee. The sub-committees are at work on the Louisiana cases. It will probably be two weeks before it is considered in full in committee.

The general removal of disabilities was discussed before the Reconstruction Committee. A bill will be prepared for the next meeting.

Great interest has been manifested in Virginia affairs, but no progress has been made and no excitement beyond Sumner's philippic against Governor Walker.

Butler and Bingham are on the floor of the Senate urging their respective views.

In the Senate the California whisky seizures were argued at great length.

The Virginia bill resumed. Thayer concluded his speech, and was followed by Nye in a very strong speech, saying Congress must be true to Virginia and to itself, whatever Virginia might do in future.

Drake followed against the admission, and Stewart strongly in favor of admission. Norton, of Minnesota, following in favor, was interrupted by Morton by a motion to adjourn, which prevailed.

A proposition to fix a certain time to-morrow for a vote was voted down.

In the House the League Island Navy Yard and appropriations were considered throughout the day.

MEMPHIS, Jan. 18.—On yesterday a negro named George Daniels murdered a man named Phil. Murphy, and fled to this city, where he was arrested, but on the way to the jail he attempted to escape, and was shot and killed. The pocket book of the murdered man was found on his body.

The steamer Lizzie Gill, from St. Louis for New Orleans, with a valuable cargo, was swamped from being overloaded, and sank in Scrub Grass Bend, below Napoleon, on Sunday evening. She added one hundred bales cotton and six hundred sacks of cake here. The Magenta took off sixty-five mules and the Mississippi took off her deck freight. She lies straight, with four feet of water on her lower deck. The boat was owned by Captain Bullington and others of St. Louis. She was valued at \$35,000, and insured in St. Louis offices for \$20,000.

NEW YORK, Jan. 18.—The English brig Chebnick, from Cienfuegos for Halifax, with a cargo of sugar, was totally wrecked last night off Cape Antonio.

LOUISVILLE, Jan. 18.—Every house between Glasgow and Cave City has been prostrated by the storm. Twenty-five lives were lost.

WASHINGTON, Jan. 19.—The Democratic members of Congress are holding a caucus to-night relative to the action on the Virginia bill, and other matters.

It is understood if the contested election cases are decided unjustly, as is at present indicated, the two Democratic members of the Election Committee will withdraw from the committee in open house.—Times.

The Election Committee report in favor of Van Wyck.

The friends of Virginia seem much discouraged by the course of events to-day. The grand object has been to get the bill back into the House for additional amendment, and much delay in consequence is apprehended.

Senate.—A communication was received from ex-President Fillmore endorsing the resolutions of the Louisville Commercial Convention relative to the Pacific Railroad.

After discussing the franking privilege, the Virginia bill was resumed. Wilson moved the recommitment of the bill, which was voted down. A motion to postpone the whole question to February, and an amendment admitting the congressional delegation on the fourth of March, were withdrawn, when Edmunds' amendment was adopted by a vote of 45 to 16, and the Senate adjourned without final action.

House.—A bill was introduced amending the bankrupt act, exempting from its operations certain life insurance policies.

The League Island Navy Yard bill was discussed. A bill continuing the income tax passed.

The following is the text of the bill:

Resolved, etc., That whereas doubt has arisen and conflicting decisions have been made in the different departments of the government in regard to the construction of the laws relating to the tax on incomes, it is hereby declared to be the intent and meaning of the act on the subject, that all persons are liable to the payment of their proper income tax, accruing and to accrue for, and during, and up to the end of the year 1870, and that the assessment and collection of any such tax accruing in the year 1870, and remaining unpaid on the first day of January, 1871, may, under the existing provisions of the law, be made in the said last mentioned year.

ATLANTA, Ga., Jan. 19.—The Senate met to-day at ten o'clock and took a recess to twelve, and then adjourned until Monday next at twelve o'clock.

The House was called to order at twelve o'clock. One member was qualified, and no more appearing, an order was read from the Governor, approved by General Terry, taking recess until Monday at twelve M., pending the inauguration.

JACKSON, Miss., Jan. 19.—The Legislature yesterday elected to the United States Senate General Akorn for the long term, commencing March, 1871; and Major General Ames for the short term, commencing March, 1870.

The Legislature was engaged to-day balloting for a Senator for the unexpired term ending March, 1871, but no choice has as yet been made. It is thought that H. R. Revels, a colored man, will be elected.

The eminent missionary, Paul Bagley, lectured here last night, by an invitation of the Legislature. The subject was on the Chinese.

He showed the utter immorality of their character, and that by the fifteenth amendment they would soon become citizens, and by the Burlingame treaty they are guaranteed in their idol worship. He declared that their introduction and idolatry would be the drugs of suffering upon the country.

St. Louis, Jan. 19.—Pierre Chouteau and ex-Senator Green are dead. Missouri has adopted the fifteenth amendment.

PROVIDENCE, Jan. 19.—Rhode Island has ratified the fifteenth amendment.

RICHMOND, Va., Jan. 19.—The representatives of both the Republican and Conservative parties have united in preparations for a public demonstration on the day of the State's admission into the Union. A joint committee has applied to the Washington authorities for the loan of cannon for firing salutes, and the application has been granted.

General Canby to-day directed James C. Taylor, the attorney general of the State, elected last summer, to assume the duties of that office. His disabilities have been removed by Congress.

FOREIGN.

PARIS, Jan. 13.—There were five thousand workmen from the faubourgs, who passed the Boulevards to the funeral of Victor Noir. There were many ladies in carriages that were dressed in mourning, who joined in the procession. Henry Rochefort's presence at the funeral caused great demonstrations, and frequent shouts of "Vive la République" occurred at the cemetery.

While Rochefort was coming down the Champs Elysee, with a great crowd singing the Marseillaise, a regiment of troops appeared and dispersed the crowd. Rochefort, claiming the privileges of a deputy, was allowed to pass to the chambers, where he arrived pale and much excited. The crowd were finally dispersed without resisting the police or the troops. It is thought that some arrests were made.

PARIS, Jan. 13.—The police and magistrates were stoned to-day by the mob. The most intense excitement exists, but no serious trouble is apprehended. There are one hundred thousand soldiers quartered to-day in Paris, and the police has been largely increased. The Marseillaise appeared as usual to-day, and its tone is very violent. Rochefort's leader says the cry of yesterday was for justice—to-morrow the cry may come for vengeance.

LIVERPOOL, Jan. 17.—The ship Kenilworth, from New Orleans, December 14, is a total wreck in Carnarvon Bay. A part of the crew were saved.

ROME, Jan. 17.—The Empress of Austria, after receiving communion from the pope, left the city.

There are three hundred of the

fathers in the Ecclesiastical Council who refused to sign the petition in favor of the infallibility of the pope, and many others who returned evasive answers.

The opposition propose a counter petition, and assert that they certainly have enough efficient adherents to defeat the infallibility article.

LOXON, Jan. 17.—The Tablet, a Catholic organ, says: "To favor infallibility would be erroneous."

The Times thinks the presence of the French troops may encourage the pope to insist on his infallibility, notwithstanding the reluctance of the council.

PARIS, Jan. 17.—The city is tranquil, though there is much anxiety manifested regarding the Rochefort decision in the Corps Legislatif to-day.

LONDON, Jan. 18.—The News has an article on the Winnipeg rebellion, in which it does not attach much importance to it, but says the Red river people cannot hope for recognition as a crown colony while the rebellion lasts.

PARIS, Jan. 18.—The Corps Legislatif held an animated session to-day. There was an acrimonious discussion between Olivier and Deputy Gambella, in which the latter in the course of a personal attack declared that the minister was the last person to speak to any one of consequences, as his own person was the most supple and changeable. This caused great agitation in the chamber, and the deputy was called to order.

In a late debate M. Gambella indulged in another attack on the minister, when the deputy exclaimed: "I call the gentleman to order." Gambella replied: "And I recall the minister to a sense of himself." A scene of violent excitement followed this passage, and the proceedings were interrupted for some moments. As soon as order was again restored, the discussion was dropped and other questions were taken up.

Deputy Rospal is dead.

It is reported that a deputation from other cities are coming here to attend the funeral of Rospal. Fears of disorder are entertained.

Traupman, the murderer of the Kinck family, will be executed to-morrow.

The military dispersed the crowd of Rochefort's friends on the Boulevard Monte Marte without a conflict. The police have been very active all night, during which there was considerable disorder, and many arrests made.

At this hour, noon, the city is quiet.

PARIS, Jan. 19.—Traupman was executed this morning. His last words were loudly spoken, and were: "I persist I have accomplished."

It is now certain that Prince Bonaparte will be tried at Versailles, by the same high court that will try Prince Murat for striking a magistrate recently.

THE EARTHQUAKE.—On Sunday last, the ninth, at about five o'clock in the morning, a few slight shocks of earthquake were felt in our town. The weather was very calm at the time, and the shocks, or oscillations rather, though quite perceptible, lasted only a second or two and caused no damage. This is the first earthquake which, within the recollection of "the oldest inhabitant," ever was felt in this region.—Ophelias Courier, Jan. 15.

We learn from several persons that about five o'clock A. M. on Sunday a shock of an earthquake was distinctly felt here. Beds were shaken, windows rattled, and a sound as of a heavy body falling to the earth was heard. A peculiar undulatory motion was perceptible for a moment. In these days of earthquakes we are prone to fear that Natchez has been visited by a slight shock, which may be the precursor of a more formidable one. However, it may prove to have been only a tremendous landslide, as our city has of late been visited by an interesting series of them.

Since writing the above we learn from a gentleman, who has just returned from the neighborhood of Sicily Island, Louisiana, that the shock was distinctly felt by himself and a neighbor, each distant about three miles from the other.—Natchez Democrat, Jan. 11.

WORK for Christ is witnessing for him. As there is no other man given under heaven whereby we can be saved but the name of Jesus, so there is, in the main, no other work to do to save men except that of pointing them to him, for salvation.

HOW TO UTILIZE VIGOROUS EXERCISE.—The number of persons with sedentary occupations has become very large. Occasionally they break away for a day's active exercise. A large number go into the country for a month during the summer. Once at the old homestead, or in the mountains, they plunge into the hay field or climb the hill. Most of them are led to doubt the value of exercise because of the effects which follow these exertions. Without doubt the labor is generally excessive for such persons; but if they would manage their table habits rightly the results would generally be more than satisfactory.

When a man is tired, he is tired all through—the stomach not less than the legs. Now, what is the usual custom? After a walk of twenty miles, or a day at haying, when every fiber of the body is exhausted, the stomach is stuffed with hearty food. The man goes to bed with flushed face and rapid pulse, and awakens in the morning with a bad taste in his mouth, less of appetite, and a sense of languor. If he had taken a cup of tea and a slice of toast instead, he would find himself the next morning none the worse for the previous day's work and perspiration.

We all understand well, when the body is weak from fever, that the stomach partakes in the general weakness and must not be overloaded. But when the body is exhausted from labor, and every part is pleading for rest, then we crowd the stomach full of beef, pudding, pies and fruit, and spend the next day in declaring to our friends that exercise is not what it is cracked up to be.

When we are tired we should seek restoration in sleep—not in calling upon the legs, the arms, the stomach, or any other part to undertake five or six hours of hard consecutive labor.

The laboring man would find himself much better in the morning if the third meal were made one small in quantity and easy of digestion.—Dio Lewis.

WHO BECOME INSANE?—We publish below an article from the Pittsburg Commercial, on lunacy, which is worthy of notice. When we consider that a much larger number of the inhabitants of the country are farmers and merchants—indeed, we may say they compose half of the society—it is not strange that they should present such a formidable list in our insane asylums. But we hope the article may be noticed by some who have thoughtlessly and unintentionally oppressed the female members of their families, and that good may be the result:

"Reports of lunatic asylums are sometimes instructive reading. For instance, the popular notion that the life of the farmer is most conducive to mental stability, is dispelled by the statistics of lunatic asylums in general. In the Michigan asylum the farming class predominates over all other classes; and taking the asylums of the country together it appears that more than one-fourth of all the lunatics of the country are farmers and merchants. With the farmer the cause unquestionably is too much work, too little recreation and habitual violation of the laws of health—too frequently the laws of cleanliness. Speaking of the farmer's wife, a writer says: 'Her scant ablutions are performed in haste; she has little time to spend on her person, and none in which to read. Night finds her weary with much doing. She goes to her bed tired out, to be kept awake half the night, perhaps, by a fretful babe. From January to December her only recreation is going to church—it may be twice a month. Is there any wonder she becomes an inmate of a lunatic asylum? This is not only the case with the wives of small farmers, but those who have added acre to acre, yet grudge money spent for household labor.'"

It was the advice of Seneca to his friend Lucilius, in order the more diligently to keep himself up to his full duty, to imagine some great man, some strict, quick-sighted, clear-brained man, as Cato, continually looking upon him. So the Christian, who would labor earnestly and successfully, must walk with Jesus—must feel that he is ever by his side, noting all he does. But, oh! how blessed is the thought that he is more than a silent spectator! He is an all-powerful helper—an ever-ready and willing helper.

A GREAT whale, eighty feet long, recently stranded on the south side of the Frith of Forth, was sold by auction for the sum of £120 to an oil merchant.

EXTENT OF THE AMAZON.—The following extract is from Prof. Agassiz's new book entitled "A Journey in Brazil":

A region of country which stretches across a whole continent and is flooded for half the year, where there can never be railroads or highways or even pedestrian traveling to any great extent, can hardly be considered as dry land. It is true that in this oceanic river system the tidal action has an annual instead of a daily ebb and flow, that its rise and fall obey a larger orb, and are ruled by the sun and not by the moon; but it is, nevertheless, subject to all the conditions of a submerged district, and must be treated as such. Indeed, these semi-annual changes of level are far more powerful in their influence on the life of the inhabitants than any marine tides. People sail half the year above districts where for the other half they walk, though hardly dry-shod, over the soaked ground; their occupations, their dress, their habits, are modified in accordance with the dry and wet seasons. And not only the ways of life, but the whole aspect of the country, the character of the landscape, are changed.

The two picturesque cascades, at one of which we took our bath the other morning, and at this season such favorite resorts to the inhabitants of Manaus, will disappear in a few months, when the river rises for some forty feet above its lowest level. Their bold rocks and shady nooks will have become river bottom. All that we read of the extent of the Amazon and its tributaries fails to give an idea of its immensity as a whole. One must float for months upon its surface in order to understand how fully water has the mastery over land along the borders. Its watery labyrinth is rather a fresh water ocean, cut and divided by land, than a network of rivers. Indeed the whole valley is an aquatic, not terrestrial basin; and it is not strange, when looked upon from this point of view, that its forests should be less full of life, comparatively, than its rivers.

THE EATING QUESTION.—Some very curious facts were stated by Prof. Loomis in a lecture before the Association of Science and Art. He said that in the United States census of 1840, 1850 and 1860, it appears that there are in the United States eighty cattle for every one hundred people, and this proportion is preserved from year to year by a law of demand and supply. In the Eastern States there are about thirty cattle only to one hundred people; in the Middle States fifty to one hundred; in the Western States about one hundred to one hundred; and in the Southwestern States, as Kansas and Texas, four hundred and five hundred cattle to one hundred people; so that the supply of the East and North must come from these far-off States.

But the transportation of these cattle from Texas to New York, on the foot or in cars, is attended with immense loss, and the meat is far inferior in quality to what it was when in Texas. To bring it in carcasses is the problem of the day. It costs four or six cents a pound there; if it could be kept fresh and good, and delivered here for twenty or twenty-five cents a pound, it would be a very great profit to the carrier and saving to the consumer.

Various experiments are in process, the most promising of which is that of making tight compartments, kept perfectly dry, and by the means of ice, at a temperature of thirty-two. Meat in such a state will remain fresh for weeks. Fruits may be thus preserved and carried into distant countries. Such processes will be perfected, and we shall have fresh meat and small fruits at all times brought by sea and land, reducing our expenses and increasing our enjoyments.—Once a Month.

DO WE desire to have the dead raised, Lazarus-like, from the sepulcher of their cold indifference and unbelief, and made alive in Christ? Then we must, Mary and Martha-like, bring Christ to them in his living power to save. We may indeed have some stone to roll away, even then; before the command will be given, and the dead come forth alive to our embrace; but that is only part of the same great work of bringing together the Saviour and those we desire to have him save.

EVERY human being is connected with God's world by a thousand ties, and cannot live a single day without doing good or evil.—Dr. E. Porter.

The Christian Advocate.

SATURDAY, JANUARY 22, 1870.

A PROTESTANT'S APPEAL TO FATHER HYACINTHE

BY F. S. A.

Oh! wandering priest, whose very name is

fragrant,

Sure thy offenses must be sadly flagrant.

Since thus they drive thee to our sheltering

nation,

Chased by a Bull—of excommunication.

Canst thou not swallow down, with due hu-

mility,

This doctrine of "Papa's" infallibility?

Are not the virtues of the line pontifical

Printed in type distinct, though hiero-

glyphical?

Have any of St. Peter's "true successors"

Ever been known to walk to our sheltering

nations?

Have they not all, by wisdom, love and meek-

ness,

Proved that a Pope is free from human weak-

ness?

We cannot help admiring thy sincerity;

But still we shudder at thy rare temerity;

Clearly, thy "stature" as a priest is critical,

If measured by the standard Jesuitical.

Well, now thou art our guest; and hospitality,

With us is no vain shadow, but reality;

If any thing that flies can see through it.

We "guess" our Eagle is the bird to do it.

Thou'lt find our worshippers a "mixed assort-

ment."

Quite various in doctrine and deportment;

Some are "sky-high," while others make ob-

jections

To pictures, candlesticks and genuflections.

Mormons and Baptists, Methodists and Qua-

kers,

Jews, Turks and Puritans, and Sabbath-

breakers,

Salute, Pharisees, and publicans and sinners,

Will flourish thee with flattery and dinners.

"Let us have peace!" why hesitate? "cul-

lomo!"

Choose now for Luther or for "Pio Nono!"

Come out, fat-footed! let us plainly gather

If thou art still in thrall to "Holy Father."

Don't keep us waiting; for, in long proces-

sion,

We Protestants are wild for thy possession.

From Trinity, way down to Plymouth Chapel,

We're quick prepared to wrangle, close and

grapple.

So, Father Hyacinthe! dear friend and brother,

Will thou not please be one thing or the

other!

Jump off the fence! thy bellowing, foes be-

hind thee;

Land on our side, and take the part assigned

thee.

—Standard of the Cross.

History of Celebrated Women of China.

HISTORY OF THE DAUGHTER OF THE KING OF

THE TREE COUNTRY, WHO WAS GIVEN IN

MARRIAGE TO THE KING OF THE WAY

COUNTRY.

When the time arrived to cele-

brate the marriage, she was con-

ducted to the city where the King

lived. When she arrived at the

gate of the city she learned the

King was dead. At this she was

much grieved, and her maids and

attendants endeavored to persuade

her to return home to her father's

house, but she refused to listen.

She went into the city and contin-

ued for three years in mourning.

When the time of her mourning

was ended her brothers came and

entreated her to return and live

with them. Messengers were sent

to inform her brothers of the course

she had taken, but all their entrea-

ties for her to return were in vain.

She answered them and said: "My

heart is not a stone, to move from

place to place. My heart is not a

mat, that it may be rolled together.

There are none to pity me in my

great misery, and in my extreme

sorrow I am falsely accused. I will

not speak evil that I may escape

evil." The Book of Odes says:

"Women should be modest, com-

manding respect, and well skilled

in the rules of propriety, that no

fault be found." There were no of-

ficers of the Way kingdom who

could be looked upon as men of

ability and able to carry out the

views of the late King. Instead of

praising this woman for her virtue

and excellent character, they made

use of every scheme to degrade and

vilify her true character. Confucius

was born five hundred and

forty-nine years before the Chris-

tian era. Just before his birth the

Way kingdom is said to have been

in constant broil and commotion.

It was at that time the daughter

of the Tsee family was to be given in

ing, on one occasion heard the noise

of a carriage approaching. When

it reached the entrance to the pal-

ace grounds the noise ceased; but

after it had passed the noise was

heard again. Ling Kung asked his

wife who it was making use of the

wheelbarrow. She answered: "It

is Chii-pak-nyoke." He asked:—

"How do you know?" She replied:

"Your handmaid knows that it is

the custom for persons riding on

horseback or in a carriage to alight

when passing the entrance of the

palace, and pass by on foot, in hon-

or of the prince. Those officers

who are faithful in the performance

of their duty will not openly be gail-

ty of any wrong; neither will they

secretly commit any offense. Chii-

pak-nyoke, who is one of the most

faithful officers of the Way govern-

ment, is both benevolent and wise,

honoring the King and serving him

in all faithfulness. I know he would

not secretly connive at the over-

throw of the government."

Ling Kung then went to see if it

was certainly Chii-pak-nyoke. When

he returned into his palace and met

his wife he told her a falsehood, and

said: "It was not Chii-pak-nyoke." His

wife then hastened to pour out

some wine for her husband, and

then bowed down to him without

uttering a word. He said to her:

"Why do you thus honor me?" She

replied: "From the beginning I

knew there was but one Chii-pak-

nyoke in the Way country; now I

know there is another officer of the

same mind. The more such men

abound in the country, in that pro-

portion peace and prosperity will

prevail. For that reason I have

bowed down to congratulate you on

the prospect of peace and happi-

ness." Ling Kung was then much

astonished, and said: "You were

right. I have deceived you; it was

Chii-pak-nyoke."

The Literatti say: "She was a

woman who thoroughly understood

human nature, and though an at-

tempt was made to deceive her, yet

it did not alter her decision from

the right." The Book of Odes says:

"She heard his voice, but did not

see his person." Nay-tse was the

name of the wife of Ling Kung.

She understood well that Chii-pak-

nyoke was a man of ability. She

also revered Confucius as a man

who manifested a superior mind.

All persons praised her for her

knowledge of truth and for her

amiable character. But she finally

forsook the path of virtue, lost all

respect for herself, and committed

fornication. Her husband fled from

the country, which was in rebellion,

and but for the presence of two

faithful officers, See-yu and Chii-

pak-nyoke, the kingdom would have

been subverted, and Ling Kung

would not have been permitted to

go to his grave in peace.

The daughter of Nay-tse followed

the example of her mother, and for

five generations the peace and har-

mony of the country was destroyed.

The wife of Ling Kung was a wo-

man of superior mind, but unfor-

tunately she was led astray and her

good name was destroyed, so that

all ceased to praise her.

J. W. LAMMIE.

To speak evil of others has almost

become the general entertainment of

all companies; and the great and

serious business of most meetings

and visits, after the necessary cer-

emonies and compliments are over,

is to sit down and backbite all the

world. It is the sauce of conversa-

tion; and all discourse is counted

but that and dull which hath not

something of piquancy and sharp-

ness in it against somebody. For

men generally love rather to hear

evil of others than good, and are

secretly pleased with evil reports,

and drink them in with greediness

and delight; though, at the same

time, they have so much justice as

to hate those that propagate them;

and so much wit as to conclude that

these very persons will do the same

for them in another place and com-

pany.—Archbishop Tillotson.

Some people, because they cannot

give as much as they would like to,

will not give anything. But this

was not the way with the poor

woman, noticed by our Saviour, who

cast two mites into the Lord's

THE LORD WILL PROVIDE.

THE BEHEAVED FAMILY OF A MINISTER.

It is often a hard task for our

weak and timid hearts to face the

difficulties and uncertainties of life

without painful fear. We know the

promises made us by our heavenly

Father, but still we fear and are

full of sadness as we look forward

to a future that seems to promise

nothing but labor and privation as

long as life shall last. And there is

another dread that seems to be even

harder than this. Who will pro-

vide for wife and little ones when

our failing arms have ceased to

work?

We have heard it said: "They

that seek the Lord shall not want

any good thing." "Leave thy

fatherless children; I will preserve

them alive; and let thy widows trust

in me." But still, it is often a sore

trial, to one who sees that year after

year there is the same burden to

bear—growing heavier, it may be—

and the time of need to the widow

and the fatherless is coming near.

Would it be any wonder if the heart

of most men should fail them, and

the evening of life be sad? To

many this is so. And to give com-

fort to such as these, I desire to

record one instance in which such

forbodings sadly indulged in have

been turned into songs of praise.

About the year 1863, or in the

winter of 1864, the Rev. B. W.—

a faithful and useful minister of the

gospel, in one of the mountain com-

munities of Virginia, was seized by

a painful disease, which it soon became

evident must end in death. He

could leave to his family little or

nothing of worldly goods—not

enough, I believe, for one year's sup-

port. He had been preaching in a

missionary field, and the few mem-

bers of his flock would have as much

as they could do to provide for their

own households. The prospect was

indeed gloomy. A terrible war was

draining and desolating the country,

and no one could tell how soon its

ravages would sweep over their

peaceful village and add new bur-

dens to those they were already

called to bear. It is not hard to

imagine how many and how painful

the consultations in that minister's

family, and how frequent and how

fervent the prayer of the dying hus-

band and father, that God would

provide for the dear ones he was about

to leave behind him.

A few days passed and the wife

was a widow, and the children

fatherless. The servant of God

rested from his labors. Another

day or two and the funeral was over,

and the broken family gathered

again in their hired house, from

which it seemed that the light and

comfort had departed forever.

What they were to expect, they

could none of them tell. This they

knew. They were very poor—

scarcely supplied with necessary

food and clothing, and the rigors of

a mountain winter were about to

close in upon them. This, also,

they knew: They had a Father in

heaven to whom they might go to

supply their wants, and they had

the promise of help to comfort them

in their desolation.

It remained to be seen whether

that promise was to be literally con-

structed, and they were not to go

hungry and cold through the coming

winter. Meanwhile, the news of

Mr. M.'s death was making its way

through the country. It came to

the ears of a brother minister living

in a neighboring county. He, too,

was as poor—as poor as his deceased

brother had been. It was his cus-

The Christian Advocate.

SATURDAY, JANUARY 22, 1870.

AN UNPROFITABLE SERVANT.

BY MISS K. A. MONTGOMERY.

"Oh, Father, stay thy hand," I cried,
When my weak soul was writing with pain.
Yet, thoughtless, on I scribbled
My Lord again.

Pressing the cruel spikes close down
Into the quivering, shrinking flesh;
Tearing aside the tender wounds,
Bleeding afresh.

Oh! Son of God, immaculate;
Divinely kind, divinely just;
Still let thy righteous vengeance wait;
We are but dust.

Deserved our grief, our pain deserved,
Thou' sent in mercy, not in wrath,
Deserved the thorns and lepers' scorn
Along our path.

Oh, Christ! our hope, our strength, our stay,
In mercy guide our erring feet;
Lead us along thy shining way
To bliss complete.

Mohammed Personally Considered.

We mentioned, a few weeks since, that Mr. Deutsch, the author of the essay on the Talmud, which appeared in 1867, has contributed to the *British Quarterly* an article on Islam. He finds the sources of Mohammedanism in the Talmud. Of Mohammed personally he has gathered from all the traditions the following account:

"He was of middle height, rather thin, but broad of shoulders, wide of chest, strong of bone and muscle. His head was massive, strongly developed. Dark hair—slightly curled—flowed in a dense mass down almost to his shoulders. Even in advanced age it was sprinkled by only about twenty gray hairs—produced by the agonies of his 'Revelations.' His face was oval-shaped, slightly tawny of color. Fine, long, arched eyebrows were divided by a vein which thrubbed visibly in moments of passion. Great, black, restless eyes shone out from under long, heavy eyelashes. His nose was large, slightly aquiline. His teeth, upon which he bestowed great care, were well set, dazzling white. A full beard framed his manly face. His skin was clear and soft, his complexion 'red and white,' his hands were as 'silk and satin'—even as those of a woman. His step was quick and elastic, yet firm, and that of one 'who steps from a high to a low place.' In turning his face he would also turn his full body. His whole gait and presence were dignified and imposing. His countenance was mild and pensive. His laugh was rarely more than a smile. 'My little son!' reads one tradition 'hadst thou seen him thou wouldst have said that hadst seen a sun rising.' 'I, says another witness, 'saw him in a moonlight night, and sometimes I looked at his beauty and sometimes I looked at the moon, and his dress was striped with red, and he was brighter and more beautiful to me than the moon.'

"In his habits he was extremely simple, though he bestowed great care on his person. His eating and drinking, his dress and his furniture, retained, even when he had reached the fullness of power, their almost primitive nature. He made a point of giving away all 'superfluities.' The only luxury he indulged in were, besides arms, which he highly prized, certain yellow boots, a present from the Negus of Abyssinia. Perfumes, however, he loved passionately, being most sensitive of smell. Strong drinks he abhorred.

"His constitution was extremely delicate. He was nervously afraid of bodily pain; he would sob and roar under it. Eminently impractical in all common things of life, he was gifted with mighty powers of imagination, elevation of mind, delicacy and refinement of feeling. 'He is more modest than a virgin behind her curtain,' it was said of him. He was most indulgent to his inferiors, and would never allow his awkward little page to be scolded, whatever he did. 'Ten years,' said Anas, his servant, 'was I about the prophet, and he never said as much as 'Off' to me.' He was very affectionate toward his family. One of his boys died on his breast, in the smoky house of the nurse, a blacksmith's wife. He was very fond of children. He would stop them in the streets and pat their little cheeks. He never struck any one in his life. The worst expression he ever made use of in conversation was: 'What has come to him?'—may his forehead be darkened with mud! When asked to curse some one, he replied: 'I have not been sent to curse, but to be a mercy to mankind.' He visited the sick, followed any bier he met, accepted the invitation of a slave to dinner, mended his own clothes, milked his goats, and waited upon himself, relates summarily another tradition. He never first withdrew his hand out of another man's palm, and turned not before the other had turned. His hand, we read elsewhere—and traditions like these give a good index of what the Arab

expected their prophet to be—was the most generous, his breast the most courageous, his tongue the most truthful; he was the most faithful protector of those he protected, the sweetest and most agreeable in conversation; those who saw him were suddenly filled with reverence, those who came near him loved him; they who describe him would say: 'I have never seen his like either before or after.' He was of great taciturnity, and when he spoke he spoke with emphasis and deliberation, and no one could ever forget what he said. He was, however, very nervous and restless withal, often low-spirited, downcast as to heart and eyes. Yet he would at times suddenly break through those broodings, become gay, talkative, jocular, chiefly among his own. He would then delight in telling amusing little stories, fairy tales, and the like. He would romp with the children and play with their toys—as, after his first wife's death, he was wont to play with the dolls his new baby-wife had brought into the house.

"To devotions and asceticism, then, Mohammed gave himself up in his wild solitude. And after a time there came to him dreams 'resplendent like the rosy dawn.' When he left his cave to walk about on his rocky fastness, the wild herbs that grew in the cliffs would bend their heads, and the stones scattered in his way would cry: 'Salam! hail, O prophet of God.' And horrified, not daring to look about him, he fled back into his cave. That same cave has now become a station for the Holy Pilgrimage, and on it that early predecessor of our Barclay-Harolds and Burtons, 'Haji Joseph Pitts of Exon,' the runaway sailor boy, delivered himself of the judgment that 'he had been in the cave, and observed that it was not at all beautified,' at which he admired."

"Suddenly, in the middle of the night—the blessed night Al Kadar, as the Koran has it—and who will make thee understand what the night Al Kadar is? That night Al Kadar, which is better than a thousand months, which bringeth peace and blessings till the rosy dawn—in the middle of the night, Mohammed woke from his sleep, and he heard a voice. Twice it called, urging, and twice he struggled and waived its call. But he was pressed sore, 'as if a fearful weight had been laid upon him.' He thought his last hour had come. And for the third time the voice called:

"'Cry! * * *

"And he said: 'What shall I cry?'

"'Come the answer: 'Cry—in the name of thy Lord!'

"And these, according to well nigh unanimous tradition, followed by nearly every ancient and modern authority, are the first words of the Koran. Our readers will find them in the ninety-sixth chapter of that book, to which they have been banished by the Redactors."

GOD'S APOSTROPHE TO WATER.—The celebrated apostrophe to water given in one of Gough's temperance lectures is a gem. It will make a capital little speech for some little boy at a Sunday school celebration—particularly if he will "suit the action to the word." Pouring a glass of water and advancing toward his audience and lifting it above his head:

"Look at this, ye thirsty sons of earth! Behold it! See its purity! It is a beverage that was brewed by the Almighty himself! Not in a simmering still of smoking fires, choked with poisonous gases, and surrounded by the stench of sickening odors and rank corruption, does our Father in heaven prepare the precious essence of life, the pure cold water, but in the green glade and glassy dell where the deer wanders and the child loves to play; there God brews it, and down in the deep valley where the fountains murmur and the rills sing, and high upon the tall mountain tops where the storm clouds brood and the thunders crash, and away far out on the wide sea where the hurricane howls music and the big waves roll, the chorus sweeping the march of God, there he brews it—that beverage of health-giving water. And everywhere it is a thing of beauty; glimmering in the summer rain, shining in the ice gem till the trees fall seem turned into living jewels; spreading a golden veil over the setting sun, or a white gauze around the midnight moon; sporting in the cataract, sleeping in the glaciers, dancing in the hail showers; folded in its soft curtain softly around the windy world and weaving the many-colored iris—whose warp is in the rain drops of the earth, whose woof is the sunbeams of heaven; all checkerboard over with celestial flowers by the mystic hand of redemption; still always it is beautiful—that blessed life-water! No poison bubbles on the brink; its fount brings no sadness or murder.

Boast not thyself of to-morrow, for thou knowest not what a day may bring forth.

WHAT WE OWE THE ARABS.

The industrious Arabs revived those useful arts which the barbarians of Europe seemed anxious to forget. They wore the choicest fabrics of cotton, wool and silk; they manufactured cloth of gold and carpets of unequalled splendor; their divans were covered with satin cushions and velvet hangings, and minis and lace of fairy-like texture adorned the Moslem bride. In metals the Arabs were also excellent workmen. They forged huge chains and bars of iron; the steel of Damascus was renowned in the cities of Europe. Their jewelry was the fairest and costliest of the age; they lavished gold and silver in decorating their mosques and their palaces, and their minis produced a coinage that was the model of the European world. As architects they invented a strangely beautiful style of building, in which the fancy of the artist seemed to revel in creations, and of which the lovely ruins of the Alhambra form a living example; in their private houses they gathered the richest marbles, the costliest mosaics, fountains of dancing waters and gardens of perpetual beauty.

The Arab workman was usually temperate almost to asceticism. Mohammed had enforced the doctrine of total abstinence with a rigor unsurpassed by any modern reformers. He denounced temporal and eternal woes against the Mussulman who should touch the accursed wine. He had himself set an example of perfect abstinence, and in their purer age his followers obeyed the precept of their prophet. It was only in the decline of the nation that the Mohammedans learned to imitate the drunkenness and license of the Europeans. Temperate in their diet, frugal in their mode of life, the Arabs possessed sound intellects in sound bodies; they soon began to display an intellectual vigor that raised them to the front of civilization. They eagerly sought for knowledge amid the ruins of Grecian literature, and the poets and philosophers of Athens and of Rome were translated for the benefit of the students of Bagdad and Cordova. The colleges and schools of the Arab cities were thronged with attentive scholars when the great nobles of France and England could neither read or write; they produced eminent poets and graceful writers, while Europe had neither a literature nor a language; their libraries numbered thousands of volumes when Oxford possessed only a few imperfect manuscripts chained to the walls; and the poorest merchant of Bagdad lived with more comfort and was far better informed than the proud knight who came at the head of his squadrons to die on the burning plains of Syria in an eternal crusade. Common schools and colleges, indeed, seem to have originated with the Arabs. The caliphs were as ardent friends of popular education as a Brougham or a Barnard. Haroun Al Rashid decreed that a free school should be attached to every mosque; the Spanish caliphs founded colleges at Cordova and Seville, that became the models of those of France and England; the Saracenic working men were accomplished artists, and the general education of the people aided the progress of manufactures and the arts.—*Harper's Weekly.*

A DANCE OF DEATH.—A few evenings since a ball was held in one of the halls of the city, at which a large number of the young folks were present. Among the attractions of the evening was a prize, a gold ring, offered to the lady who should outwalt all competitors. At twelve o'clock the band struck up "Il Baehio," and a full dozen competitors took their places on the floor, entering for the contest. At the expiration of twenty minutes four of the couples gave way and took their seats, leaving the rest twirling and whirling in the giddy and intoxicating dance. One hour more there were but three couples on the floor, and the dance went on till after another hour had passed, when from sheer exhaustion another couple gave away, leaving the floor to the remaining two pair of top-schores devotees. The band of music played and played and played, and the four fast falling dancers danced and danced and danced, till even those who looked upon them grew sick and dizzy. At the end of the fourth hour the musicians grew feeble, and from the finger ends of the violinists the blood trickled to the floor, but still they supplied the moving power to keep the dancers going. The excitement grew intense as the fifth hour of the dance came on, and there were those present who insisted on putting an end to the merry, though reckless quartette suicide. However, no interference was permitted, and the prize dance, over the jaws of death, went on. After five hours and three minutes had elapsed one of the ladies fainted, and her partner quickly followed her example; and, amidst cheers, the prize was awarded the other couple who kept the floor. Then came a summing up of dam-

ages. The two contesting girls were higher death than life, and had to be conveyed to their homes—together with their partners, who were as badly used up—in carriages, and all have since been in a precarious condition and under medical treatment. The girls had to have their shoes cut from their feet, and their limbs were swollen next day to enormous size. The young men will hardly recover, and the musicians suffered terribly and will never again play at a top-schores contest.—*Pittsburg Gazette.*

KNOCKING AWAY THE PROPS.

"See, father," said a lad who was walking with his father, "they are knocking away the props from under the bridge. What are they doing that for? Won't the bridge fall?"

"They are knocking them away," said the father, "that the structure may rest more firmly on the stone piers which are now finished."

Archers always require props while they are being built. A temporary wooden structure is first prepared, over which the real arch of brick or stone is laid. But though the arch may be finished and the key-stone set in its place, yet it will never become strong and solid as it should be, until the props are all knocked away, the wooden arch removed, and the different stones left to feel their own weight, and bind themselves by their own pressure between the massive piers from which the arch is sprung.

And in like manner God permits his children in their infancy and weakness to have various props and supports on which to lean, giving crutches to the lame and sight to those who fear to walk by faith; but when at last he would bring us forth to stand in strength and beauty, resting on his word alone, he knocks away prop after prop till we can only rely on God and wholly trust in him.

Sometimes a man trusts in health, and God weakens his strength on the way, and shortens his days that he may learn to lay hold on eternal life when this life is passing from his grasp. Another trusts in his wealth, and thinks himself secure from the approach of want; till God removes that prop and teaches him how to pray "Give us this day our daily bread," and trust in the Lord's providence till he receives it.

Again, men trust in friends and covet human sympathy, and receive honor one from another, until the Lord knocks away the props they rest on, permits friends to become foes, and teaches them that his sympathy and love are worth far more than all that men can give or do.

Then when earthly hopes are blasted, and earthly joys withered away, the Lord appears to us an unchanging friend, the same yesterday, to-day and forever. His peace no man can take away. His love is an everlasting love. His compassions fail not. His mercies are from everlasting. His word endures forever.

What then, though every prop be gone, and only God sustains our fainting souls? It is enough. Storm and sunshine, war and peace, sorrow and joy, darkness and light, all are alike to us while "he abideth faithful," and is with us always, even to the end of the world.

Let sickness blast, and death devour;
If heaven but recompense our pains;
Forsake the grass, and fade the flower,
If firm the word of God remains.

—The Christian.

BOXING CHILDREN'S EARS.—Boxing the ears of children is condemned by a writer in *Good Health*, on sanitary grounds. Anxious parents must, therefore, look up some other kind of punishment, and we are not sure but it will be for the good of the parents to be restrained from what is not only a very handy means of summary discipline, but also, in a not a few cases, a very ready way in giving vent to passion, which does both parent and child great moral mischief, aside from the physical damage. This writer says: "Children's ears should never be boxed. The passage of the ear is closed by a thin membrane, especially adapted to be influenced by every impulse of the air, and with nothing but the air to support it internally. What, then, can be more likely to injure this membrane than a sudden and forcible compression of the air in front of it? If any one designed to break or overstretch the membrane, he could scarcely devise a more effective means than to bring the hand suddenly and forcibly down upon the passage of the ear, thus driving the air violently before it, with no possibility for its escape but by the membrane giving way. And far too often it does give way, especially if from any previous disease it has been weakened. Many children are made deaf by boxes in this way; if there is one thing which does the nerve of hearing more harm than almost any other, it is a sudden jar or shock. Children and grown persons alike may be entirely deafened by falls or heavy blows upon the head. And boxing the ears produces a similar effect, though more slowly and in less degree."

The Farm and Garden.

The Use of Smoke in Taming Bees.

BY ELISHA GALLAT.

I am frequently asked what kind of smoke do you use to subdue bees with? etc. When I first commenced making artificial swarms, hunting for queens, etc., I used tobacco smoke, because the person that I first saw handling bees in that manner used tobacco smoke; but I soon found out that smoke from sawdust, chips, cotton rags or rotten wood answered every purpose; and for two seasons I managed some of my swarms with tobacco, and the result was that I do not use tobacco smoke for bees. Bees that are managed with tobacco smoke are irritable; they feel themselves insulted; for two or three days after being disturbed they are watching for the enemy. Walk into the yard and first one hits your hat, then another, and not unfrequently the face is hit. It is not safe to take strangers or visitors into your yard if they are managed with tobacco. Furthermore, it takes but very little tobacco smoke to make them helpless or paralyzed; and in all of my operations with bees I want them to know what they are about. I do not believe in administering chloroform to children at school to make them learn their lessons easy, neither do I believe in paralyzing bees to make them learn their lessons. In handling bees as they should be treated it requires very little smoke of any kind—especially for educated bees.

Let me explain how I manage my bees: Here are some friends; they want to see a queen, the lives and bees in general. I have an old shallow tin pan with some ashes in the bottom, a few fine chips or sawdust; chips that are fine enough or sawdust that will not blaze. It should be considerably damp; on this put a shovel of coals or hot embers, sprinkle some of the sawdust on the coals, and we are ready to proceed. Now we walk up to the hive—step around backside if you please, for we do not wish to disturb the little fellows in their labors. We take off the cap and the honey-board, shake the bees off of the honey-board in front of the hive. Now if we have gone this far without any sudden jar or accident, we have not used a particle of smoke yet; we have only had it on hand in case of necessity. Now we commence taking out the frames, and shewing the bees, the brood in its various stages, and as a rule we do not have to take out over two or three frames before we can show the queen.

The next operation is to replace the frames, and perhaps by this time we use a little smoke to drive the bees from the top of the frames, so that we can adjust the honey-board, and in this performance we have made no quick, sudden motion; the frames have been withdrawn carefully and replaced as carefully; there has not been a single bee crushed or injured, and the bees have been flying out and in all through the operation, carrying on their regular labors. Well, but those are educated. Certainly they have never been insulted in any manner; not even by blowing tobacco smoke in their faces.

There are a great many operations with bees that require more smoke than the above. But do not use tobacco if you want them so that they can be approached at any time without the least danger of stings. They can be handled, and very roughly handled, several times a day by the merest novice, if subdued with chip or rotten wood smoke. But let the same person subdue them with tobacco smoke, and they will remember the insult for weeks, at least that has been my experience. Tobacco is good to cure the scab and kill ticks on sheep, and that is about all.—*Amals.*

ARTIFICIAL SWARMING.

It is now a conceded fact by all to be but one way of successfully keeping bees, and that is to never allow them to swarm naturally. But the question arises, How can we help it, and when shall we do it? They can be kept from swarming by watching the bees as soon as the early spring approaches. When the hives and blooms are in their loveliness on the fruit trees, and the drones have made their appearance, and the hive is full of bees, the colony may then be divided by removing one-half the comb and bees to an empty hive, filling up both hives with empty frames, at the same time giving the queenless half a queen, or what is better, give them a fertile queen. The usual way is then to remove the old hive a few feet from where it stood and set the new hive the same distance the other way; then watch them occasionally to see that one does not get the most of the bees, and should one get the advantage remove both hives by changing places, and in that way both may be made equal. I could give many more ways of doing the same thing, as practiced by

the most experienced apiarists, all of which I have tried, and all would work, yet had their drawbacks, as well as their advantages, so much so that the novice in bee culture was in danger of losing his bees and getting in trouble and not know how to get out.

I will now endeavor to impart our method of artificial swarming, or multiplying stocks, and have found it to be both easily done and practicable, so much so that the inexperienced could do it without danger of loss. To better illustrate our theory we will suppose that we have seven colonies of bees, all in good condition, full of honey and bees. We will proceed to procure an empty hive, set it down near the seven old hives, open up the first hive, removing one comb with what bees may be upon it. Be careful not to get the old queen out of the hive, set that frame in the new hive, close up; then open the second and remove one frame as before, setting up in the new hive, and in that way open all the hives, taking one frame from each hive containing brood, honey and bees. You will now have eight colonies. We will now, for instance, imagine the bees taken from seven different colonies. They would commence a war of extermination upon each other, resulting in destruction to everything, and despair to the bee owner. On the contrary all is peace and harmony; all the bees find themselves surrounded by strangers, and in the place of seeing that commotion there you would naturally expect they will be unusually quiet; for at least twenty-four hours scarcely a bee showing itself at the entrance; they seem to be determined and decided what is best to be done. It may be that they are preparing for future operations. You may set them wherever you wish, and but few will ever return to the old colony. You will be safe to let a queen bee go among them, whether she be fertile or otherwise. The bees will receive her with all the courtesies and deference her majesty demands.

The above directions should be followed strictly, taking care to keep the bees strong at all times, and dividing as fast as filled up. In that way the careful apiarist may increase his stock to almost any number in one season, and have each hive full of both bees and honey. Here let me caution the bee-keeper wanting to make artificial swarms to be sure to take a frame from each hive containing both brood and honey. It is a well known fact that bees scarcely ever forsake their brood.—*Illustrated Bee Journal.*

TEACH YOUR BOY A TRADE.—An article which we cut from one of our exchanges, referring to this subject, says:

Of thirteen thousand four hundred and ninety-three prisoners in the penitentiaries of thirty States in 1867, according to the report of prison association just issued, seventy-seven per cent., more than three-quarters, had not learned a trade. Here is a text from which Dr. Frankly should have preached a forcible sermon to parents.

The time was when it was not thought reputable for parents to leave their children without trades—unless they belonged to the class of gentry! In France, before the revolution—the one of 1789—this perverted sentiment or instinct was so strong that even the children of the nobles were in some cases taught a light handicraft, and when the storm of the Reign of Terror came, and they were compelled from their homes and deprived of their fortunes, many of them subsisted by the trades they had amused themselves with in more prosperous days.

A man who has a good trade has an independence. He has need only to be honest and diligent to secure a competence. Bread and butter is sure always of higher wages than he who has no trade, and if his genius and enterprise lead him into some other calling, it is always a satisfaction to know that in case of misfortune he can return to his trade. He has that at any rate; his speculations may break down, but he has an anchor to leeward, as the sailors say; his subsistence and that of his family is sure.

In this country, where fortunes quickly gained are also quickly lost, it is still more necessary and prudent that every young man should learn it thoroughly. No man's future is so secure here but that he would do wisely to have his boys—and girls too, for that matter—learn a trade.

LABOR is of noble birth, but prayer is the daughter of heaven. Labor has a place near the throne, but prayer touches the golden scepter. Labor, Martha-like, is busy with much serving, but prayer sits with Mary at the feet of Jesus.

Let us clearly understand that the most powerful men are but instruments of a higher will, to whose behests they are completely subjected.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JANUARY 23, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE LOUISIANA CONFERENCE.

SECOND DAY.

The twenty-fourth session of this Conference met in Shreveport on yesterday, the twelfth instant. Having traveled three days and three nights, we found ourselves still on a steamboat that continued to slowly nose its way through the windings of the Red river. On Wednesday evening we were landed at the wharf. During the passage three deck passengers were lost—two died and one jumped overboard. They were all movers, and terribly illustrated the folly of attempting to save money by exposure on the deck of a steamer, instead of paying for the vital comfort of a state room and for well cooked food. It is only less than a trip to New York or Canada to come up to this point from New Orleans, and turns the mind of the traveler upon the contemplated railroad for the valley of the Red river, from the gulf to northeast Texas. That such a road will be built we cannot doubt. Every snag—and there are many in this turbid, Tiber-colored stream—is in the interest of that projected highway.

As we had the Bishop along there was no undue impatience at the delay. We knew that nothing so serious could possibly happen at Conference but might be remedied. Upon arrival we found that the Rev. N. A. Crayens had been elected president, and the Rev. Linus Parker secretary of the Conference. Business had progressed admirably, both in a morning and an afternoon session.

THIRD DAY.

Thirty-three preachers are present and eight laymen. The Rev. Dr. McFerrin, secretary of the Home Missionary Society, is present, full of vigor and good sense. The visit of a connectional officer awakens in the Conference a sort of gratitude, especially when made at this distant point. Always disposed to listen to the counsels of experienced ministers, our young men eagerly drink in the words which flow from the lips of such a visitor. The recent labors of the secretary are no ordinary evidence of his devotion to the church, this being the thirty-first Annual Conference which he has attended within the past four years, not to mention district and other church meetings.

The following persons have been received on trial: Joseph W. Medlock, Joseph G. Miller and J. Lane Borden. Readmitted: Philip Barth.

The usual committee business progresses in the afternoon of each day in Committee of the Whole. The whole body attends, and discuss freely and somewhat informally the matters referred to it—the chairman having in charge say the subject of education, presiding while that subject is under consideration. When the committee determines to entertain the subject of periodicals, the chairman having that in charge takes the chair. Foreign missionary interests have been incorporated into the regular Conference business by the appointment of a chairman on Foreign Missions. The reports made from all parts of the work indicate a great improvement in the finances of the church in Louisiana, and missionary collections are a very sensitive and correct index of this change. There are other directions in which this resuscitation is visible. Applications for preachers are coming in from many fields which have lain fallow since the close of the war; but, alas! the laborers are few. O that the Lord of the harvest would send forth more!—"He that filleth all things" "giveth some, pastors and teachers."

The following transfers were announced from other Conferences to the Louisiana: Patrick Lane, J. V. Pointer, Marcus C. Manly and J. E. Cobb.

FOURTH DAY.

The following preachers have been elected local deacons: William Shephard, Thomas Franklin, Gilbert McCoy; and the following colored preachers: Jennings Hampton, Wm. Butler, Stokes Steele, Americus Ross, Jack McKee, Alfred Le Gordy and Joshua Jackson.

The following person was elected local elder: James M. Franklin.

The report of the Committee on Periodicals strongly sustains the Advocate, and called out some excellent speeches in behalf of rallying to our own papers and schools and Publishing House. While we write Dr. McFerrin is addressing the Conference in a speech full of good things, urging the brethren to untire devotion to the work of the ministry.

SATURDAY NIGHT.

The missionary meeting was held in the Methodist church. The chairman of the Committee on Foreign Missions read a very able and a very searching report, which will be published in full. After the reading of this, and a report from the treasurer of Domestic Missions, the meeting was addressed by Bishop McTear in a solid and stirring speech, and was followed by Dr. McFerrin, who knows how to work, whether in the lead or at the wheel. We listened to the doctor's various touches upon the cords of his audience, and saw him ring out the collection of \$508—thought what an admirable and powerful agent he would make for the New Orleans CHRISTIAN ADVOCATE. This meeting we felt very proud of. The whole collection for the year was: For foreign missions, \$3,158 85; for domestic missions, \$1,130 35, which, added to the \$508, makes a total for the year of \$4,797 20. We doubt not the average per member will prove to be equal to that of any other Conference.

SABBATH.

An address by Dr. Walker to the Sunday school began the services of the day. The Bishop preached a sermon upon a theme exceedingly appropriate to these times of Methodism—the importance of a faithful stewardship of God's mercies. We believe that he scored it deeply upon the minds of the audience. In the afternoon, after the usual religious exercises, three persons were ordained elders: Traveling, Whitmel P. Kimball; local, Anthony W. Tucker, James M. Franklin.

At night, in the court house, the Bishop ordained the following colored persons traveling deacons: Jack McKee, Jennings Hampton, Alfred Le Gordy, Joshua Jackson, Elijah Powell.

MONDAY.

The order of the day was the election of delegates to the General Conference, with the following result: Clerical, J. C. Keener, N. A. Crayens, J. D. Adams; reserves, L. Parker, S. Armstrong, Lay, W. F.

Morland, W. H. Foster, James M. Ford; alternates, J. H. Brigham, H. G. Hall, J. L. Scales.

MOVING TO TEXAS.

To realize the immense exodus which is now setting toward Texas from the States of Alabama, Georgia and Mississippi, one must find himself—where we now are—in the center of this "living stream." For two months every ferryboat, road, steamer and railroad on the highway of travel westward has been choked with men, women, children, babies, dogs, oxen, mules, wagons, carriages and antiquated buggies, all pressing forward as eagerly as Magi in search of the fountains of light. Among the frescoes in the capitol at Washington, one of the best represents a company crossing the spurs of the dividing chain between the Atlantic and the Pacific. "Westward, ho!" is the thought of the artist, and to this idea all the inspiring accessories of a migrating party contribute—an ox cart on a high, rocky road stands in that expressive attitude which leaves the driver at a loss to decide whether it is going on or going over; the oxen, have long since ceased to be impatient, and are evidently prepared for the worst; all imaginable lumber, with one or two children, are inside. Behind, on horseback, are the mother and a babe, the father and a sick boy. The young men of the family, the boys, the dog, the rifle, the ax, and girls, ruddy with excitement, complete the scene, all poised, for an instant, upon a grand lookout, while beneath them, and far away, are the valleys and hills of the unbroken, untrodden West. As a rendering of the march of the American pioneer it is admirable; but it also expresses what the artist probably never intended: that restless going on and on, by which the immortal soul plainly shows that it seeks "a better country."

On board of this steamer we have at least forty children under twelve years, besides mothers, fathers and grandfathers, all going they know not whither. They are from Carroll and Pulaski counties, Georgia, and Marengo county, Alabama. Texas looms up as the land of plenty, of freedom and of white people; more they do not care to know. It is of no use to suggest that there are better lands behind them—more corn, as good a population, and may be as much freedom. They have caught the contagion and are on the road. That is enough, for we have never yet known a party, consisting of a two-yoke or a one-horse covered wagon, and a family of say nine children, if they were dressed in poplar and copperas-dyed homespun, ever turned back by any calamity, prospective or present. They come nearer being at home everywhere than any other company in the world. And indeed, with father and mother along, a cow, a pony, a gun and a dog, what more is there in life anywhere? A gentleman on board informs us that beyond Jefferson there are hundreds of tents—masses of movers not decided which way to turn. Corn is being brought for their accommodation a great distance, and brings \$1 50 per bushel. We doubt not that the thing is being overdone this season, and that there is already a great deal of suffering among movers. People who are living in Texas have seen hard times themselves in coming to the State, but it has not enlarged their sympathies to the extent of charging a mover less than a neighbor for corn or fodder. Corn is always worth \$1 a bushel when you come to buy it; but about twenty-five miles off of where you are buying it it is only twenty-five cents—a mere question of distance. We advise all movers to take a plenty of money with them to run one year, at the rate of \$1 a bushel, and not to pass through New Orleans if they have any curiosity. If they can get through a large city without visiting every "Moral Exhibition of Live Animals" they may do well, not otherwise. We have on board one old gentleman who was fobbed of \$2,000 by the jackals who follow a train of movers, and have their den in these "live animal" shows on levees. Another went out to buy

apples in company with an honest-looking countryman, who invited him into an oyster saloon, and ended by getting some greenbacks for some \$600 in gold, which turned out to be only copper. Better keep out of the way of cities, or else go to the best hotels.

We were curious to know more of the philosophy of leaving such a State as Alabama—the best in the whole South—for such a region as Texas, and inquired particularly of several parties. The answer in each case was the same: "We are going to get rid of the negro." This we thought to be a good reason. In the present state of affairs and of society in Louisiana, Alabama, Georgia and Mississippi, who can wonder if a poor man, with several "girl children," should be unwilling to remain? Negroes in the Legislature, in the school board and on the police oppress the social atmosphere so that to a poor man it becomes insupportable. But, on the other hand, it is the negro's Paradise, and he is making his way by the thousand from Virginia to a land where he can be a lieutenant governor or secretary of State. Thus the finest population of white people in the world—the bone and sinew, moral and physical, of our land—are abandoning the fairest and most productive portion of the South, and negroes are pressing into it. This is the effect of that blighting curse, the controlling power of New England—her theories of race and her insatiable greed of gold. The white man of the South is to be kept under, and the negro used in order to maintain his grasp upon the government. We do not wonder that after such elections, eye after such tickets of candidates, as we have recently had in Mississippi, there should be an effort to get off; for it looked to plain men as if their leaders were either abandoning them or were losing their senses or principles, or both. If we would keep white men in our State, and negroes out, there should be a distinct Southern white man's party, without fear or favor, without compromise or wavering—a party to protect the white laborer and the poor white man's family from the combinations, the theories, the corruption and the tyranny of New England.

NEWS FROM THE CHURCHES.

SPARTA CHURCH.
Blenville Parish, La., Dec. 20, 1869.

Min. Editor: Presuming that some of your readers may desire to hear again from the highways and hedges of this region, I send herewith an account of the result of God's grace in this field of labor, which I have tried to serve this (my first) year as a supply.

As the year draws to a close we are constrained to thank God for what he has done for this people. Our beloved Zion has been increased by the accession of forty-one members, of whom, I believe, the greater number profess to have received the witness of the Spirit, whilst others continue to evidence their desire of salvation. Some may faint by the way, but I trust that the most will appear as bright seals to my ministry in the great day of eternity. Indeed, I feel assured that at least one will; she joined the church on a bed of sickness, and within a week passed away a happy witness of the resurrection of Jesus. To him be all the glory.

We trust that the church here is and will remain alive. I believe that at least some have higher views and aims than ever with regard to the New Testament standard of holiness. Fifteen children and twenty adults have been baptized, during the year, by brethren who were with us from time to time.

And I think we may safely say that there are some among us (not of our church) who have heretofore looked upon Methodism only through the distorted glasses of prejudice, but who have discovered, on a nearer view, that she is not a monster of such frightful mien, but that, after all, there is something lovely in her purpose: "To spread scriptural holiness over these lands," and in the motto of her polity: "The poor have the gospel preached to them."

Yours in Christ,

J. C. MILLIN.

Minutes of the Mississippi Conference.

Ma. Editor: Please publish to the preachers and members of the Mississippi Conference that I commence to-day sending the Minutes of our late session to the subscribers, and will continue to mail them as they are furnished from the bindery. They ought to have been out before, but an unexpected press of business has caused delay with the printers. They will all be finished and mailed by the last of the week.

The job is neatly gotten up, and freer from typographical errors than such things usually are. The information contained ought to be considered invaluable to those interested.

There are nearly two hundred copies not spoken for. Let those who wish them send forward their addresses and the money at once, at the rate of ten cents per copy.

C. G. ANDREWS.

JACKSON, MISS., JAN. 18, 1870.

To the Members of the Mobile Conference

The box of books sent from the Publishing House, containing General Minutes, Summers' Commentary, McFerrin's Methodism in Tennessee, Life of Bishop McKendree, by Bishop Paine, two volumes, has been received, and the books await your orders, at the following prices: Summers' Commentary, \$1 50; History of Methodism in Tennessee, \$2; Life of McKendree, per volume, \$2. Usual discount to preachers.

I have received the list of subscribers to the General Minutes, and will expect to hear from those of you who subscribed, giving directions where to send; etc. The price of the Minutes is as follows: Paper cover, \$1 25; cloth cover, \$1 60.

E. M. BORDEN.

SELMA, ALA., JAN. 17, 1870.

NEW PUBLICATIONS.

THE POETICAL WORKS OF ALFRED TENNYSON, POET LAUREATE. Illustrated. New York: Harper & Bros., publishers, 1870. Octavo, 232 pp., bound in muslin.

A very beautiful edition, with tasteful illustrations, containing three representations of the poet, including all of Mr. Tennyson's latest productions, and with the finest and most desirable edition we have seen for the center table. For sale by George Ellis, opposite the post office.

KIRBY. By M. Betham Edwards. Harper & Bros. 1870. Bound in paper, 143 pages. For sale by George Ellis.

TING-A-LINGO: AN EASTERN FAIRY TALE. By F. R. Stockton. Illustrated. Hurd & Houghton, publishers, New York, 1870. Bound in muslin, tinted paper, 12mo, 187 pages. For sale by George Ellis.

TWO LIVES IN ONE. By "Vieux Moustache," author of "Our Fresh and Salt Taters." Published by Hurd & Houghton, New York, 1870. Muslin, 12mo, 240 pages.

This seems to be a very spicily and well written story.

OLD HORSE GRAY AND THE PARISH OF GRUMBLETON. By Edward Hopper. Published by Hurd & Houghton, New York, 1869. Bound in paper, 12mo, 82 pages.

This is an epic, written in very smooth verse, and, so far as we have observed, to some extent satirical of the "cloth." For sale by George Ellis.

GOOD WORDS, FOR JANUARY, 1870. We need say nothing commendatory of perhaps the best monthly published in the English language. The January number is peculiarly attractive.

REV. DR. BUCKINGHAM was examining once a dull student who had an inveterate habit of answering one question by asking another. "Where," inquired the doctor, "was Solomon's temple?" "Hem, do you refer to its location, sir?" "Yes," growled the doctor in his deepest tones, "I refer to its location, or to anything else about it that may be embraced under the word 'where.'"

"This one thing to have our sins worn away from the memory, and quite another thing to have them washed away at the gospel fountain."

BURKE beautifully observes, in his journal, that some persons would never have a share in his prayers but for the injuries they had done him.

The memory of good actions is the starlight of the soul.

PURITY OF SOUL.

To come somewhere—right in the ordinary relations of life is the highest moral aspiration of the mass of men. If they keep clear of open transgression, if they do not sink into the slough and fifth drunkenness, if they overreach their neighbor only by methods not regarded exactly respectable, they think themselves entitled to a quiet conscience. There are, alas! multitudes of professing Christian people who allow themselves in various degrees of conformity to the world, yield habitually to the power of covetousness, and the love of whose secret living is far below the plainest standard of duty, and seem, almost as truly as the above described, to fail utterly in understanding the breadth of the obligation and the extent of the claim made by divine love and vine law upon the soul.

I am jealous over you, says Paul to the Corinthians, for I have promised you to one husband, that may present you as a chaste virgin to Christ. By thus crowding into one sentence the ideas of jealousy, espousal and virginity—elasticity, makes a powerful impression of the exalted and delicate nature of Christian obligation. True chastity is true fidelity in these intimate relations involve a certain sensitivity to evil, and a shrinking from its most approach. They would nothing less than completely stain. The thought of the smallest blemish is intolerable. Indeed, a very idea and almost the possibility of unfaithfulness is shut out of the life of the happily married. His monster that lies quite beyond the calm and untroubled horizon.

Stead, too, is the proper state of the renewed soul toward the Saviour. "Chaste fidelity" is a true type of his experience. He must aim at an inward delicacy of nature. His conscience must healthfully and keenly alive to form and degree of sin. He turns from it as something shameful, polluted, disgraceful, as a stain upon his purity, as a breach of his relations. The chaste soul is the erant of the least stain. It is rather, die than be soiled. It is not to be weighed against honest purity and fidelity. Therefore the martyrs when they might have lived by pronouncing words on the lips of their persecutors were a mere form. They would seem to tolerate a stain upon fidelity to Christ.

Chasteness of soul in our relations to Christ is too little too easily lost, too feebly after. How many and deep stains upon our bridal robes should be so white and clean conformity to the world, following its fashions and amusements, its filthy here, groveling honors, pampering of self, indulging in fears and doubts, instead of taking him simply at word—it is in such ways that minds, through the subtlety of serpent, are beguiled and the simplicity that is in Christ.

And what soul breathes toward a perpetual prayer for chasteness of spirit? Who's great gift which only the Spirit, whose name is holy, can stow upon fallen man? Who feels that the only right way out of a deadly pollution and abnormality which holds no parley with which is jealous of its approach? Who echoes the beatitude of Saviour as containing the sum of all his hopes: "Blessed are the pure in heart, for they shall see God?"

CONSCIENCE is God within us, is man's best friend, or his deadliest enemy; it haunts a man everywhere. He has no power to resist it, and lies perpetually at its mercy. It is a flame kindled in his soul, inwardly torments and consumes him. It is a viper which coils itself about his heart and stings in the tenderest places. It is a hungry vulture, a never dying worm which secretly preys upon his heart and fills him with agony and despair. But where conscience obeys, it is a friend indeed, a friend at home—an inward, intimate, truly bosom friend. It deserts us, even in the greatest of our temptations.

GOD LOVED ME.—Some years ago two gentlemen were riding together, and as they were about to separate one addressed the other thus:

"Do you ever read your Bible?" "Yes, but I get no benefit from it, because, to tell the truth, I do not love God."

"Neither did I," replied the other, "but God loved me."

This answer produced such effect upon his friend that, in his own words, it was as if one lifted him off the saddle into the sky.

It opened up to his soul the great truth that it is not much I love God, but how God loves me.

A HUMBUCG.—HOW OFTEN WE read
 this expression from persons ready
 to denounce the evils of medicine, and
 to advocate the use of ten times more
 than twenty-two years since I introduced
 Dr. Cass' Emulsion of Cod Liver Oil to the public.
 I do not mean to advertise it, so I left it
 to the druggists and storekeepers to
 sell it, and since then I have never been
 troubled with great reluctance; but I told
 them if any one have it, and if it did not
 do what was stated in my pamphlet, no one need
 try it. In some stores two or three bottles
 of this medicine were sold, and I have
 many, thought crazy, and that would
 cast them would see of me. But I knew
 medicine was no humbug. In about
 six months I began to receive orders for
 the Emulsion, some calling it my valuable
 remedy, who had refused to sign a receipt
 I left it at their store. Now my sales
 consist of bottles yearly, and also for cash.
 I sent it superior to any other medicine
 of the kind, Croup, Diarrhea, Dysentery,
 Vomiting, Spasms, and all the diseases
 of the lungs. It is perfectly innocu-
 ous internally—see each accompanying
 bottle—and externally for Chronic Rheu-
 matism, Headache, Mumps, Trusted Feet,
 Scabs, Sprains, Old Sores, Swellings,
 Throats, etc.

Price, fifty cents. Sold by the Drug

ANGEL UNAWARE.

BY T. POWELL.

Little can we tell who share
Our household hearth of love and care!
Therefore with grave tenderness
Should we strive to cheer and bless
All who live this little life—
Husband, children, sire or wife—
Lest we wrong some scrap here,
Who has left a starry sphere,
Exiled from the heavens above,
To fulfill a mortal love.

THE BOY WHO HAD NO MEMORY.

"Well, Frank, how do you get on with your holiday task?"
"Got on?" replies Frank; "I don't get on a bit. It's an awful shame giving a fellow any work in the holidays. Here have I been lagging away at this long string of names and dates for the last hour, and I can't say it yet. I have no memory at all."

"Well, my boy," said I, "holiday tasks are rather a bore, no doubt, and rather unfair, when 'a fellow works hard all the half-year,' as you say; but as you have got the Roman history to do, the best thing is to see how soon you can manage it. As to no memory, that's a complaint that a great many people suffer from who might easily be cured. Do you remember the old story of Eyes and No Eyes?"

"Yes, I do; but what has that to do with memory?"

"A great deal. Two boys—say you and Tom—of about equal age and ability, walk down a green, country lane, or up Regent street, on a sunny morning. One fellow sees a hundred curious and pleasant things, the other not five. But both have eyes, and both can see clearly. Much in the same fashion two fellows in your class both have memories. One has been taught, or has learned by practice, to use the power of storing up facts in his mind and recollecting them; the other has not. What one finds easy the other finds very hard or impossible; though, at the time, both have got memories equally good, and equally fit for work. Do you remember, Frank, the great pool below the Hatch, on the Claford river, where I killed the two big trout last year?"

"Oh, yes, quite well."
"You can remember how different the two fish were in color and size and shape; how the pool curved round on one side with a broad, shallow pebbly beach, and how on the other side there was a bank of chalky mud beyond the bed of thick weeds?"

"And the thousand of caddis worms that we saw crawling about at the bottom of the shallow! Oh, yes, I remember; and we counted sixty-one red spots on the biggest trout; and you showed me the two sorts of May flies and the red warbler's nest and the water-ousel—and then we were so puzzled by the fish all at once leaving off feeding in the afternoon, and suddenly beginning again as we came up the river. I can see that great pool now, quite plainly, and watch the fish feeding; and I recollect that queer story the keeper told us about the two big trout fighting—charging each other like a couple of rams—to settle which should be king of the run."

"And how is it," said I, "that you can recollect all these things so clearly and exactly if you have no memory?"

"Oh," replies Frank, "but trout fishing is a very different thing from Roman history. Of course a fellow can recollect all about trout and the chalk-stream, flies and beetles and the river, because he likes them so much."

"Just so; he likes them all, and puts his heart into the work of storing them up in his mind. The facts all fit into their right places, and he keeps them there safe and sound for many a long day. And the very same machine he uses to learn the history of the trout, the names of the flies, beetles and birds, only wants careful use and plenty of oil and a little heart in the business, to serve equally well for Roman history. Some day, Frank, you and I will have a talk about this long story of names and dates again."

A few weeks after this we got back from the country to our own home at the Blind School in St. George's Fields, where about one hundred and sixty poor blind children are taught to read and write and cipher, and work at a trade; all of which things they learn to do nimbly and correctly as boys with the sharpest eyes.

"Now, Frank," said I, "come along with me, and let us hunt up a few fellows who once had no memory—like a boy I once met in the holidays—but somehow or other have managed to learn by heart scores and hundreds of words and lines which would puzzle you as much as the Roman history, at first."

"These blind children come to us at all ages, between ten and eighteen, and generally know nothing

more than the names of a few letters; often unable to say even the Lord's prayer correctly, and without even a notion of what arithmetic means. As to writing and reading they look upon the whole thing as an impossibility. And yet more than ninety out of a hundred learn to read fairly with their fingers, and to emboss a letter on thick paper which they can make out for themselves, or a friend in the country can read in the usual way; and all of them, some early and some late, wake up to the fact that they have got strong, clear, sharp memories.

"Go into the chapel on Sunday morning; you will hear a hundred voices repeating not only all the responses, but the alternate verses of the psalms for the day; and, when the time comes for singing, joining heartily in the verses out of 'Hymns, Ancient and Modern,' which are some hundreds in number.

"Ask that little girl there, busy weaving a sash line, how long she took to learn the whole of the one hundred and fifty psalms. She will tell you about eighteen months—all done, too, not in the school room, or while at work—but after school hours, while strolling about with a friend, who teaches them to her a verse at a time, line by line, and makes her repeat it, verse by verse, until she has mastered the whole psalm, and so on through the one hundred and fifty. And, once learned, she never forgets them. If you doubt my word, try her by giving her a verse out of any one psalm you know, and she will at once go on with that which follows, to the end of the psalm. There, I told you so. Once she had no memory. Now you see what she has. There are fifty other girls in this long work room who can do what she does so easily and so correctly.

"Gossiping old Bishop Burnet tells us of a blind lady, a Miss Walker, who had mastered five different languages, and knew by heart all the psalms and the whole of the New Testament; and Mr. Wilson, in his biography of a blind sailor, who had learned the 'navy list' straight through from beginning to end.

"You smile, Frank, at this, I see; but come now over to the other side of the school, where the blind boys and men are at work, and you shall see and hear for yourself a man who can beat the sailor, if not Miss Walker.

"Here we are in the mat shop, full of boys and men, all busily at work on cocoanut matting; coarse mats for doorways, or colored rugs of the daintiest kind. There, at the loom, is D. Butler."

"Well, Butler, how are you? Busy as ever?"

"Yes, sir; and quite well, thank you."

"How does Milton get on?"

"Pretty well, sir; but the 'Paradise Regained' is a deal harder than 'Paradise Lost.'"

"Paradise Regained! have you been learning that?"

"Just finished two books, sir, in the holidays; and the 'Life of Milton,' which you lent me, as well—and most of the notes."

"And can you really say the whole of this by heart?"

"Yes, sir, I think so. Will you try me? I shall be glad if you will, because I am going to repeat a book or two of the 'Paradise Lost' to the girls, and give them a sketch of the life, with a note or two. Mr. M. (the matmaker) has the book, sir."

Milton was fetched in a trice; and we tried the blind man in half a dozen places; giving him a line taken at random, wherever we pleased, and he at once giving in reply the lines that followed, as clearly and accurately as if he read every word from a book.

By working slowly, steadily and carefully on in his odds and ends of leisure time, and going over the ground again and again, while at work, he had not only learned the 'Paradise Lost' by heart, but a very large portion of Scripture, the whole of the Prayer Book Psalms, and a vast number of hymns—to say nothing of Goldsmith's 'Deserted Village,' and other modern poetry! Very few persons, even with sight, could ever accomplish such a holiday task, simply because few would set to work for years with such incessant, unwearied application.

"Oh," says Frank, "blind people must have extraordinary memories—that's the reason why they can do such things."

"Yes," said I; "they have got extraordinary memories, simply because they put them to the right and the best use; and in spite of all difficulties fight their way steadily on. And see what a blind boy's difficulties are. Nearly every line he learns must be from the voice of a friend; not a book can be looked at, not a note referred to; he has to rely solely and entirely on his own wits. But watch the blind man as his friend reads to him. See how intently he listens; he is now all ear, not a word, not a syllable escapes him. He cuts off every chan-

nel of communication, with the other things that are going on about him, and gives himself up to this one work. It is this unwearied, earnest application which, after all, wins the day.

"Do not imagine for a moment that blind people have any wonderful or special aptitude for remembering things, or any unusual genius for steady work—except what practice and a strong desire to succeed bring with them. The surest sign of genius is, in fact, the power of giving your mind steadily to a single object; and, in this sense, the old proverb comes true: 'An ounce of genius is worth a pound of clever.' So, at last, the blind boy succeeds in learning by heart many and many a long page which puzzles his friend with eyes; not because his powers of memory are keener or stronger than his friend's, but mainly because he gives time and labor to the work, and puts his heart into it. Step by step, and little by little, he finds out the strength that is in him; very often by being thrown upon his own resources, and left almost alone to make the most of what he has.

"Take a few hints from the blind boy when he sets about learning by heart. Do not attempt too much at a time. Go slowly. 'Memory,' says a wise man, 'is like a purse; if overfull that it cannot shut, all will drop out. As for facts and dates of history try to sift the chaff from the wheat, be content to let the little fishes slip through the meshes of the net, provided you save the big ones.' Don't turn so good a servant as memory into a slave; above all never dream for a moment that you have 'no memory.' Give it only fair play, fair exercise, and a willing heart, and some day you may rival Butler in getting up a thousand lines of 'Paradise Lost.'"

Good Words.

Scientific.

American Inventions in Europe.

It is a fact exceedingly gratifying to the pride of every true American that American inventors and manufacturers are to-day supplying the Old World with many of its best implements. In the matter of improved firearms we are so far ahead of the nations of Europe that many of them are sending large orders to our manufacturers, and where they have attempted to get them up themselves they have almost invariably adopted American inventions.

A writer in the New York Tribune mentions the fact that the Spider alteration of the Enfield, in England, was an American invention; the Henry Martin is but a very slight modification of the Peabody gun, and the Swiss gun is the Winchester (formerly known as the Henry) magazine rifle, altered very much for the worse. At the various trials abroad the American guns have invariably come out ahead, and the English commission reported as to magazine guns in favor of, first, the Winchester, and second, the Ball gun. The Messrs. Remingtons, of Ilion, New York, have furnished to the Danish government twenty-five thousand of their celebrated breech-loading rifles, and to the Swedish government twenty-five thousand; while this year they will send to Europe fully one hundred thousand. These rifles have been sold to Austria, France, Italy, Spain, Egypt and Cuba, in smaller quantities, with a prospect of much larger sales in the future. Colt's Company is completing thirty thousand Berdan rifles for Russia, and it is rumored that the order has been increased to one hundred thousand. At the same time Colonel Berdan has gone to Russia to superintend their present arms. Turkey has bought two hundred thousand of our rifles, and sent them home, and has just completed the purchase of over \$600,000 worth of machinery, with which to convert them into breech-loaders, on the plan, probably, of those altered at Springfield. Sharp's Company have been converting thirty thousand of their rifles and carbines into metallic cartridge guns for our government. At the same time the Winchester Company is turning out over one hundred per day of its repeating rifles, and is increasing its works. It has also bought out the Spencer Company, of Boston, including the Spencer and Fogarty patents, thus combining and controlling all the prominent magazine guns, except the Ball, which is owned by the Windsor Company, of Vermont, and of which quite a number have been recently sold in Persia. The Winchester and Remington rifles are being sent to China and Japan, and the former are also sent to Australia, as well as all over the West, the Plains and the Pacific coast. Nearly one-half of the entire product of Smith & Wesson's pistol factory, employing some three hundred hands, is sold in Europe, mainly in France, notwithstanding their cheaper labor. This result is of course due to the fact that they are mainly the product of machine

labor, which machines are themselves of American invention and manufacture, and which produce an accuracy of work and finish that their hand labor cannot equal. But not only are we furnishing Europe and the Old World generally with arms, but we are also supplying them with ammunition. The Union Metallic Cartridge Company of Bridgeport, under the control of Hobbs, of lock fame, is furnishing metallic cartridges—far superior to any ever before seen—to nearly all the world. They had one order of twenty-five millions from the Russian government, and it is reported that the order has been increased to one hundred millions. They make them of every variety and size, their sale of one small size for pistols averaging forty-five thousand per day, a large portion going to Australia. And these, too, are all made on machines invented by Americans, the like of which do not exist elsewhere in the world. In addition to all this the Windsor Company, of Windsor, Vermont, are just completing an order for \$80,000 worth of milling and screw machines, to be shipped to Edinburgh, Scotland, to establish there a large factory for the manufacture of the Singer sewing machine. Not content with shipping the sewing machines themselves—of which large numbers of the leading kinds are constantly sent—they intend making them there; and that, too, with American machinery. Already the Windsor Company has sent one or two lots of similar machinery to Canada for the same purpose; but sending machines from here to Great Britain is bearing the lip in his den to some purpose. It is also specially worthy of note that the milling machine—one of the most important and useful of all metal-working machines—and the screw-making machine are purely of American origin.—Scientific American.

Lions and tigers may be bought in London wholesale and retail, like haberdashery or cheese. At this moment (says the London Daily News) bears, monkeys, zebras, tigers, leopards, and other wild beasts are all on sale, together with a fine young lioness, who is warranted "to tear you to pieces if she can get at you," and birds and reptiles innumerable.

Why do you talk so much about religion? Simply because others talk so little. If all did their share, we would have less to do.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamel Iron Knobs, the improvements in the covers and centre piece, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sold free of charge in an emergency. We have all sizes of the justly celebrated Stove, both

PLAIN AND EXTENDED BACKS.

the Extended Back with cast Iron Enamel Reservoir and Patent Tin Ware Cooking Gridiron Cover

The Christian Advocate.

SATURDAY, JANUARY 22, 1870.

HEALTH RULES FOR WINTER.—1. Have your sleeping room well ventilated. Pure air is just as necessary in cold weather as in warm. If you shut yourself up in a close, warm room through the night you will be very apt to take cold the next day.

2. Have bed-clothing enough to keep you comfortably warm, but no more, as an excess will prove burdensome and weakening. Have more clothing over the feet and legs than over the body.

3. Never go to bed with cold or damp feet. Always warm and dry them in some way. Dry them by rubbing with a towel or before a fire. Warm them by exercise, if able. If not, before a fire, or by putting them in hot water, then in cold for a moment, followed by a brisk rubbing.

4. Before exposing yourself to the cold for any length of time, get thoroughly warmed up, not by hot or stimulating drinks, but by exercise or by a fire. By exercise is best, if not to the extent of perspiration or fatigue.

5. In going from a warmer to a colder atmosphere always keep the mouth closed, and breathe through the nostrils, that the air may be partially warmed before reaching the lungs, thus preventing those sudden shocks and chills which frequently end in pleurisy, pneumonia, etc.

6. Avoid standing, sitting or lying in a draught of cold air. Many a person has caught a cold which resulted in an incurable consumption by standing in a hall or doorway waiting from ten minutes to an hour for some gossiping friend to say the last word.

7. Protect the feet from cold and dampness by loose, warm, thick-soled shoes and an abundance of clothing for the legs and ankles.

8. Avoid compression by dress of any part of the body or limbs, as it interferes with the circulation of the blood, results in cold extremities, and congestion of the head or some of the internal organs.

9. Avoid bathing in cold water or in a cold room, unless there is a full and quick reaction. Chills after a bath is a sure indication that it was not properly taken.

I WILL GIVE NOTHING.—"There is that scattereth, and yet increaseth; and there is that withholdeth more than is meet, but it tendeth to poverty."—Prov. 11, 24.

A minister soliciting aid toward his chapel waited upon an individual distinguished for wealth and benevolence. Approving the case, he presented to his minister a handsome donation, and turning to his three sons, who had witnessed the transaction, he advised them to imitate the example. "My dear boys," said he, "you have heard the case; now what will you give?"

One said: "I will give all my pocket money furnished."

Another observed: "I will give half of that I have in my purse."

The third sternly remarked: "I will give nothing."

Some years after the minister had occasion to visit the same place, and recollecting the family he had called upon, he inquired into the actual position of the parties. He was informed that the generous father was dead; the youth who had so cheerfully given all his store was living in affluence; the son who had divided his pocket money was in comfortable circumstances; but the third, who had indignantly refused to assist, and laughingly declared he would give "nothing," was so reduced as to be supported by the two brothers.

The incident furnishes a most suggestive comment upon the text which stands at the head of this article; and there are plenty of parallel-texts and fairs.

BEWARE OF evil thoughts. They have done great mischief in the world. Bad words follow, and bad deeds finish the progress. Watch against them, strive against them, pray against them. They prepare the way for the enemy of souls.

"I have the most effective eye-water here that you ever saw." "No, you haven't," responded the farmer; "I don't half so effective as a woman's tears, and I have seen lots of them." They beat all the eye-water you've got in your pack."

Memory presides over the past; action over the present. The first lives in a rich temple hung with glorious trophies, and lined with tombs; the other has no shrine but duty, and walks the earth like a spirit.

As humble man is like a good tree; the more full of fruit the branches are, the lower they bend themselves. "Through much tribulation ye must enter into the kingdom of God."

No man has a right to do as he pleases, except when he pleases to do right.

MEDICINE—MEDICINE.

BRAN NEW LETTERS!

FRESH TESTIMONIALS!

DARBY'S PROPHYLACTIC FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 23, 1869.

Messrs. J. DARBY & Co., 161 William St., N. Y.—Gents: Yours of the 23d is before me, and has attracted my attention. It gives me pleasure to say that my belief in your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted to a skeleton by the effects of teething, and an affection of the bowels thereafter. I had never seen any one reduced so low to recover.

Physic had been tried in vain, until the physician stated it was useless. A friend recommended your Fluid, or Ozone, which he stated was one of the component parts of it. I did so, and the effect was like magic, plainly discernible in an hour in its good effects, producing quiet and sleep almost at once, where irritation and sleepless restlessness had previously possessed the child to nearly entire exhaustion.

I first administered it in a small way, two and three drops in a spoonful of water, and increased it to six or eight drops. It completely checked the bowels, and the child recovered. I have tried your Fluid on animals, with the same effect—both horses and cows—increasing more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Cholera, Diarrhoea, or any violent affection of the bowels.

I would not be without it in my family under any consideration. Yours truly,

WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Sonnerelle, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Calne, of the Methodist Episcopal Church South:

150 Broadway, N. Y., July 29, 1869.

Messrs. J. DARBY & Co., 161 William St., N. Y.—Gents: About the 10th of June last one of my children was taken with Scarlet Fever, in its most malignant form, and as soon as I could I procured your valuable disinfectant, Darby's Prophylactic Fluid. Although it was several days after the appearance of the disease before I began using the Fluid, still by a free use of it the disease was not only confined to the one case, but the benignity of that case somewhat mitigated.

During the use of the Fluid as a disinfectant in my family it was also tried in a case of headache and one of toothache, the results in each case being instantaneous relief. It was afterward tried in a case of Erysipelas, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Erysipelas in question, being located in the feet, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, to the utter discomfiture of said corn, for upon subsequent examination it had disappeared, and though it was sought for diligently, it could not be found.

I find, in this, hoping it may be the means of inducing others of earth's poor sufferers to test for themselves, as I did, the great merits of this great remedy.

Very respectfully yours,

FRANK SAUNDERS.

Never was a medicine so universally respected and extolled. It never fails. It may be depended on.

TO AGENTS.—A straight pencil mark in the above calendar indicates the date of a money-letter received; a circle the amount of dollars received, and a half-circle the amount of cents.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Vocational, Bookkeeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Terms: Ten to twenty per cent. less than other colleges in this city.

A liberal donation made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN, New Orleans.

METHUEN FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

NEW ORLEANS MARKETS.

NEW ORLEANS MARKETS.
From the N. O. Price Current.
We have again to notice only a moderate degree of activity in most branches of the wholesale trade, although some departments have done a fair business in filling orders from the country. The receipts of sugar and molasses have been moderate, and met a fair demand at steady prices. The movement in Western produce has been of about the usual extent, but, with more liberal supplies, there has been some export demand for State inspected flour.

We have no new features to notice in our accounts from the interior. The tributaries are all at a good navigable stage, and the receipts of cotton have been liberal, increasing the excess over last year 11,272 bales.

The river has risen since our last, and is now four feet ten inches below high water mark.

Corros.—The following are the arrivals since the fourteenth instant:

Louisiana and Mississippi	22517
Arkansas	2209
Alabama	200
Florida	109
Texas	133
Total	25223

On Saturday the movement commenced with a fair degree of spirit, and was subsequently stimulated by encouraging telegrams from New York and Liverpool, as well as by the falling off in the receipts at all the ports, and although the supply was only moderate, and factors raised their pretensions $\frac{1}{2}$ to $\frac{3}{4}$ c, the sales summed up 5,150 bales, at prices showing an improvement of $\frac{1}{4}$ c, low middling closing at 23 $\frac{1}{4}$ to 23 $\frac{3}{4}$ c. On Monday operations were restricted by dark and rainy weather, a moderate supply, difficulty in effecting deliveries, and more stringent pretensions on the part of factors, and the business was confined to 3,600 bales, at irregular prices, which ruled during the morning $\frac{1}{4}$ c dearer, but were subsequently less buoyant, and closed without any material change, low middling being quoted at 23 $\frac{1}{4}$ to 23 $\frac{3}{4}$ c. On Tuesday the market opened with a good inquiry, and a fair business was done during the morning, partly at previous rates, and partly at rather fuller prices, after which the advantage continued on the side of factors, but without any marked advance. The movement, however, was animated, and the sales summed up 8,950 bales. Low middling ruled at 23 $\frac{1}{4}$ c for standard, and 23 $\frac{3}{4}$ to 23 $\frac{1}{2}$ c for strict, and middling at 24 $\frac{1}{4}$ c, with 24 $\frac{3}{4}$ c for desirable lists. The prospect of more liberal supplies compelled factors to meet the demand, but prices were strengthened both by an improvement in foreign exchange and favorable telegrams from Liverpool.

This makes an aggregate for the past three days of 17,700 bales.
The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 543,083 bales, against 504,554 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 320,963 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 142,397 bales to Great Britain, of 2,845 to France, and of 27,979 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	21 $\frac{1}{2}$ to 22 $\frac{1}{2}$
Good ordinary	23 to 23 $\frac{1}{2}$
Low middling	23 $\frac{1}{4}$ to 23 $\frac{3}{4}$
Middling	24 to 24 $\frac{1}{2}$
Strict middling	24 $\frac{1}{4}$ to 24 $\frac{3}{4}$

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	25223
Arrived previously	551098-576321
Exported past three days	68216
Exported previously	390976-407461

SUGAR.—The demand for the better

descriptions has continued fair, but the lower grades are slow of sale. The supplies were pretty much disposed of, however, at about previous rates.

MONEY.—Gold opened on Tuesday at 121 $\frac{1}{2}$ to 121 $\frac{3}{4}$, (against 121 $\frac{1}{2}$ at New York,) and closed at 121 $\frac{1}{2}$ to 121 $\frac{3}{4}$, (against 121 $\frac{1}{2}$ at New York.)

The only sales of silver reported are \$3,500 in American half dollars on Monday at 119, and \$1,000 on Tuesday at 118 $\frac{1}{2}$, and \$2,000 at 119.

There has been rather more inquiry for stocks, but the only sale reported is 25 shares Louisiana State Bank on Saturday at \$16.50. Sales of St. Charles Street Railroad were made last week at \$59 and \$59.50, ex-dividend.

CATTLE MARKET.

NEW ORLEANS, Jan. 18, 1870.	
Texas cattle, choice, per head	\$45 to 60
Texas cattle, second qual., per head	30 to 40
Texas cattle, third qual., per head	18 to 25
Hogs, per lb. gross	10 to 12
Sheep, first quality, per head	\$4 to 6
Sheep, second quality, per head	3 to 5
Sheep, third quality, per head	2 to 3
Milk cows, choice, per head	50 to 100
Milk cows, per head	40 to 50
Milk cows, with calves	10 to 15
Yearlings, per head	10 to 15
Calves, per head	10 to 15

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, JANUARY 29, 1870.

NO. 2.

NEWS OF THE WEEK.

DOMESTIC.

Richmond, Jan. 24.—The news of the final passage of the bill admitting the State was received here after dark. There appeared to be a general feeling of welcome relief, but none of the demonstrations of joy that followed the news of the passage of Mr. Bingham's unconditional bill in the House.

The Richmond City Council, upon the receipt of the intelligence, passed a resolution hailing with delight Virginia's return to the Union, and requested General Canby to fire one hundred guns in honor of the event to-morrow.

Washington, Jan. 24.—House. This afternoon Farnsworth moved to pass over all business for the purpose of concurring in the Senate amendments to the House bill for the admission of Virginia, which was agreed to, the Democrats voting in the negative.

Bingham then addressed the House, and he was listened to with the greatest attention, his desk being surrounded by members. He said it would be borne on the journal of the House that more than three to one of the members declared for the unconditional admission of Virginia; that the vote would commend itself to the approval of the country. He made no apology for the position he had assumed, and now reiterated that Congress had no power to exact fundamental conditions on the admission of a State. The Virginia constitution was more liberal than any west of the Alleghenies. If he thought under this bill Virginia would be subjected to conditions which might not be imposed on New York and Ohio, he would refuse to vote for it.

Alluding to gentlemen on his side of the House, Mr. Bingham was not by the inquiry from Mr. Butler: "Which side of the House is that?" To which Mr. Bingham indignantly replied: "The gentleman is very wise—wise beyond his years; but he cannot read me out of the party with which I am associated, nor can he blot out my record. Vulgarly is not wit—assumption is not power. There was no occasion for the inquiry."

A wit's feather, a fool's a rod.
An honest man's the noblest work of God.

(Laughter and manifestations of excitement.)
Mr. Butler said he never intended to read Mr. Bingham out of the party; he knew not whether he (Bingham) was to have an ovation in Virginia; if so, he would like to see the Virginians, too, sting the man whom all their papers announced as the murderer of Mrs. Burratt. (More excitement.) Mr. Butler referred to Mr. Bingham's eulogy on the Virginia constitution, saying that it was not the work of Virginia statesmen, but of carpet baggers, scoundrels and negroes from the fields. He regarded the conditions of the bill as a notice that if the State did not maintain the spirit of the reconstruction acts Congress would put her back where she had been. Mr. Farnsworth then took the floor, and alluded to the remarks made by Mr. Butler regarding the acting chairman of the Reconstruction Committee. He said that he would not be instructed in Republicanism by Mr. Butler.

FOREIGN.

Paris, Jan. 24.—Paris was apparently on the verge of insurrection. An extraordinary excitement pervaded the city. The great hall in which the Corps Legislatif debated the question of the arraignment of Rochefort was surrounded with immense crowds of people. The Place de la Concorde and the quay of the Tuilleries were jammed with a frantic, surging multitude. The military and police occupied the neighboring streets in force, and the Pont de la Concorde was closed to passengers. The debate in the chamber was characterized with extreme violence. Upon the suggestion of a moderate Republican that the government had better abandon the prosecution, the premier, Ollivier, replied that if the chamber refused to arraign the arch-agitator, the ministry would resign. Rochefort made a bitter speech, and was cheered from the galleries and galleries. Finally the chamber came to a vote and the demand of the government for the arraignment of Rochefort was carried by an overwhelming majority—226 to 34. When the result was announced to the mob outside, a tremendous demonstration of sympathy for the prisoner took place. This was in the Place de la Concorde at six o'clock. Another popular demon-

stration was reported on the boulevard Montmartre half an hour later. At eight o'clock the streets were still crowded with people shouting for Rochefort. When the last dispatch was sent off the agitation had not abated, and though the ability of the government to put down an insurrection was not questioned, it was feared that this Rochefort business would not be finished without blood-letting.

THE PISTOL SHOT THAT SHAKES ALL EUROPE.—If the pistol shot of the tenth of January, in the Rue d'Autenil, should be echoed by the roar of artillery and the rattle of musketry in the streets of Paris, the world need not be more surprised than at the intelligence that a fire-brand had exploded a powder magazine. Rochefort doubtless mourns for the loss of his friend and co-journalist, but perhaps in the secret recesses of his Republican heart he rejoices at such a splendid opportunity to fan the embers of revolution. He may be "no orator as Brutus is," but Mark Anthony, uncovering the gaping wounds of the dead Caesar, had no better theme to stir the hearts of the populace than this French Red Republican in appealing to a fiery and impulsive people to avenge their murdered champion.

For those drops tell a tale of teaching which is not so easily forgiven as mere violence. The victim is not simply a slaughtered patriot; he is a martyr cheated to his death while on duty in the people's cause. Nothing more unfortunate for the emperor than that the name of a Bonaparte should be branded with this record of a shameful crime. In his confidence of power he has haughtily promised to answer for the preservation of order, and the first sensational breach of order that thereafter occurs is at the hands of his cousin, a prince of the imperial blood. Does it not seem that the wheel has turned full circle with the great adventurer, and that, as on the eve of Waterloo, the Napoleonic star nears the horizon? A hundred thousand soldiers guard the great city of Paris, but a still more formidable power dwells in the silent tomb of Victor Noir.—*New York News.*

THE CROWING HEN MOVEMENT.—Dakota has joined Wyoming in granting the right of suffrage to the women, and now the Governor of Colorado, in a message to the newly-assembled territorial Legislature, advises the passage of a similar measure. Thus, to the intense delight of the strong-minded sisters of the Revolution office, the cause spreads and fructifies. Kansas is counted upon as the first of the States that will put the ballot in the tiny fingers of the softer sex. There will be much disappointment, however, when the question comes to be seriously debated in the Eastern States. In Massachusetts, for instance, there is a surplus of forty thousand women. If the franchise is extended to them they can elect, if they choose, women to every general and local office in the State. It is certain that Sumner, Wilson, Bontwell, and the leading Radical politicians of that State, will look with no favor upon a project which involves the possibility of their own displacement. While the remote States and Territories, which have few women, will be likely to admit them to the ballot soon, it will be a long time before the men in the East will be ready to pass the scepter of power over to their aspiring spouses.—*New York News.*

FREE.—Last week the Empire State shook off the last vestige of Radical thralldom. It was but a few years ago that New York appeared to be almost hopelessly in the power of the enemy. They controlled the Legislature by large majorities in both branches; they possessed every State office; they even dominated in the metropolis itself. We were buried under a load of sixty thousand adverse injustice. The steady pluck with which the New York Democracy fought year after year, advancing and conquering a fresh point with every election until the whole fortress fell into their hands, ought to encourage our brethren in other States. There is no stronghold of error, however powerfully defended, that men armed with the weapon of truth, cannot overcome with persistent, earnest effort. New York, the greatest of American commonwealths, leads the Democratic van in 1870. Where she trends no other State need fear to follow.—*New York News.*

A wise man endeavors to shine in himself; a fool to outshine others.

THE PAPAL COUNCIL.

The correspondent of the London Times, under date of December 14, lets some light in upon the proceedings of the first secret meeting of the council, and explains the history of its sudden dissolution. In a subsequent letter he comments upon the position of the American bishops. Both extracts will be found quite interesting.

The truth about the first meeting with closed doors (that is, on the tenth) is coming out. It was a scene of the greatest confusion. I am now told that the minority was 130. It was the Archbishop of Temesvar, in Croatia, it is now said, who was making a Latin speech, protesting against the forms and arrangements, as interfering with the independence of the bishops, when the bell rang and he was called to order. Thereupon, it is added, the Primate of Hungary came to his rescue, and in his turn was called to order in a like manner. Upon this Dupanloup made a strong observation in good French and left the hall, with the Archbishop of Paris and a hundred others, in fact breaking up the meeting. All the bishops complain that they are powerless; that they have had no time to know what they are wanted to do; that they have only been allowed eight days to make one another's acquaintance; finally, that the hall is intolerable. They are dying of cold, and they cannot hear one another. They say the present accommodation is utterly inadequate; that they require many more rooms, and those larger than what have been improvised in and about St. Peter's. I hear that some of them say the council ought to have been held at the Lateran or the Quirinal, where they might have had a whole palace for the work, and rooms for conversation and other business. They are now obliged to find opportunities for mutual information and conference where they can, and cardinals and others who happen to have palaces at their command, are holding nightly large reunions. Very late ones, too, I suspect, for the streets are getting noisy at midnight, more so than when I came. Thus the first meeting on the tenth ended with an abrupt adjournment; and I cannot doubt that of to-day has done also. This is not very promising for the presumed object of the council, which every day recedes further into the limbo of vain aspirations. If the dogma of infallibility is adopted, it is now said positively the French Concordat will be at once withdrawn, and Pins the Ninth will find that with a new position new relations also will have to be arranged. So strongly is this intention announced that the pope's friends accuse France of dictating, and Frenchmen do not deny the imputation. The situation is described on both sides as *gravissima*; and nobody sees the way out of it, except by continual adjournments, till time itself may bring some sort of escape. But as for any conclusions being come to and proclaimed by January 6, that is pronounced impossible.

POSITION OF THE AMERICAN BISHOPS.
ROME, December 15.

The papal authorities have housed the bishops with careful and discriminating hospitality. Those who could not be absolutely trusted have been lodged with safe companions, in the proportion of one weak brother to half a dozen strong. In one palace, two or three known to want their faith confirmed are in charge of ten stout believers. The Jesuits have had the manipulations of the flock, and have done it well. There is not one of them who has not his feelings sounded and reported upon daily; and the common study of the printed papers compels all to speak. In this way it will be ascertained what points can be pressed—supposing it desirable to press them—and what not. But the pope will probably not propose at all what he would have to withdraw. The American bishops, I hear it said, plead their difficulties at home. The Syllabus has excited a good deal of attention there, and has been denounced as an attack upon civil society, putting everybody pledged to it in antagonism to his fellow-citizens. At first sight it might seem that under a constitution, founded on the right of private judgment and the will of the majority, there would be no great reason to fear an external claim to entire spiritual and social submission. But it is plain the Americans entertain a strong dislike to the kind of thing altogether, and that any maintainer of the pope's infallibility and supreme authority in the chief affairs of life will often find himself

at a disadvantage. So the American bishops would rather be out of it. Indeed they say they cannot help themselves; the new converts stipulate for their liberty.

If this be the case in the United States it cannot be otherwise in all the States of the Old World, where religion is at all a matter of controversy, and where there are such things as converts from one communion or one school to another. The objections to infallibility are said to take a great variety of forms, but that must be only a variety of language, expression and circumstances. There is one master objection at the root of all objections, and that is the individuality and the self-consciousness which make every man, who thinks at all, think for himself by laws and rules of his own, and from his own point of view. The man who thinks is already on a throne, and he does not even vacate it when he has solemnly accepted the pope for his lord paramount. He still holds it in that see.

Report of Board of Domestic Missions, Texas Conference.

The last General Conference, for reasons deemed at that time imperative, placed all the German work in Texas under the charge of the Texas Annual Conference. Subsequent experience has demonstrated that this action was unwise. In former days we were able to raise from eight to ten thousand dollars missionary money per annum; and, out of our abundance, could supply the demands of this field. Our territory has been curtailed by the formation of other Conferences, while the pressure of the financial disasters which followed the war have fallen with peculiar weight upon our people, and, thus weakened and crippled, we have proved ourselves unable to bear the burden we bore with ease in more prosperous days. The result has been that our appropriations for the support of this work have been too meager, and even this slender amount we have failed to raise. Notwithstanding these difficulties, a noble band of missionaries have kept the field, and amid toils, privations and solicitations from other quarters to abandon their father church, have at once demonstrated their love for those people who, under the hand of God, were instrumental in their conversion and their devotion to the great work of saving souls.

We have among them the following missions:

HOUSTON MISSION.

John Pruenzing, missionary, reports seventy-six members, one Sunday school, one superintendent, six teachers and thirty-five scholars, nine infants baptized, \$300 raised for support of mission, and two church buildings, valued at \$4,000.

BELLVILLE AND INDUSTRY MISSION.

Ulrich Stienner and William Knolle, missionaries, report fifty-five members, one Sunday school, three teachers and fifteen scholars, twenty-one infants baptized, \$422.25 raised for support of mission, and two houses of worship, valued at \$800.

VICTORIA MISSION.

Jacob Kern, missionary. No report.

BASTROP MISSION.

J. A. J. Rabe, missionary, reports eighty members, two Sunday schools, nine teachers, forty-four scholars, \$168.35 raised for support of mission, one house of worship, valued at \$600.

NEW FOUNTAIN MISSION.

Jacob Kern, Jr., missionary. No report.

FREDERICKSBURG MISSION.

Charles Grote, missionary, reports seventy members, one Sunday school, three teachers, twenty-seven scholars, raised for support of mission \$210, and one house of worship, valued at \$300.

GALVESTON MISSION.

No supply. No report.

YORKTOWN MISSION.

Supplied by Louis Rhinehart. No report.

The importance of this field of missionary effort is but faintly apprehended by our people. Though at present its boundaries are limited, yet when we behold it yearly widening, we must feel that not only is there a present necessity laid upon us, but that results are looming up in the future which demand wise counsel and prompt and vigorous action.—*Texas Christian Advocate.*

Frost bravely the object of your worst apprehension, and your stoutness will commonly make your fears groundless.

Minutes of the Mississippi Conference.

Mr. Editor: Please publish to the preachers and members of the Mississippi Conference that I commence to-day sending the Minutes of our late session to the subscribers, and will continue to mail them as they are furnished from the bindery. They ought to have been out before, but an unexpected press of business has caused delay with the printers. They will all be finished and mailed by the last of the week.

The job is neatly gotten up, and freer from typographical errors than such things usually are. The information contained ought to be considered invaluable to those interested.

There are nearly two hundred copies not spoken for. Let those who wish them send forward their addresses and the money at once, at the rate of ten cents per copy.

C. G. ANDREWS.

JACKSON, MISS., Jan. 18, 1870.

The Prussian needle-gun has a formidable rival in the form of a *zundmorgengewehr*, or knife-gun, the new breech-loader invented by Herr Mayhofer, of Kunschen, East Prussia. At a recent trial in Konigsberg, twenty-five rounds, with full cartridge, are said to have been fired off per minute. The missile penetrates at a distance of two thousand yards. The piece carries with great precision, and has the great advantage of a minimum of smoke.

Take heed of every sin; count no sin small; and obey every command with your might.

The hardest of all taskmasters is the sin that doth so easily beset us.

Appointments of the West Texas Conference.

We copy the appointments of the West Texas Conference as we find them in a secular paper. We have made several corrections from personal knowledge of the names and localities. If any error appears, we will correct. We prefer always publishing from a list furnished by the proper officer, but as it has never come to hand (through fault of mail no doubt,) we publish what we have:

SAN ANTONIO DISTRICT.—John S. Gillett, P. E. San Antonio station; B. Harris; Southland Springs, E. G. Duvall; Cibola, R. M. Loaten; Preston, supplied by W. C. Newton; Kerrville, A. J. Potter; Uvalde, supplied by J. A. J. Smith; Seguin and New Braunfels, J. G. Walker; So-guin colored mission, to be supplied; San Antonio Institute, R. H. Belvin.

GONZALES DISTRICT.—W. T. Thorn-berry, P. E. Gonzales circuit; Wesley Smith; Concoreto and Victoria, A. H. Sutherland; Lockhart, J. W. Brown, S. T. Bridges, supernumerary; San Marcos station, John L. Harper; San Marcos circuit, supplied by T. A. Lancaster; Blanco, to be supplied; Texana, C. M. Carpenter.

GOLIAD DISTRICT.—E. Y. Seals, P. E. Goliad station, A. A. Killough; Helena, J. T. Gillett; Leesburg, R. Blassengame; Clinton, J. W. Cooley; Lavaca and Indianola, C. M. Rogers; Navadad colored mission, to be supplied by J. F. Cook.

CORRIS CHRISTI DISTRICT.—O. A. Fisher, P. E. Corris Christi station, H. A. Graves; Rockport, D. W. Fly, T. Myers, supernumerary; St. Mary's, R. Gillett; Konkoister, C. R. Shapard; Nueces river, J. H. Thoker; John W. De Vilbiss and W. J. Joyce, agents American Bible Society.

W. C. Dunlap, transferred to North Georgia Conference; R. M. Kirby, to East Texas Conference; R. P. Thompson, to Trinity Conference.

R. H. Belvin and O. A. Fisher, clerical delegates to General Conference; W. T. Thornberry, reserve clerical delegate; William Headou and Don A. T. Woods, lay delegates; Henry E. McCulloch, reserve.

The next Conference is to be held at San Marcos.—*Texas Christian Advocate.*

TRUE RELIGION.—A little of religion is a life of faith; and faith is that strange faculty by which man feels the presence of the invisible, exactly as some animals have the power of seeing in the dark. That is the difference between the Christian and the world. Most men know nothing beyond what they see; their lovely world is all in all to them; its outer beauty, not its hidden loveliness. Prosperity, adversity, sadness, it is all the same; they struggle through it all alone, and when old age comes, and the companions of early life are gone, they feel that they are solitary. In all this deep, strange world they never meet, or but for a moment, the spirit of it all, who stands at their very side. And it is exactly the opposite of this that makes a Christian. Move where he will there is a thought and a presence which he cannot put aside; he is "haunted forever by the eternal mind." God looks out upon him from the clear sky, and through the thick darkness—is present in the ruin-drop that trickles through the branches, and in the tempest that crashes down the forest. A living Redeemer stands beside him, goes with him, talks with him as a man with his friend. The emphatic description is: "Enoch walked with God."

THE DRUNKARD'S CARNIVAL.—It is the general testimony of our city press that the Christmas holidays were this year distinguished by extraordinary and excessive drinking. "New York was drunk yesterday" is the rather strong expression of one of them with reference to New Year; but that the drinking of that day was general and immoderate, even for New York, is the concurrent assertion. Drinking was once all but universal; now it is not. There is a very considerable minority, even in this metropolis of sensuality, who systematically and on principle reject every intoxicating beverage. These are a hundred times more numerous than they were fifty years ago. But, apart from the rigidly abstinent, it is our conviction that there was more drinking and deeper drinking here in the year 1869 than in any of the two hundred and sixty preceding years since Hendrick Hudson discovered this island.—*New York Tribune.*

SATURDAY, JANUARY 29, 1870.

HERE AND THERE

Here is the sorrow, the sighing ;
Here are the clouds and the night ;
Here is the sickness, the dying ;
But there are the life and the light.

Here is the fading, the wasting,
The foe that so watchfully waits;
There are the hills everlasting,
The city with beautiful gates.

Here are our locks growing hoary.
The glass with the vanishing sands ;
There are the crown and the glory,
The house that is made not with hands.

Here is the longing, the vision,
The hopes that so swiftly remove;
There is the blessed fruition,
The feast and the fullness of love.

Here are the heart-strings tremble,
And here is the chastening rod;
There are the song and the cymbal,
And there is our Father and God.

Life and Times of Bishop McKendree
by Bishop Paine.

MR. EDITOR: I have headed this article as above not with any intention of reviewing the work, but simply to call attention to the book, with the hope of inducing a general reading of the same by Methodists, and especially by young ministers. The work has very decided literary merits; but if I mistake not this is not a moiety of its worth. I regard it as a large and liberal contribution to the piety and spirituality of the church.

The thread of the narrative is kept up throughout, and is deeply interesting; and yet we are sometimes led off, through by-ways and private circles, into the richest repeat. We are made fully acquainted with Bishop McKendree—as a preacher, clear-headed, strong and efficient; as an executive officer in the church, calm, decided, never at a loss; as a Christian holding constant communion with God, strong in faith and powerful in prayer. And through him we are introduced to nearly all of his intimate friends and co-laborers. All at once we find ourselves ushered into the society of the Asburys, the Easters, the Lees, the Burkes, the Emorys, the Olins and the Soules of another generation; and while communing with these illustrious dead we become familiar with the history of the church during fifty years of its most interesting period.

In this work we have not only the biography of Bishop McKendree, but sketches of the lives and labors of scores of others whose names will ever be dear to the church. This is the secret of the interest and success of the book : it is a history of the times and labors of the men of that day. The reading of biography I regard as a most valuable means of grace. Our young people have almost ceased to read biography, and, if I mistake not, this is one reason why we have departed from the zeal and piety of our fathers. Would that we might return again to the halcyon days of the church, when her members, and especially her ministers, would leave off trying to read everything, and read only the right thing, and read that to profit. The book ought to have been written thirty years ago. Let us make haste and read it, and thereby, if possible, make amends for the past. But I forbear, lest the length of this article should deter some one from reading it, and in that way prevent the reading of a book in which I think the church, and especially the ministry, has a large interest.

A. H. MITCHELL.

THE discovery of the skeleton of a sea horse, fifteen feet beneath the surface, near Bic, on the line of the Intercolonial Railway, by the men at work under the contractors, is an important fact of which scientific men will avail themselves. The existence of a skeleton at a height of more than one hundred feet above the sea level affords conclusive evidence of two facts—first, that the land on which the skeleton was found was once a sea beach or covered by the ocean; secondly, that the elevation of the land above the sea must have occurred within a comparatively recent period—i.e., geologically speaking—otherwise the bones of the skeleton must have wasted away. Sea horses were at one time abundant in the St. Lawrence, but have long since been exterminated.

PREACH CHRIST.

We need not fear that the world is weary of hearing about him. It wearies of everything else, but it never wearies of Christ. After the lapse of eighteen hundred years he still exerts over foes and friends the same mysterious power which belonged to him when he was on earth. Every attempt to tell the story of his life over again stirs the human heart as nothing else can stir it. The genius of M. Renan, the ineffable grace and beauty of his style, his great reputation, invested his "Life of Jesus" with exceptional attractions; but after all it was the story itself that France wanted to hear; and when he wrote about the "Apostles," France cared nothing for his book. The literary beauty of "Ecce Homo," the freshness of its spirit, the originality of some of its views, and the ignorant and undiscriminating abuse which it provoked, all contributed to its popularity; but what made men read it with such eagerness and delight was this—it was another effort to tell the world the wonderful facts of the life of Christ.

What do we and our churches and our fellow-countrymen know about Christ? How much of our strength is given to the endeavor to make men familiar with his character and history? I suppose that most of us are conscious that when we attempt to preach about Christ we are in danger of preaching about everything and everybody that had any connection with him, and of forgetting Christ himself. * * * We suggest ingenious methods of harmonizing the discrepancies of the four gospels. We answer objections to the Christian miracles. We take isolated moral precepts from our Lord's discourse, and show their application to modern life; or isolated statements of doctrine, and illustrate their bearing on the controversies which divide hostile schools of theology. Phrases which fell from his lips, phrases which occur in the gospel narratives, suggest long trains of thought; which appear to us to be striking and pathetic, and perhaps "original." We discuss a thousand questions about him; we reply to a thousand difficulties; we declaim, we argue, we entreat. We may do all this and fail to tell the actual story. We may criticise the portrait contained in the gospels, instead of trying to paint it afresh. We may discuss merits of the drama, instead of letting men see it acted before their eyes.

Here it happens that, to the very people to whom we are constantly preaching, the story of Christ's life, as a whole, is new and unfamiliar. When it is told them they are, as we have seen lately, charmed and fascinated by it. We may have been able to give them many admirable thoughts about the facts of our Lord's earthly history, but the facts themselves are better than the thoughts. If we could only make them see Christ as he lived and moved among men—if his own thoughts, his own words and his own deeds were so presented to them that they should feel as though they had listened themselves to his sermon on the mount, and to the parable of the prodigal son—had been with the apostles in the boat when he walked across the stormy sea—had seen him lay his hand on brows burning with fever, and taking the little children in his arms and blessing them—had stood by his side when he wept at the grave of Lazarus—sat in the upper chamber when he said: "Let not your hearts be troubled"—watched him in his dying anguish, and gazed on him as he ascended into heaven—I cannot but believe that we should have new and wonderful proofs that Christ is not our speculations about Christ, not our arguments in support of his divine commission, not our learned dissertations on the geography of the land in which he lived, and the civil, political and religious life of the Jewish people—but Christ himself is still the power of God and the wisdom of God. * * *

Let the world look on his face again, and hear his voice and see whether the tide of battle will turn, and a glorious victory be won. We know how marvelous was the spell which he exerted over all the men when he was here. The rabbi came to him by night; the woman that was a sinner crept to his feet and washed them with her tears; fishermen forsook their boats and their nets to follow him; Zecheus, the extortionate publican, climbed the tree to see him pass; and repented of all his rapacity as soon as Jesus entered his house. The rich Pharisees asked him to do with them; the common people heard him gladly; Herod desired to see him; Pilate pronounced him innocent; the officers who were sent to take him said; "Never spake like this man;" the thief, the cross became a penitent; and turning his eyes to the inscription which was hung in mockery at the head of the rejected and crucified peasant of Nazareth, cried, "Lord, remember me when thou comest into thy kingdom." The

cient spell has not lost its power. In our great controversy with unbelief our supreme argument for the authority of Christ is Christ himself.

Rev. R. W. Dale.

BENARES.

We rowed down the river through the city, for two or three miles, in a covered boat. Certainly I never saw such a striking spectacle in my life. It remains unapproached and unapproachable in my memory. No description can give any adequate idea of the scene. I must refer to the illustration, although even it can only convey an imperfect notion to the reader. The architecture was remarkable; yet no building, unless perhaps the two remarkable minarets, made any distinct impression of beauty or of grandeur upon the mind. Still, as a whole, and with many remarkable bits, it was extraordinary. The city rose high from the edge of the grand old river with a strength and imposing majesty (from its height and the vast mass of stone) such as I had not before seen in the East. The river itself, flowing in broad and rapid stream, formed a splendid foreground to the picture. Its surface was covered with every kind of out-of-the-way picturesque boat, whose sails, whether white or saffron colored, whole or tattered, each made a study. The marvelous line of architecture was of every possible variety of form, the ghats, or landing places, having long flights of stairs, and being continued on and on along the river, in such numbers as one never saw before. These stairs were not uniform, but were longer or shorter, broader or narrower, according to each building. All, however, were built of solid stone, massive and apparently enduring. Above these, and mingling with them in utter confusion, were a countless number of temples, small and great. And then, lastly, overtopping these, were fortress-looking stone palaces of rajahs, who had here their town residence, although probably they generally resided in distant parts of India. When one was cool enough—for the spectacle was most exciting—to look at architectural details, how picturesque they were! As to the excellence of these works as artistic productions I could form no judgment as I floated past—I felt, but could not criticise. And certainly nothing could be more unique than such a first glimpse beneath the bright sun and the blue sky of an outline so broken, and of forms so fantastic; of brightest lights and shadows numberless; of balconies, verandas, towers, cupolas, or windows, projections, recesses, and covered galleries, endless and indescribable! And then there was the absence of every trace of Westernism, for so far as the eye could see, no Englishman had ever visited Benares. There Hindooism had reigned long ere the Romans had landed in Great Britain, and did seem to have been disturbed.

The ghats are wholly given to idolatry, and were alive with devotees. Hundreds, nay thousands, crowded them; many performing their ablutions in the holy waters of the Ganges, and saying their prayers. Thousands, again, grouped round the holy Brahmins, who sit under their white umbrellas, planted, like beds of great mushrooms, along the river; for, under these, all ceremonies are properly arranged, blessings bestowed and fees paid. Here the weak, the aged and the sick, who have arrived from long pilgrimages of hundreds of miles, receive spiritual strength and comfort from these sacred waters, or die and enter heaven direct from its gate. On one giant smoke constantly ascends from the burning bodies of the dead, and on another the most heinous crimes are being atoned for. Rosas is promised to the sinful and weary as the reward of sacrifices, pains, penances and pay. And all this has been going on for centuries! What knows this spiritual world-of-Benares about us—and what care we for it! Alas, we are only exiled and mocked by this antique drama—strange, so un-European, so old-world is it. Were we ourselves right toward God and man, and had we love to our father and our brother, we should look at such a spectacle with a very different eye, and experience a poignant sorrow for such ignorance, degradation and "lying vanities." One spectacle only is more sad and alarming—the idolatries, the mammon worship, the indifference and the formality, the materialism and nubbled which exist at home. Within the heart of the church of Christ, more than anywhere else, the battles are to be fought and the victories gained, which will insure the spiritual conquest of India, and ultimately convert such a city as Benares into a home of Christian worship.

I have before me a lecture, delivered in December, 1866, by a native, Lichun Lakshumaji Pandit Gaud, Le'or: the Bournes Institute, which gives anything but a flattering account of "the social status of the Hindoos." Whether his is a correct account or not, I cannot tell. But

it is interesting as being the judgment of "one of their own children," who, one would think, must be well informed on the subject. If his statements were untrue he would hardly dare to give them forth in the city of Benares, and among his own people.

There are about ten missionaries in Beuares, supported by the Church Missionary and London Missionary Societies, with schools, native pastors and teachers, and native congregations. Mr. Kennedy, our host, who is connected with the London Mission, and Mrs. Leopoldt of the Church Mission, have labored here for twenty-six years. Here, as in other parts of India, we have evidence that the combined forces of Western culture and civilization, together with education and Christian teaching, are slowly but surely creating a better public opinion, and if not making many individual converts as yet, are most certainly and surely preparing the way for greater results in the future.

There is also in Benares a very handsome government college, which I had time only to glance at. It seemed full of young men, and was presided over by a distinguished Oriental scholar.—*Good Words.*

VICTOR EMMANUEL'S CONFESSION

SCENES AT THE BEDSIDE OF THE SICK
ITALIAN KING.—ADMINISTERING THE
SACRAMENT.—A CONFUSED PRIEST.

The illness which exhibited the most alarming symptoms of a pulmonitis in a man who had already an affection of the heart, assumed most alarming proportions on the evening of Friday and all Saturday. On the evening of the last day the medical men did not conceal their apprehension that the angust patient might not survive the night, and an attack of syncope about midnight left them little hope of his recovery. Prof. Cipriani, of Florence, then gave him a glass of wine, and it is certain that from that moment the improvement set in which still continues. As early as Friday evening, his majesty having been informed by his physicians of the serious character of his illness, he determined to perform his religious devotions whilst his mind was calm and serene. He begged that a messenger might be dispatched to the archbishop for a priest. The wife of one of the physicians who attended him conveyed to Archbishop Corsi the wishes of the king. The prelate first thought of Canon Ibragha, and then finding he was absent from Pisa, sent the reverend president of the Pisa Hospital, who, on his arrival, found that his majesty was somewhat relieved, and the confession was delayed. On the Saturday evening he again wished to confess, and the archbishop dispatched the priest Reni with full powers to absolve his majesty from the spiritual censures which, according to the views of those revered personages, he might have incurred.

On Sunday morning there was administered sacrament of the Eucharist, in the presence of Princes Humbert and Carignano, and it was received by his majesty with profound devotion. As the hours now began to be somewhat relieved from the oppression which, during the previous night, had threatened to prove fatal, and as perspiration and symptoms of an eruption were visible the physician replaced the priest by the bedside of the patient. The following may be accepted as an exact version of the relations which took place between his majesty and the church. The priest, before absolving the king, told him that it was necessary he should make an abjuration of the offenses which he had committed against the church. His majesty replied: "As a Christian I have lived in the faith of my forefathers, and am prepared to die in the same—as a king, imitating the example of my forefathers, I have done what my conscience as a sovereign commanded me to do for my country. I have always distinguished my obligations as a king from my duties as a Christian; as a king I have no abjuration to make." The priest, confused by this reply, administered the sacrament, but on his return to Pisa, and reporting to Cardinal Corsi, the archbishop, what had happened, he was blamed, and enjoined, on pain of church censures, to return to San Rossore and demand the abjuration. The priest obeyed, and returning to the couch of the sick man, delivered his message. The king told him: "I will come here to speak to a Christian on his approaching end, I will listen to you with calmness and with gratitude, but if you require me to speak about politics, my minister will be in the next room." The reverend priest made his way back to Pisa.—*Pisan Correspondence Gazette d'Italia.*

RELIGION need not, should not, make me gloomy. What says the Author of it to his disciples?—
"These things I say unto you, that *your joy may be full.*"

Mex are said to admire that which they look up to, and love that which they look down upon.

The Sweetness of Worship at Evening.

When the noise and turmoil of the day are over, it is sweet to commune with God ; the cool and calm of eventide agree most delightfully with prayer and praise. The hours of the declining sun are so many quiet alleys in the garden of time wherein man may find his Maker waiting to commune with him ; even as of old the Lord God walked with Adam in paradise in the cool of the day. It is meet that we should set apart a peaceful season ere the day has quite departed—a season of thanksgiving for grace abounding, of repentance for follies multiplied, of self-examination for evils insinuating. To leap from day to day like a mad hunter scouring the fields, is an omen of being delivered over to destruction ; but the solemn pause, the deliberate consideration—these are means of grace, and ensigns of an indwelling life. The tide of ocean stays awhile at ebb before it resolves to flood again ; the moon sometimes lingers at the full ; there are distinct hedged in nature, set between acres of time ; even the strike of the bell is a little mound of warning ; men should not remove landmarks, but beat the bounds frequently, and keep up with due interest and solemnity the remembrance of the passing away of days and months and years ; and even if it were well to traverse the boundaries of the day, and take note of all it has brought, and all it has

The Drops of the night come from the same fount as the dew of the morning. He who met Abraham at break of day, communed with Isaac in the field at eventide. He who opens the doors of day with his hand of mercy, draws around his people the curtains of the night, and by his slining presence makes the outgoings of the morning and of the evening to rejoice. A promise at dawn, and a sure word at sunset crown the brow of day with light, and sandal its feet with love. To breakfast with Jesus, and sup with him also, is to enjoy the days of heaven upon earth. It is dangerous to fall asleep till the head is leaned on Jesus' bosom. When divine love puts its fingers on the weary eyelids, it is a brave sleeping that the Lord's beloved may have such sleep given him, it is needful that he should make a near approach to the throne, and unburden his soul before the great Preserver of men. To enter into the blaze of Jehovah's presence by the way of the atoning blood is the sure method to refine ourselves of our earthly cross, and to renew the soul after exhausting service. The reading of the word and prayer are as gates of carbuncle to admit us into the presence-chamber of the august Majesty, and he is most blessed who most frequently swings those gates upon their sapphire hinges. When the stars are revealed, and all the hosts of heaven walk in golden glory, then surely is the time when the solemn temple is lit up, and the worshiper is bidden to enter. If our hour can be endowed with a sacredness above its fellow, it must be the hour when the Lord loseth the bands of Orion, and lendeth forth Arcturus and his sons; then voice from worlds afar call us to contemplation and adoration, and the stillness of the lower world prepares a sanctuary for the devout soul: For surely never prays at all who doth not end the day as all men wish, and their lives—in prayer.

In many households the gathering of the family for evening prayer is more easy than the morning opportunity, and in all the tents of our Israel the evening sacrifice should be solemnly remembered. Ere we cower down beneath the wings of the Eternal, let us entreat him to deliver us from the terror of the night, and give us a safe dwelling in his secret place. It is blessed work to set the night wardens in their post by supplication, and then commit ourselves, without fear, to the embrace of divine love.

SHORT AND SWEET.—Pay your debts as soon as you get any money in your pocket. Speak your mind when it is necessary, hold your tongue when prudent. Speak to a friend in a seedy coat. If you can't lend a ninn money tell him why. If you don't want to, do the same. Cut any acquaintance who lacks principle. Bear with infirmities, but not vices. Respect honesty, despise duplicity. Wear your old clothes till you can pay for new ones. Aim at comfort and propriety, not fashion. Acknowledge your ignorance, and don't pretend knowledge you haven't got. Entertain your friends, but never beyond your means.

The surest road to poverty is to hoard up treasure. The surest road to wealth is to bestow liberally where it is most needed. The miser is the poorest man on earth; the most liberal man is the most wealthy. If, therefore, you would be rich, do not aim at riches, but simply use what you already possess for the greatest possible good of the greatest possible number.

THE POSSIBILITIES OF YOUNG MEN

Robert Murray MacCartyne had been the means of the conversion of hundreds of persons, and given lasting impulse to foreign missions in the hearts of the Scotch people by his visit to the Jews on the continent of Europe and in Palestine before he died at thirty years of age, and his biographer (Rev. A. A. Bonine) says: "Perhaps never was the death of one whose occupation had been preaching the everlasting gospel more felt by all the saints of God in Scotland."

David Brainerd killed a flame of interest in the salvation of the poor savages of this continent, and set an example of burning zeal for Christ, which has, perhaps, begotten that of any other man, inspired and sustained others in labors for the most benighted and degraded of our race, before he finished his brief thirty years. Jonathan Edwards, in his memoirs, says of his life, meekness, etc.: "I scarcely know where to look for a parallel instance in the present age;" and that his memory should "teach and exhort to duty, as who are called to the work of the ministry—and all who are candidates for the great war."

Felix Neff filled the Alps with the light of the gospel and ascended the glory on high before he was thirty-one.

Henry Martyn died at the early age, leaving a name precious in England, India, Persia and wherever Christ's cause is loved throughout the world.

Walter M. Lowrie, whose life and death have so powerfully drawn the heart of the Presbyterian Church to China, was but twenty-eight years of age when he was killed by pirates drowned him in the waters of the Bay of Hangshan.

Isador Lowenthal, that prodigy of talent, fervent zeal and industry, had served the church but two years in India before he was martyred by the Afghans, the Persians, the Arabics, the Cashmieri and the Hindustani languages; had translated the New Testament into the language of them, and nearly completed a dictionary of it, besides contributing a large amount of valuable matter for publication in America and England.

Melville B. Cox. Need we
our people to the memory of this
young man, whose dying utterance
has not ceased to ring along the
ranks of our Israel: "Let a
and fall before Africa be given

How animating and how encouraging are such examples! Similar ardor of love for Christ, ceaseless prayerfulness and perseverance in labors for good may be within the reach of every reader of these words to be blessed and honored as were the

Presbyterian Record.

Faith.—The blessing that is given to those who have faith. Christ is infinite. "He that believeth hath everlasting life." But to pass through which we have everlasting life must be a living. Dost thou think a dead faith can make a living soul? It is no reason. True faith is not a conceit floating in the brain. I say, "I am God's child," if there is no love to Christ—moving after holiness of life—moving of our own. The devil will soon lead a man into a fool's paradise. He is glad to rock men to sleep in such conceits. It is not enough to take one's place as God's children, like the foolish virgins. You must have oil in your vessels, or, like them, you will be slung out at last. Thou must believe thou art safe, and yet have this assurance to hell with thee. Thy faith is not faith. Faith is believing what God hath said. Thou must not go a jot further than the word of God. Thy fancied faith is a presumption; it is a mere conceit. According to the word of God, a faith that does not change the heart, and produce good works is dead faith. "As a body without spirit is dead, so faith without love is dead also." Faith, if it be true, must be holy and sanctifying its effects. Faith purifies the heart so that God can dwell in it. Faith dwells in the heart, it is the heart a fit habitation for the King of Saints. Faith and love dwell together.—*Cher.*

NECESSITY OF PERSISTENCE
Israelites had journeyed about
years when they drew nigh
land of promise. The spies
up and searched the count-
ten of them brought back
report. The people murmured
God then led them back-
they fell in the wilderness
now. Some, to all appear-
out for heaven and run well-
pens as though they were
reach the land of rest. They
let their hearts grow cold
duty, virtually complain of
and go back again into sin.
God help all who set out sin-
vere to the end!—Fenton.

The Christian Advocate.

SATURDAY, JANUARY 30, 1870.

THE PRICE OF TRUTH.

Great truths are dearly bought. The common truth.
Such as men give and take from day to day,
Comes in the common walks of daily life,
Blown by the careless wind across our way.

Bought in the market at the current price,
Bred of the smile, the jest, the pleasure of the bowl;
It tells no tales of daring or of worth,
Nor perceives the surface of the soul.

Great truths are greatly won—not formed by chance,
Nor waned on the breath of a summer stream;
But grasped in the great struggle of the soul,
Hard battling with adverse wind and stream.

Not in the general mart, mid corn and wheat;
Not in the merchandise of gold and gems;
Not in the world's gay haunts of midnight merriment,
Nor amid the blaze of regal gladdenings.

But in the day of conflict, fear and grief,
When the strong hand of God, put forth in might,
Plows up the subsoil of the stagnant heart,
And brings the imprisoned truth seeds to the light.

Wring from the troubled spirit in hard hours,
Of weakness, solitude, and penitence of pain;
Truth springs like harvest from the well plowed field,
And the soul feels it has not wept in vain.

BABIES' RIGHTS.

BY REV. H. D. NORTHRUP.

A zealous mother remarked, the other day, that she did not see why she had such bad children, for she scolded and whipped them from morning till night. This enterprising female, and others of similar disposition, cross and volentia and sour, ought to take soothing sips as a common beverage. It were better that the whole juvenile household should have a perpetual hurricane of wind come than that they should be subjected to such a continuous blast of fretfulness.

The remark of the mother aforesaid is indicative of the wrongs inflicted upon ungrown humanity. It is time these were remedied. Cuba is struggling for independence; Spain is coming out of her significant revolution; the land of St. Patrick is clamoring for justice, long delayed; women are up in arms for their rights; but who is there to speak for the babies? An agitation for their special benefit ought to be got up forthwith, a society formed, a paper printed, and an annual meeting held. It is culpable that such a field as this should have been so long neglected at a time, like the present, of universal reform.

In the name of all the babies, black and white, native and foreign, clean and dirty, cuffed and petted, we affirm that they have rights sufficient for a Declaration of Independence. One is the inalienable right to be babies. Not unrequitedly they are hustled into premature infancy, and like hot-house plants, are forced to ripen before their time; and so, as eggs are hatched into chickens by steam, babyhood and childhood get into the next stage of existence without even showing the premonitory symptoms of what is coming. The youngster must be able to walk and talk, and say smart things, and go to parties and receive calls as soon as possible; so that we have "misses" who have scarcely cut their teeth, "young ladies" who really need a nurse to lead them, "young gentlemen" who have hardly entered into trousers—children who are older than their parents. If we had the system of publishing births that they have in England we might see it seriously announced that John Smith, Esq., was born night before last, and the mother and squire are doing well. Nature is too slow; the "nursery" is emptied into the parlor; young heads are done up in waterfalls, with cascades dribbling down behind; tender feet are thrust into many boots, and the airs of maturity are taken on, as if the juvenile period were a disgrace. Now babies ought to be kept such until they naturally grow to something else.

The physical wrongs of many who are so unfortunate as to be born might fill a volume as bulky as Fox's Book of Martyrs. We pity the children of the poor that are half-famished; there is equal need of pitying the children of the rich that are stuffed like turkeys before Christmas. If the baby cries, as nature seemed to intend that it should, why it must be fed; if it doesn't go to sleep, it must be fed; if it screams from reason of pains in unmentionable regions, it must be fed; if it is sick, what better thing could be done than to feed it? If it is perfectly well, of course it must be fed; if it is uneasy because overfed already, it must be quieted with another dose of food. I would not be a well-to-do baby for all the rattle-boxes in creation.

Think, too, of the villainous notions to which babyhood is subjected. Cradles that are more favora-

ble to sea-sickness than the sea itself—perpendicular tossings in nurses' arms—jolts and jumps, as if the happiness of the youngster depended upon his being vigorously churned—who wouldn't get sick, and pour out indignation, or something worse? It seems to be the deep-seated conviction of many that children are born into the world for the express purpose of bobbing up and down.

But children are beset with other evils besides those that may be denominated physical. The character, the better nature often suffers. John Brown said he had rather have measles, smallpox, yellow fever and cholera all in his camp at once than to have a man without principles. We might reasonably wish all these diseases for a child in preference to that tornado of scolding which rages in some families from morning till night. If things go wrong, and only the parents are to blame, the children are sure to get enraged for it. There is just about so much scolding to be done, and woe be to the luckless brat that comes in the way of it! Many children who are sour and ugly would be amiable and attractive if it were not for this overhanging domestic thunder and lightning. It is meant to serve moral purposes, and make the unfortunate victims of it better in character and manners; so Xantippe thought to render Socrates more amiable by emptying the contents of her soup-kettle upon his philosophic head. It is possible to have firmness and love united; and sometimes a real thunder blast sweeping through the family may clear the atmosphere and prove a blessing; but this continuous drizzle of scolding chills the home, makes the children harsh in temper and barren of affection, and altogether ignorant of that love which softens the heart, and calls out the finest feelings and noblest purposes of the young.

Very often, too, the little prattler asks a question (heaven be praised for all such curiosity!) and is as promptly snubbed as if the desire to know anything were nothing but intolerable impertinence. When old enough to read, it devours any and everything that comes in its way, and no proper selection of reading is set before it. It is corrected, perhaps, for a certain misdemeanor at one time and not at another. Very likely the parents disagree in their commands, and the household has two heads, or rather no proper head at all.

These are only a few of the things which often render it a desperate undertaking to be a baby—a hazardous piece of business to become connected with the human family. We insist that this question ought to be agitated, articles written, speeches made, posters stuck on the curbstones, and a general fuss inaugurated, until babies get their rights.

THE DIVIDING LINE.—Where does the dividing line run between true religion and the world? We answer that it runs just where God's word puts it; and a conscience which is enlightened by the word and by prayer does not commonly fail to discover it. Where Christ would be likely to go, if he were on earth, is the right side; but where a Christian would be ashamed to have his Master find him, there he ought never to find himself. Wherever a Christian can go, and conscientiously ask God's blessing on what he is doing, there let that Christian go. He is not likely to wander over the line. And when a church member can enter a play-house, or into a dining-frolic, and honestly ask God's blessing on the amusements, and come away a better Christian for it, then let him go; but not before.

But should not every good man be a "friend of the world"? Was not the divine Jesus a friend of the world when he so loved it that he gave himself for its redemption? Did not Paul love the world when he endured hardship, humiliations and martyrdom to lead sinners to the cross? Ah! yes, very true; but what the Redeemer and his apostle were after was not sinners' sins, but sinners' souls. And they sought to save the world not by conformity to it, but by transforming it to a higher and holier ideal of life.

Nor is it by going over to the world that we can save the world. If we are to impress the world, we must live above the world; if we would save sinners we must, in the same sense that Jesus was, be "separate from sinners." The moment we go over the line to "envy favor" with the votaries of sin, we never reach them, and only run the risk of ruining ourselves. Would to God that in trying to draw the world into conformity to Christ we did not allow the world to drag us down into conformity to itself!

Evangelist.—Our present frail existence is the unsubstantial basis upon which too many are building the fabric of their happiness; but it is building a nest upon a wave.

CRYSTAL MOUNTAINS.

BY EMER BIRDSEY.

In the regions of perpetual winter beautiful crystal mountains, called glaciers, are formed in vast numbers, and of remarkable size and shape.

In January, on the coast of Greenland, the sea freezes, filling the deep, dark inlets of water with piles of white and glistening ice; these are increased, day after day, by the waves, as they rise and freeze around them, and dashed by strong winds up the sides of these icy mountains, rise higher and higher under the cold sky and glittering sun of the frigid zone.

When the sea water can no longer reach their tops it continues freezing underneath; this also assists their elevation, though the icebergs only present about one-eighth of their length from top to bottom above water.

In some instances, also, vast glaciers from the interior of Greenland, formed by the sliding of snow and ice down the mountain sides, approach the coast and extend out into the sea.

As summer advances the long lines of crystal mountains are undermined by the waves, and fall over into the sea with a terrific noise, causing the water to bubble and foam for miles around; then, gaining an upright position, they float away, propelled by winds and currents.

Many icebergs thus unloosed approach the latitude of the coast of Florida, borne by the Polar current; some meet the warm waters of the Gulf stream, where they are melted, and nothing is left of them but the stones and dirt they have brought with them from Greenland.

The Grand Bank of Newfoundland by some is believed to have been thus formed, from the deposits of stones and dirt transported from Greenland by these huge, sailing mountains.

The crystal mountains, when moving down from their frozen home, present a beautiful and extraordinary appearance. They often float in great companies, like a fleet of vessels, sometimes to the number of five hundred, and from fifty to three hundred feet in height.

Those who have gazed upon these vast structures describe them as bearing the appearance of specimens of rare architecture—towers, temples and palaces, with turrets and columns rising above cliffs of pale green or purest blue, from which, through numerous ravines, rush catenars of limpid water, mingled with glistening fragments of ice.

On the summit of these crystal mountains, ere they leave their native land, lies a bed of snow. As they move away, under the sun of a warmer clime than that where it fell, the snow melts and forms a pond of fresh water in a basin of ice.

When touched by the sun's rays, these icebergs assume radiant colors, changing as they move, like the rays of a prism, wonderful as a fairy palace overlaid with pearls and precious stones.

Often the action of the water underneath, which is warmer than the ice, wears away a portion of the base of a glacier, and causes it to roll heavily from side to side, when it finally "breaks" over and disappears with a terrific plunge. When again appearing it is bottom up, but floating quietly on as before.

THE ORIGIN OF CANDLES.—The tallow candle is the offspring of the tallow torch used in the twelfth century. When tallow candles were first introduced their cost was so great that only the most wealthy could afford the luxury, and it was not till the fifteenth century that they were sufficiently cheapened to come into general use.

Think of a tallow candle—that dripping, guttering, greasy thing—being considered a luxury. But the tallow candle, now used only where more convenient and economical lighting materials cannot be obtained, is, as we know it, no more to be compared to the candle of the twelfth century than the best illuminating gas to lard oil. Its wick was of tow, hard to light and burning so rapidly as to melt a large portion of the tallow into rivers of oil, so that the drip of four candles would buy a new one.

What would the quaint old revelers of that period have thought if, in the midst of one of their drinking bouts, their tallow dips with tow wicks could have been suddenly eclipsed in the splendor of the oxyhydrogen light of to-day. Verily, both the physical and mental darkness of that age has given way to the light of a brighter and nobler period.

Can it be that, in centuries to come, the hymnies of the present will be regarded as contemptuously as we now regard the obsolete appliances of the middle ages?—*Scientific American.*

God sits upon his mercy-seat, and will pardon and save all who approach him aright.

HEALTH HINTS.

One of the most important things to be considered in dress is the careful covering of the chest and back. Exposing the lungs by inadequate shielding of these portions of the body from cold is too generally practiced, especially by ladies. To cover the chest alone most carefully is not enough. There should be thick covering between the shoulders.

A physician, in a very sensible article upon bathing, says: "For the 'wind in the stomach' children are thought to have, for their tiresome crying, and for the restlessness and worrying at night with which they are afflicted, if the warm bath were resorted to oftener, and the dosing of soothing syrups and worse nostrums less, it would be far better for the children."

Cold air is not injurious to breathe, even by the most delicate. If it causes irritation and coughing for a time, it is only because it seeks to find its way into diseased or overburdened lungs, to strengthen and heal so far as permitted. The injury received from going into cold air proceeds from having some part of the body insufficiently clothed to protect from cold and dampness, and not from inhaling the fresh cold air into the lungs.

A man who has strength to do twelve honest hours of labor in twenty-four, and no more, should do but nine or ten hours' work. The reserve power keeps the body in good repair. It rounds out the frame to full proportions. It keeps the mind cheerful, hopeful, happy. The person with no reserve force is always incapable of taking any more responsibility than he already has. A little extra exertion puts him out of breath. He cannot increase his work for an hour without danger of an explosion. Such are generally pale, dyspeptic, bloodless, nervous, irritable, despondent, gloomy—we all pity them. The great source of power in the individual is the blood. It runs the machinery of life, and upon it depend our health and strength.

LOOK OUT FOR HIM.—For the great adversary who always aims at the open point in the harness: A shrewd writer says:

Does not Satan attack us in our weakest point? How he snits his mode of temptation to the disposition of the victim! Are you vain? In how dazzling a luster will he place the pleasures of this poor world before you. Are you ambitious? In what splendid honor will he make the great things of man appear. Are you discontented? In what exalted light will he place the advantages of others before your eyes. Are you jealous? In what strong contrasts will he place the kindness of the person you love toward mother than you. Are you of an ill temper? How he will make you think everybody hates you, neglects you, despises you or intends to slight you. Are you indolent? How wearisome will he make the slightest effort for another's good seem in your eyes. Are you too active? How useless will he make the quiet hour of prayer and thought and reading seem to you. He tempts us to what our nature is most inclined to; he suits his allurement to our inclination. If we are of a quiet temper he will not tempt us there; if we are only ambitious he will take care to make us jealous; if we are too active he will not tempt us to be idle. He knows us well; he drives our inclination to its far extreme.

HOW TO ENTERTAIN GUESTS.—Emerson says: "I pray you, O excellent wife, not to cumber yourself and me to get a rich dinner for this man or this woman who has alighted at our gate, nor a bed chamber made ready at too great a cost. These things, if they are curious in, they can get for \$1 at any village. But let this stranger see, if he will, in your looks, in your heart and earnestness, your thought and will, what he cannot buy at any price, in any village, and which he may well travel fifty miles, and dine sparingly, and sleep hard, in order to behold. Certainly let the board be spread and the bed be dressed for the traveler; but let not the emphasis of hospitality be in these things. Honor to the house where they are simple to the verge of hardship, so that the intellect is awake and sees the laws of the universe, the soul worships truth and love, honor and courtesy flow in all deeds."

An eminent divine, remarkable for the devoted piety and spotless purity of his character, was heard to say that he never read or heard of a crime in his life, no matter how heinous, without feeling an inward consciousness that, under certain conditions of education, he might have committed the same crime himself. The same feeling must be experienced, more or less, by all reflecting, enlightened men; and yet how little charity there is in the world.

Those who are bound for heaven must be willing to stem against the storm, and must not do as the most do, but as the best do.

HOW TO RISE IN THE WORLD.—Glance over the world, and we find that it is not those who are born with the silver spoons in their mouths, who are aided by friends, or who are known as the "geniuses," that achieve the greatest success. On the contrary, they are those who embrace all the opportunities which are offered them, who push steadily forward, having a fixed purpose in view, and are diverted neither to the right nor left; who labor diligently, spending no time in idleness, but improving every moment. Whoever starts out in life with a determination to be unceasingly industrious, and adheres to that determination, will achieve success, though his talents be not of the brilliant order, and he receives little or no assistance from his friends. Go study the habits of those who have risen to eminence, and you will learn that industry has been the secret of their success.

What can be achieved during these "spare moments" is well illustrated in the case of Elihu Burritt, the learned blacksmith, who contrived, while working at the forge, to acquire a knowledge of all the ancient languages. The New York correspondent of the Chicago Journal tells of a man in the Brooklyn Navy Yard who has for many years done the work and drawn the pay of a machinist, who has yet found time during all this while to gratify a yearning thirst for knowledge. It may be surprising, yet it is nevertheless true, that he has mastered the French, German and Italian languages, made himself partially acquainted with Hebrew, and obtained a thorough knowledge of botany and geology. He has continued to work on from day to day at the navy yard bench, spending all his nights and noons in study, and linsbanding all his earnings to purchase books, of which he has a library of nearly eleven hundred volumes, and now he is suddenly promoted to a prominent public position.

There is no individual, however humble in his circumstances of calling, who cannot rise in this country, if he makes up his mind to do so, and devotes to the attainment of his object the moments which are now given to idleness or pleasure. Young men—you who are filling inferior stations, and are unhappy because you are tied down to your calling—think of this, and strike boldly for yourselves.—*New York Commercial Advertiser.*

NOT JUSTICE, BUT PARDON.—We are shocked when we hear men talk of dealing with God on the basis of their personal merits. The man who thus speaks is either ignorant, willfully deceived, a hypocrite or a fool.

In the days when Napoleon was first consul of France, a well-dressed girl, fourteen years of age, presented herself alone at the gate of the palace. By tears and entreaties she moved the kind-hearted porter to allow her to enter. Passing from one room to another, she found her way to the hall through which Napoleon, with his officers, was to pass. When he appeared she cast herself at his feet, and in the most earnest and moving manner cried: "Pardon, sire! pardon for my father!"

"And who is your father?" asked Napoleon; "and who are you?" "My name is Lajolia," she said, and with flowing tears added, "but, sire, my father is doomed to die."

"Ah, young lady," replied Napoleon, "I can do nothing for you. It is the second time that your father has been found guilty of treason against the State."

"Alas," exclaimed the poor girl, "I know it, sire; but I do not ask for justice; I implore pardon. I beseech you, forgive, O forgive my father!" Napoleon's lips trembled, and his eyes filled with tears. After a momentary struggle of feeling he gently took the hand of the young maiden, and said:

"Well, my child, for your sake I will pardon your father. That is enough. Now leave me."

Reader, whoever you are, know that, as a sinner against God, the cry from your lips must always be: "Not justice, but pardon."

MEX bow before talent, even if unassociated with goodness; but between these two we must make an everlasting distinction. When once the idolatry of talent enters, then farewell to spirituality; when men ask their teachers, not for that which will make them most humble and god-like, but for the excitement of an intellectual banquet, then farewell to Christian progress. Here also St. Paul stood firm. Not wisdom, but Christ crucified. St. Paul might have complied with these requirements of his converts, and then he would have gained admiration and love; he would have been the leader of a party, but he would have been false to the Master—he would have been preferring self to Christ.

A LONDON FOG.—A London paper says: "On Wednesday afternoon, when London and the suburbs were enveloped in a dense fog, Mr. Coxwell made a balloon ascent from the Horsey gas works. The ascent took place at 2.40, when the atmosphere was clear. Soon after three o'clock the fog extended exactly in the direction the balloon was traveling, and presented a strongly defined line of vapor, stretching for miles in an easterly direction. The formation of this fog, as witnessed by Mr. Coxwell from his balloon car, was, we hear, one of the most interesting occurrences in the adventurous life of the experienced aeronaut, and will, no doubt, be fully described. Over the forest, near Woodford, Mr. Coxwell and his companion were unable to see the earth at a height of only fifty feet, and it was only by the aid of a rope trailing on the ground that a level course could be regulated so as to select an open spot on which to alight. While holding a conversation with some men who were following the balloon, and could only hear the rustling of a rope among the bushes and trees, the aeronauts were supposed to be poachers. Keepers, who were in close pursuit, rushed upon the strangers, when Mr. Coxwell cast his grapple in a hedge, and great was their surprise when they discovered what kind of a net and cordage it was trailing over the park. So dense was the fog that the balloon could not be seen, and the voyagers were supposed to be running along the ground; although Mr. Coxwell proclaimed his balloon, but this was thought to be a ruse to draw off the keeper's attention.

FEW DRUNKARDS' REFORM.—Facts show that of the vast army of the intemperate—of the five hundred thousand in our land, who are wending their way toward a drunkard's doom, comparatively few are reformed—only here and there one is saved. The deceptive power of appetite and habit, like some evil spirit, blindfolds its captives, leading them speedily on to ruin. Companions in dissipation encourage and embolden one another, and present an united front against saving influence. Together they drown the voices of admonition in the cup, together they cheer the way of death with songs of revelry, and fortify their hearts against God and salvation by ridicule of true and serious things. Thus they are held fast under bonds of iniquity. The mother sees her son in the path of the destroyer, and goes after him with prayers and pleading tears, but alas, the bonds of sin have already grown too strong for the ties of filial affection. The son revels on, though he knows he is smirching her the cup of unutterable anguish. The sister's gentle and tender entreaties are added, but only to be spurned for the cup of intoxication. With all her blessed ministrations she cannot lead him back to life.

GROUND OF HOPE.—What is the foundation of the Christian's hope? Not innate moral excellence; not enlarged and critical knowledge of the sacred text; not punctual discharge of relative duties; not diligent use of the ordinances of religion; not sacraments, nor fastings, nor prayer, nor almsgiving; not forced progress in the way of holiness; not past excitement, nor present peace and enlargement of heart; nor visions, nor graces, nor expediences—these do not constitute the foundations of Christian hope. Of some of these his judgment is that of Paul: "What things were gain to me those I counted less for Christ." Of others he makes the lawful, the scriptural, the believing use; while the language of his unfeigned self-remembrance ever is: "Lead me to the rock that is higher than I." That rock is Christ. To expand the ideas condensed in that one word, "Christ," the foundation of the Christian's hope is the promise of Jehovah, recorded in his word, confirmed by his oath, ratified by the blood of the everlasting covenant, evidenced by the resurrection, and revealed by the hearts of his chosen—by the Spirit of his grace.—*Bishop of Carlisle.*

BOOKLESS HOUSES.—We form judgments of men from little things about their houses of which the owners perhaps never think. Give us a house furnished with books rather than furniture. Both if you can; but books at any rate. Books are the windows through which the soul looks out. A house without them is like a room without windows. Let us pity those poor rich men who live barrenly in great bookless houses. Let us congratulate the poor that, in our day, books are so cheap that a man may every year add a hundred volumes to his library for the price of what his tobacco and his beer would cost him. *Episcopalian.*

BURTON has said: "The style is the man." The prayer also is the man—the inner man. It is the *Evee Homo*, uttered not to the Jews, but to God.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, JANUARY 29, 1870.

OFFICE—No. 42 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. O. KEENER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:
REV. J. H. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS.

FOR MONTGOMERY CONFERENCE:
REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:
REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:
REV. J. O. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

NEW VOLUME.

The year slipped away so rapidly that we had gone past the last number of the last year before we knew it. We have passed the center without a jar, and turned out into the stream for another trip. We wish to keep on a good head of steam, and to secure this must have plenty of fuel. That this craft shall not be surpassed by any in speed, regularity and accommodation will be the care of its editors and agents.

CRAPS STREET GERMAN CHURCH.

This beautiful house was duly dedicated, on Sabbath last, by Bishop H. N. McTyeire. The afternoon was stormy, and the rain fell in torrents while the congregation was on the way to church and during the whole time of the service. We were surprised and somewhat sorry to see the house well filled with people. They were there, but not of the giving sort; and at a church dedication we can dispense with all who go to see and hear, but not to give—that is, if a balance of indebtedness to the builder remains. We needed only \$500; raised but \$200. Captain Robertson thought he could venture a little, and went these few hundred dollars over cash in hand, calculating on the collection at the dedication. Now he is left in the lurch. This \$300, which the congregation ought to have given, but did not, we hope our friends will make up by handing what they would have given, if present, to the captain. Our people should go down to the corner of Craps and Music streets and see this house, and they will then be able to appreciate the amount of labor and anxiety which have been expended to produce the result. It is like getting another piece of heavy ordnance into position to build such a house for Southern Methodism. The German field is enlarging hourly in the South, and will prove a source of great strength to us if we fully occupy it and hold the advantage which we now have. If we had made a good collection, we should have enlarged upon the proportions and excellent parts of this house with some spirit. But it is enough to say that it is finished up like everything the captain undertakes. It is solid and neat—a credit to him, to those who have given toward its erection, and to the preacher. It measures about eighty by forty-two, with a basement story, and a spire one hundred and twenty feet high. Long after we are all dead this house will be a comfort and strength to God's people.

THE LOUISIANA CONFERENCE.

MONDAY.

In the election of delegates thirty-five ministers voted and seven lay members. It was a somewhat severe illustration of the new system, as but four lay votes were necessary to elect three members to the General Conference. Of the seven laymen present, three were from the Shreveport district, one from the Lake Providence, two from the Onachita, and one from the Opelousas. Life is either too short or our brethren too busy to leave their farms and merchandise to attend this feast of the King.

An admirable report upon the Sabbath school interest was read by the chairman, and the following resolutions upon this subject were passed:

Resolved, That we request our approaching General Conference more clearly to define the true relation of the pastor to the Sabbath school.

Resolved, That we request our approaching General Conference to enact such laws as will authorize the preachers in charge to nominate, and the Quarterly Conferences to elect or reject, as the case may be, the superintendents of the Sabbath schools.

The chairman of the Committee on Ministerial Support declared a dividend of seventy-six per cent. for the widows, orphans and superannuates upon their claims. The Bishops' support was brought up to only seventy-three per cent. of the amount due them. That these two collections should ever fall one cent below the full amount due by the church should be, and doubtless is, to all godly men a matter of deep mortification. The support of these widows and orphans should be only a little less dear to a good Methodist than the support of his own family.

TUESDAY MORNING.

Bishop McTyeire this morning led off in a very important analysis of the year's work. The secretary called out the membership, etc., of each circuit and station for the year, while the president held in his hand a copy of the Minutes of last year, and compared the one with the other. The preacher in charge came up in the shape of what he had been doing, and had the satisfaction of seeing an accurate reflection of himself in the glass of his own statistics. There was no escaping in the fog of a session, nor in the mere print of a pamphlet that but few people read. The concentrated attention of the entire Conference had the effect of a fifteen-inch lens in enlarging the field of one's vision in the open region of ministerial responsibility. There was an increase of seven hundred and sixty-three colored members, of eight hundred children in Sabbath schools, and of two hundred children added from the schools to the church.

The report of the Committee on Education was encouraging. The Conference is well up in its schools, male and female. The Mansfield Female College has a career before it, as it has a history, of great usefulness to our church in Louisiana. Homer College is out of debt, excepting a few hundred dollars, and is most admirably located. The election of President Cobb will inspire it with additional life. It begins its session the first week in February. The Conference rallies with all its strength to the repair and full equipment of Centenary. The resolution passed promises to aid, by collections and otherwise, its representative whenever he may appear at the stations or on the circuits. Pierce and Paine College has suffered from the general financial debility of the region in which it is located, but is out of debt, and is in a growing part of the State. If the pine and oak lands there are offered at fair rates a part of the stream of immigration will turn that way. A great deal depends, at this formative period, upon the liberality and enterprise of a neighborhood—whether it invites or repels those who are seeking for cheap lands with churches and schools. We doubt not that it would pay the owners to give away one-half of the wild lands of west Louisiana. The rich bottom land within striking distance of Pleasant Hill is an item

to be reckoned in the future of Pierce and Paine College.

Among the visitors who took leave to-day are Father Thomas Sanford—full of age and the mature graces of a life spent in the service of the Master—and Dr. McKenzie, of the Trinity Conference, the most successful as well as the most experienced and venerable teacher of Texas. He has learned to grow gray without growing old.

Thanks were offered to the officers of the various steamboats that so kindly offered to bring the preachers to Shreveport for half fare, to wit: The Kous's line, the Selma, the Era No. 9, the Lulu D., the Post Boy, the Bradish Johnson, the Jennie Howell and the Texas. [The preachers who went up on the Era No. 9 speak in high terms of the generous and polite attentions received from the officers of that boat. We can say fully as much for the gentlemen who command the Jennie Howell. Those who came down on the Bradish Johnson have published a card of thanks in the *Picayune*.]

We had now passed through one week of entertainment at the house of Colonel Battle, and were fully prepared to judge of the hospitality of the households of Shreveport. For the first few days the brethren were fairly "stalled" with the abundance of good cheer on every side, until they learned presently that they were not obliged to eat everything that was set before them, for conscience sake. Then they rallied surprisingly, and we confess that we never saw a larger capacity for creature comforts, such as turkey, celery and oyster pie, not to mention pastry, cakes, custards and whipped cream; nor a more complete satisfaction than these roving sons of Asbury realized every twenty-four hours. It filled up one's war idea of a "square meal." They ought to go in the strength of such eating many days. By a rising vote we thanked those noble ladies and princely friends, who had ministered to our wants as grandly as ever "Joanna, the wife of Chuza, Herod's steward, and Susanna" did to the Master.

The church at Shreveport has been enlarged and repaired the past year, and paid for. Now the ladies have in hand the buying or the building of a parsonage, and from what they have already done, and the idea which we have received of their devotion to the church and of their influence in this community, we expect to hear shortly not merely that they have secured a parsonage, but a very convenient and proper parsonage, such as will do credit to the station, and have weight with the Bishop whenever he is deciding upon a preacher for Shreveport.

This is a place of much thrift. The railroad going out from this point westward infuses life into every department of business, and when the strip of country between the Red river and the Onachita is overcome, and the Vicksburg and Monroe road reaches to Shreveport, it will be one of the large cities of the South. For fifteen hundred miles the Red river pours its way down through fertile territory to this place, and for the last seven hundred is navigable. From here it makes its way by tortuous windings, over lands of exhaustless strength, for five or six hundred miles further, to the Mississippi, reaching it two hundred above the city of New Orleans. One hundred thousand bales of cotton will be sent forward from this port this season, and not a little of this yield will have been sold and the proceeds realized here.

The time at last came when even "resolutions" ceased. The Bishop held the east of the next year's work in his hand. Every heart felt its own beating, and thought of the dearer pulses at home which throbbed in unison. Then came the prelude—a manly statement from the Bishop of the imperfection of human judgment, but of the true, high and impartial purpose which had guided and controlled him in framing the appointments of the preachers. He quoted many apt passages of God's word; after which, with an earnest sympathy for his brethren, he read out as follows:

APPOINTMENTS.

NEW ORLEANS DISTRICT.—J. C. Keener, P. E. Carondelet street, J. B. Walker, J. B. Walker, L. B. Parker; Moreau street, Thomas B. White; Dryades street (German), J. B. A. Alrons; Crapstree (German), John A. G. Rabe; Lafayette (German), P. Barth; Jefferson City, P. M. Goodwyn; Algiers, Joseph G. Miller; New Orleans circuit, James A. Ivey; Thibodaux circuit, James L. Wright; Baton Rouge, James L. Chapman; Plaquemine and Grosse Tete, to be supplied; colored charges, to be supplied; Publishing House, New Orleans, Robert J. Harp, agent; professor of Blind Asylum at Baton Rouge, Patrick Lane.

OPLOUSAS DISTRICT.—J. D. Adams, P. E. Opelousas, William C. Haislip; Washington, to be supplied by Gilbert Guillet; Plaquemine, to be supplied by C. A. Frazier; Vermilion and Bellevue, B. F. White; Abbeville, J. V. Pointer; New Iberia, A. E. Goodwyn; Franklin and Pattersonville, Reynolds S. Trippett; Grand Cheniere, S. J. Graves; Lake Charles, to be supplied; New Iberia colored work, to be supplied by William Butler.

ALEXANDRIA DISTRICT.—J. F. Marshall, P. E. Alexandria, J. F. Marshall; Rapides, to be supplied; Harrisonburg and Sicily Island, J. H. Stone; Evergreen and Big Cane, to be supplied; Atlanta, J. F. Wynn; Spring Creek, Fred. White; Centerville and Trinity, E. W. Yancey; Columbia, John S. Davis; Simsport, to be supplied; Calcasieu, to be supplied by J. A. Monroe; Rapides colored charge, to be supplied.

SHREVEPORT DIST.—John Pipes, P. E. Shreveport, John Wilkinson; Mooringsport, James M. McKee; Greenwood, Baxter Clegg; W. E. Doty, sup.; Keachie, W. H. Moss; Mansfield, M. C. Manly; Pleasant Hill and Manny, James M. Franklin; Natchitoches, to be supplied by T. S. Collier; Springville, Jesse Fulton; Anacoco, R. H. Adair; Coushatta colored charge, to be supplied by Willis Cottonella; Greenwood colored charge, to be supplied; Keachie colored charge, to be supplied by Jack McKee; De Soto colored charge, to be supplied by Joshua Jackson; Pleasant Hill colored charge, to be supplied.

ONACHITA DIST.—S. Armstrong, P. E. Onachita, Robert T. Parrish; Monroe and Trenton, Charles F. Evans; J. L. Bordon; Sparta, R. M. Crowson; Lake Bisteau, W. P. Kimball; Farmerville, Robert Randle; Vernon, Thomas H. McClelland; Castor, Alanson W. Moore; Louisville, James W. Medlock; Mt. Lebanon, to be supplied by N. M. Skipworth; Minden, N. A. Cravens; North Bossier, H. O. White; South Bossier, Samuel S. Scott; Homer, T. J. Upton; Haynesville, John A. Miller; Arizona colored charge, to be supplied by Stokes Steele; Minden colored charge, to be supplied by Elijah Powell; Mount Lebanon colored charge, to be supplied by Jennyns Hampton; Homer colored charge, to be supplied by Americas Ross; president of Homer College, James E. Cobb.

LAKE PROVIDENCE DISTRICT.—B. F. Alexander, P. E. Lake Providence, John C. Reed; Waterproof, P. H. Diefenweirth; Floyd and Delhi, James E. Bradley; Carroll, William G. McGaughey; Winnsboro, F. T. Rawson; Richland, to be supplied by J. H. Bonit; Bastrop, C. W. Carter; Linn Grove, Joel T. Daves; Oak Ridge colored charge, to be supplied by Warren Williams; Bastrop colored charge, to be supplied by Cyrus Alexander; Tensas colored charge, to be supplied by William Banks; agent Southwestern Bible Society, B. F. Alexander.

TRANSFERRED.—John A. Pauley, stationed at German church in Houston; W. D. Stayton; to Memphis Conference.

SUPERANNUATES.—Thos. Samford, Joel Sanders, H. C. Thweatt, Chas. Hallberg.

NEXT PLACE OF MEETING.—The Louisiana Conference meets next year in New Orleans.

NEW ADVERTISEMENT.

The Mechanics and Agricultural Fair Association of Louisiana advertise the opening of the fair on the twenty-third of April next, in New Orleans, to be continued for nine days. We hope the fair will not be turned into a race course, and that judges will be appointed who have themselves nothing on exhibition. From some cause the fair last year was a comparative failure. It would be well to ascertain if the people of New Orleans do not prefer a fair to a race.

Honest industry is always rewarded. No young man need complain of being kept poor if he rolls up his sleeves and goes cheerfully to work.

Religion is not an art, a matter of dexterity and skill, but a new nature.

CHARLES WATERS.

With deep regret we announce the death of Brother Charles Waters, a member of our church in this city. Brother Waters has long been a member of the Methodist Church, and in Baltimore and New Orleans, when in the enjoyment of health, was one of the active, living members on whom the church could rely for work or aid in its hour of need. He had long been a sufferer, but bore his afflictions with Christian fortitude. We called to see him the day before his departure. He was calm and confident. Death had no terrors. While we engaged with him in prayer he fervently responded, and gave us, on parting, a charge we shall never forget. May God bless and support his afflicted family!

We copy the above from the *Texas Christian Advocate*, and would add our testimony in memory of our dear friend and brother. He was of those who constitute the best staple of a Methodist church. He loved the church of Christ as if it were a part of himself. He sustained its ministers with a true sympathy, and to the utmost of his influence and ability. He filled the difficult post of steward as long as he was with us. The Felicity street church was the place where he was to be seen every Sabbath for long years, prominent among its official members. He was always a hard worker—"diligent in business"—and was often "fervent in spirit."

In common with most men in mercantile life, he passed through the trying extremes of success and failure, but in either condition lived by faith—his business perplexities did not lead him away from Christ. How delightful now is it to contemplate this part of his career! He did not cast away his confidence in his Lord. And in the great end of life he made no failure. God mercifully placed a period of affliction between the bustle of the market and the hour for meeting his righteous Judge, and we doubt not therein his soul learned more perfectly the sufferings of Christ and the power of his resurrection. Many friends revere his memory.

RICHMOND CHRISTIAN ADVOCATE

This important journal has received new form and new life, and if the publishers would only consent to buy a good article of paper it would be one of the most welcome and attractive visitors to this office. We are not surprised that Dr. Lee has returned to his former occupation; in fact we have observed that if a man ever once edits a paper he fancies that calling until death. It is pleasant to see the old editor back again in his accustomed seat, and to hear him indulging in just a little self-congratulation.

For eleven years, twice told, we sat in that old chair—sat and thought, and talked and wrote. What a mass, aye, and for the matter of it, what a mess, we wrote in those working years. How its incidents and events, its imaginings and realities, the old things, the old controversies, and the old familiar names and faces rush upon our recollection as we sit down again among the old papers and by the old desk, to resume the old work. We lived in the old chair—sat in it so much, and for so long, that when we left it we had metaphorically to learn how to walk, i. e., if much of it had to be done. Then we were the oldest editor, not perhaps in age, but in length of service, in the church. Now we are the youngest—as one just born, only a week old, standing, hat in hand, at the entrance of the great public reading room, anxious to bow ourselves gracefully into the august presence of the assembled wisdom of the world of letters; but fearing lest our limbs may have grown stiff, and our right hand have forgotten its cunning, as Time, self-willed old man that he is, has insisted on our keeping pace with him in his rush through the by-rolling years. He refuses to wait, and seems always in a hurry to go by. He'll have to use pinners the next time he tries to drag us by the foretop.

One who can write that way brings to his work something more than graceful art, and we warmly congratulate the Virginia Conference upon the positive accession of strength which it has given to Methodist journalism by returning Dr. Lee to the editorial department of the *Advocate*. Just at this point we need all the armor and all the power that Southern Methodism can command. Our people need to be

herded, instructed, encouraged and defended; and brave, intelligent and true men are required now, if ever, at every rallying center of our church.

NEW PUBLICATIONS.

THE ATLANTIC MONTHLY FOR FEBRUARY.—Contents: Joseph and Friend, number two; Rhyme Stayeth Shame; The Pressure upon Congress; Quail; Winter Woods; The Value of Accident; Father Merriell's Bell; Risk; The Street Cries of New York; Among the Isles of Shoals, number three; The Way to Sing; Life in the Brick Moon; We Lee and his Kinsfolks; Edwin M. Stanton; Reviews and Literary Notices.

THE METHODIST QUARTERLY REVIEW, JANUARY, 1870.—Contents: Ernest Renan; On the Power of Mind over Nature; Holy Scripture as an Educational Instrument; The Bible Better than the Eucumene; Council; The Twenty-second Psalm; Inspiration of all Scripture; Foreign Religious Intelligence; Foreign Literary Intelligence; Quarterly Book Table, etc. This review contains the best thinking of the Methodist Episcopal Church. This number is quick in its book notices. The editor, an original thinker, is struggling with an atmosphere of fanaticism which is around him, but of which he still breathes deeply. He thinks that his soul goes out after stray brethren of the South, which indeed he does, but with a whip in hand: "Heaven bless you, dear souls, gentlemen of the Church South, we do not propose remission because we need you." * * * She (his church) meant what you little deserve in hearty good faith. Bring when you put on airs, and bring charges and prescribe conditions, if you were the purists and the querulous, you are simply giving evidence to the world that harmony is not your purpose." It is very true, we might reply, that we do not need you, nor ever will, but we should some day desire to be consumed, scattered and squandered. We are not "putting on airs," we are "simply giving evidence" that we do not wish to be swallowed. We have not lost sight of the fact that you, and not we, are the "querulous"; for it is exactly in that character we regard you, and you regard yourselves—ecclesiastical form, political in fact. "We are 'purists,' for we pay no attention to your words, but to your actions. That 'harmony' is truly not a purpose which may only be secured by the embrace of death.

To the Friends of Temperance in Mississippi.

Having been commissioned by the president of the Supreme Council of Friends of Temperance district vice president for the State of Mississippi, I earnestly exhort the friends of the cause of temperance to organize at once against the fell destroyer.

Applications for charter may be addressed directly, or through me to Rev. W. B. Wellins, secretary, Suffolk, Virginia, enclosing for charter fee \$5; for books, rituals, etc. Send to me by express, pre-paid. I have just received several charters and a number of rituals and will respond promptly to applications. We propose to organize a State council as soon as practicable. Applications for charter must be signed by at least eight persons. Address me at Brookhaven, Mississippi. L. R. REDDING, D. V. P. F. I.

MOREHOUSE CONSERVATIVE.—This is the only paper in that parish. It is published and ably edited by Rev. Joel T. Daves, and is a most excellent advertising medium for merchants who wish to bring their business before that part of the State. In size it is nearly as large as the *Advocate*. Price, \$3 a year. Address the publisher at Bastrop, La.

THERE is a voice from the dead sweeter than song; there is a remembrance of the dead to which we turn, even from the charm of the living.

To have a good opinion of yourself, think, if you were rich, how much you would give away.

The Child's Corner.

THE LITTLE OLD CRADLE.

BY M. H. K.

Neath the little shingles brown,
Where the light steals softly down;
Drifting o'er the rafters old,
Long, thin lines of trembling gold.
There the little cradle stands,
Silent as the silent hands,
That have swayed it to and fro,
In the summers long ago.

Days have come and days have gone,
Till we count, by years, their dawn;
And the little forms it held,
The strong ranks of men have swelled.
Here bright eyes first saw the light,
Breaking on their startled sight;
Little hands here first unfolded,
Little feet here first reposed.

From it, stumbling and afraid,
Life's first pilgrimage was made.
O'er it fell a mother's tears,
Mother's hopes and dreams and fears.
Here her castles in the air
Reared their fabrics, frail and fair,
As she watched with loving eyes,
Crowning bird-like lullabies.

Spring's first birds and soft perfume;
Summer's leaves and perfect bloom;
Autumn's skies that cloudless glow;
Winter's fleecy deeps of snow,
Smile upon us and pass by;
So the years unnoted fly,
Till at last the baby's hands
Execute a man's commands.

Life calls to them: "Here am I;
Put the foolish playthings by;
Toys for children—deeds for men;
Haste! I come not back again."
And they listen and obey;
Put the childish things away;
Tolling with undaunted soul,
Till they reach life's promised goal.

Then the tired feet lagging go,
And the hands are working slow,
Till the earth, in dreamless rest,
Folds each tired child to her breast.
By this cradle, quaint and old,
This one truth is sadly told:
What'er future waits, at last,
Lies behind us but one past.

—Little Corporal.

HONESTY THE BEST POLIOY.

One day the Duke of Buccleuch, a Scotch nobleman, bought a cow in the neighborhood of Dalkeith, where he lived. The cow was to be sent home the next morning. Early in the morning the duke was taking a walk in a very common dress. As he went along he saw a boy trying in vain to drive the cow to his residence. The cow was very unruly, and the poor boy could not get on with her at all. The boy, not knowing the duke, bawled out to him in broad Scotch accent:

"He, man, come here, and gie's a han' wi' this beast."

The duke walked slowly on, not seeming to notice the boy, who still kept calling for his help. At last, finding he could not get on with the cow, he cried out in distress:—"Come here, man, and as sure as anything I see ye half I get."

The duke went and lent a helping hand. "And now," said the duke, as they trudged along after the cow, "how much do you think you will get for the job?"

"I dinna ken," said the boy; "but I'm sure o' something, for the folks at the big house are guid to a' bodies."

As they came to a lane near the house the duke slipped away from the boy, and entered by a different way. Calling his butler, he put a sovereign in his hand, saying:—"Give that to the boy who has brought the cow."

He then returned to the end of the lane where he had parted from the boy, so as to meet him on his way back.

"Well, how much did you get?" asked the duke.

"A shilling," said the boy; "and there's half o' it to ye."

"But surely you had more than a shilling," said the duke.

"No," said the boy; "sure that's a' I got; and d'ye no think it's plenty?"

"I do not," said the duke; "there must be some mistake; and as I am acquainted with the duke, if you return I think I'll get you more."

They went back. The duke rang the bell and ordered all the servants to be assembled.

"Now," said the duke to the boy, "point me out the person who gave you the shilling."

"It was that chap there with the apron," said he, pointing to the butler.

The butler fell on his knees, confessed his fault and begged to be forgiven; but the duke indignantly ordered him to give the boy the sovereign and quit his service immediately.

"You have lost," said the duke, "your money, your situation and your character by your deceitfulness. Learn, for the future, that honesty is the best policy."

The boy now found out who it was that helped him drive the cow; and the duke was so pleased with the manliness and honesty of the boy that he sent him to school; and provided for him at his own expense.—*The Children's Friend.*

A fair reproach is better than smooth deceit.

The Farm and Garden.

MILKING WITH DRY HANDS.—I believe that much of the milk gets tainted with noxious or bad odors before it reaches the pail. Some persons, and help especially, have a habit of wetting their fingers with the milk once in a while, and then wetting the cow's teats, as they say, to make them milk easier. Now this wetting process causes much foul stuff to drop from their hands or the teats into the pail while milking. This is all wrong—cows can be milked as easy with dry hands as wet ones. I have been in the habit of milking cows; and although I have met with some hard milkers that require their teats to be softened in order to draw the milk, I have generally found it both easier and pleasanter to milk with dry hands. If the teats are dirty the udder should be washed with tepid water, allowed to dry before milking; and if the teats are very hard and tough to draw the cow had better be turned into beef, or kept to raise calves from. It is just as easy to make good, sweet, clean butter, as to make poor butter. The best of butter is made from sweet cream gathered as free from milk as possible. To make good butter requires more than ordinary care and attention. Everything should move on with the regularity of the sun. To make butter profitable great care must be exercised in milking the cows. To milk clean is important. It not only adds to the quantity of butter, but saves the cow from positive injury. Let a farmer or his dairy get the reputation of keeping a good article of butter in every respect, and he will find it not only to pay, but to pay well too.—*Correspondent of Practical Farmer.*

WHY PORK SHRINKS IN THE POT.—An old farmer gives in the *Homeside* the various notions on this question, and closes with his own views on the subject, which we condense below for our readers: "Store hogs kept low in flesh in summer and autumn, and then fully fed when shut up for fattening, will gain fast, appear to be doing well, and look well when dressed, but will weigh light, and boiling will prove the flesh to be puffy. The little cells, of which the meat seems to be composed, are filled with gelatinous matter, which has not had time to become hard and firm—it is partly soluble in boiling water; hence pork shrinks in the pot. The same kind of pork results from feeding mostly on animal food, as a slaughter house, and from irregular feeding, or from killing hogs when in heat. To produce pork that will not shrink in the pot the writer says he first has a good breed; they are never allowed to fall off in good condition from the start they get with their mother's milk, and never know stint or stint while alive. Early in autumn he takes them up in high order, and begins to fatten them, increasing their rations of grain till they are fat and ready to kill. Then he feeds them one week more, and makes due preparations for butchering, which is done early in the day by good hands. When thoroughly cooled, cuts up and salts down (not allowing his pork to freeze), using plenty of the best salt, and filling up the barrels with brine, and not with water, as some do. This method secures pork white, firm, compact and almost as solid as marble, which, when well cooked, will be tender, juicy, melting and delicious, never shrinking in the pot."

EGG-PLANTS AND TOMATOES.—Every person can raise his own egg-plants and tomatoes with very little trouble. Select a warm border, enrich heavily with horse manure, pulverize the ground and sow pretty thickly, thinning out if necessary. A common window sash or two, raised two or three inches over them, on any kind of supports, will greatly facilitate their vegetation and growth. If they are transplanted into other beds when three or four inches high, so that they shall stand about three inches apart each way, it will cause them to become very stout in the stem, and they will branch considerably, making much stronger and more productive plants. Tomatoes should not be set out for a crop until the ground is warm and weather settled, say the last of April or the first of May, the latter perhaps the better. Egg-plants should never be set out before the last week in May. We prefer the long purple egg-plant, and the Piquito tomato, though many other excellent varieties of the tomato are now introduced, some of which it would be well to cultivate also. Not a day should be lost in getting in the seed.

WOODEN SHOES FOR HORSES.—The Milwaukee *Sentinel* tells the following: Henry Luobring is one of the wealthiest farmers in the county. He owns a well cultivated farm of four hundred and fifty acres, which, under superior management, yields him a handsome income. His land embraces a large tract of meadow land, with bottom of very yielding and unreliable nature, which, through his ingenuity, is also work-

ed to advantage. During the haying season he straps large wooden shoes to his horses' feet, and by means of a wagon, whose tires are five inches wide, manages to haul a ton at a time, where, under ordinary circumstances, he would be unable to secure half that amount. The horses, it is said, manifest no dislike to their novel foot gear.

AN EXCHANGE gives the following sensible directions for driving young horses: "In teaching a young horse to drive well do not hurry to see how fast he can trot. Keep each pace clear and distinct from the other—that is, in walking make him walk, and do not allow him to trot. While trotting be equally careful that he keeps steady at his pace, and do not allow him to slack into a walk. The reins, while driving, should be kept snug; and when pushed to the top of his speed keep him well in hand that he may learn to bear well upon the bit, so that when going at a high rate of speed he can be kept at his pace, but do not allow him to pull too hard, for it is not only unpleasant, but makes it often difficult to manage him."

UNCOMMON FLOUR.—Science threatens the extinguishment of "the dusty miller." A method has been discovered of making bread without grinding the grain, and a patent has been taken out for the process. In making bread from flour there is much waste; one hundred pounds of grain yielding only one hundred and twelve pounds of bread. By the new process the same amount of grain will produce one hundred and fifty pounds of bread. Moreover, the decomposed and lost gluten in the old process is preserved in the new.

Scientific.

THE MANATEE: THE HUMAN FISH. To believers in the Darwin theory it will be of interest to know that in the quiet bays and rivers on the eastern coast of Central and South America there lives an animal, which might be rightfully considered as the connecting link between men and fish. It is the manatee, the water siren, the sea calf or sea cow, as this strange animal is sometimes called. It belongs to the order of the Cetacea, and is altogether herbivorous: living on grass which grows under water, or on herbs which it seeks on shore.

The body is piseiform, and measures some fourteen or more feet in length; the skin being very thick, without hair, and of a dark color. The upper part of the body, especially of the females, much resembles that of a woman, the breasts being of the same form. In place of the fins of the ordinary fish the manatee has a short arm of only one joint, which terminates in a sort of hand, on which the nails are distinctly visible, and which the animal uses with much dexterity, in moving about when on land, and in carrying its young. This limb has caused this animal to be called manatee, from the Latin word *manus*, the hand.

The writer, who for several years resided in those countries where these animals abound, has seen the animal, and has been told repeatedly by the natives that the female holds her cub to suckle as the mother does her babe.

The tail of the manatee is shaped like an open fan, and the dense observer will perceive ten divisions, which mark the ten toes.

Manatees swim by the help of this broad tail, which moves up and down, and not from right to left like that of the fish. This limb, which at first sight appears to be a mere fin or nerve, melts almost entirely into butter when fried in a pan, and is highly prized by the natives for ointments and for other medicinal purposes.

The animal weighs from a thousand to fifteen hundred pounds, and the meat is considered a great delicacy. It looks and tastes much like pork, and needs a good deal of cooking. It is a strange fact that the flesh keeps longer from decay than any other, and it is therefore salted and preserved like pork.

They are caught with harpoons by the Indians who know their haunts and customs, and it seems as if they were becoming more scarce every year.

Much has been fabled about these water sirens that needs corroboration from scientific men, who seem to have taken but little interest in these strange animals. Some have assured me that their voice resembles the bellowing of an ox, others that it was perfect music. I am induced to believe the latter, as they are well known under the name of "sirenia," or "sirens," which appellation they could only derive from their charming voice. Whether this be so or not remains yet to be confirmed, like the harmonious song of the dying swan.—*Correspondent of Scientific American.*

CONDENSED FOOD.—Experiments have recently been made with satisfactory results to test the practicality of supplying the North German army and navy with compressed

or condensed food. The principal object was to ascertain the best means of furnishing the soldier in the field with a three days' stock of provisions reduced to a minimum of weight and bulk. It has been found that a sort of meat-bread is admirably adapted for this purpose, as it may either be eaten dry in the form of cakes or can be converted with very little trouble into soup. Similar attempts have been made to compress hay and other provender for horses.

We find the above item in a recent number of the *Evening Post*. The idea of using condensed food in the manner described was first patented in 1850, by Gail Borden, Jr., then a resident of Galveston, Texas, since better known in connection with Borden's Condensed Milk, an article of large consumption in this and other cities. Mr. Borden has devoted a great deal of attention to the preparation of condensed food, and may be regarded as the pioneer in that branch. His patent of 1850 consisted in the concentrated extract of alimentary animal substances, combined with the vegetable flour and meal, made into cakes and baked into bread, and was readily converted into a wholesome food.—*Scientific American.*

FIVE HUNDRED POUNDS of manganate of soda will furnish two and a half cubic yards of oxygen every hour. The material is placed in a retort, and superheated steam passed over it. In five minutes all the oxygen is extracted from this quantity of the salt. Then hot air passed over it again for five minutes more restores an equal amount of oxygen. By thus alternating steam and hot air, making six extracts and six reoxidations in an hour, the two and a half cubic yards of oxygen are obtained. It contains, however, about fifteen per cent. of nitrogen, unless care be taken to reject what first comes off—when the adulteration may be reduced to two and a half per cent. In this way one ton of the manganate of soda can be made to produce thirty-six thousand cubic yards of oxygen in a year, without any renewal of the salt.—*Scientific American.*

THE OLDEST HOUSE.—The old stone house in Guilford, Connecticut—the oldest one on the continent—built in 1640 for a fort, where all the inhabitants in the town gathered every night to be secure from the Indians, is undergoing extensive repairs, the original model, however, being carefully retained.

LIFE INSURANCE.

THE HOME INSTITUTION.

LOUISIANA EQUITABLE

LIFE INSURANCE COMPANY.

Capital, \$500,000.

Office: NO. 142 CANAL ST., NEW ORLEANS.

Directors: John Pemberton, W. S. Pike, E. A. Tyler, J. W. Stone, C. H. Slocomb, A. Thompson, F. Delboudie, Phillip Meyer, George A. Fosdick, Marshall J. Smith, Edward Rigay, W. B. Schuadt, Alex. Marks, C. E. Grandey, Edward Barnett.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, containing all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre piece, all of which have been covered by Letters Patent, and are not to be found in any other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS.

The Extended Back with cast iron Enamelled Reservoir and Facet, Tin Warming Chamber, Griddle Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove, the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR BITUMINOUS COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1863.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Cook Stoves are so numerous, and so patent to every sensible observer, that it is not necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,

62 Camp street.

Sole Agent for States of La. and Texas.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES

is made of a superior quality of iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the cost of a new Stove.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Wiley:

The Philanthropist.

A first class Cooking Stove, having all the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pan. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charley Oak, True Kentuckian, Mild of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPBELL,

mols 6m 133 Poydras st., New Orleans.

THE CHARTER OAK COOKING STOVE.

From and after this date I shall keep a full stock of the celebrated

CHARTER OAK COOKING STOVES,

so universally approved by all housekeepers, and by special arrangement will be able to fill all orders as low as they can be had.

Orders for this celebrated Cooking Stove solicited, and satisfaction guaranteed.

G. W. W. GOODWYN,

62 Camp street, New Orleans.

The Christian Advocate.

SATURDAY, JANUARY 29, 1870.

MINING UNDER THE SEA.—There is a vast copper mine in England, where shafts extend many hundred yards under the sea. The moaning of the waves as they dash against the rocks is forever sounding in those gloomy aisles. When the storms come the sound of the waters becomes so terrific that even the boldest miners cannot stay below, but leave their work and come out upon earth. Overhead are masses of bright copper streaming through the gallery in all directions, traversed by a network of thin red veins of iron, and over all the salt water drips, drips down from tiny crevices of the rock. Immense wealth of metal is contained in these roofs, but no miner dares give it another stroke with his pickaxe. Already there has been one day's work too much upon it, as a huge wedge of wood driven into the rocks bears witness. The wedge is all that keeps back the sea from bursting in upon them. Yet there are three tiers of galleries where men work day by day, not knowing but at some fatal hour the flood may be upon them, rendering all escape as hopeless as in the days of Noah. The awe-stricken visitor hurries away from the scene with a heart appalled in view of the hourly dangers.

QUININE.—Quinine is produced from a forest tree in South America, known as the Chinchona, of which there are many varieties, but the Chinchona canayana and Chinchona rubra yield the medicine in greatest abundance. So great has been the demand that in most of the districts whence it has been obtained the supplies are gradually diminishing, and as no substitute is likely to be found, it is of the utmost importance that new sources should be discovered. In Jamaica the Chinchona rubra has been cultivated sufficiently to show that it will grow well on that island, and the government is urged to encourage and assist in its cultivation on an extended scale. It seems, however, that only upon mountains one thousand feet high, where the forests are often bedewed with mists, does this tree arrive at a perfection that will make its cultivation profitable; but there are several sections in the island which will answer the requirements. Besides, there are other islands in this quarter of the world where similar conditions prevail, and if the efforts are made the world's supply of quinine may continue unexhausted.

REACH THE MASSES.—Would you reach the masses with the gospel? Then let ministers "preach the word, in season, out of season," plainly, attractively, and with divine motion; watch for the impression which the word preached makes, and deepen the impression by pastoral visits and pertinent conversation. Let professed Christians go out among those who do not attend church, take an interest in them, secure their good will by deeds of kindness, and prevail upon them to come to the sanctuary; gather the children of the poor and neglected into the Sabbath school, make it an inviting place for them, win their hearts lead them to Jesus, and then use them as instruments by which to reach and save their parents. Much may be done by a judicious system of tract distribution, nipping out parasites into districts, calling monthly upon every family therein, leaving their religious state and learning with them a tract appropriate to their peculiar necessities. Pray frequently and fervently that the blessing of God will attend these efforts, that his word and grace may be glorified in the salvation of those who are ready to perish.

THE POPE'S STOCKINGS.—In the "Almanach des Fideles Anis de Pie IX" is the following pretty story: "A lad of sixteen arrived lately at Rome, and eagerly petitioned for an audience with the pope. When it had been granted, and he found himself in the presence of his holiness, he made this simple speech: 'I had a swelling in my leg; the doctors told me I must have it cut off. A pious lady, just come from Rome, gave me a new but most successful remedy; it was a bit of one of your stockings. I applied it to the swelling, convinced that I should be restored to health, for our Saviour refuses nothing to his year. In a few days I was completely cured. I have come to thank you, and to enlist in your army.' The best part of the story is the pope's answer, who, it is well known, is afflicted with swellings of his legs. 'It is extraordinary,' said Pius the Ninth, 'that my stockings have cured you. They do not produce the same effect on me who wear them.'"

Death may remove from us the great and good, but the force of their actions still remains.

For Churches, Schools, Etc.
BLYNER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (and Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much.
Send for descriptive circular. Jail 1y

MEDICINE—MEDICINE.

BRAN NEW LETTERS!

FRESH TESTIMONIALS!

DARBY'S PROPHYLACTIC FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 28, 1869.
Messrs. J. Darby & Co., 161 William St., N. Y.—Gents: Yours of the 23d is before me, and has attracted. It gives me pleasure to say that my belief is that your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted, a skeleton by the effects of teething, and a affection of the bowels therewith. I had never seen any one reduced so low to recover.

Physic had been tried in vain, until the physicians stated it was useless. A friend recommended your Fluid, or Ozone, which he stated was one of the component parts of it. I did so, and the effect was like magic, plainly discernible in one hour in its good effects, producing quiet and sleep almost at once, where irritation and sleepless restlessness had previously possessed the child to nearly entire exhaustion.

I at first administered it in a small way, two and three drops in a spoonful of water, and increased it to six and ten drops. It completely checked the bowels, and had the happiest effect, the child rapidly recovering.

I have tried your Fluid on animals, with the same effect. Both horses and cows—bringing more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Cholera, Diarrhea, or any violent affection of the bowels.

I would not be without it in my family under any consideration. Yours truly,
WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Son, New York, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Paine, of the Methodist Episcopal Church South:

159 Broadway, N. Y., July 29, 1869.
Messrs. J. Darby & Co., 161 William St., N. Y.—Gents: About the 10th of June last one of my children was taken with Scarlet Fever, in its most malignant form, and as much as I could I procured your valuable disinfectant, Darby's Prophylactic Fluid. At about 11 o'clock I began using the Fluid, and by a free use of it the disease was not only arrested, but the child recovered.

During the use of the Fluid as a disinfectant in my family it was also tried in a case of headache and one of colic, the results in each case being instantaneous relief. It was afterwards tried in a case of Erysipelas, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Erysipelas in question, being located in the feet, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, to the utter disfigurement of said corn, for upon subsequent examination it had disappeared, and though it was sought for diligently, it could not be found.

I find you this, hoping it may be the means of relieving others of early and protracted test for themselves, as I did, the great merits of this great remedy.

Very respectfully yours,
FRANK SAUNDERS.

Never was a medicine so universally resented and extolled. It never fails. It may be depended on.

Every Druggist and Country Merchant keeps it. Manufactured only by

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Cottier Commercial Place, N. O.
Open day and evening the entire year.
Fellowship, Book-keeping, Mathematics and Languages are specially taught by experienced professors. Pupils from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for equal situations in business. Some from the country may obtain board in the family of the principal.
William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Terms: Ten to twenty per cent. less than other colleges in this city.
A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1841. For circulars, giving terms, etc., address
J. W. BLACKMAN,
sell 1y New Orleans.

METHUEN FEMALE COLLEGE.

TUSCALOOSA, ALABAMA.
Under the Patronage of the Mobile Conference.
The regular scholastic year will begin on the first Monday in October next, and end the last of June. It is divided into two terms of four and a half months each.
EXPENSES.
Primary department, per term \$20 00
College department, per term 25 00
Latin and Modern Languages, each 10 00
Music on Piano and Guitar 25 00
Use of Instrument 5 00
Drawing and Painting 20 to 25 00
Contingent fee 5 00
Board, including washing, lights and fuel, per month 22 00
Young ladies must furnish their own towels, sheets, pillow cases and table napkins. Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Itinerant students charged no tuition in the Literary Course.
Strict attention given in the manners and morals of the young ladies, and to their habits of study.
Refer to Dr. Keener.
For information address the President,
Jail 1y C. D. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE.

TUSKEGEE, MACON COUNTY, ALABAMA.
REV. GEO. W. F. PRICE, PRESIDENT.
1. Institution permanent and successful.
2. Full faculty of experienced teachers.
3. Music made a special feature.
4. Art taught thoroughly and cheaply.
5. Fine Scientific Apparatus in good order.
6. Boarding department, excellently kept.
7. Pupils under control of President.
8. Attention to health, manners, morals.
9. Vocal music gratuitously to all.
10. Languages taught, ancient and modern.
11. Particular care given to Primaries.
12. Object Lesson System adopted.
13. Discipline thorough and efficient.
14. Literary culture unsurpassed.
Music Department.—Dr. S. M. Bartlett, principal.—Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.
Boarding Department.—Capt. J. H. Pooser, steward; Mrs. E. R. Whitehurst, housekeeper.—The gentleman in charge of this department is late of Marietta, Florida, and is of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, table soap and lights. Fees for each term in advance. Four weeks make a scholastic month.
Next year begins September 15, 1869. Two terms, twenty weeks each.
CHARGES FOR YEAR OF FORTY WEEKS.
Primary department \$25 00
Academic department 40 00
College department 50 00
Music department 20 00
Art department 20 to 40 00
Languages, each 20 00
Diploma fee 5 00
Board per month, without lights 20 00
No incidental charges of any kind. Fees paid in advance. Total expense, without extras, about \$200.
REV. GEORGE W. F. PRICE,
Pres. Tuskegee Female College,
Jail 1y Tuskegee, Macon Co., Ala.

SHARON FEMALE COLLEGE.

SHARON, MADISON COUNTY, MISSISSIPPI.
will reopen on MONDAY, the 27th of September, under the presidency of
REV. J. M. PUGH, A. M.
The course of study is extensive and thorough, and no pains will be spared to give to the student a solid education.
Rates of tuition per session of ten months:
Primary division \$20 00
Preparatory department 40 00
College department 50 00
Contingent fee 5 00
Music at usual rates.
Board and tuition from \$16 to \$20. For further information address the President,
H. H. MONTGOMERY,
President of Board of Trustees.
NOTE.—My friends in the counties of Madison, Yazoo, Holmes, Carroll, Sunflower, Attala, Scott, Leake, Neshoba, Rankin, Hinds, and elsewhere, will please consider this notice as a personal application for their patronage, as it will be out of my power to pay them a special visit.
The daughters of the preachers of the Methodist Conference, and the orphans of deceased preachers, and also the orphans of deceased Masons, on application, shall have their tuition free of charge.
Jail 1y
J. M. PUGH, President.

WITWORTH FEMALE COLLEGE.

BROOKHAVEN, MISSISSIPPI.
will reopen SEPTEMBER 22, 1869. Provision will be made for all who apply for admission.
To send your daughter here will cost you \$200 for the term of ten months, or forty weeks. This amount will pay for board, fuel, lights, washing, tuition in English, English, French, German, Latin, and all the stationery and books of the school room. A deduction of \$50 will be made for ministers' daughters.
All the branches are taught. Our music teachers are believed to be unexcelled. Music and the Languages are extra.
Send for circular.
H. F. JOHNSON,
Jail 1y President.

MANSFIELD FEMALE COLLEGE.

Mansfield, De Soto parish, La.
OWNED BY THE LOUISIANA CONFERENCE.
The Fall Session of this institution, now entering upon the sixteenth year of its existence, will open on WEDNESDAY, the 20th day of September, with a corps of experienced teachers, and enlarged facilities of instruction.
Terms unchangeable. For catalogues, containing full particulars, address:
CHARLES H. STUART,
Jail 1y President.

SCHOOLS AND COLLEGES.

CENTENARY COLLEGE, JACKSON, LA.,
was established by the State of Louisiana in 1825, and transferred to the Methodist Episcopal Church South in 1845. It is now under the joint patronage of the Mississippi and Louisiana Conferences.
The College exercises were necessarily suspended during the war, but were regularly resumed, under reorganization, on the first Monday in October, 1865. The approaching session will open on the first Monday of October next.
Tuition, \$75 per annum, payable semi-annually in advance.
Boarding can be obtained at from \$20 to \$25 per month.
The buildings, Libraries, Apparatus, Laboratory and Society Halls, the location in point of beauty, health, ease of access, and good society, are all unsurpassed by those of any institution in the Southern States.
The past history of the College is the pledge of its future prosperity.
The Board and Faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the young men committed to their care, in both Preparatory and Collegiate Departments.
The old students, alumni, and friends of the institution are requested to give publicity to the full reorganization and opening of the College, as stated above.
W. H. WATKINS, President.

EAST ALABAMA MALE COLLEGE.

AUBURN, ALABAMA.
Rev. James F. Dowdell, A. M., LL. D., President and Battle Professor Moral Science.
John Darby, A. M., Eclectic Professor of Chemistry and Natural History.
John T. Dunklin, A. M., Professor of Latin and Greek Languages.
Alexander Hogg, A. M., Professor of Mathematics.
William C. Stubbs, A. M., Professor of Natural Science.
Professor of Modern Languages, A. S. Douglas, A. B., Instructor in Preparatory School.
Spring Term opens on the 20th of January and closes on the 13th of July.
Mr. Douglas will be aided by the Faculty in the discipline and instruction of the Preparatory Department.
Tuition and incidental fee in College, Spring Term \$48 00
Tuition and incidental fee in Preparatory Dept., Spring Term \$20, 30, 40 00
Board in best families, exclusive of lights and washing, \$15 to \$20 per month.
Auburn is located on the Montgomery and West Point Railroad. It is unrivaled in healthfulness, and unsurpassed in moral and social advantages.
The Board of Trustees are rejoiced in securing the above Faculty, and are confident that nothing is wanting to make this institution equal to the best.
For further information apply to President Dowdell, at Auburn, Alabama.
JOHN B. GLENN,
Jail 1y President Board of Trustees.

TRINITY HIGH SCHOOL, FOR YOUNG MEN AND BOYS.

Pass Christian, Mississippi.
REV. WM. CAMERON, A. M., PRINCIPAL.
The next scholastic year of this institution will commence on the FIRST MONDAY in October, and continue ten months, or forty weeks.
The Boarding Department is under the management of Mrs. John E. Caldwell.
For circulars, giving particulars, apply to the Principal, or to the following named

PATRONS.

Colonel D. E. Scruggs, New Orleans.
Colonel Henry Gilliam, New Orleans.
Captain W. C. Mayers, New Orleans.
Mr. Joel Murray, New Orleans.
Mr. Otin Call, New Orleans.
Mr. A. H. May, New Orleans.
Colonel Frank A. Gardet, New Orleans.
Mr. J. B. Jennings, New Orleans.
Mr. A. H. Swanson, New Orleans.
Mr. Alfred Davis, Natchez, Mississippi.
Gen. E. Swift, U. S. A., Vicksburg, Miss.
Mr. William Myers, Deer Creek, Issaquena county, Mississippi.
Mrs. Mary A. Smith, Woodville, Miss.
Mrs. Catherine Stall, Mobile, Alabama.
Rev. John H. Rice, D. D., Mobile, Alabama.
W. A. Champlin, Esq., Pass Christian, Mississippi.
Dr. C. B. New, Pass Christian, Mississippi.
Jail 1y

SOUTHERN UNIVERSITY.

GREENSBORO, ALABAMA.
The schools of Moral Philosophy, Ancient Languages, Modern Languages, Mathematics, Natural Philosophy and Chemistry are in successful operation. The Faculty consists of gentlemen whose reputation is well established. The Preparatory School is taught by the Faculty. We offer the best facilities for thorough education.
The session is divided into two terms. It begins the first Wednesday in October, and closes the first Wednesday in July.
Tuition in University, per term \$35 00
Tuition in Preparatory School, per term 30 00
Contingent fee, per term 25 00
Board in private families, per mo. \$16 to 20 00
Fees must be paid in advance. Send for a circular. Direct to
J. C. WILKS,
Jail 1y

FRANKLIN SEMINARY.

will be reopened for the reception of pupils on the 9th of AUGUST, which will be the beginning of the scholastic year.
Board can be had in good families for \$15 per month, exclusive of lights and washing.
The following are the terms of tuition, payable in advance, per session of three months:
Elementary branches \$20 00
Higher branches 25 00
Latin, Greek, etc. 30 00
French and music extra.
For further information apply to
B. CLEGG, Principal,
Jail 1y Franklin, La.

MEMPHIS CONFERENCE FEMALE INSTITUTE.

STITUTE, JACKSON, TENN.
Rev. A. W. Jones, President, assisted by a full corps of competent teachers.
Fall Session opens SEPTEMBER 6, 1869.
Tuition, College Department \$25 00
Music and use of piano 30 00
Other charges in proportion.
Board, including washing, fuel, bedding, etc., 90 00
Tuition required in advance, and one-half the board.
The location is every way favorable and the facilities ample.
We solicit patronage, and insure satisfaction on our part.
Jail 1y

CENTENARY MALE INSTITUTE.

SUMMERFIELD, ALABAMA.
The twenty-eighth annual session of this school will begin on the first Monday in OCTOBER, 1869, and continue nine months.
The expense for tuition, incidental fees, board, washing, fuel and lights for the session, will be \$21 50, one-half to be paid on entrance and one-half on the 14th of February, 1870.
Persons wishing to patronize this school may address
JOHN M. STUART,
Jail 1y Principal, Summerfield, Ala.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited only a moderate degree of animation since our last report, but a fair business has been done in several branches of the wholesale trade in filling country orders to replenish stocks which have been materially reduced by the winter's sales. The receipts of sugar and molasses have been more copious, and have met a fair demand at firm prices. There has also been some increase in the supplies of Western produce, the movement in which, however, has been mostly confined to the local trade, at rather stiffer rates.

The tributaries are still at a good navigable stage, and the receipts of cotton have been liberal, increasing the excess over last year 7,855 bales.

The river has fallen four inches since our last, and is now five feet four inches below high water mark.

COTTON.—The following are the arrivals since the twenty-first instant:

Louisiana and Mississippi.....	bales..	23128
Arkansas.....		3646
Lake.....		49
Mobile.....		117
Florida.....		7
Texas.....		372
Total.....		27319

On Saturday the demand was active throughout the day, and although factors were more stringent in their pretensions and the supplies were moderate, yet the sales summed up 9,150 bales, partly at previous rates and partly at a slight improvement, good ordinary closing at 23½ to 23¾, and low middling at 23½ to 24c. On Monday buyers came forward with unabated spirit, and the demand being stimulated by favorable telegrams from New York and an improvement in foreign exchange, the business embraced 7,350 bales, at still fuller prices, good ordinary closing at 23½ to 23¾, low middling at 23½ to 24c, and middling at 24½. On Tuesday the market opened with a fair demand at about previous rates, and several hundred bales changed hands at full prices, without any notable improvement, but at a later hour the receipt of decidedly favorable telegrams from Liverpool and New York gave an additional impetus to the movement and enabled factors to realize an irregular advance of ½ to ¾c, and in some cases ¾c. Hence during the day low middling sold at from 24c up to 24½c, and strict from 24½ to 24¾c, and while 24½c was accepted early for middling, it subsequently sold at 24½c and 24¾c. This irregularity was exhibited also in other descriptions, but at the close prices were firm at the subjoined quotations. The sales were quite liberal, amounting to 8,850 bales.

This makes an aggregate for the past three days of 25,400 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 590,003 bales, against 538,155 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 843,041 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 243,988 bales to Great Britain, of 8,504 to France, and of 34,097 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	21½ to 23
Good ordinary	23½ to 24
Low middling	24 to 24½
Middling	24½ to 25
Strict middling	25 to 26

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	27318
Arrived previously	596822-624141
Exported past three days	18915
Exported previously	422759-442574

Stock on hand and on shipboard... 182337

SUGAR.—The demand for the better descriptions has been fair.

MONEY.—Gold opened on Tuesday at 120½ to 121½, (against 121 at New York,) and closed at 121½ to 121¾, (against 121½ at New York.)

The only sales of silver reported are \$4,500 in American half dollars on Tuesday at 119½ to 119¾, and 10,000 Mexican dollars at 2 per cent. premium in gold.

There has been more inquiry for stocks, but the only sales reported are 50 shares Union Bank, at the Board on Friday night, at \$33 75; 400 Ship Island and Canal at \$1; and 20 shares Merchants' Bank on Monday at —. Last week, after the adverse verdict in the Tizard case, 100 shares Canal Bank sold at \$41.

CATTLE MARKET.

NEW ORLEANS, Jan. 25, 1870.

Special Notices.

The Publishing Committee of the New Orleans Christian Advocate.

This committee has not been called together since the meeting of the General Conference, because in the financial state of the office there was nothing it could do. To be able to support an editor was one of the conditions necessary to the electing one. Then the expenses of such a committee should be borne by the office—another question of finance. These are simply the reasons why this call has not been made yearly. There was really nothing to do, or that could be done by the committee. As the ADVOCATE feels somewhat like standing on its legs, or at least like stretching them in a preparatory way, we give notice that there will be a meeting of the Publishing Committee directly after the patronizing Conferences shall have all adjourned—say on the second Saturday in February next.

Meridian District, Mobile Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Meridian	Jan. 15, 16
Enterprise	22, 23
Pearce's Springs, at Pearce's	29, 30

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, FEBRUARY 5, 1870.

NO. 3.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Jan. 31.—General Ames laid before the President, this morning, the result of the recent election in Mississippi. There seems to be no reason to doubt the speedy admission of the State.

Revels, the negro Senator from Mississippi, creates quite a sensation even among the Radicals.

Mr. Dawes, of Massachusetts, chairman of the Committee on Appropriations, addressed the House again to-day in reply to the speech of General Butler of yesterday, and in defense of what he said a week ago in explanation of the excessive estimates of the administration. He maintained the truth of all he had said then, and took up in detail the estimates, first asking the members to follow him with their printed book of estimates and make their comparisons themselves, and showed just the exact difference between the estimates made last year by Andrew Johnson's administration and those submitted this year by the cabinet of President Grant. In citing the difference he illustrated that Secretary Robeson asked for \$3,600,000 for navy funds this year, while Mr. Wells only required less than half a million last year. These comparisons, made *seriatim*, footed up nearly \$40,000,000, and Dawes appealed to the candid judgment of the House. He had not sustained his assertion. He then addressed himself to the defense of the propriety of the occasion of his first speech as a Republican member occupying a position wherein he was responsible for extravagant appropriations.

WASHINGTON, Feb. 2.—Senator Harris attended an entertainment last evening given to Revels, the colored Senator from Mississippi, by Downing, the colored caterer of this city.

FOREIGN.

LONDON, Feb. 2.—Captain Cochran, commanding the ship Petrel, cruising off the African coast, writes that Dr. Livingstone was burned as a wizard in the interior of Africa.

Rome.—Another committee has been completed and announced in the Roman Council, named "On Eastern Rites and Apostolic Missions."

Cardinal Antonelli has assured the French ambassador that the pope will maintain as equal the rights of Church and State.

Archbishop Dechaump, of Mecklin, who is said to be the leader of the inflexible party in the Ecumenical Council, has been made Primate of Belgium.

The secession of the German bishops in Rome will be resolved upon, unless the numerical strength of dioceses is considered in the vote of the council.

In the Ecumenical Council on Saturday a protracted debate took place on the syllabus. At two of the sessions last week monetary circulars were distributed, enjoining upon the members "absolute secrecy and brevity of discourse." The Archbishop of Paris on Wednesday delivered a discourse which is said to have been "full of moderation and wisdom," and for which he was congratulated by many of the fathers. A petition against the excesses of laymen has been numerously signed by the clergy present.

A petition against the excesses of laymen who edit religious journals has been drawn up and numerously signed by the fathers. Articles destined for the Exposition of Roman Arts will be received until the second of February. The exposition will be opened on the fifteenth of February.

The protest of Cardinal Ranscher against papal infallibility, which is shortly to be presented to the pope, was published on Saturday in one of the Bavarian papers.

Paris.—Advices have been received from Baker's expedition of discovery up to the first of January. At that time they were at the head waters of the Nile. All well.

FRANCE.—Several of the opposition journals having taken occasion to circulate a rumor that the emperor was thoroughly disheartened in view of the recent changes of policy, it is stated semi-officially that all such statements are utterly false. Though she takes great interest in all the movements of the political field, she has exhibited in the most lively manner her pleasure at seeing a new era inaugurated in the French nation. The fact that the support of Messrs. Guizot and Odillon Barrot has been obtained to the new regime, has brought from her a statement that she considers it a splendid auspice of good for the emperor, for the security of her son's succession and for the country itself.

MEETING OF THE PEOPLE.

THE PEOPLE AROUSED.—AN IMMENSE GATHERING IN LAFAYETTE SQUARE.

It is seldom in the history of governments or States that occasions arise for great popular demonstrations, in which the indignant populace rise up to rebuke their rulers. When such events do transpire the fact is attended with a significance and power that no more political prejudice or partisan principles can accord. It was so last night at Lafayette Square. The people of New Orleans, outraged by public and repeated evidences of injuries and ruinous legislation on the part of their representatives in the General Assembly, could no longer endure in silence such utter disregard of right, principles and common honesty. They came together, therefore, inspired with the firm determination to express their feelings and give voice to their opinions.

The meeting was called to order by Mr. Gabriel de Feriet, as president, who announced the vice-presidents and secretaries.

General Harry T. Hays, called upon to state the objects of the meeting, said that when he looked upon the crowds of honest citizens who surrounded the platform, he felt it unnecessary to say that they came here to protest against hurtful legislation. They were freemen, and would not willingly endure the infamous slavery to which legislative enormities were reducing them. It was the part of freemen to resist before they were powerless. It was time that this people lifted up their voice in protestation. Resolutions expressive of the sense of the community were already prepared, and the speaker would give place to Colonel Fuqua, of East Baton Rouge, who would read them.

Colonel Fuqua then proceeded to read the following preamble and resolutions:

WHEREAS, Certain measures have been introduced in and are now pending before the General Assembly of Louisiana, which propose to give to the executive of the State the control of the elections, and the administration of justice; to establish in our midst an armed and uniformed militia, subject absolutely to his orders; and to confer upon private corporations exclusive privileges, and to grant them State aid to a ruinous extent; therefore be it resolved by this meeting, representing, as we claim to do, the people of Louisiana, without distinction of party—

That we view with indignation and alarm the efforts which are being made by unprincipled and selfish men to impoverish us upon the one hand, and enslave us on the other; and that we can regard the men who advocate these measures, whether in or out of the Legislature, in no other light than as public enemies.

Resolved, That the series of measures known as the constabulary bill, the militia bill, the registration bill and the election bill are but parts of a system which, if successfully inaugurated, will destroy the freedom of elections, and, in connection with former legislation, concentrate in the hands of the executive a controlling and most dangerous influence over all the branches of the State government, and make him an absolute despot, clothing him, at the same time, with the means of perpetrating his power.

Resolved, That our opposition to these measures does not depend upon the character of any particular individual who may now or hereafter fill the office of Governor, but we solemnly protest against conferring such unlimited power upon any man, as utterly opposed to the genius of republican institutions, and dangerous to the liberties of the people.

Resolved, That we are not here as the opponents or advocates of any particular financial or railroad scheme or schemes now pending, or that may be hereafter introduced into the Legislature, but we declare ourselves unalterably opposed to all schemes which propose to establish monopolies or confer exclusive rights or privileges upon individuals or corporations, believing as we do that all such legislation tends to repress competition, to shake and embarrass commerce, is destructive of the fundamental principles of free government.

Resolved, That while we earnestly desire to maintain the credit and honor of the State, and will cheerfully submit to any taxation that may be necessary to pay in principal and interest every debt of the State

that has been honestly and fairly contracted, yet there is a point beyond which we cannot and will not go; and we now give notice to the world that we intend to use all the means in our power to prevent the payment of any bonds or other obligations of the State which may hereafter be fraudulently or corruptly issued, or any bonds or obligations, the issue of which is not indispensably necessary to the proper administration of the State government, or to maintain the faith and credit of the State in conformity with laws already enacted; that we intend to make this a paramount question at the next election for members of the Legislature, and will vote for no man who will not pledge himself to institute the most rigid scrutiny into all these transactions, and to refuse to vote to levy any tax, or make any appropriation to pay \$1 of the principal or interest of any such obligations.

Resolved, That the president of this meeting is requested to appoint, as soon as practicable, committees in every parish of the State and ward of the city of New Orleans, to obtain the signatures of the citizens of the State to the foregoing resolution, and their pledge that they will carry it out.

Resolved, That we call upon all men who have the good of Louisiana at heart, to whatever party they may belong, to use all the influence they possess to prevent these obnoxious measures from becoming laws; we call upon the Legislature to place the seal of their reprobation upon them; should they unhappily pass that body, we call upon the Governor to interpose his veto to preserve the credit of the State, and to refuse to receive or exercise the extraordinary, unnecessary and dangerous powers sought to be conferred upon him.

Resolved, That our thanks are due and are hereby tendered to those members of the Legislature who have maintained their integrity, and have already declared their opposition to these obnoxious measures and others of a similar character. We entreat them to continue that opposition, and pledge them our hearty co-operation and support.

Resolved, That the president and vice-presidents of this meeting are hereby appointed a committee to present these resolutions to the Governor and to the Senate and House of Representatives, and to ask for them that consideration which is due to any action of the people, taken in the exercise of their constitutional right peaceably to assemble and declare their grievances.

The meeting was then addressed by Colonel J. O. Fuqua, Esq., of Baton Rouge, Mr. William Randolph and Judge Cotton. — *Picayune, February 1.*

The Times remarks of the meeting:

The meeting in Lafayette Square was very earnest and very emphatic, and the resolutions adopted were such as cannot fail to meet the hearty approval of every right-thinking citizen. For the most part the speeches were temperate, but there was a deep undertone of feeling in the meeting which could not be misunderstood. The people are determined to resort to every legitimate means in their power to save their property from becoming the prey of hiring plunderers, and their liberties from being sacrificed for the benefit of partisan intruders. They know that all legitimate authority is based upon consent, and are determined that they will not be bound by subsidies granted in defiance of their well-understood wishes, and by infringements of their most sacred rights, made in the interests of partisan greed and at the behest of partisan corruption.

Of the various bills of inquiry discussed, those which involved mere financial losses to our already tax-ridden people, were treated as of but trifling importance when compared with those other and graver measures which involve the deeper issues of freedom and independence. We counsel the Legislature not to overlook or disregard the solemn expression of public opinion uttered on Lafayette Square. There was something in its very earnestness which should secure attention and enforce respect—something which, like the strong heaving of a mountain wave, speaks of restless night and a determination to be felt.

The City.—The Mechanics' Institute was yesterday the scene of an event without precedent in the history of Louisiana, or so far as we can now recall, any other State. The occasion was the presentation of the resolutions adopted by the

great meeting in Lafayette Square on Monday night, denouncing the iniquitous schemes for the plunder of the State Treasury by the prodigal grants of aid to alleged railroad or levee schemes of State, bonds or indorsements, and the invasion of public liberties, and the dearest privileges of the citizen, by laws such as the election bill, the militia bill, the constabulary bill, and others equally tyrannical and unfeeling.

It is understood that the Governor received the delegation courteously, and entertained it hospitably. In the course of a speech which he made he named certain parties as engaged in the work of bribing, or attempting to bribe, the Legislature and himself on subjects of legislation. For this exposure of guilty men, engaged in a most scandalous business, the Governor will no doubt receive the thanks of all good citizens, of every party, which will be increased should he veto all the measures denounced at the Lafayette Square meeting. — *Picayune, February 3.*

THE ELECTION BILL.

The bill passed by the Senate, to regulate elections in this State, is evidently intended to secure the supremacy of the Radical party here. Its effect will be to increase the disgust and hostility of the people toward that party, and to insure their ultimate defeat. No party which seeks ascendancy by such means can ever escape eventual retribution, ruin and disgrace.

The leading feature of it is to withdraw all power of the judiciary to protect the citizens in their most valuable rights. The absolute and final decision on all election results is confided to the supervisors of election. They are to manipulate the votes and determine which of them shall be set aside and declared fraudulent, or when there has been sufficient violence to authorize the declaring of an election void. Under the merely ministerial power of making up and declaring the results, they may not only usurp the judicial function by setting aside any result which may be displeasing and unsatisfactory, but they also must Congress and the Legislature of the constitutional right to pass upon the qualification and election of their own members. Either body may be filled with the creatures of the supervisors, through their exercise of the power of determining, without appeal or supervision, who have been elected.

The supervisors are placed beyond all judicial and legal responsibility, or even examination. It is made a penal offense for the courts to issue writs of mandamus or injunction against them. The processes to protect personal and property rights are not available to defend the most sacred right of a freeman. All peace officers, all sheriffs and constables, are prohibited from the exercise of any of their powers and duties in the maintenance of law and order.

The Metropolitan Police are created a band of Janissaries or Pretorian band, to guard the polls and enforce the decrees and orders of their masters, the supervisors.

But why need we present and dwell upon all the abominable features of this infamous bill. There never was a political party so honest and high-toned, so pure in its character, and so respected by the people for its integrity and patriotism, which ought to be intrusted with the powers conferred by this bill. What then shall we say when the enigma of this audacious scheme to defraud and overcome the people shall be trusted to the agents of a party which has rendered itself so odious to the people of all classes as that now in power here? — *New Orleans Times.*

To the Members of the Mobile Conference

BROTHERS: The books looked for so anxiously, during the session of our Conference, reached Selma soon after its adjournment. It would be a pity to return them to Nashville. The agent is anxious to have them sold, and our people wish and need them. They can be had of Bro. Bounds, at the same rates charged by the Publishing House, and I hope the brethren will take them at once.

For the accommodation of brethren in this region, I have requested Brother Bounds to forward a few sets of each work to Brother J. K. Randall, of this city, where they can be had at Publishing House rates.

The works embraced in the bill are Bishop Paine's Life of McKendree, Dr. McFerrin's Methodism in Tennessee, Dr. Summers' Commentary on Matthew, and General Minutes. J. HAMILTON.

MOBILE, ALA., JAN. 20, 1870.

All Christians Astray on the Form of Baptism.

BY HARRY ELLISON KALISCH.

It is remarkable that baptism has been for thousands of years a sign of admittance to Judaism. This ordinance was also adopted as an initiatory rite at the beginning of the Christian religion, although it is now performed by all the Christian sects in a very different manner from its original and proper form. It will, therefore, not be uninteresting to the candid reader if I endeavor to elucidate briefly this subject.

It is well known that a solemn institution or baptism was customary as an expiatory rite among the ancient Greeks and Romans after having committed any crime or murder. See Virg. *Æn.* 2, 719. It reads there:

"Me, bello e tanto ille summi et cetera recenti, Atterere, nefas, donec me flumine vivo Alutero."

"I, who just came from the great battle and dreadful slaughter, dared not touch them" (namely, the Penates) "before I bathed in the spring water of a river."

Herodotus (2, 37) tells us that the Egyptian priests had to cleanse themselves very often by water.

According to the doctrine of Zoroaster the water is as holy as the fire, inasmuch as it is a symbol of the good, especially of inward purity. Therefore, the cleansing of the body by water forms an important part of the religious ceremonies which he ordered, and is scrupulously observed by the Persians. The cleansing by water was also among the Jews a very ancient religious ceremony.

The patriarch Jacob ordered his family to put away the idols which they had, and to cleanse themselves (meaning bathing, as it is expressed in the Hebrew word *hitaharu*), and to change their clothes. (Gen. 35, 2. See, also, Lev. 15, and Judith 12, 7 and 8.)

That a lustration had to take place when the person was in an entirely nude state is evident by Lev. 14, 9, 15 and 13; *ibid.* 16, 24 and 26; Numbers 31, 24.

The Essenes had to be baptized before they were admitted to the community of the initiated members. (See Joseph. *De Bello Jud.*, lib. 2, chapter 8, section 7.)

But as it appears from the ancient traditions handed down to us in the Talmud, three initiatory ceremonies were required, during the existence of the temple at Jerusalem, to make men Jewish proselytes, and two when females were converted:

1. Men proselytes were brought into the covenant of Abraham.
2. They were baptized in a nude state, and by a submersion of the whole body in water.
3. They had to bring a sacrifice as a purgatory means of pollution, the blood of which was sprinkled on the altar. (See Treatise *Keritas*, page 9.)

The reason that these ceremonies were necessary for Jewish proselytes was to enable them to partake of the Paschal lamb, etc.

After the destruction of the temple, however, three different opinions prevailed among the Jews in respect to the observance of the above mentioned ceremonies for the admission of proselytes to Judaism. Rabbi Jehoshua maintained that baptism alone was sufficient for a conversion to Judaism. Rabbi Elieser differed with him, and taught that if one is brought into the covenant of Abraham he needs no baptism in order to become a Jew (Treatise *Kesuboth*, page 71 A, and 46 A.); while others maintained that baptism and circumcision must be performed when a non-Israelite was admitted within the pale of Judaism.

The Jewish radical reformers in Frankfurt-on-the-Main who rejected, in the year 1844, the Talmudical controversies, ordinances and doctrines, in theory as well as in practice, coincided, nevertheless, in principle with the above quoted Rabbi Jehoshua concerning the circumcision of Jewish male proselytes, which led them so far that they abrogated, in 1845, circumcision altogether.

It is very probable that Paulus was prompted by the same ideas when he abolished circumcision among the heathen who became Christians. (See Epistle of Paul to the Romans, 2, 28 and 29; Epistle of Paul to the Galatians, 2, 3; Acts 15; *ibid.* 16, 1, 2 and 3.)

But concerning baptism, all agreed, in ancient times, that immersion of the whole body (not the clothes) in water was necessary for a new member of the Jewish or Christian religion.

There was no sprinkling of water, as this can be seen by a description of the baptism which was performed by John. (See Matt. 3, 6 and 16; Acts 8, 36.) Yes, the Greek expression *baptisma* used in the New Testament shows clearly that submersion of the whole body in water is required. As the baptism was a Jewish ceremony before the time of Jesus, John the Baptist and the apostles surely performed it in the same way and manner as the Jews did; especially as it was not considered by the contemporaneous Jews of John and the apostles as something new and extraordinary, and no Pharisee or Sadducee raised any objection against it, as they did to many other performances, it is certain that this ceremony was scrupulously done in Jewish style. Hence I cannot account for it why the imitators of John the Baptist and the Apostolic Church perform baptism when clad in waterproof clothes.

A real baptizing, or bathing of the body, and not of the clothes, ought to take place, and hence male should be baptized by male, and female by female. This is now customary among the Jews, and has been from time immemorial. It is obvious, therefore, that no female was among the multitude that came to John the Baptist, as it is reported in Matt. 3, 5, 6, etc.: "Then went out to him Jerusalem and all Judea," etc., "and were baptized of him in Jordan." Furthermore must the passage (Acts 8, 12) "They were baptized, both men and women," be understood that males were baptized by males, and females by females. — *New York Union.*

DR. MUNSEY ON MISSIONS.

Sabbath morning last Dr. Munsey delivered his first missionary address in Baltimore. In spite of the almost no notice given, Trinity church overflowed with an eager crowd. The address was extempore, but marked by the characteristic vigor and style of the great preacher. The lack of severe correctness of sentences was amply compensated for a freshness and abandon in which the orator and his subject appeared to the greatest advantage. We were much pleased to find such manifest improvement in his health as was attested by his untiring energy of delivery for near one hour and a half. Such a faithful, dreadful, soul-stirring appeal for missions has been seldom made—the gentle spirit of the minister was elevated to such a pitch of devotion as to leave no room for that deceitful tenderness which saves the sore which can only be reached by knife or caustic. That infidelity and selfishness in the church which keeps "charity" at home when the gospel thunders "Go!" he lashed with unsparring whip. But few of his listeners will forget the cutting question: "Go where?" "Is it to go home?" And the splendid antithesis of the answer: "No! Go ye into all the world," etc.

Dr. Munsey is the right man in the right place. The close application of the student has been applied to untiring assiduity in the office of missionary secretary. Every dollar coming in and going out is checked and posted as in mercantile accounts—he lives and moves through the secular part of the business by sight and not by faith—and may here compare with the wisest "of the children of light." If the debt of the Board of Foreign Missions had been the sum originally estimated, it would have been paid by him, principal and interest, before General Conference. But the larger sum found due is so much more than was supposed that he may not discharge it by that time.

The church cannot evade or resist such appeals as he made on Sabbath, when Trinity, with such slight preparation, gave him \$1,400 for missions, of which \$500 goes to the Foreign Board. This, added to the collections to be reported from the Sabbath school, it is thought, will reach the handsome sum of \$2,800 to \$3,000 for Trinity church. With such a man to preach a missionary crusade the work must go on, and our church become potent as a missionary church.

We say to the Christian orator: "Go," and he will go in the name of his Master, like an "army with banners, conquering, and to conquer."

Dr. Munsey has left for St. Louis. We envy the brethren there the rich treat in store for them. We hope that he will not be tasked beyond his strength, but that the Missouri brethren will return him to us in improved health. — *Baltimore Episcopal Methodist.*

The Christian Advocate.

SATURDAY, FEBRUARY 5, 1870.

VARIETIES IN CREATION.

BY COLONEL H. O. HALL.

For fifty years, all over this broad land, has thou been searching how the Maker's hand
Created, fashioned, planted and sustained
The varied vegetable forms he designed
To deck our soil withal. For fifty years
All over this broad land thy hand appears,
Those forms describing in one common
speech.

To all thy Master's skillful work to teach.

While, duty chief and science were thine aim—

How hast thou spread memorials of thy fame!

Within a thousand daisies, and on their hills;
Beside a thousand springs, and by their rills;
On lofty mountain sides, in valleys deep;
By rushing rivers, where still waters sleep;
In gloomy swamps, in smiling fields and
lanes;

In marshy fens, or arid, sandy plains;
In stifling woods, in breezy, sea-like prairies;
At heads of streams, and by their estuaries;
In awful canons, on high table lands;
In tracts far inland, on the ocean straits;
In frozen habitats, in sunny spots;
On elevated cliffs, in sunken gorges;
Hard by the snow-capped edge, the crater's
brink.

To name hast thou wrought thee a lasting link—

In giant forest trees and humble bushes;
Vines climbing high or trailing, straws and
rushes;

Nutritious stalks, and useless noxious weeds;
Large canes and slender grasses, shrubs and
reeds;

Composed of stem, root, leaf, bloom, seed
and fruit;

Some plants all blossom, scathe on the root;
Some rooted in the bark of other trees;
Some rootless, living airy at their ease;
Some leafless, or with leaf merged in the
bark;

Some evergreen, the glory of the park;
Some yearly stripped by winter's cruel blast;
Some barren long, by fruiting killed at last;
Some reared and living wholly underground,
As truffles only by the deliver found;

Some growing under water, till they rise,
In flowers matched, their germs to fertilize;
(The bride still held at home by spiral spring,
He leaves his parents to his mate to cling,
Thus beauty's time and task fulfilled in air,
The nymph retires again her fruit to bear.)

Some hairy, fawn-like, in deserts growing,
Or, camel-like, their food in thick leaves
stowing;

Some bearing pitchers, lid and all complete,
With soothing liquor fragrant, nepenthe
sweet;

Some quick, when touched their tender leaf-
lets folding,

Some bated insects trapping and fast holding.

Some bearing flowers dyed with thine light,
Glanced from the iridescent wings of morn-
ing,

And shaped like ice-bergs burst from herbs by
night;

Some with plain leaves alone their boughs
adorning;

With fruits delicious as of paradise—
With odors sweet as in the Isles of Spice;

With balls or berries, tubers, or stems,
Leaves, roots and nuts for food, worth more
than gems;

With bark or fiber, lint or down, for dress—
Gum, resin, oil or wine, sour or sweet juices,
Distilling freely forth in teeming sluices;
Some lasting as the longest age of man,
Some living but one summer's narrow span;
Renewed from seeds, from spores, from buds,
from eyes;

Forever falling that they still may rise,
In all those vegetable forms, and more,
Hast thou beheld the handwork of God,
Hast learned of him and taught to men thy
lore,
And carved thy name upon a budding rod.

MISSISSIPPI CONFERENCE.

ITS FIRST SESSION.

Mr. Editor: In your paper of the eighteenth of December you published the names of the preachers who composed the first Mississippi Annual Conference, fifty-four years ago. I forgot the name of our secretary, John Menefee. It may be satisfactory to some of the preachers to have a sketch of the proceedings of that Conference. I quote from my journal: "Thursday, tenth of October, 1816.—We look in vain for the Bishop. Conference met and organized at three P. M. Brother Sellers in the chair, Brother Menefee our secretary. Conference proceeded to business. Adjourned at five to meet at eight to-morrow. Friday, eleventh.—Conference met at eight, Brother Sellers in the chair. No news of the Bishop. Conference proceeded to business. At ten minutes past ten Brother Williams announced, to our great joy, the arrival of Bishop R. R. Roberts; but, as he was much fatigued by his long, lonely journey through the Indian nation, Conference adjourned until after two o'clock. Conference met at two o'clock, Bishop Roberts in the chair. We now feel like we are in order for business. We adjourned at five o'clock. Saturday, twelfth.—We met at eight o'clock, Bishop Roberts in the chair. We adjourned after eleven o'clock. The Bishop preached at twelve o'clock, from Hebrew 12, 1. Perhaps more than two-thirds of the congregation

were shedding tears; such pathos and power carried the whole congregation away. He is indeed a good and a great man. In the evening we met and nearly finished our Conference business. Sunday, thirteenth.—Brother Sellers preached from Colossians 1, 28, after which the deacons were ordained. The Bishop then preached from Jeremiah 9, 23 and 24. The elders were then ordained. I was ordained elder to-day—the first elder the Bishop had ever ordained (so he told me afterward.) I could give the appointments of the preachers, but as they are in our minutes, I close with the above short sketch. I will, however, give you a correct list of the names of the nine preachers that composed that Conference: Samuel Sellers, presiding elder; John Menefee, secretary; Thomas Owens, John Lane, Ashly Hewitt, Peter James, Elijah Gentry, James Dixon, who was transferred to the Tennessee Conference, and Thomas Nixon.

Your brother in Christ,

THOMAS NIXON.

HINDS CO., MISS., Jan. 11, 1870.

LOUISIANA CONFERENCE.

REPORT OF THE COMMITTEE ON FOREIGN MISSIONS.

Your committee would use this occasion to indulge in some general, and, we may hope, not unprofitable reflections upon the subject of foreign missions.

The work of converting the heathen to the knowledge and worship of the true and living God is a great work—a work attended with difficulties, and opposed by powerful and various opposition. The corruption of the human heart is everywhere opposed to the pure "wisdom from above." The deep-seated and long-established superstitions yield with reluctance to "the truth as it is in Jesus." The immoral lives of the sailors, soldiers and traders from Christendom pour scandal upon the Christian name, and create prejudices hard to eradicate. Then the apathy, the unbelief and covetousness of too many in the visible church have disastrously retarded the work and discouraged the missionary. But the cause of missions is the cause of God. He "chooses the weak things to confound the mighty." The smooth stone from the brook in the hands of a stripling, when God directs it, can smite down the most gigantic opposition.

We must not be discouraged at any apparent slowness in the conquering march of the gospel. We must remember that it was more than three centuries from the Pentecost before the Roman world was even normally converted to the acknowledgment of the gospel. The modern missionary movement is not a century old. Eighty-one years ago Carey felt called to be a missionary. That was the beginning of the modern missionary movement. Now there are forty-two grand missionary societies, with one thousand eight hundred missionaries, assisted by eight thousand native preachers. Sixty years ago the American Board of Foreign Missions was not in existence; now it has two hundred churches, and has reckoned in all, seventy thousand converts. Sixty years ago nothing was done in the South seas; now there are eight hundred native preachers and two hundred thousand communicants. There are one hundred preachers in the great Island of Madagascar; six hundred missionaries in India; twenty thousand communicants in South Africa, fifteen thousand on the west coast of Africa; one hundred native preachers in Turkey and Persia, and forty thousand people taught to read in the past twelve years from a single station of the American Board in Eastern Turkey.

The King of Burmah, instead of holding poor Dr. Judson in a filthy dungeon, now welcomes the missionaries to his capital, and is building a school house to accommodate one thousand scholars, and has commanded the translation of the British Encyclopedia into the Burmese language. The Queen of Madagascar, instead of persecuting her Christian subjects, is crowned beneath a canopy, inscribed: "Glory to God

in the highest; on earth peace and good will to men."

In money matters the change has been equally progressive and remarkable. In 1788 there was nothing given by Protestant Christendom to carry the gospel to the heathen. In 1808, \$100,000; in 1828, \$1,000,000 were given; in 1842 \$2,000,000 were given, and in 1868 \$5,000,000 were given. In a hundred years \$50,000,000 will be annually given to this great cause, and instead of eighteen hundred missionaries, eighteen thousand will be sent over the heathen world, preaching to the spiritually impoverished "the unspeakable riches of Christ."

The Protestant missionary field is wide, yet annually extending. Scores of missionaries and hundreds of native preachers are preaching Christ in Mohammedan lands, from the Danube to the Euphrates. The Scriptures are now translated into the sacred characters of the Korm—the language read by a hundred and sixty millions of men, stretching from the west coast of Africa to the eastern shores of China. In India, from which Protestant missionaries were repelled with scorn, nearly six hundred missionaries are preaching the gospel, in scores of languages, from Cape Comorin to the Himalaya mountains. Twenty years ago the converts in China could be counted by dozens; now by thousands. The Moravians excepted, fifty years ago a single church edifice would have sufficed to convene all the missionaries and all the native converts in all the mission fields in the world. Now there are more than three hundred thousand communicants, and a Christian community of more than a million. The grand work goes on, girding the world with lines of light.

One of the most encouraging features in modern missionary labor is the permanence of the work—the holding of the positions taken. The movement is not a raid, but thorough conquest and permanent colonization. The Bible is taken with the missionary, and translated into the languages and dialects of the heathen. This is a great and permanent work. The Bible, when translated, can reach many beyond the access of the missionary. The missionary may die, "but the word of the Lord endureth forever." The Bible is in China and in the Chinese language, and there it will stay forever. It is in India and in the tongues of Hindostan, and there it will remain. The Bible is in Japan, and it will take root there and spread all over those great islands; and so it is in Africa, and in the islands of the great Pacific. This is a great point. The Spirit that indited the truth will attend it, and the truth shall bring the millions of the spiritually enslaved into the "glorious liberty of the sons of God."

A century ago an emperor of China, a wise man, anxious to elevate and improve his people, drew up for them a moral code—a bible. He instituted a Sabbath, to be observed at each new and full moon. He set apart preachers to instruct the people, on these appointed days, in the doctrines and precepts of the new bible. But the people did not regard the preachers or the book as having anything more than human authority; so they would neither heed nor hear, and the emperor's benevolent enterprise entirely failed. After this the Jews came into China with the Old Testament scriptures, but they would not translate them into Chinese, but kept the sacred rolls locked up in the ark, bowing in adoration, even worshipping them, but did nothing more, and no beneficial results followed. Then the Nestorian Christians came and preached and established churches; but they did not translate the Scriptures. Their converts were not rooted and grounded in the inspired truth which is able to make them wise unto salvation. So by and by the storms of revolution swept them away. But now the missionary translates and circulates the Bible, gathers the children into schools, and feeds them from the printed page with the sincere milk of the word. Thus a deep, broad, and

permanent foundation is laid, against which the gates of hell shall never prevail.

Our faithful and efficient missionaries in China, and among the red men of the West, are doing well—doing all that men can do. Let us sustain them by generous gifts and fervent prayers. Let us co-operate with our able and devoted secretary in sending out other faithful men into the heathen fields, now white to the harvest.

The chairman of the Committee on Foreign Missions asks leave to submit the following report. The several districts, circuits and stations have contributed the following amounts for foreign missions during the current Conference year:

NEW ORLEANS DISTRICT.

Carondelet street	\$1,000 00
Emile street	1,200 00
Morion street	243 35
Dryades street	70 85
Crops street	19 00
Lafayette and Carrollton	4 60
Jefferson City and Louis- iana avenue	30 45
New Orleans circuit	50 00
Thibodaux	20 00
Plaquemine	20 00
Colored charges	\$2,711 45

One thousand three hundred members. About \$2 07 per member.

OPELOUSAS DISTRICT.

Opeolousas	\$30 00
Bayou Mallet mission	10 00

The Ditzler-Sweeney Debate Again.

Mr. Editor: As the press of the so-called Christian church has been so bitter over the late debate at Warrensburg, Missouri, showing a chagrin and mortification that prudence, if not the spirit of religion, should have taught them to avoid, it is due the public that I expose one of the main facts that gave them such mortification. It is only one of a hundred, but as they writhed most under it, and their newspapers have teemed with articles of unusual length about the debate, I will give the facts to the public. Stokius' Greek Lexicon of the New Testament is an old one (English), published over a hundred years ago. Campbell had it; Rice never had seen it, and was imposed on by Campbell most outrageously, as will be seen below. And my use of the facts—having Stokius with me, as he now lies before me—made a better extraordinary. Nor did my opponent, Mr. Sweeney, demand a committee at all, as Elder Longan says. He threatened to have one. I promptly demanded it, and he said no more, and never did name it again, but the moderator brought it up.

I now give the facts to the world, as the immersionists have made more capital out of this lexicon than out of all others together.

ALEXANDER CAMPBELL, ON STOKIUS' GREEK LEXICON OF THE NEW TESTAMENT.

* Stokius, one of the most learned

rabbi in the school and learning of orthodoxy, deposes as follows: Generatim, ac vi vocis, etc.—Debate with Rice, 206. "The two still more venerable names of Schlessner and Stokius."—Ibid, 208.

"This great master (Stokius) of sacred literature says, Generatim, etc."—This distinguished theologian and critic.—Christian Baptism, by A. Campbell, 125.

I now charge Mr. A. Campbell with—

1. Intentionally omitting what Stokius gave as the definition of baptizo.

2. In quoting from a foot-note only, he thereby designedly misrepresents Stokius by leaving out the words sprinkle—"adspargendo aquam."

3. In said note, where alone dip and immerse are given as meanings of baptizo, he omits the word pour, etc.

4. He says Stokius gives "wash, cleanse, wet," as tropic, metonymical meanings of baptism—"by consequence"—without showing that he gave wash as its literal meaning first, and this confirmed by rendering the Greek word baptizo, and baptisma, and baptismos, by wash, never by immerse, where he could not fail to see Stokius' meaning.

5. Campbell, in translating Stokius' Latin, adds more words—over and above and contrary to what Stokius said and than Stokius had! (See Debate, etc., 206-7.) I will now give all the Latin definitions that Mr. Campbell copies (page 206-7 in the Debate); he copies the same in his "Christian Baptism," page 125, though not so fully. I will, in transcribing it, put in italics all that which Campbell adds to Stokius' definition, and without any authority, and in small capitals false renderings:

1. Generatim, ac vi vocis intentionis ac immersionis notione obtinet. 2. Speciatim. (A) proprie est immergere ac interfingere in aquam. (B) Tropice, per metalepsin est lavare alibi, quia aliquid intingi ac immergi solet in aquam at lavatur vel abluatur. Which I translate (says Campbell,) Generally, it obtains the sense of dipping or immersing, without respect to water or any liquid whatever. 2. Speciatim,

AND IN ITS PROPER SIGNIFICATION (proprie, adverb, properly,) IT SIGNIFIES (the Latin is est, not significat—it is, not it signifies, as Campbell has it,) to dip or immerse in water. This is its New Testament sense. 3. Tropice, (est—is) to wash, to cleanse, because a thing is usually dipped or immersed in water that it may be washed, THAT IT MAY BE CLEANSED. (Latin, vel abluatur, or cleansed.) Its general sense is to dip. Its proper sense, to wash, to cleanse. "This," adds Mr. Campbell, "is a true version of this great author!"

I will now add what Campbell left out, omitting the texts of Scripture and references—not one of which Stokius renders dip or immerse—commencing at the very word where Mr. Campbell left off. The last words quoted by Mr. Campbell were, "at lavatur, vel abluatur, quoniam et (continues Stokius) adspargendo aquam, luto vel ablutio fieri queat et solent. (Mar. 7, 4; Lu. 11, 38.) (Although, or moreover also, by sprinkling the water, washing or cleansing can be, and generally is, accomplished. Mark 7, 4; Luke 11, 38.) In loco the Greek is baptizo, from baptizo. But Stokius does not stop by saying baptism was generally accomplished by sprinkling the water, citing cases in the gospels, but in the same note he says: "Designat (A) Miraculosam Spiritus (S) effusionem super apostolos, aliosque credentes, tum ob donum Spiritus (S) copiam, prout olim apostoli et credentes affunderantur. (It designates—denotes—the miraculous outpouring of the Holy Spirit upon the apostles and other believers, and on account of the abundant gift of the Holy Spirit, since anciently the water was poured copiously upon those who were baptized.)" In the face of these facts Mr. A. Campbell, with Stokius in hand, said (page 181 Debate): "Has he produced a lexicon, of the eighteen centuries past, giving sprinkle or pour as the proper or figurative (italics his) meaning of baptizo? * * * Let him adduce any modern dictionary, English, French, etc., thus expounding the Greek word baptizo or baptizo." Again: "It never has been translated by either sprinkle or pour by any lexicographer for eighteen hundred years."—(Ibid, 139.) Ursmis, Graves, and others define those words by sprinkle also. But the worst is to come.

With this Stokius in his hand—Rice acknowledging he never saw the book—Campbell, rejoicing in his pretended triumph (pages 206-7,) says: "But my friend, Mr. Rice, will now have it that the dictionaries give wash as the first meaning of baptizo. He cannot show one! I say again, he cannot show one that does so." (Italics his—page 118, Debate Campbell and Rice.) He is answering what Rice said in his third address, which I copy: "They (lexicographers) generally agree

with Bretschneider; * * * and in the New Testament, first, LAVO, abluo simpliciter—simply, to wash, to cleanse." (Page 91; again, page 92.) Of Stuart, Rice says: "And the first meaning (italics Rice's) he gives is to wash."

Now, then, what will the reader say when he learns that this great lexicographer, of whom Mr. Campbell said so much, gives wash as the first and only literal meaning of baptizo; then adds, baptizo, i. e., transfers it? Here is Stokius: "Baptizo, lavo, baptizo." Then the next words are about its construction with the cases and passages given; then he gives the passive baptisomai, tuor, lavor, baptizor—to be washed, to be cleansed, to be baptized. He then renders the Greek word, by wash—lavo—three times; then Mark 7, 4, where they eat not, etc., unless they baptize themselves—wash, in James' version—he renders it a foro (venientes) nisi prius luti fuerint non edent; and coming—when they come—from the market (agora—public places,) unless they first wash they do not eat. Thus he does not give dip, or immerse, or plunge, as definitions of the word at all, but puts them in his note as a meaning taken or obtained in classic or general use.—"Generatim, notione obtinet."—Generally, it obtains the notion, etc.

Mr. Campbell adds of Stokius (page 60 of Debate:) He defines baptisma (the name for baptism in the New Testament) in like manner. "It generally denotes immersion and dying; but by the inside force of the term," etc. This, again, is from a foot-note, which gives its classic use, or general use in Greek literature. But here is Stokius' definition: Baptisma; verb, baptizo, lavo, abluo, baptizo. Baptism, from the verb baptizo, to wash, cleanse, baptize."

Baptismos, luto ablutio, baptismos—a washing, cleansing, baptism. He then renders baptismos (Mark 7, 4-8; Heb. 9, 10) by washings.

For making the above exposures, with a hundred more equally damaging to the honesty and integrity, as well as veracity, of Mr. A. Campbell, in the debate between the followers of Mr. Campbell's peculiar views and the Pedo-baptists, represented by Elder Sweeney, of Chicago, and myself, their papers have done what before the audience they feared to attempt to do—defend Mr. Campbell and vilify myself. In the Pioneer, a so-called religious paper, published at Chillicothe, Missouri, December 9, 1869, appears a most scurrilous article, by its corresponding editor, bitterly abusing me for the exposures I made. It is enough to say that there is not a sentence in it that has not misrepresentation. The Apostolic Times, of Lexington, Kentucky, December 2, is of the same class, only not half so scurrilous. Both the writers—Elders Davis and Longan—are so ignorant that the former knew not that Aramian dialect was the Syriac; reports what never occurred—reports all so colored as to be utterly untrue. For instance, he says I proposed to read three sentences in Syriac if Mr. Sweeney would read three in Greek. I, as all there would testify, offered to render five English verses into Syriac if Sweeney would render two sentences of Greek into English. As to Lynch: what Sweeney said of the Jordan and Lynch, indorsed by Davis—the whole is simply preposterous—Lynch is before me. He shows the Jordan to be so swift that at the place where John baptized he supposes the rushing waters must have paused for the occasion, and below he saw two camels in one morning washed off by the terrible current. Poor Longan makes the Latin, lavo, a Greek word of the Septuagint three times! He misspells the Greek participle of baptizo four times—never having it correct—batches Latin grammar as a Latin novice of three days' schooling would not do in his Grammar Novum Testamentum, for Novi Testamenti; misrepresents everything of which the following will serve as a sample: The reference offered by Mr. Sweeney to the faculty of the State University I declined. I gave my reason, that it was under their church's influence, etc. Longan says, there the matter rests. That was untrue. I at once offered, as I had urged in the committee of their side when they called on me, that a committee copy all our largest paper, if they would do the same. They refused! There is where it rests. So of all these the poisonous waters, Dead Sea, etc. Alas! that men will be so reckless and yet publish this! "May the Lord help men to be honest."

J. DITZLER.

St. Louis Christian Advocate.

A QUAIN writer says: "I have seen women so delicate that they were afraid to ride—for fear of the horse running away; afraid to walk for fear the dew might fall; afraid to sail for fear the boat might upset; but I never saw one afraid to be married, which is more risky than all the others put together."

The Christian Advocate.

SATURDAY, FEBRUARY 5, 1870.

FATHER TOM AND THE POPE, OR A NIGHT AT THE VATICAN.*

CHAPTER I.
HOW FATHER TOM WENT TO TAKE POT-LOCK AT THE VATICAN.

When his reverence was in Room or course the pope axed him to take pot lock wid him. More be token, it was on a Friday; but, for all that, there was plenty of mate; for the pope gev himself an absolution from the fast on account of the great company that was in it—at husto so I'm tould. Howaniver there's no fast on the drink any how—thank the Virgin!—and so, as they, wor sittin', after dinner, taking their snip together, says the pope, says he, "Thomus," for the pope, you know, spakes that away, and all as one as ov iz—"Thomus a lanna," says he, "I'm tould you well them English heretics out of the face."

"You may say that," says his reverence to him again. "Be my soul," says he, "if I put your holiness under the table you won't be the first pope I floored."

Well his holiness laughed to split; for you know Pope was the great Prodesan that Father Tom put down upon purgatory; and ov course they knew all the ins and outs of the conthnaversy at Room. "Faix, Thomus," says he, smiling across the table at him mighty agreeable—"it's no lie what they tell me, that yourself is the pleasant man over the dhrup ov good liquor."

"Would you like to thry?" says his reverence.

"Sure, and an't I thrying all I can?" says the pope. "Sorra better bottle ov wine's betwixt this and Silamancha, nor there's forrest on the table; it's rual Lachrymachrysal, every spudh ov it."

"It's mortal could," says Father Tom.

"Well, man alive," says the pope, "sure and here's the best ov good claret in the cut decanter."

"Not maining to make little ov the claret, your holiness," says his reverence, "I would prefer some hot wather and sugar wid a glass ov spirits through it, if convenient."

"Hand me over the bottle of brandy," says the pope to his head butler, "and fetch up the materi'ls," says he.

"Ah, then, your holiness," says his reverence, mighty eager, "may be yerd have a drop ov the native in your cellar? Sure it's all one throuble," says he, "and, troth, I dunna how it is, but brandy always plays the puck with my intrails."

"Pon my conscience, then," says the pope, "it's very sorry I am, Mistor Maguire," says he, "that it isn't in my power to please you; for I'm sure and certain that there's as much whisky in Room this blessed night as 'ud blind the eye ov a midge."

"Well, in troth, your holiness," says Father Tom, "I knew there was no use in axing; only," says he, "I didn't know how else to ex-queeze the liberty I tuck," says he, "of bringing a small taste," says he, "of heating out an imperi' quart bottle out ov his coat pocket; 'that never seen the face ov a ganger," says he, setting it down on the table forthwith the pope; "and if you'll jist thry the fall ov a thimble ov it, and it doesn't rise the cockles of your holiness's heart, why, then, my name," says he, "isn't Tom Maguire?" and with that he ont's wid the cork.

Well, the pope at first was going to get vexed at Father Tom for fetching drink thataway in his pocket, as if there wasn't lardies in the house; so says he: "Mistor Maguire," says he, "I'd have you to comprehend the differ betwixt an invitation to dinner from the successor of Saint Pethr, and from a common maynor of a Prodesan squirean that may be has't liquor enough in his cupboard to wet more ner his own heretical whistle. That may be the way wid them that you visit in Leithrim," says he, "and in Roomanum; and I'd let you know the differ in the prisint case," says he, "only that you're a champion ov the church and entitled to lanney. So," says he, "as the liquor's come let it stay. And, in troth, I'm enris myself," says he, "gettin' mighty soft when he found the delightful smell ov the pulleva, 'in investigating the composition ov distilled liquors; it's a lannch ov natural philosophy," says he, taking up the bottle and putting it to his blessed nose.

Ah! my dear, the very first snuff he got ov it, he eried out, the dear man: "Blessed Vargin, but it has the divine smell!" and crossed himself and the bottle half a dozen times running.

"Well, sure enough, it's the blessed liquor now," says his reverence, "and so there can be no harm any way in mixing a dandy ov punch; and," says he, stirring up the materi'ls wid his golden meedlar, "for everything at the pope's table, to

Father Tom and the Pope. Philadelphia: T. B. Peterson & Brothers.

the very schrew for drawing the corks, was ov vergin gold—"if I might make boold," says he, "to spake on so deep a subjic afore your holiness, I think it 'ud considherably whacillate the investigation ov its chemistry and pharnaceutics, if you'd jist thry the laste sup in life ov it inwardly."

"Well, then, suppose I do make the same exprimint," says the pope, in a much more condescending way nor you'd have expected—and wid that he mixes himself a real stiff facer.

"Now, your holiness," says Father Tom, "this bein' the first time you over dispinked them chymicals," says he, "I'll jist make boold to lay down one rule ov orthography," says he, "for convhounding them, *secundum mortem*."

"What's that?" says the pope. "Pnt in the sperits first," says his reverence; "and then put in the sugar, and remember every dhrup ov wather you put in after that spoils the punch."

"Blessed Vargin!" says the pope, not mindin' a word Father Tom was saying. "Blessed Vargin!" says he, smacking his lips, "I never knewen what drink was afore," says he, "it bates the Lachrymachrysal out ov the face!" says he, "its Nectar itself, it is, so it is!" says he, wiping his epistolical mouth wid the enif ov his coat.

"Pon my secret honor," says his reverence, "I'm raily glad to see your holiness set so much to your satisfaction; especially," says he, "as, for fear ov accidents, I tuck the liberty of fetchin' the follow ov that small vessel," says he, "in my other coat pocket. So devil a fear of our running thry fill the but-end of the evening anyhow," says he.

"Draw your stool into the fire, Mistor Maguire," says the pope, "for faix," says he, "I'm bent on anilizing the metaphysics ov this phenomenon. Come, man alive, clear off," says he, "you're not drinkin' at all."

"Is it drink?" says his reverence; "by gorra, your holiness," says he, "I'd drink wid you till the cows 'ud be coming home in the morning."

So wid that they tackled to, to the second fugil a piece, and fell into a larned discourse.

"But it's time for me now to be off to the loethir at the board. Oh my sorralight upon you, Doctor Whately, wid your phtical economy and your hydherastatics! What the bit use has a poor hedge-masther like me with sich deep larnin' as is only fit for the likes ov them two I left over their second-tumbler? Howaniver, wishing I was like them, in regard ov the sup ov drink, any how I must brake off my noration for the prisint; but when I see you again I'll tell you how Father Tom made a hero ov the pope that evening, both in theology and the enbe root."

Conference adjourned with the benediction.

Dec. 17.—Conference met. Rev. S. Johnson opened with religious services.

Minutes read and approved.

Question 15 resumed: J. McNeil and Charles Thiigpen laid over; David Funchess, Green Jones, Frank Funchess, John Hollis, Isaac Brown and Robert Coleman passed.

Question 1—Who are admitted on trial? Wm. Mandy and George Wright.

Question 15: Lownon Carlisle and Louis Hays laid over; Daniel McGaw elected to deacon's orders and continued on trial.

Question 9—Who are elected to elder's orders? Answer: Robert Coleman, John Dorsey, Green Jones, Frank Ambrose and Isaac Maytin.

The following reports of committees were presented:

The Committee on the *Christian Index* report: That we heartily approve of the plan proposed to publish a paper for the colored people of the Methodist Episcopal Church South, at Memphis, Tennessee, by name the *Christian Index*; that we have seen a specimen copy of the paper, and we are pleased with it; that we will do all in our power to extend the circulation of the *Christian Index* among our people.

The Committee on Sunday Schools and Bible Cause report: That Sunday schools are quite limited yet, in operation, in the bounds of the Conference. There are twelve schools, thirty-eight teachers, three hundred and seventy-five scholars under instruction. The instruction of children has been confined mostly to the catechism and spelling book; but they are making progress. The interest in this important field of labor is deepening and widening among the people, and the prospects for an increase of schools and extensive usefulness are brightening. There is, however, a great need of books, catechisms, Testaments, etc. The committee would recommend that Bible societies be formed on the circuits, and an application be made to the Bible agent, Brother John W. Harmon,

for Bibles and Testaments, to meet the growing demand in the church. Vaiden was chosen as the place for holding the next Conference.

It was resolved that the \$10.40 collected at the last Conference, to publish the Minutes, be used to purchase catechisms, to be equally distributed between the districts.

Brother A. B. Nicholson was added to the Committee on the *Christian Index*.

The Conference adjourned with benediction by the Bishop.

Dec. 18.—The Conference met and was called to order by the Bishop, and singing and prayer by Brother Isaac Martin. The minutes were read and approved.

Resolved, That a copy of the minutes be furnished the editor of the New Orleans Christian Advocate for publication.

Resolved, That we sincerely tender our thanks to the trustees of the church for the use of their house of worship.

Resolved, That we sincerely thank those of our friends who have so kindly taken care of us during our Conference.

The following additional members answered to their names: Thomas Murrow, W. W. Drake, John Dorsey, W. B. Hines, H. P. Bowen, J. D. Willis, W. T. Pearce, David Funchess, Green Jones, Frank Funchess, Robert Coleman, Bartlett W. Baily, John Johnson, Moses Wright, Willis Latham.

The minutes of yesterday were read and approved.

Question 3 taken up—Who are admitted into full connection? Answer: John Johnson; and pending his admission the following resolutions were adopted:

Resolved, That applicants who are ordained and recommended as suitable persons to travel and preach the gospel be admitted into full connection.

Resolved, That all applicants who are present and shall be elected to orders at this Conference, be admitted into full membership.

John Johnson, Bartlett W. Baily, Henry Murdock and Moses Wright were elected to deacon's orders; Abraham Anderson was admitted on trial and elected to deacon's orders; John Foster was elected to deacon's orders; Willis Latham was admitted to full membership and elected to deacon's orders.

Question 15—Are all the preachers blameless in their lives and official administration? Bartley Turner, Frank Ambrose and Charles Lewis were passed. John W. Dunn and Samuel Harris were stricken from the roll.

It was resolved that a committee on the *Christian Index*, a paper published in the interest of the colored people, be raised, as follows: John Dorsey, Frank Ambrose, J. Brown, S. Johnson, Robert Coleman, Moses Wright, Harry Hargraves, Reuben Pope, John Dorsey.

Reuben Pope, John Dorsey, Isaac Martin and Harry Hargraves were passed; Henry Garmen was passed and elected to deacon's orders; Bartlett Turner was elected to deacon's orders previously; Isham Barrell, Robert Amacker, A. J. Thompson and Frederick Newell were withdrawn.

Conference adjourned with the benediction.

Dec. 17.—Conference met. Rev. S. Johnson opened with religious services.

Minutes read and approved.

Question 15 resumed: J. McNeil and Charles Thiigpen laid over; David Funchess, Green Jones, Frank Funchess, John Hollis, Isaac Brown and Robert Coleman passed.

Question 1—Who are admitted on trial? Wm. Mandy and George Wright.

Question 15: Lownon Carlisle and Louis Hays laid over; Daniel McGaw elected to deacon's orders and continued on trial.

Question 9—Who are elected to elder's orders? Answer: Robert Coleman, John Dorsey, Green Jones, Frank Ambrose and Isaac Maytin.

The following reports of committees were presented:

The Committee on the *Christian Index* report: That we heartily approve of the plan proposed to publish a paper for the colored people of the Methodist Episcopal Church South, at Memphis, Tennessee, by name the *Christian Index*; that we have seen a specimen copy of the paper, and we are pleased with it; that we will do all in our power to extend the circulation of the *Christian Index* among our people.

Resolved, That we sincerely thank those of our friends who have so kindly taken care of us during our Conference.

Carlisle; Port Gibson circuit, Louis Hays; Rocky Springs circuit, D. A. J. Parker.

Question 1—Who are admitted on trial? Answer: George Wright, William Mandy, John Foster, Frederick Gillespie and Abram Anderson.

Question 2—Who remain on trial? Answer: Daniel McGaw.

Question 3—Who are admitted into full connection? Answer: John Johnson, Bartley W. Baily, Henry Murdock, Moses Wright and Willis Latham.

Question 6—Who are deacons of one year? Answer: Frank Ambrose, Bartley Turner, Reuben Pope, John Dorsey, Isaac Martin, Henry Hargraves, David Funchess, Green Jones, Frank Funchess, John Hollis, Isaac Brown, Lownon Carlisle, Louis Hays, Charles Thiigpen, Isaac Warren and George Henington; deacon of second year: Charles Lewis; deacon of third year: Robert Coleman.

Question 7—What traveling preachers are elected and ordained deacons? Answer: Henry Murdock and Bartley W. Baily; elected but not ordained: Daniel McGaw, Henry Garner and Bartley Turner.

Question 8—What local preachers are elected and ordained deacons? Answer: John Johnson, Moses Wright and Willis Latham; elected but not ordained: Abram Anderson, Frederick Gillespie and John Foster.

Ques. 9—What traveling preachers are elected and ordained elders? Answer: Robert Coleman, John Dorsey, Green Jones, Frank Funchess, Frank Ambrose and Isaac Martin.

MADAGASCAR.

OFFICIAL BURNING OF THE ROYAL IDOLS. ENTIRE RENUNCIATION OF HEATHENISM BY THE NOVAS.

Just fifty years ago the first Christian missionaries visited the Island of Madagascar. For seventeen years they labored quietly among the natives, with the usual difficulties and discouragements that attend early efforts of the kind, but gradually gathering a little band of converts. The king who reigned when they first came was inclined to encourage intercourse with the European nations, and looked with no disfavor upon their endeavors. His widow, who became queen at his death, had other ideas. The idolaters were alarmed at the progress Christianity was making, and in 1835 the missionaries were suddenly ordered to leave the island, while their converts were forbidden to observe the Lord's day, or any Christian ordinances, or to read the Scriptures. For twenty-six years persecution raged—sometimes violently, never altogether remitted. The constancy of the Christians, their simple faith and the patience with which they endured the loss of all things, cruel mockings and scourgings, imprisonment, slavery and death, not accepting deliverance, is, and will ever remain, one of the most glorious chapters in the history of the Christian church. In 1861 the persecuting queen died, and all was changed; the missionaries were recalled, they had permission to settle at the capital, they found that the knowledge of Christianity had been maintained in their absence, that the blood of the martyrs had been, as always, the seed of the church, and that the people generally were not disinclined to listen to their instruction. The authorities now favored them, but they had reason rather to shun than to cultivate the countenance of the late king. So at last thought his subjects also; a conspiracy was formed against him; he was assassinated, and his queen reigned in his stead. The Christians were once more in doubt whereto this would tend, but they were left in peace; permission was granted them to build chapels, and they prospered and multiplied abundantly. At last the queen declared herself to be a Christian, and in February last she was baptized by a native teacher within the precincts of her own palace. She had not consulted the English missionaries, and did not invite their presence at the ceremony; and not the least gratifying feature in the Christian revolution now passing over Madagascar is that the authorities neither attempt to control, nor offer to patronize, nor suffer the interference of the missionaries. They are honestly desirous of building up a native Christian church which shall know nothing of the controversies and divisions which have disfigured European Christianity. As our readers are aware, the queen during all this summer has been busily occupied with the building of a Chapel Royal. Of all these matters, of the opening of the memorial missionary

churches over the spots consecrated by the martyrdom of the early Christian converts, and of the solemn dedication of the queen's chapel, letters from our correspondents in the island have given full and most interesting particulars. But the news which we publish to-day surpasses and crowns all that has gone before. The royal idols have been burned by the express order of the queen, the whole province of Imerina has declared its desire to be instructed in the truths of Christianity, and teachers have been sent to every village.

It may be gathered from the interesting communication of Mr. Pool that the destruction of the idols had been expected. When the foundation stone of the Chapel Royal was laid the fence round the house in which the great national idol was kept, in a village some seven miles from the capital, was pulled down. The keepers of the fetish hastened its doom by muttering threats of vengeance, hinting that the god had medicine and intended to use it. This was as much as to say that the queen would be poisoned. They came to court in their minacious temper, claiming their supposed rights as nobles. A Council of State was called, and while the protectors of the idol were detained in the capital an express was sent off in hot haste to end the imposture for ever. No opposition was made to the queen's commands. The people gathered round while the house was burned with a fire made with the materials of the broken fence, and curiously watched what would come of it. The appearances of the idol were first consumed. His long came, the bullocks' horns from which the sacred sprinklings were made, his three scarlet umbrellas, and his silk gown; then his case, and lastly the formidable deity himself who rendered the sovereign invincible, preserved from fire, from crocodiles, from infection, and in battle—the great god of Madagascar worshipped for generations, and the object of fear to thousands of people, was brought out. Scarcely anybody but his keepers had ever seen him, and when he proved to be a bit of shapeless wood, about as big as a man's thumb, with a couple of scarlet silk wings, it is not surprising to read that "all seemed astonished at his insignificance." The crowd, however, exclaimed: "You cannot burn him, he is a god," to which the Christian officers, superintending the holocaust, replied: "We are going to try," and while the sham deity was enveloped in flames it was held up on a stick that all might see him consumed. Other idols, with unpronounceable names, were burned afterward. One consisted of a small quantity of sand tied in a cloth, and another of three round pieces of wood fastened together by a silver chain. One was "the avenger," another was the god of traders, others were the queen's private tutelary. The destruction of these objects of veneration occasioned no remonstrance from the people, showing that they had been prepared for the decisive act by the general change of opinion, and we are able to supplement the account of our correspondent with still later news. The inhabitants of the villages, seeing that they had no longer any gods left to worship, sent to the queen to ask what their religion was to be for the future, and who was to teach them the knowledge of the true God. The missionaries and native pastors were summoned to the prime minister's house, and he himself suggested that the responsibility of supplying them with teachers should be devolved on the churches already existing, and that the government should have nothing to do with the matter. The native churches should make collections, in which the Chapel Royal should share, and thus the expense of sending teachers be defrayed. A list of two hundred and eighty villages, in Imerina, the province in which the capital itself is comprised, was made out, and of these it was found that one hundred and twenty were already supplied with pastors. Native teachers were selected from the churches in Antananarivo for the one hundred and sixty others, and thus the whole district was brought at once under Christian instruction.

To this marvelous and gratifying story there has been no parallel in our times. Madagascar has finally parted with idolatry and entered the community of Christian nations. There are some countries of Europe that cannot afford to make merry over the debasing superstitions which for ages led the Malagasy to worship bits of wood and bags of sand. While the pope and his council are worshipping a wafar, the loss said about the Malagasy fetish the better. And to-day the queen and people of Imerina take a place that may deserve the admiration of us all. While the philosophers of Germany, France and England, too, are rejecting Christianity, they are accepting it as the truth of God. Perhaps there are some who pity them; we and all Christian people thank God for their wisdom, and take fresh courage from the example.

English Independent.

Brother A. B. Nicholson was added to the Committee on the *Christian Index*.

The Conference adjourned with benediction by the Bishop.

Dec. 18.—The Conference met and was called to order by the Bishop, and singing and prayer by Brother Isaac Martin. The minutes were read and approved.

Resolved, That a copy of the minutes be furnished the editor of the New Orleans Christian Advocate for publication.

Resolved, That we sincerely tender our thanks to the trustees of the church for the use of their house of worship.

Resolved, That we sincerely thank those of our friends who have so kindly taken care of us during our Conference.

The Bishop addressed the candidates for orders, after which the following were ordained deacons: John Johnson, Bartley W. Baily, Henry Murdock, Willis Latham and Moses Wright. Elders ordained: Robert Coleman, John Dorsey, Green Jones, Frank Funchess, John Hollis, Isaac Brown, Lownon Carlisle, Louis Hays, Charles Thiigpen, Isaac Warren and George Henington; deacon of second year: Charles Lewis; deacon of third year: Robert Coleman.

Question 7—What traveling preachers are elected and ordained elders? Answer: Robert Coleman, John Dorsey, Green Jones, Frank Funchess, Frank Ambrose and Isaac Martin.

MADAGASCAR.

OFFICIAL BURNING OF THE ROYAL IDOLS. ENTIRE RENUNCIATION OF HEATHENISM BY THE NOVAS.

Just fifty years ago the first Christian missionaries visited the Island of Madagascar. For seventeen years they labored quietly among the natives, with the usual difficulties and discouragements that attend early efforts of the kind, but gradually gathering a little band of converts. The king who reigned when they first came was inclined to encourage intercourse with the European nations, and looked with no disfavor upon their endeavors. His widow, who became queen at his death, had other ideas. The idolaters were alarmed at the progress Christianity was making, and in 1835 the missionaries were suddenly ordered to leave the island, while their converts were forbidden to observe the Lord's day, or any Christian ordinances, or to read the Scriptures. For twenty-six years persecution raged—sometimes violently, never altogether remitted. The constancy of the Christians, their simple faith and the patience with which they endured the loss of all things, cruel mockings and scourgings, imprisonment, slavery and death, not accepting deliverance, is, and will ever remain, one of the most glorious chapters in the history of the Christian church. In 1861 the persecuting queen died, and all was changed; the missionaries were recalled, they had permission to settle at the capital, they found that the knowledge of Christianity had been maintained in their absence, that the blood of the martyrs had been, as always, the seed of the church, and that the people generally were not disinclined to listen to their instruction. The authorities now favored them, but they had reason rather to shun than to cultivate the countenance of the late king. So at last thought his subjects also; a conspiracy was formed against him; he was assassinated, and his queen reigned in his stead. The Christians were once more in doubt whereto this would tend, but they were left in peace; permission was granted them to build chapels, and they prospered and multiplied abundantly. At last the queen declared herself to be a Christian, and in February last she was baptized by a native teacher within the precincts of her own palace. She had not consulted the English missionaries, and did not invite their presence at the ceremony; and not the least gratifying feature in the Christian revolution now passing over Madagascar is that the authorities neither attempt to control, nor offer to patronize, nor suffer the interference of the missionaries. They are honestly desirous of building up a native Christian church which shall know nothing of the controversies and divisions which have disfigured European Christianity. As our readers are aware, the queen during all this summer has been busily occupied with the building of a Chapel Royal. Of all these matters, of the opening of the memorial missionary

churches over the spots consecrated by the martyrdom of the early Christian converts, and of the solemn dedication of the queen's chapel, letters from our correspondents in the island have given full and most interesting particulars. But the news which we publish to-day surpasses and crowns all that has gone before. The royal idols have been burned by the express order of the queen, the whole province of Imerina has declared its desire to be instructed in the truths of Christianity, and teachers have been sent to every village.

It may be gathered from the interesting communication of Mr. Pool that the destruction of the idols had been expected. When the foundation stone of the Chapel Royal was laid the fence round the house in which the great national idol was kept, in a village some seven miles from the capital, was pulled down. The keepers of the fetish hastened its doom by muttering threats of vengeance, hinting that the god had medicine and intended to use it. This was as much as to say that the queen would be poisoned. They came to court in their minacious temper, claiming their supposed rights as nobles. A Council of State was called, and while the protectors of the idol were detained in the capital an express was sent off in hot haste to end the imposture for ever. No opposition was made to the queen's commands. The people gathered round while the house was burned with a fire made with the materials of the broken fence, and curiously watched what would come of it. The appearances of the idol were first consumed. His long came, the bullocks' horns from which the sacred sprinklings were made, his three scarlet umbrellas, and his silk gown; then his case, and lastly the formidable deity himself who rendered the sovereign invincible, preserved from fire, from crocodiles, from infection, and in battle—the great god of Madagascar worshipped for generations, and the object of fear to thousands of people, was brought out. Scarcely anybody but his keepers had ever seen him, and when he proved to be a bit of shapeless wood, about as big as a man's thumb, with a couple of scarlet silk wings, it is not surprising to read that "all seemed astonished at his insignificance." The crowd, however, exclaimed: "You cannot burn him, he is a god," to which the Christian officers, superintending the holocaust, replied: "We are going to try," and while the sham deity was enveloped in flames it was held up on a stick that all might see him consumed. Other idols, with unpronounceable names, were burned afterward. One consisted of a small quantity of sand tied in a cloth, and another of three round pieces of wood fastened together by a silver chain. REV. LINUS PARKER, D. D.

To SUBSCRIBERS—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remittance the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

THE PUBLISHING COMMITTEE.

On next Saturday and Sabbath we expect the presence of several eminent ministers of our church from the neighboring Conferences. Our people, always ready for their entertainment, will doubtless be richly entertained by them on Sabbath, the thirteenth of February.

ALFRED HENNER.

The decease of this venerable citizen occurred on the nineteenth ultimo, in his eighty-fourth year. His mental vigor was unimpaired until death. A native of Maryland, he has lived here for fifty years. He was remarkable for his extensive and varied acquaintance with the science and practice of the law; spoke the French, Spanish and Latin languages, and was a student to the last.

"He was the oldest elder in the Presbyterian Church—the last of the few citizens who had welcomed and encouraged the earliest Protestant ministers in this city. Venerable and earnest in all the associations, the occasion of his burial witnessed the profound feeling of respect in which he was held by the survivors of a past generation, and by old and young of the present."

Rev. Wm. A. Smith, D. D.—Since the session of our Conference Dr. Smith has been in this city in a very feeble state of health.

For a time, under skillful medical treatment, he improved very much, and for several days in succession was able to ride out and visit his numerous friends. But venturing out in damp and unpropitious weather, he was attacked with a severe cold, which terminated in pleurisy, and for several days he was extremely ill. He was relieved of this by constant medical attention and the most assiduous nursing, and is now improving daily. The doctor converses freely with his friends, as far as his strength will allow, and manifests the deepest interest in all the religious and educational movements of the day.

It is most pleasing to the friends of the venerable doctor to listen to his words of wisdom and love. For Methodism he cherishes the ardent love of his youth, intensified by nearly half a century's experience of its excellency and power. Our venerable friend enjoys a most comforting religious experience, and his conversations are highly edifying and instructive. He feels an ardent concern for the success of the great educational plans which he has inaugurated in Missouri, and longs for the time when he shall be able to resume his labor of love. Let the people of God pray for the restoration of this eminent servant of the church.—*Richmond Christian Advocate.*

UNION—NEVER.

It would seem that the Methodist Episcopal Church has ceased to give us credit for ordinary sagacity, or she certainly would not present herself in such contrary moods and extremes of behavior for our admiration—at one time patronizing us, at another accusing us, then again overwhelming us with an excess of courtesy. We wish to give due credit to good motives, and yet are strongly tempted sometimes to attribute such approaches to conceit, simple and pure, imagining herself clear, fair and terrible; sometimes to contempt, undisciplined, for a shattered fragment of Methodism, exhausted by "slavery," "treason" and defeat; and sometimes to enmity, native, unconscious, characteristic cunning, that professes "union," strong and swift, in order to avoid fraternal recognition. A proposition may become repulsive by its unnatural excess. We do not expect a man to fall at once upon the neck or to bestow a kiss immediately after a period of continued and violent difference. It might be much more expressive of a sincere return to good temper if he would first shake hands. Preachers dwell much upon the "works" of a hearty conversion—reformation of manners and restitution of goods. But without any such works the Methodist Episcopal Church presumes to insist upon a prompt recognition of her avowed charity and fervent love for us. We reply by saying: "We are not equal to it; we have not grace enough to take you to our bosoms just as you are; we cannot honestly return this amazing warmth which you display; we do not understand you. Loose your grasp upon our goods—none which you once had, but which you now have—and we will try to see honesty in your face; your voice and your hands do not agree. We are not capable of such sudden revulsion in feeling as you seem to suppose; we have not such a flow of spirits as you seem to have; we are not flushed with charity and success, as you seem to be, and the utmost we can hope is bravely to walk, not leap, in the way we should go. We are ready to receive from you, to heartily receive, a fraternal recognition; not that we see in you anything specially attractive, but because it accords with our own sense of Christian duty. We are in no mood either to woo or be wooed by you; for anything closer than the relation which should subsist between one branch of Christ's church and another we do not desire." Our Bishops, in their reply to the Northern Bishops, embodied not only the mind, but the full measure of the charity of our people. We stand by that, and suppose that our General Conference will fully endorse it as the sufficient answer to all further propositions for union which may emanate from Northern Methodism.

The Methodist Quarterly Review for January contains an article, by the editor, upon the status of the "union" overture, which, coming as it does from one who represents the extreme right of the union party in the Methodist Episcopal Church, is worthy of extended criticism. From some cause it is evident that the long suffering of the Review has given way. Its spirit is fretful, its manner supercilious, and its statements well calculated to offend. We would remind its editor that one who presumes to lead public sentiment must expect small thanks by just so much as he is in advance of it. And though we do not sympathize with him in his heroic attempt, he must know that every true reformer should possess the spirit of a martyr. We quote as much as will give a fair idea of the way the mind of Northern Methodism is at present exercised toward us.

At the close of the rebellion, in reading the Southern Methodist papers, which started into sight like sudden stars in the dark firmament, we recognized—before the Southern politicians had done their fatal work—what appeared to us a spirit of humble penitence and of conciliation, so hopeful of a better future that we announced it to the North by several pages of extracts in our Quarterly. In our quarterly, in our

Conference, and in the preachers' meeting we earnestly, and at the risk of forfeiting our standing with our friends and the church, fought with all our power against the doctrine and policy of "disintegration and absorption" as both unchristian and impracticable. "What!" it was replied, "offer terms of communion with the guilty Church South! Look at her crimes. Two centuries of slavery blacken her skirts. She has sustained the human auction block. She has blotted out from her discipline all protest against what John Wesley called 'American slavery, the vilest system that ever saw the sun.' She has fiercely interdicted the liberty of speech; she has murderously denounced all opponents of slavery. To this she has added treason. There is scarce a man in her ranks not liable to a traitor's doom. And has she repented?" And now there is a much diminished number who say: "The Church South, in holding out to every remnant of oppression as long as possible. She deals out to the negro, as the negro himself testifies, every species of lying and treachery. Not until she is forced by Northern pressure does she grant one additional prerogative of manhood to her oppressed colored people—and she does not repent." * * * Release of grievances is generally an unsuccessful route to conciliation, and a very decisive indication that no conciliation is intended. To the whole our own reply has been, that guilty, awfully guilty, as the South has been, and still is, the North has been also guilty; that it is the frankly given fraternal hand that most easily leads to repentance; and that the true way is to drop our charges against each other and both kneel down in repentance, side by side, leaving God to decide how great our respective sins and how possible our pardon. To this point the large body of our church, we believe, have really come. But the leaders of the Church South are still counting up their charges: "You have done this and you have done that; and you must do this and you must do that, or we will not even fraternize with you." Heaven bless your dear sons, gentlemen of the Church South, we do not propose reunion because we need you. The Methodist Episcopal Church, in her clear, bright, well-read history before the acknowledging world, well knows that in offering to overlook your fearful history of sin, to cover your guilt with her comparative clearness, to sustain your weakness with her strength, and to lead you out from your outcast isolation into universal recognition, she is performing an act of high Christian magnanimity. The chief benefit would result to the Church South, to the general cause of Christ, to the peace of our common country, and, least of all, to us as a church. She meant what you little deserve in hearty good faith. But when you put on airs and bring charges, and prescribe conditions, as if you were the purists and the conquerors, you are simply giving evidence to the world that harmony is not your purpose.

* * * They are in heart and soul Southerners, but scarce Americans. The South is their sole country. Among the people these stubborn remnants of the old spirit will fast die away as fraternal fusion and commercial intercourse increase; among the leaders it will die when they die.

We know not what the Union Commission appointed by our last General Conference contemplates doing in view of the meeting, next spring, of the Southern General Conference, nor have we any advice to offer. Our belief is that it will be the desire of that body that its session should pass unnoticed by the commission, and that it will take any proposition as inviting another glorious rebuff. Its real wishes, we think, will be two—that disunion may be permanent, and that the responsibility of disunion may be avoided.

It is quite discouraging to be sought for by those who "need" us not, save only as an appendage, and indeed, to a body of six hundred thousand church members and several thousand ministers, quite humiliating. Such a statement, though chilling, may have been made for our good, to prick our conceit, and to let some bubbles out of our high-blown pride; and, for aught we know, those friends may keep back our property for the same beneficent end. And the editor of the Review, in saying we do "not need you," might have added, "but yours." It would have strengthened the sentence without impairing its truth, and might have suggested the somewhat similar language of St. Paul to the church at Corinth.

This readiness to pour itself out upon an unworthy object is without parallel, excepting in the one ever

memorable instance; and it is the fullest, largest illustration of merely human sympathy we can conceive of for a church that reckons itself to be so holy and strong, so "clear and bright in its history," to make a sincere offer of perfect union with another church that has "so fearful a history of sin" as ours is said to have—"with scarcely a man in her ranks not liable to a traitor's doom"—"guilty, awfully guilty," and still "without repentance." Yes, the Methodist Episcopal Church proposes, as "an act of high Christian magnanimity," to "overlook our fearful history of sin," "to cover our guilt with her comparative clearness," to sustain our weakness with her strength, and "to lead us out from an outcast isolation into universal recognition."

If we admit that the Methodist Episcopal Church is everything she ought to be, what have we done to her that she is called upon to "overlook?" Or is the more graciousness of such an office of itself a cause for gratitude? Now, if we have been guilty, let us fall into the hands of God, for his mercies are great, but let us not fall into the hand of man—no, not even into that of the "clear, bright, well-read" Methodist Episcopal Church. We are glad to see in her such kindness of disposition, but really we had supposed ourselves sinned against rather than sinning, and had been trying to keep ourselves up to the same lofty graciousness toward her for having forced our preachers at Nashville, Vicksburg, New Orleans, and elsewhere, out of their pulpits, and for many other various unneighborly acts we have suffered and still suffer at her hands. But it seems one cannot know himself, for here comes an offer from that church to cover our guilt with her "comparative clearness." That word "comparative" is well put, for we think that any higher claim would have defeated itself. Even low as this assumption may be of "comparative" innocence, we feel sure that our people would not exchange places this day with the Church North—no, not before the bar of God; they would not take her record, with her success, "clear, bright, well-read, world-acknowledged," as it may be; so that they are fatally blind to those virtues so prominently displayed. They see in her no surplus to spare—certainly none to "cover" the transgression of another. What guilt we may have needs something beyond such "comparative clearness."

Nor do we believe that, in the eyes of the religious world, she has anything "comparative" to spare. She came out of the war with garments "spotted by the flesh." Her history has been too "well read" to be misunderstood. She bent herself to Caesar, and with *lettre de cachet* went from point to point in her episcopal character, to seize and appropriate both churches and parsonages. Our "guilt" must be dark and deep to give to such a "history" any clearness, even by comparison, or as the Review has it: "Your fearful history of sin." Well, we can ask in simplicity, what is this fearful history? Is it that we found ourselves at birth in the midst of thousands of negroes that had been brought from Africa by the slave carriers of Old and New England, and sold to the South? Is this it, or is it that we resisted as long as we could the ent-throats who wished to turn our fair hand into a St. Domingo? who, failing in the John Brown raid in Virginia, transferred the attempt to Kansas, and then from that point to the whole South. Was it a fearful sin

* WAR DEPARTMENT, WASHINGTON, Adjutant General's Office, November 20, 1862.

To the Generals commanding the Departments of the Missouri, the Tennessee and the Gulf, and their subordinates, etc.,

You are hereby directed to place at the disposal of Rev. Bishop Ames all houses of worship belonging to the Methodist Episcopal Church South in which a local minister, who has been appointed by a loyal bishop of said church, does not officiate. It is a matter of great importance to the government, in its efforts to restore tranquility to the community and peace to the nation, that Christian ministers should, by precept and example, support and foster the loyal sentiments of the people. Bishop Ames enjoys the entire confidence of this department, and no doubt is entertained that all ministers who may be appointed by him will be entirely loyal. You are expected to give him all the aid, countenance and support practicable in the execution of his important mission.

By order of the Secretary of War, E. D. TOWNSEND, Assistant Adjutant General.

to resist men who came to rob, to burn, to kill and to ravage our homes with a brutality only less than that of a Comanche war? If this be our guilt, would to God we had more to answer for of the same sort! No, gentlemen of the Church North, excuse us; just at this point we do "not need you," nor can we conceive of any greater audacity of self-righteousness than this offer to "cover our sin" by a people whose hands are stained with our blood, the blood of their kindred, whose influence is hourly lent to a policy that degrades the white man before the negro, and turns the liberty of their country into a despotism.

Just after the war a million of dollars might have rebuilt some of our churches, cleaned the cinders from our burnt parsonages, and saved the families of our preachers from subsisting upon army rations, doled out by grudging commissaries; but that opportunity for "high Christian magnanimity" was not improved by the Methodist Episcopal Church. We do not now need "her strength to sustain our weakness."—Let thy gifts be to thyself, and give thy rewards to another.

That as a church we are in "outcast isolation" from the Christian world, is true. We have been ever since 1844. In this we stand with all Christian churches of the South—thanks to the fiery zeal that would have brought fire from heaven upon us if it could, but failing to do that, kindled it anyhow! We are "isolated," but we prefer to be introduced to the Christian world again, if we must be, under some other auspice, by some other hand than that of our well-satisfied friend. We have long since recovered from the bitterness of this death. The isolation of one million of Christians, Presbyterian, Methodist, Baptist and other, is not as lonely a condition as that of Alexander Selkirk. We can manage to provoke one another to love and good works, even if we have not fraternal access to the gentle North, or "an open way into fraternity with universal Methodism."

These advantages, it would seem, are not all that would accrue from the proposed union, for they are all on one side. There would be one other, and that on the main side. We let the Review state it: "To the entire united church it would present the means of a free national circulation, affording an interchange of ministers between the entire North and South." This is indeed the true object of all this persistent wooing—Northern Methodism wishes a national breadth. The few galvanized societies she has scattered about the South, and paraded in her statistics, may deceive others, but do not deceive herself. They have a "national" dilution, but nothing more. She wants for political ends to embrace every State in her jurisdiction—"our forces concentrated would blessedly affect our national doctrines." We beg to be excused again. There is not a society in the South, among our people, that wishes for or could endure the settled ministrations of a Northern minister, nor are there any ministers among us that would consent to take charge of any congregation of Radical Methodists. The plan suggested by Bishop Ames for breaking up and curing ecclesiastical evils, by transferring all the preachers from the locality, and supplying it with those of another mind from a distance, may be all very far-reaching, and no doubt would be promptly put into operation by Bishop Ames or Simpson, if they could get a fair chance at us; but those venerable men will die without the sight of any such providential opportunity for straightening out Southern Methodism.

In conclusion the whole tone of this Review article is offensive. It indicates that the writer has never seriously remedied his original antipathy to the South. If he will believe it, he is not capable of a clarity that he occasionally catches glimpses of and cannot but admire. Let him attempt not union, but fraternal intercourse. Let him be satisfied with what is possible, and is only possible even to himself. Whenever the General Conference day of his advent,

of the Methodist Episcopal Church North, squarely, not indirectly, sends to our General Conference a fraternal messenger—as squarely as we sent one to her—he will be received honorably, heartily, and with due brotherly love, as much as in us is. But all this by-play, this artificial work of attempting some impossible thing, as a substitute for an expression of fraternal interest, is unworthy the high parties interested.

NEW PUBLICATIONS.

From A. Eyrich, 130 Canal Street, XAMPEA'S POEMS. Philadelphia: J. B. Lippincott & Co. 1870. Beautifully bound. A 12mo. of 262 pages.

A collection of many fugitive pieces, contributions probably to some weekly newspaper—no doubt the fruit of many a dreamy, weary hour, in which poetic talent has wrought the elastic English into sonorous, even-measured lines, which give pleasure just in proportion to the harmony they find in the reader.

BIBLE (GENS.) OR MANUAL OF SCRIPTURE LESSONS. Philadelphia: J. B. Lippincott & Co. 1870.

We have not quite made up our mind that all Scripture questions books are a hindrance rather than a help to children in their learning the Bible. We know that questions made to hand encourage a merely mechanical method in the teacher, as they very considerably obviate the necessity for study. Then there is a rigid uniformity in the way in which every subject is presented, that deprives Sabbath school teaching of its great charm—the discovering how to interest children in the truth.

OLD AND NEW, FOR FEBRUARY. No. 2. By H. O. Houghton & Co., Boston.

This is the new monthly in the interest of the New England Unitarians. It gives a rich table of contents, and commands much literary talent. It is, of course, well seasoned with the inevitable gadfly of every Radical dish—"the negro and his breed." It shows great sprightliness than the Atlantic Monthly, and, at the same time, embraces a wider range of grave topics. One single sentence well indicates the spirit in which its political guest is written: "It is pitiful that these ex-rebels will not voluntarily walk in the good way; but if they do not choose the right we must constrain their footsteps"—a formula of those theories of government which now control the country. Subscription price, \$4.

THE HOME MONTHLY FOR JANUARY. The contributions by Dr. Green, Prof. Lupton, and many other well-known and highly gifted men and women, make every number of this periodical worth the full price of its yearly subscription. Nashville: Southern Methodist Pub. House.

GOOD WORDS FOR JANUARY. Published by J. B. Lippincott & Co., Philadelphia. Our frequent quotations from this monthly are evidence of our high appreciation of its pages. We know of no better family periodical.

To the Friends of Temperance in Mississippi.

Having been commissioned by the president of the Supreme Council of Friends of Temperance, vice president for the State of Mississippi, I earnestly exhort the friends of the cause of temperance to organize at once against the fell destroyer.

Applications for charter may be addressed directly, or through me, to Rev. W. B. Wellins, secretary, Suffolk, Virginia, enclosing for the fee \$5; for books, rituals, etc. I have just received several charters and a number of resolutions, and will respond promptly to applications. We propose to organize State councils as soon as practical. Applications for charter must be assigned by at least eight persons. Address me at Brookhaven, Mississippi. L. R. READING, D. V. P. F.

The coming of the Lord is one of the principal articles of our faith, and resting solely upon a promise. Scoffers will attack it till the day of his advent.

THE EVANGELICAL ALLIANCE.

The General Conference of the World's Evangelical Alliance will be held in New York in September next. It is thought that this biennial assembly will be more of distinction than have ever been assembled on this continent. The following is the programme, to which we cannot now attach the days of the month:

THURSDAY EVENING.—Social reunion of members and delegates in a public hall.

FRIDAY.—Organization of the alliance.

1. Address by the president of the General Conference.

2. Welcome by the president of the Alliance of the United States.

3. Reports on the state of religion in all the countries represented.

SATURDAY.—Religion and civil government.

1. The teachings of history upon the relations of church and state.

2. Present state of religious liberty in the States of Christendom.

3. Civil recognition of religion, support of churches and organized charities.

4. Religious aspects of popular education in all Christian countries.

5. Legislation for the protection of the Christian Sabbath, suppression of vice, and promotion of morality.

6. Constitution and government of the United States in its relation to religion.

7. Correlation of conscience and citizenship.

SUNDAY.—Morning.—Sermons in all the churches opened to the alliance, by foreign preachers.

Evening.—Public services for addresses and prayers in several churches, and in German, French and English language.

MONDAY.—Romanism.

1. The doctrinal principles of Romanism and Protestantism compared; authority and freedom; the rule of faith; justification.

2. Romanism and civil liberty.

3. The temporal power of the papacy.

4. Jesuitism.

5. Best methods of evangelizing Roman Catholic countries.

6. Lessons to be learned from Romanism.

TUESDAY.—Rationalism and infidelity.

1. Conflict of evangelical theology with rationalism and pantheism in Germany.

2. Rationalism and ritualism in England.

3. Materialism and positivism.

4. Rationalism in the United States; Unitarianism, Universalism, foreign infidelity.

5. Mormonism, spiritualism, communism, etc.

6. Best methods of meeting the infidel tendencies of the age.

7. Science and revelation.

8. The spirit of sect—its value and limits.

WEDNESDAY.—Theology of the Reformation.

1. Statement of the theology of the Reformation, and the distinctive errors repudiated by the reformers.

2. History of the Protestant doctrine in Europe since the Reformation era, and its present identity or contrast with the theology of the Reformation.

3. History of the Protestant doctrine in America since the Reformation era, and its present identity or contrast with the theology of the Reformation.

4. Relation of the theology of the Reformation to the present forms of error and infidelity.

5. Theology of the Reformation in relation to civil liberty, social progress, and church unity.

6. Best methods for insuring more cordial recognition and wider acceptance of the theology of the Reformation.

THURSDAY.—Foreign missions.

1. Protestant and Roman missions compared in their principles, methods and results.

2. The conversion of Mohammedans and the reformation of the Oriental churches.

3. Missions to civilized pagan nations.

4. Missions to uncivilized and decaying races.

5. Lessons of experience in conducting missions.

6. Relations and obligations to each other of different societies and boards in prosecuting their work.

FRIDAY.—Home missions.

1. Denominational and co-operative efforts in home missions, including a view of the progress of home missions in our country.

2. Evangelization of great cities.

3. Revivals of religion; how to promote them and make them most productive of good.

4. The evangelization of the foreign element in the United States.

5. The freedmen in the United States.

6. Mutual relations of home and foreign missions, and their comparative claims.

SATURDAY.—Social evils and their treatment.

1. Poverty, and systems for its relief.

2. Divorce; laws and consequences.

3. Crime; causes and remedy.
4. Prison discipline.
5. Treatment of the insane.
6. War and its prevention.
7. Intemperance.

SUNDAY.—Close of the Conference. Morning.—Sermons in various churches in New York, Brooklyn, Newark, and vicinity.

Evening.—Closing service of the Conference, with addresses and prayers in each language represented.

"LOOK HERE!—STRIKING FIGURES."—Under this heading our readers will find in an advertisement on our fifth page some substantial evidence of the high esteem in which the *American Agriculturist* is justly held by its readers. This journal will undoubtedly prove very serviceable to every one who adds it to his stock of practical, reliable, instructive reading matter.

Married.

On the nineteenth of January, 1870, at the residence of Mr. R. M. Smith, Clow Hill mission, by R. A. Davis, Mr. J. Denley Sloan and Miss Lucy Penny, all of Tazewell county, Mississippi, by Rev. J. V. Pointer, on Thursday, the twenty-seventh ultimo, at the residence of the bride's father, Mr. Sidney Bonham to Miss Annie Williams, all of Vermilion parish, Louisiana.

Obituaries.

Died, in Greenville, Mississippi, at 2.45 A. M., January 4, 1870, Rev. JAS. MACLEAN, aged fifty-nine years.

I am unable to collect sufficient data for preparing an accurate or connected memorial of Brother Maclean. I hope some one who has known him longer than I will undertake that; but I will write a running sketch of the prominent incidents of his life, and an account of his last hours.

He was born in Scotland, some time during the year 1810. In childhood and youth he attended, first, a common school, and then a classical institution in Aberdeen, making himself a good Latin and Greek scholar. For five years after the completion of his literary education he studied law in a lawyer's office, immediately after which he came to America. He first engaged in business in New York as clerk—for how long I do not know. The next I know of him is that he brought a flatboat load of Western produce down the Tennessee river, and lived in north Alabama a while. Then at different times he lived in Grenada and Vicksburg, Mississippi, New Orleans, Louisiana, and Jackson, Mississippi. He was living in the latter place, serving in the bank, when he received license to preach.

He was raised in the Presbyterian Church, but while living, I think, in Grenada, Mississippi, he was converted under Methodist influence, and joined the Methodist Church. When he felt called to preach he was receiving a good salary from the bank in Jackson, and had the promise of \$600 a month to act as cashier. But he surrendered those flattering prospects, and, obeying the call of duty, cast in his lot with the Mississippi Conference. For thirty years he was a Methodist preacher, filling, during that time, some of the best appointments in the Conference. Twice he was connected with female schools under the Conference patronage—once with the school at Port Gibson, and once with that at Sharon. He located once for a short time, and the last year of his life was superannuated; but for at least twenty-six years he stood in an effective relation to our Conference.

He was strict and punctual in attending to the duties of his ministry. He would not hesitate to ride through rain or snow, or to swim creeks, in order to reach an appointment. While preaching on Greenville district, in years when the country was overgrown, he always made a "digout," and would paddle himself from one end of the district to another, without fear of being lost in the wild swamp forests, stretching sometimes fifteen miles without a clearing. His constitution seemed to be of iron, and he had resolution that would never yield to obstacles. Few of us young men either can or are willing to endure as much "hardness" as he endured while bordering on sixty years of age.

In July, 1869, he was taken with diarrhea, which prostrated him, and soon became chronic. For six months he was an invalid, but endured his sufferings with much patience and hopefulness. Those who saw him at our late Conference will recollect how enervated and feeble he appeared. For a week after returning from Conference he seemed to improve, until taken violently with pneumonia, which ended his life in a few days. His mind wandered a great deal; but when rational he spoke of his disease with composure and resignation, and expressed entire

reliance on Christ for salvation. The night he died he asked: "Do you feel confidence in Christ?" "O yes," I have no hesitation in resting on him," he said in a feeble, broken voice. He then added: "I never lost my trust in God, and he alone sustains me now."

As I sat near his bed his hard breathing grew more quiet by degrees, until I could not hear it; when, approaching him, I found the breathing had ceased and the pulse had stopped. Death had stolen upon him. There was so much vigor, such unconquerable tenacity in him that I could hardly realize that he had so gently yielded himself at the summons of death. But to him who has faith in Christ the summons is welcome—death only opens the door to a larger life. The chrysolis breaks its narrow, imprisoning shell, and is free among the beauties of the broad earth. And so, when let loose from the body, we shall fly away, to be with God in his kingdom above.

Brother Maclean was twice married—to Miss Bonsey and to Mrs. Leavel, both of Jackson. Each left him a daughter. We commend them in their orphanage to God, and to the kindest sympathies of his people.

BACHELOR'S HAIR DYE.

The best in the world; does not contain lead; no violent poisons to paralyze the system or produce death. It is perfectly harmless—reliable—instantaneous. Avoid the painted and deceptive preparations boasting virtues they do not possess, if you would escape the danger. The genuine W. A. Bachelor's Hair Dye has thirty years' reputation to uphold its integrity. Sold by Druggists. Applied at 16 Canal street, N. Y. Jan 24

WHAT EVERY HOUSEMAN WANTS.—A good, cheap and reliable Lignum—such an article is Dr. Tobias' Ventolin Lignum. Put in bottles at \$1. For Lameness, Cuts, Galls, Colic, Sprains, etc., warranted better than any other. It is used by all the great horsemen on Long Island courses. It will cure Rheumatism or Sprains, as there is no Lignum in existence that will. What is stated to cure it positively does.

No owner of horses will be without it after trying one bottle. One dose relieves and often saves the life of an overworked or driven horse. For Colic and Bellsache it has never failed. Just as sure as the sun rises, but so sure is this valuable Lignum to be the Horse Embroiderment of the day.

Use it once and all. Sold by the Druggists and Storekeepers throughout the United States. Depot, 10 Park Place, New York. Jan 24

SUNBEAM.

BY MRS. C. A. MEANS.

May's golden curls were closely pressed
Against the misty window pane;
Two soft blue eyes intently watched,
While slowly dropped the drizzling rain.

"Papa has come! I see him now!"
He hears the sound of pattering feet;
A joyous shout salutes his ear,
And welcome words his footsteps greet.

"Ah! Sunbeam, glad to see papa!"
On father's knee she quickly climbed,
And many a kiss for answer gave,
While round his neck her arms she twined.

"How much I love you, dear papa!"
She said, with soft and tender voice;
Then stroked his cheek with fond caresses,
That made his weary heart rejoice.

May Sunbeams shine in all our homes,
And shed around their cheerful light;
Their gracious words, their loving ways,
Can make the darkest day so bright.

—Little Corporal.

ALLAH'S GIFT.

Hassam Ben Ali kept a snug little shop in one of those shadowy bazzars leading out of the narrow sun-steeped streets of the Khan Khaled. He was married, and doated upon his wife. She had borne him a young family. Not in all Cairo could be found prettier children than those which clustered about Hassam Ben Ali's knee. It was quite a treat to look at them; even the passers-by would tarry and gaze up at the open fretted lattice above the street, where, amid a thicket of little flower pots, like stray bits of sunshine, their sweet, merry faces could be seen peeping out. Hassam's heart was at first glad and thankful; but by and by, as years went on, dark colors interwove themselves with his thread of life. He became moody and sad.

"What aileth thee, O brother?" said a neighbor, one afternoon, when quiet had settled on the street, and business had abated. "What aileth thee, Hassam? Thy steps are bent—thou walkest not upright as heretofore."

"Oh! Saadi," replied he, "this is a bad world, a heartless world—I am sure of it. My soul is torn by domestic cares. Come, take thy chibouke, sit down on my musnud, and I will tell my sorrow. Mayhap thou shalt comfort me."

So Saadi sat down and gathered up his feet, and the struggling traffic of the street passed on before them. When the chiboukes were satisfactorily alight, and the first few whiffs blown off in becoming silence, Hassam told his grief.

"Customers," he said, "had been faithful. He was not so rich as, with his talents, he might expect to be. In the early days of marriage his way was prosperous; business promised increase; he could then treat his wife to little pleasant surprises, hire donkeys and be driven through the happy summer fields to Boulaq, or go sailing in the sweet and dim freshness of autumnal evenings, under the palms on the silver waters of the Nile. It was all different now. Business had not increased, but his family had; and in good sooth there was little more to keep them on than a simple fare of bread and beans. Yes, it was a bad world, and that was the truth."

"Listen," said Saadi, "listen, O neighbor, to the tale of one who has passed through the same stormy waters of unbelief in which I perceive thou art struggling. I have been even as thou. Listen. In my youth I feared that Allah's providence was nothing but a name. I labored and toiled, prayed and wept; but a frugal fare of beans and bread was my portion. My children had just enough to nourish and clothe them—that was all."

"Well, as I lay awake one night, breaking my head over these hard matters, a man came to my bedside. 'Saadi,' said he, 'I have brought you riches at last. Here.'"

"And with a slam, as if it were very heavy, he bounced down a chest in a corner of the room. I recognized it at once to be a casket such as contains treasure. It was bound about by two iron clasps, and locked. 'Here is the key,' said the man. 'Take it; but mind, open not till such time as thou hast absolute need; otherwise thou wilt find it empty. When thy last piastre is spent, and thy little ones lack bread, then unlock the chest. But until then—no!'"

"How gladly I thanked him! I bowed my head to the earth. 'Hush!' he said; 'it is the gift of Allah. I am his messenger. Get to thy bed. Scared at these mysterious words, much as I wished to question the stranger, my tongue would not wag; but he, when he was departing, turned him about as one who had forgotten half the message. 'O Saadi,' he said, 'I have one thing more to tell: If by the end of ten years thou hast had no need to open this, neither thou nor thy children lacking bread—why, then, unlock the casket and take that which is therein.' And so this strange messenger departed."

"From that time forward I walked with my head upright; for I knew that, let the worst come to the worst, I had always something to fall back upon. The neighbors said: 'Saadi, the merchant, has received treasure; behold how contented he is!' But in truth it was only that I had something in store to rest upon. Business went on much the same. I ate my bread and beans as usual; but now it was with a thankful heart and restful temper."

"By and by, however, as my sons began to grow up, money came in faster, so that, much as I wanted in the early days of my good fortune to peep into the chest, it came about that, when ten years had gone by, I had almost forgotten that I possessed such a thing."

"One day, however, I bethought me of it, and sought it out. It was covered with cobwebs and dust. 'Where is the key?' I said to my wife. But immediately I remembered to have hidden it myself in some secure nook, lest the mother of my children might, in a fit of temptation, be induced to disobey the injunctions of Allah."

"And now, what thinkest thou, O Hassam, we found in that casket? My wife and family stood eagerly around, expecting treasure. 'Jewels,' said my daughters. 'Gold,' said my sons. But lo! all that we discovered was a piece of musny parchment, with these words written thereon:

"Use well what thou hast, and thou art rich; true wealth lies in the using. Furthermore, the thing that Allah purposes for thee is better than the thing thou hastest after. Therefore submit, trust, and be thankful."

"That was all. That was the treasure I had been counting upon, and which, in good sooth, procured for me a quiet and contented mind. Allah supplied me with the rest."

"Verily, O Saadi," exclaimed Hassam, when his friend had finished, "Allah is great! This is a wonderful tale of thine! The echo of it has fallen on my heart like light through a morning mist. Go thy ways. I will ponder on what thou hast said."

And so the friends parted. Hassam, it is supposed, laid to his soul the lesson that there is, after all, a living providence watching over men, and that rest is to be got in this life only by trust.—Foreign Magazine.

The Farm and Garden.

FARM WORK FOR THE MONTH.

Now is the time for the farmer to mature and determine his plan of operations for the year. Success depends largely upon the adoption of a well ordered system and a punctual adherence to it, leaving nothing to chance which prudent foresight can avoid. The first thing to be settled is to "pitch the crop," determine how much land is to be cultivated, and what portions of it are to be devoted to cotton, corn, small grain, potatoes, etc. In doing this, taking it for granted that the farmer has secured his laborers for the year, or has ascertained how many hands he is likely to have, he should make his calculations so as to allow not more than fifteen acres to each full hand. This is quite as much as the generality of the best freedmen will attend well. To attempt to cultivate a greater number of acres to the hand is to run the risk of cultivating all badly. One acre thoroughly prepared, well planted and perfectly cultivated will pay better than four acres scratched, planted in a hurry and insufficiently worked. Over-cropping is one of the most fruitful sources of failure to the farmer.

His crop pitched, the next thing to be done is to prepare to execute the plan, and in this direction the most important operation is plowing, giving attention first to fallow and stubble lands, plowing deep, turning over and covering all vegetable matter, and breaking the subsoil of as much of his land as his means will allow. In plowing land that was in cotton last year the old cotton stalks should be plowed under and covered. In nine years out of ten they will be sufficiently decomposed not to interfere with the roots of the young crop. They impart some fertilizing property to the land, they help to lighten stiff clay soils, make the field look neat and tidy, and they are out of the way of the plows and sweeps in the early working of the crop.

PLANT PLENTY OF CORN.—It is to be hoped that the experience of the past year has taught farmers the imprudence (to use the mildest word) of planting "all cotton and no corn." The calculations on paper of raising a five hundred pounds bag of cotton to the acre, to sell at thirty cents per pound, and thus enable the farmer to buy as much corn as twelve or fifteen acres would yield, have proved so painfully delusive that we trust no one will put faith in them again. The farmer who plants "a plenty of corn" always has well conditioned stock, has abundance of good meat, never

borrow money and receives none but friendly visits from the sheriff.

—CLOVER.—Clover should now be sown with oats or with rye for seed, or it may be sown on wheat land in good condition. It is now an ascertained fact that clover can be successfully grown at the South, and it is universally admitted that apart from its value for hay it is the best and cheapest fertilizer that can be used. A gallon and a half (two gallons are better) of seed obtained from a reliable seedman should be sown and lightly brushed in, if sown with oats or rye, or sown and left on the surface of wheat land just before a rain.

MANURE.—This is the time to haul to the fields the farm yard manure and the compost heaps. Where the farmer has a large quantity of it, and every careful farmer has—this is a heavy and tedious job, and should be commenced at once. All rotted manure should be spread and covered immediately, so that it may be in a proper condition to yield wholesome food to the young crops in the spring. If the manure is intended to be applied to the cotton row or hill of corn it should be covered where it is dropped with a thick coat of earth, to prevent the loss of its most active fertilizing properties by exposure to the sun and wind. The gathering of manure from every available source should still receive attention. The manure heap is the planter's bank of deposit, and the larger he makes it the larger will be his income.—Southern Farm and Home.

A NEW ROPE is one of the most unmanageable inanimate things that a farmer is called upon to use. By simply boiling the rope in water for two hours all trouble can be avoided, and the rope made as soft and pliable as if used for months. Its strength is not diminished, but its stiffness is gone. It must hang in a warm room until thoroughly dried, and must not be allowed to kink.

Scientific.

The mistake is by many rejected as an inmembrane, by others it is condemned as unscientific, and it has even been described as "the lip in mourning for the brain." There may be as much folly shown in the disposition and parade of this appendage as in the use of any article of factitious adornment, but there are sanitary reasons why it should not be indiscriminately condemned. Why hair was appointed to grow on the lip and chin it may not be so easy to explain as it is to give good reasons why some people should cultivate both mustache and beard. The upper lip is intimately connected, through its nerves, with the eye. A false stroke of the razor, or a dull one, will draw tears, or give sharp pains to the eyes, as many a man knows by experience. In some the effect of constant shaving is to weaken the eyes, so that oftentimes physicians are constrained to prescribe a mustache, and patients find that it brings relief. Many ministers are obliged to face public opinion, and wear the appendage for this reason, and probably there are many more who should do the same thing. The beard has an object in protecting the throat, which is too obvious and too well proved by experience to need defense on the part of those who deem it proper to allow their hair to grow.—Scientific American.

Too Much Science.—The poor Welsh fustling girl died after eight days' watching to see that she took no food, as she or any other human being must have done. It has been a cruel business from first to last—cruel chiefly on the part of the parents, who made gain by her hysterical temperament, which enabled her to live with such small quantities of food that it could be given to her without the detection of the public—but cruel also on the part of the vicar, the surgeons and the people round, who, instead of treating the matter with contempt, allowed it to grow into a mischievous importance by examinations and reports, and then to expose the imposture set up an elaborate machinery for watching, which could mean nothing else than preventing the conveyance of food. The surgeons and nurses will have to explain how it was that when they saw the girl manifestly sinking before their eyes they did not insist on the administration of nourishment, instead of making themselves parties to the poor creature's starvation.

A PRODIGY.—Near Wurtensburg, Johnson county, in Missouri, resides a poor widow woman, who has a son, Reuben Field, a mere boy, untutored, and seemingly almost incapable of literary culture, who yet possesses most remarkable powers of mental calculation. As evidence of this, among many other evidences that might be cited, a gentleman of St. Louis, who has heard of his possessing this faculty, sent him the following figures, viz: 145, 145, 145, 145, asking him to square this number mentally, that is to multiply the

number by itself, and send him the result, with the time taken to perform it, secretly believing, however, notwithstanding the extraordinary accounts related to him, that he would be incapable of the task. In this, however, he was mistaken, as were others to whom the proposition had been named. A letter has been received by the gentleman named, from a highly respectable citizen of Warrensburg, who states that in three minutes' time the boy Field mentally and accurately pronounced the result: 21,067,113,159,163,117,071,025, or, written in words: Twenty-one sextillions, sixty-seven quintillions, one hundred and thirty-nine quadrillions, one hundred and sixty-three trillions, one hundred and seventy millions, seventy-one thousand and twenty-five.

Though such exhibitions of mental powers of calculation as the one exhibited in the above are not altogether unheard of, they are, nevertheless, exceedingly rare. In this instance it will appear all the more marvelous when it is stated that this boy, Reuben Field, is almost entirely uneducated. Indeed, the letter referred to above says that Field maintains it is "of no use for boys to go to school, as he can't learn anything, and never could." In fact, except in this matter of calculation, in which he is a marvel, he is said to be "very ignorant in all other matters," lazy, uncouth, disposed to wander idly from place to place, and worst of all, perhaps, "is very fond of drink." Yet, the letter states, "he can repeat the eighty-seventh line in multiplication backward and forward, and does many marvelous things in calculating mentally."

Let those who think the solution required in the proposition given above cannot be a difficult one, because rendered by an illiterate and uncultivated boy, call to mind that this solution, by the usual forms of multiplication, requires the use of 191 figures, 144 multiplications, 23 additions and 15 combinations of figures, and that this, by the ordinary process of multiplication, is to be performed and retained in the mind until the process is completed. When they realize this, or attempt the solution itself, they will very likely come to the conclusion that Reuben Field is a prodigy in mental calculations.

Love the poor. Be great and seek little things; don't be little and seek great things.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements also to the extra height of the Oven under the fire-chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS, the Extended Back with cast iron Enamelled Reservoir, Front, Top and Warming Closet, Griddle Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the Reservoir. The Reservoir, being detached from the pipes, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR HOUSEHOLDS COAL OR COKE

ever invented. In the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR,

which can be seen at 62 Camp street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra large Ovens, Oven Doors lined with tin, and furnished with William Hestor's Patent Air Chamber, sliding front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

The Christian Advocate.

SATURDAY, FEBRUARY 5, 1870.

THE SOURCE OF THE NILE.

The geographers of Christendom are felicitating themselves upon the discovery of the fountains of the old river, and upon the solution of the mystery which has for ages baffled inquiry and thwarted investigation. It is to be feared that these paeans are premature. To Livingstone all honor. He is among the first of adventurers and explorers, and his renown will be cherished to the latest ages. But he has not laid hand upon the urn from which the waters of the mysterious river emerge, nor plucked from old Father Nile the secret shrouded from the curiosity of forty centuries. The old river-god holds it yet undiscovered and inviolate. Of course, we know approximately where its floods originate. So did Ptolemy, and that ancient geographer is at one with Livingstone. The latest explorer corroborates the earliest geographer, and puts to shame the purblind gazetteers of modern times, who have taught us to believe that the river took rise amid the snowy ranges of the Mountains of the Moon. Speke and Grant and Burton have exploded many of the topographical bubbles blown by the map-makers; and each new explorer thought he had finally got at the heart of the matter. But lo! the venerable river, eluding their furthest search, still stretches away amid the wilderness and mountains of the untraversed continent, and its native fountains still sing their melodies unheard. Egypt is gone. She is become the land of oblivion, and doth. The line of her kings is dust. Mizraim cures wounds and Pharaoh is sold for balsam; Canopus is afar off and Monnon resoundeth no longer to the sun. And the eighty nations to whom the mighty river rolled sustenance, and along whose thresholds it poured its psalm of plenty, are departed; and the columns are fallen which the builders dreamed would outlast the desert and the Dog-star; but the river, whose source was a mystery to Choops and Psammetichus, is, in spite of Livingstone and Burton, a similar enigma to the Khedive and the kings of Abyssinia, as well as to Sir Roderick Murchison and the rest of us. Father Marquette thought he had an inkling of the sources of the Mississippi, when the real fountains of the river, which are those of the Missouri, were separated from him by the breadth of half a continent. It is quite likely that subsequent research may disclose that the chain of lakes which Dr. Livingstone identifies as the mother floods of the African river have their tributaries—unknown, unmeasured and mysterious—winding from the gorges of mountains laid down on no map and named by no geographer, and flowing through wildernesses which are now as untraversed as they were in the days of Strabo, and as they bid fair to be in the age of the geographer of the future. The fastnesses of that torrid continent are not easily stormed. After all the effort of travelers and explorers, we are said by astronomers to know less of its surface now than we do of that of the moon.

However, the interests of science are adequately subserved by the great discoveries which Livingstone has actually made. His contributions to the geographic knowledge of Africa are of the most valuable kind. If he has not stood at the edge of the snow line upon the slopes of the unknown mountains, and seen the sacred fountain in which old Nilus takes his rise, breaking up through walls of cloven granite, and leaping forth crested with foam and glittering with equatorial light, as if its birth foretold the majesty of its career, he has at least made nearer approach to the fountain head than any other traveler. Persons whose imaginative powers transcend their range for exact inquiry, will be rather glad that there is one genuine mystery left to us. The glory of looking upon the source of the Nile, of cataloging the reeds which border it, and classifying the sacred mops which cling to the branches of its overshadowing trees, would not counterbalance the shame of sending away the veil, more awful than that of Isis, which has hung before it since the slinging-together of the morning stars. —New York World.

USE OF DR. SHALLENBERGER'S

FEVER AND AGUE ANTIDOTE

ALWAYS STOPS THE CHILLS.

This medicine has been before the public for many years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and is the only medicine that will

Cure immediately and Permanently every form of Fever and Ague, because it is a perfect Antidote to Malaria.

MEDICINE—MEDICINE.

DIANE NEW LETTERS!

FRESH TESTIMONIALS!

DAIRY'S PROPHYLACTIC FLUID.

THE ASTONISHING FAMILY MEDICINE.

Saved from Death—Read!

MONTGOMERY, ALA., June 28, 1869.

Messrs. J. DUNN & Co., 101 WILLIAM ST., N. Y.—Gents: Yours of the 23d is before me, and has attracted my attention. It gives me pleasure to say that my belief is that your Fluid, under the supervision of a kind Providence, saved the life of my youngest child, some six years ago, the child being wasted, and in a state of the effects of teething, and an affection of the bowels therewith. I had never seen any one reduced so low to recover.

Physic had been tried in vain, until the physician stated it was useless. A friend recommended your Fluid, or Dounce, which he stated was one of the component parts of it. I did so, and the effect was like magic, plainly discernible in one hour in its good effects, producing quiet and sleep almost at once, where irritation and sleepless restlessness had previously possessed the child to nearly entire exhaustion.

I at first administered it in a small way, two and three drops in a spoonful of water, and gradually increased it to six and ten drops. It promptly checked the bowels, and I had the happiest effect, the child rapidly recovering.

I have tried your Fluid on animals, with the same effect. Both horses and cows mingling more or less in water, and letting them drink.

I have no hesitation in saying I believe it a specific for Cholera, Diarrhea, or any violent affection of the bowels.

I would not be without it in my family under any consideration. Yours truly,

WILLIAM FOWLER.

Mr. Fowler is a member of the celebrated Banking House of Fowler & Somerville, Montgomery, Alabama.

AND AGAIN!

Read the following letter from Mr. Frank Saunders, a well known citizen, and brother-in-law of the beloved Bishop Paine, of the Methodist Episcopal Church South:

159 Broadway, N. Y., July 29, 1868.

Messrs. J. DUNN & Co., 101 WILLIAM ST., N. Y.—Gents: About the fall of June last, my children were taken with Scarlet Fever, in its most malignant form, and as soon as I could I procured your valuable medicine, Dair's Prophylactic Fluid. Although it was several days after the appearance of the disease before I began using the Fluid, still by a free use of it the disease was not only confined to the one case, but the malignancy of that case somewhat mitigated.

During the use of the Fluid as a disinfectant in my family it was also tried in a case of hemorrhoids and one of toothache, the results in each case being instantaneous relief. It was afterward tried in a case of Erysipelas, with almost equal success.

It is due to the merits of this compound, also, to state that the case of Erysipelas, which was located in the feet, the Fluid, in its application, was brought in frequent contact with a troublesome corn on one of the feet, to the utter discomfiture of said corn, for upon subsequent examination it had disappeared, and though it was sought for diligently it could not be found.

I hand you this, hoping it may be the means of relieving others of our poor sufferers to test for themselves, as I did, the great merits of this great remedy.

Very respectfully yours,

FRANK SAUNDERS.

Never was a medicine so universally esteemed and extolled. It never fails. It may be depended on.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE.

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here specially qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the late, Dr. J. H. Walker, of New Orleans, has charge of the Mathematical department.

Fees: Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together.

A practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN,

sell by

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

6. Boarding department excellently kept.

7. Pupils

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The wholesale trade generally has exhibited an increased degree of animation, since our last report, from filling country orders and sales to merchants from the interior who are replenishing their broken stocks. Sugar and molasses have come forward less freely, but the former has continued dull and drooping, and ruling at unsteady prices. The latter has been in good request for the better qualities, while the lower grades have been heavy and depressed. The movement in Western produce has been of moderate extent, and mostly confined to the local trade.

The tributaries are still at a good navigable stage, and the receipts of cotton continue liberal. With the prevailing sensitiveness with regard to the crop, the large receipts at all the ports, as well as at our own port last week, excited a general disposition to raise estimates, and parties who have been regarded as long crop men, and put their figures at from 2,700,000 to 2,750,000 bales, jumped at once to 3,000,000, while those who had looked for little or none over 2,600,000, raised their ideas 100,000 to 150,000 bales.

The river has risen ten inches since our last, and is now three feet six inches below high water mark.

COTTON.—The following are the arrivals since the twenty-eighth ultimo: Louisiana and Mississippi, 221,555; Lake, 11,669; Mobile, 2,098; Florida, 2,098; Texas, 3,623.

Total 240,822

On Saturday the sales were confined to 1,600 bales, at irregular prices, the bulk of the business showing a falling off of $\frac{1}{2}$ to $\frac{1}{4}$ c. in some instances figures being accepted $\frac{1}{2}$ c. below Friday's quotations. On Monday the tendency was even more in favor of buyers, and the business during the morning was at still easier rates, but of only limited extent. Later in the day, however, finding that the movement could not be kept up unless at further concessions, factors were compelled to accept still lower offers, which brought out some buyers, and 4,000 bales changed hands, at figures showing continued irregularity, but closing at a further decline of $\frac{1}{4}$ to $\frac{1}{2}$ c., low middling being quoted at 23 $\frac{1}{2}$ to 24c, against 24 to 24 $\frac{1}{2}$ c. on Saturday, and 24 $\frac{1}{2}$ to 24 $\frac{1}{2}$ c. on Friday, and middling at 24 $\frac{1}{2}$ to 24 $\frac{1}{2}$ c. on Saturday, and 24 $\frac{1}{2}$ to 24 $\frac{1}{2}$ c. on Friday. On Tuesday the market opened with a pretty fair inquiry, but buyers claiming further concessions, and a moderate business was done during the morning, partly at previous rates and partly at a further decline. Later, however, the reduced figures accepted stimulated the demand, and the movement became more animated, resulting in sales of 7,700 bales, at very irregular prices, Liverpool low middling, for example, selling as low as 23 $\frac{1}{2}$ c., and strict as high as 24 $\frac{1}{2}$ to 24 $\frac{1}{2}$ c. The bulk of the business, however, was on the basis of 23 $\frac{1}{2}$ to 24c. The discrepancy in prices may be partly attributed to difference in classification, which appears to be more marked than usual, and rigid buyers for the North and the continent are compelled to pay what are regarded as extreme rates.

This makes an aggregate for the past three days of 13,900 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 631,829 bales, against 571,406 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 360,206 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 166,715 bales to Great Britain, of 16,575 to France, and of 44,313 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary 214 to 224
Good ordinary 224 to 234
Low middling 234 to 244
Middling 244 to 254
Strict middling 254 to 264

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales 770

Arrived past three days 240,822

Arrived previously 646,533—668,735

Exported past three days 12,827

Exported previously 462,960—475,807

Stock on hand and on shipboard, 189,098

MONEY.—Gold opened on Tuesday at 121 $\frac{1}{2}$ to 121 $\frac{1}{2}$ c. (against 121 $\frac{1}{2}$ at New York), and closed at 121 $\frac{1}{2}$ to 121 $\frac{1}{2}$ c. (against 121 $\frac{1}{2}$ at New York).

No sales of silver have been reported. American half dollars are quoted at 119 to 120, and Mexican dollars at 1 $\frac{1}{2}$ to 2 cent. premium in gold.

CATTLE MARKET.

NEW ORLEANS, Feb. 1, 1870.

Texas cattle, choice, per head \$45 to 60

Texas cattle, second quality, per head 30 to 40

Texas cattle, third quality, per head 18 to 25

Special Notices.

The Publishing Committee of the New Orleans Christian Advocate.

This committee has not been called together since the meeting of the General Conference, because in the financial state of the office there was nothing it could do. To be able to support an editor was one of the conditions necessary to the electing one. Then the expenses of such a committee should be borne by the office—another question of finance. These are simply the reasons why this call has not been made yearly. There was really nothing to do, or that could be done by the committee. As the Advocate feels somewhat like standing on its legs, or at least like stretching them in a preparatory way, we give notice that there will be a meeting of the Publishing Committee directly after the patronizing Conferences shall have all adjourned—say on the second Saturday in February next.

Meridian District, Mobile Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Meridian, Jan. 15, 16

Enterprise, 22, 23

Pearce's Springs, at Pearce's Springs, 29, 30

VOL. XVI.

NEW ORLEANS, SATURDAY, FEBRUARY 12, 1870.

NO. 4.

NEWS OF THE WEEK.

DOMESTIC.

CITY.—Carondelet street was more animated yesterday than at any time this season. Up to noon scarcely above an average quantity of cotton had changed hands, but later the demand became exceedingly active, the sales running up 12,300 bales; the heaviest day's business since the opening of the present commercial year, prices closing steadily at Tuesday's quotations. The next largest business this season was on the fourteenth of January, when 11,000 bales were sold. The heaviest sales last season were 17,000 and 14,000 bales, the former on the third of February and the latter on the fourteenth of January. The large sales of the season of 1867-68 were 11,500 and 11,400, on the seventeenth of February and fifteenth of March. 12,400 bales were the "brag sales" of 1866-67, and those of the two years before 10,000 and 5,400 bales respectively.—*Pineyune, Feb. 10.*

WASHINGTON, Feb. 4.—Among the nominations made by the President to-day was that of Dr. Sam. Bard, late of Atlanta, Georgia, to be Governor of Idaho.

FOREIGN.

The news from Paris is more than usually important. France has averaged a revolution every twenty years, and Napoleon has been on the throne about that long. It is not unlikely that his health is feeble enough to invite the attempt of the Republicans.

PARIS, Feb. 7, 7 P. M.—Henri Rochefort, editor of the *Marseillais*, was arrested at Belleville, in the eastern part of the city, at an early hour this evening. His friends and partisans are assembling in great crowds in that quarter of the city, and serious troubles are expected.

PARIS, Feb. 8, 2 A. M.—The troubles at Belleville are of a serious character; the streets are filled with shouting people, and barricading has commenced. A detachment of the imperial troops arrived in the vicinity of the disturbance at eleven o'clock.

PARIS, Feb. 8, 3 A. M.—Barricades have been erected on the Rue du Faubourg de Temple, Rue St. Maur, Rue Grange aux Belle Sand and other streets in the vicinity of Belleville. The scene of the disturbance is near the Northern and Strasbourg Railway stations.

At half-past eleven, P. M. additional detachments of troops had arrived, but up to this hour no fire-arms have been used.

The troops in the garrisons of the city have received orders to hold themselves in readiness to march at a moment's notice.

Such are the precautions which have been taken by the police, and the military, that it is believed a riot will not be attended with any serious consequences.

PARIS, Feb. 8, 7 A. M.—The troubles at Belleville lasted all night, and have extended northward to the La Villette, the extreme northeastern arrondissement within the fortifications.

The troops have not yet resorted to the use of fire-arms. The police are active, and many arrests have been made. Beyond the excitement which is naturally incident to such an occasion, the rest of the city is entirely tranquil. The government still continues taking precautionary measures to prevent outbreaks elsewhere.

PARIS, Feb. 8, 8 A. M.—The police attempted to carry the barricade at Rue du Faubourg de Temple, and were repulsed with a loss of one killed and one wounded. Barricades have been erected elsewhere, but are not defended.

The troops are out in full force, but have not used arms. At this hour all is quiet. Many persons have been arrested, who are mostly boys under the influence of liquor.

PARIS, Feb. 8, Noon.—Rochefort was arrested entering a political meeting. He made no resistance and no appeal to the crowd. When his arrest was known at the meeting, the wildest scenes occurred.

Gustave Flourens, who presided, drew a sword and fired a pistol, declaring the insurrection had begun. Barricades were commenced, and the omnibuses and other vehicles from the neighboring streets were appropriated to this purpose.

The commissary of police, who accompanied the guard which arrested Rochefort, was carried off with the crowd and maltreated.

The district lying between the Rue du Faubourg de Temple and

the fortifications, a distance of about two miles, is held by the rioters.

The insurgents pillaged the armories at three o'clock this morning. Three hundred arrests are reported. Gustave Flourens is in custody.

This evening in the Corps Legislatif, Keratry (Liberal) demanded to know why Rochefort had not been arrested before five thousand of his partisans had gathered, and said that it was not necessary that this meeting should be disturbed and the people participating aroused to violence; that the conduct of the government was provocative of a disturbance.

The ministry replied that an arrest at the chambers was forbidden, to avoid the scandal which his arrest here would have caused—that the friends of Rochefort were prepared to make the demonstration which they had made; and upon this fact the ministry would rest the responsibility of what had occurred.

PARIS, Feb. 9.—The disorders were resumed last night at midnight in the vicinity of the former disturbances, and several additional barricades have been erected in the narrow streets. The troops still reserve their fire. The police made several charges, killing some of the insurgent leaders. Gustave Flourens is still at large.

PARIS, Feb. 9, 3 P. M.—The police and the military have the riot under control. The city at this hour is tranquil.

All the editors of *La Marseillaise* have been arrested. The printer refuses to put the paper to press.

The city is quiet to-night. A large police force are patrolling the streets.

LONDON, Feb. 8.—Rochefort's arrest and its consequences make a sensation. The rumors about that the troops fired on the people are discredited.

LONDON, Feb. 8.—The queen opened Parliament to-day with a highly conservative speech.

PORT-AU-PRINCE, Jan. 18.—The work of the military commission which tried Salnave and sentenced him to death is not yet ended. The cases of several of his generals, and of the most prominent and influential of his friends among the civilians, yet remain to be disposed of in Port-au-Prince, and in most of the southern towns the shooting of Picquets is going on briskly. At Jeremie a large number of those unfortunate people have been put to death, and at Jacmel more than forty of them are in prison, doomed to die on an early day. The spirit of vengeance has been fully roused, and the victorious revolutionists have expressed their determination to crush out the Salnave party. The Cacos are crying out for blood, and unless more moderate and merciful counsels should prevail than those ruling at present, a reign of terror may be expected at Hayti.

THOMSON'S ROAD STEAMER IN PARIS. The Paris correspondent of the *Times* writes: "We have had, one of the road steamers, with India rubber tires to the wheels, invented by Thomson, of Edinburgh, running through the streets of Paris within the last few days, dragging behind it a heavy Versailles omnibus with fifty passengers, compared to which the six horse-power engine looked like a steam tug towing an Indian-man. On the report of the French government engineers, leave has been granted to the road steamer to ply over two routes, several miles in length, and including some busy parts of Paris. The engineers report it more handy and manageable than horses, and in no way dangerous to the public."

AN INSTANCE is related of a pious Irishman who was discovered by a priest reading the Scriptures in a cabin to some poor Roman Catholics, who were delighted with hearing the precious truths of God's word. When the priest came in he asked him, in a most dictatorial tone: "How dare you read the Scriptures to any of my flock?" "Please, your reverence," said the man, with the readiness with which an Irishman is always distinguished, "I have got a search warrant to do it." "Produce it," said the priest. "I am sure that it cannot be from the bishop or his holiness, the pope." "No," said the Scripture reader, "it is from God; and here it is in John v. 39: 'Search the Scriptures.'"

The triumph of woman lies not in the admiration of her lover, but in the respect of her husband; and that can only be gained by a constant cultivation of those qualities which she knows he most values.

Another Outrage Contemplated.

We do not know whether Mr. Conway, the superintendent of education, has ever been actually employed in teaching, but if that be the case, he is certainly the most ambitious and aspiring pedagogue of whom there is any historical record.

He claims to be put into complete possession of the youth of all colors and both sexes, in order that he may, under his patent new process, complete their education on his own model, disregarding what he, and his abettors in their monstrous pretensions, appear to look on as absurd prejudices on the part of the parents of white children as to religion and social intercourse. Mr. Conway dares to ask that he be clothed with power to compel the mingling of the sexes in all public schools, where they are to be instructed by teachers of his own selection, and use text books which he knows to be extremely and justly obnoxious to the tastes and convictions of this State. He seeks to be made a monarch in the school system, and from present indications he will get from our pure, patriotic Legislature all he desires. Our educational antecedent will thus be doubly gratified, for not only will he have the opportunity for extending the "moral idem" system, under which he was bred, but a splendid chance to put money in his pocket through arrangements with Northern school-book publishers.

The bill which is designed to effect his objects was taken up in the House of Representatives. When the fourth section was reached Mr. Wiltz offered an amendment, the object of which was to restrict the sweeping grant of power to the superintendent and his subordinates to control schools supported by the State itself, so as to protect public schools maintained by religious denominations, and paid for by their friends; and he made a forcible speech, showing their right to such exemption. But he was not heard, and his amendment failed. Then Isabella, a mulatto member, moved an amendment extending the general grant in the section so as to provide that all public free schools should be opened to children, irrespective of race, color, etc., and it was adopted.

Thus we are to have fixed on us a system of mixed schools, whether they be State, parish, municipal or denominational.

Now it is well for Conway, and his backers and subordinates, to know that no such thing will ever be submitted to by the white people of Louisiana, and that it cannot be enforced by all the militia or regular troops at the command of Governor Warmoth.—*Pineyune.*

AN OPEN-POLAR SEA.

Prof. J. B. Maury, in a very interesting article in *Putnam's Magazine*, expresses his belief in Dr. Kane's open Polar sea, and that it can be easily reached by following the Gulf stream, which will give open water all the way. He asserts, on the authority of the Transactions of the Royal Society of London for 1775, that two Dutch whalers in 1655 penetrated to the Pole itself. He quotes from a captain of an American whale ship, who says he had gone "several hundred miles to the northward and eastward from Behring's Strait, and three hundred miles beyond the limit of his chart, and with an open sea still before him, as far as could be seen in that direction." Kotzebue, in 1815, says, as he attempted to pass to the west round the coast of Asia, "The sea was open to the northeast as far as the eye could see," and Commander John Rogers, of the United States North Pacific Exploring Expedition, in 1854-55, says of the same waters: "As far as I went to the northward and eastward, beyond the Straits, I had an open sea, with a current flowing to the northward, and with a temperature of the water much above that due to the latitude." Prof. Maury holds that there is a Pacific warm current sweeping through Behring's Straits to the Pole, to correspond with the Atlantic Gulf stream, which sweeps around Spitzbergen, and that by either of these routes the Pole may be reached in safety and an open channel found between the Atlantic and Pacific.

In confirmation of his theory, he fronts of birds and fishes and seaweeds as "dumb guides to the Poles." He shows that birds feed only on grain and marine plants, and cannot endure the winter cold of the Atlantic coast, have been seen flying northward beyond eighty degrees of latitude; and that vast quantities

of marine vegetation are carried by the Gulf stream toward the Polar sea.

The argument is well put in his article, and we may be sure that some enterprising navigator will never be content till the truth of his theory is tested, and it is known whether there be an open current flowing into an open Polar sea.

FIGARO tells two new stories of the pope. A lady of Lyons comes into his presence, closely veiled in black. "What do you wish?" asked the supreme pontiff. "Your benediction, holy father." The lady made vain attempts to raise her veil; the pope stretched forth his hand. "Holy father, wait a moment." "Do you believe," said he, smiling, "that my benediction cannot penetrate that thin veil?" And he continued the formula. The second anecdote concerns an American lady—a Protestant—who desired the blessing of Pius the Ninth upon an armful of beads. "Is that all?" patiently asked the pope. "Holy father, your photograph." "Here it is—anything more?" "Your autograph, if you please, upon the *carte de visite*." The pope hesitated a little, but signed, nevertheless. "Now is there any other favor you were going to ask?" "Oh, holy father, give me, if you will, the pen with which you wrote your name." This was too much even for the pope's good nature, and he said: "Yes, take it. Carry away the penholder too. Here, take the inkstand!" The American coolly rolled all the articles up in an old newspaper, carefully placed them in her carpet-bag, and departed with a sweet smile and a reverence to the pope. "What a great people, nevertheless!" exclaims the *Figaro*.

The list of sovereigns arranged according to age is headed by the name Pope Pius IX, who is in his 78th year. Omitting the petty princes, the ages of the other sovereigns are as follows: King William of Prussia, in his 73d year; King John of Saxony, in his 59th; the Emperor Napoleon in his 63d; King William of Holland, in his 53d; the Emperor Alexander, of Russia, in his 52d; Duke Ernest, of Sax-Coburg and Gotha, in his 52d; Queen Victoria in her 51st; King Victor Emanuel in his 50th; King Charles, of Wurtemberg, in his 47th; the Emperor Don Pedro, of Brazil, in his 45th; King Charles, of Sweden, in his 44th; the Grand Duke Frederic, of Baden, in his 44th; the Sultan of Turkey in his 40th; the Emperor Francis Joseph, of Austria, in his 40th; King Leopold, of Belgium, in his 35th; King Louis, of Portugal, in his 32d; King Louis, of Bavaria, in his 25th; and King George, of Greece, in his 24th. These nineteen are all that are worth considering as sovereign princes actually reigning.—*Exchange.*

I know somebody who always appears to be miserable, and this is the way she contrives to be so: thinking always about herself; constantly wishing for that she has not got; idling away her time; fretting and grumbling.

I know somebody who is much happier, and this is the way she contrives to be so: thinking of others; satisfied with what her heavenly Father has judged best for her; working, caring for somebody else besides herself, and thinking how she can make others happy.—*British Juvenile.*

AN ARTIFICIAL LEECH.—Dr. A. H. Smith, of Philadelphia, describes in a medical journal a new contrivance to be used in lieu of the natural leech, as simple as it is novel in its construction. The artificial leech consists of a light glass tube, from which the air is expelled by the vapor of ether, a small quantity of the latter having been previously introduced and partially vaporized by dipping the tube in hot water. The skin having been scarified, the tube is applied, when the condensing vapor leaving a partial vacuum, into it the blood rushes, relieving the patient as effectively as the ordinary leech.

The other day X. called on Madam Q., in Paris. "Madam, can I see your husband?" "No, sir; he is out at present. He went out to buy a cigar." "Did he say when he would return, madam?" "No." "Has he been gone long?" "More than twenty years." "Ah! I see," said X., "I wanted to get a good one."

Time is gold; throw not a minute away, but place each one to account.

RECONSTRUCTION.

* * Reconstruction is the text. We transfer the word, its relations and suggestions, from its political and civil ideas and uses to Christian relations and personal duties.

The church needs reconstruction. Not in its organic principles or spiritual agencies, but in its aggressive powers and practical operations. Its registers need revising. It must "purge out the old leaven." It has too many decaying and dead branches. The pruning knife has been too little used. The pure, spiritual life is too much obstructed to produce much fruit, or bring the little it yields to perfection. It needs reconstruction on its old first principles. We have drifted away from the old doctrines of personal holiness. The old fires of love for Christ and zeal for the salvation of souls, which once burned so flamingly on its altars, have gone out; and the cold ashes of a formal profession, and "a name to live" while the heart is dead, are all that is left of its life and love. We do not measure up to the standard principles and statue-height of spiritual life. All seek their own things, not the things of Christ. Personal religion is too general, too abstract, too indefinite. It is aimless and lifeless. It has no self-denial, no heart-sorrows, no prayer-agonies, no soul-longings. When we surrendered the class meeting we gave up the habit of watchfulness, self-examination and prayer, the frequent contemplation of death and the cheering hope of heaven. These old habits have become obsolete in faith and practice. "Ease in Zion" is the characteristic and curse of multitudes in the church. We have grown sedate, affect decorum, are dying of respectability; and, unless the Spirit breathe on us and revive our hearts, will soon be as dead in religion as the world is dead in sin. Then, in the old times, the presence and "the power of the Holy Ghost," and the conversion of sinners, stimulated and satisfied our desire for excitement; now we seek "the sensation" in great organs and grand music, popular preachers and large, fashionable congregations. Churches are estimated by the numbers attending them; and ministers measured not so much by intellectual power and spirituality, as by capacity to draw and to please. Spiritual edification is less sought than mental gratification. Taste predominates; it supersedes the fear of the Lord; substitutes both the hope and the joy of salvation.

There are exceptions to these general statements. Here and there a handful—an humble few—"precious children of Zion, comparable to fine gold," but "esteemed as earthen-ware," known and loved in heaven more than on earth. It is well that there is a remnant, else the church would stagnate. Ten righteous Lots would have saved Sodom. "A few names, even in Sardis," held back the vengeance and prolonged the call and the time for repentance. These, with their prayers and faith and love, preserve the vital energy of the church. The oil that keeps the spiritual machine in motion is generated in the faith and patience of these saints. If there were more of them we would witness greater works of grace in the outpouring of the Spirit, and wider, more regular and more glorious manifestations of the power of God unto salvation than the church of these last days has yet seen. Christendom would experience a Pentecost; and the gospel would run and be glorified in all the earth. These "sons under the altar" are held down, and spiritual power held back, by the selfishness, covetousness and love of the world, of the multitudes "who have a name to live and yet are dead."

Thus saith the Lord: "Woe to them that are at ease in Zion." Who estimate the weight of this woe, or measure the duration of "the wide, reprobating wrath" that follows when and wherever it falls? Let church sluggards heed its warning voice.

The pulpit needs reconstruction. Not in personal character, nor in soundness in the faith, nor yet in sincerity of desire to do good and glorify God, do we impeach the pulpit or its occupants. We bring no accusation against brethren well beloved in the Lord. We only desire to bring them back to the old themes, to rekindle the old fiery earnestness of preaching, to re-awaken the old *vim* of word and spirit, born in the soul when it was born of God, and baptized with the blood of the cross—the old eloquence of tears and love that drew its inspiration and its power from "the fellowship of Christ's suffer-

ings," and poured forth a tide of sympathy that stirred the pulse of a new life in the hearts of "the dead in trespasses and sins." "There were giants in those days, men of renown," mighty through God in saving souls. Their motive power was sympathy with Christ, and sincere love for those for whom Christ died.

The world was a valley of death, filled with the dry bones of the dead. It was their duty and prerogative to evoke these dry bones into life. This was their calling of God. They were conscious of a spiritual presence, and of the presence of the spiritual forces, "as workers together with God," and they preached with an unction of love and earnestness—an afflatus of conviction that the word of the gospel was the power of God unto salvation, whenever and to whomsoever it was preached. They were saviors of souls; sent to save; preachers of salvation. Saved themselves, they strove to save others. They preached for present results in salvation; sowers and reapers at the same time. They believed in God—believed in the day of judgment—believed that Christ died for sinners—believed in the forgiveness of sins through repentance and faith in Christ. The love of Christ constrained them to preach a present, free and full salvation to all and for all. Were they wrong? Let the results testify. What multitudes heard the word with joy, and believed it to be the saving of their souls. We have the same gospel, yet fresh and full in its provisions and promises; the same motives to stimulate efforts; the same "terror of the Lord" as an ever-present and intimate reason for persuading sinners to repent, believe and be saved. Why, then, is there so little fruit in the awakening and conversion of sinners? The true view of the gospel—its object, its end, its power as a means of saving sinners—compels the conclusion that the true and faithful preaching of the gospel of Christ produces conviction, and conviction precedes conversion as the electric flash precedes the thunder; and that salvation is in preaching as electricity is in the cloud. So the apostles preached: "The Lord working with them, and confirming the word with signs following." Why is it not so in these times? Let all who "preach the word" think on these things.—*Richmond Christian Advocate.*

The surest road to poverty is to hoard up treasure. The surest road to wealth is to bestow liberally where it is most needed. The miser is the poorest man on earth; the most liberal man is the most wealthy. If, therefore, you would be rich, do not aim at riches, but simply use what you already possess for the greatest possible good of the greatest possible number.

Men and women make their own beauty or their own ugliness. On our features the fine chisels of thought and emotion are ever at work. Beauty is not the monopoly of blooming young men, and of pink and white maids. There is a slow growing beauty, which only comes to perfection in old age. Grace belongs to one period of life, and improves the longer it exists.

COMMUNION with God must ever hold a higher place than service for God—secret fellowship with God must never be put out of its place by public engagements, even in godly things. There are many who are ready enough to perform showy acts of service apparently for God, who doubtless would find little craving after private communion with him.

PROGRESS!—Nine years ago Jefferson Davis stood up in the United States Senate, and announced the secession of Mississippi from the Union. He resigned his seat at the close of the speech. That seat was, on the twenty-first ultimo, again filled by W. H. Revel, a colored man.

I hold that seeking the good of others gives a man tact, makes him amiable, and fills him with the most exquisite sense of propriety. He knows how to do good in the right way. There is over so much Scripture against doing good with noise and racket.

NOT LONG since an ingenious individual managed to get drunk free of expense, almost daily, in the streets of London, by falling down in a fit, with a small placard on his breast, "Don't bleed me, but give me a glass of hot brandy and water."

The Christian Advocate.

SATURDAY, FEBRUARY 12, 1870.

SAVIOUR OF THE DYING THIEF.

"And Jesus said unto him: Verily, I say unto thee, to-day shalt thou be with me in paradise."—Luke 23, 43.

Jesus saved the dying thief—
Welcome news for one like me!
Now I know there is relief,
When the world no hope can see;
Saved by grace, by sovereign grace,
By the cross I'll take my place.

Saviour of the dying thief,
Lo! a wretch as vile as he,
Filled with shame, remorse and grief,
Draws his hope, O Lord, from thee:
In the view of so much grace,
Can despair at all have place?

Nothing but the richest grace
Could relieve a wretch like me;
This alone could reach my case,
And I see this grace in thee:
Saviour of the dying thief!
In thy love I find relief.

LETTER TO DR. C. K. MARSHALL.
THE YOUNG QUESTION: DO SUNDAY SCHOOLS
SO JEALOUSLY ATTEND CHURCH?

DEAR DOCTOR: Your high position as one of the oldest and most learned of the ministers of our church gives great weight to all statements you may make, and fears that you may express.

It also involves a great responsibility, and what you present as facts should be facts beyond possibility of denial; and whatever evil may exist in a prominent church institution, that causes you to tremble, should excite lively apprehension in the minds of her membership.

In a late letter to the *Baltimore Methodist*, concerning the session of the Mississippi Conference, you mention the subject of Sunday schools as one considered on that occasion, and use the following important expression: "I begin to tremble for the working of our Sunday school results."

After detailing the usual exercises of a session of the Sunday school, and calling attention to the physical, mental and moral fatigue caused thereby, you assert, with italic emphasis, as the legitimate and immediate result:

"Many, perhaps the majority, of our Sunday school students go home when school closes, and do not return to hear the sermon."

You then inquire: "What is the result, in the end, of this course of education?" and submit as the fearful answer:

"As soon as the youths are grown out of the Sunday school they are lost to the congregation, the church, the school and the choir. They never had any church-going habits. They went to Sunday school. Now they don't like sermons." And having acquired habits of loitering about while their good parents were worshipping God, they loiter on for years, and are lost from the church. The Sabbath school ruined them." The italics are your own.

Now, doctor, after subjecting your article to a fair and critical analysis, we understand you to assert:

1. That the working of our Sunday school results begin to give cause for trembling.

2. That the effect of the exercises and instruction of the Sunday school produces in many, perhaps the majority, of the Sunday school students the habit of neglecting church.

3. That the result is, the Sunday school ruins many, perhaps the majority of Sunday school scholars.

These are grave and serious charges, and as such we have endeavored to give them a careful and honest consideration, and have arrived at the deliberate conclusion—

That the three propositions are erroneous; that they are unfounded either in fact or inference.

1. We think, as the reverse of the first proposition, that the church has more cause for congratulation and rejoicing, because of the increased prosperity and rich rewards of her Sunday school institution, than in any former period of her history. In fact a great Sunday school revival prevails throughout the Christian world, and the Sunday school is assuming a primary position in the evangelization and salvation of mankind.

Its officers and teachers, as the result of more extended research and fuller requirements of scriptural

knowledge, are assuming the functions of public teachers, and laymen are rising in usefulness with the divinely called ministers of the gospel. The Sunday school has assumed the missionary spirit, and is leading the way for the preaching of the word and the establishment of churches among the poor, and in the most destitute and wicked portions of our cities and country. The piety and usefulness of the membership is being increased largely through its instrumentality. Time, talent and money are given to God and the church, that have heretofore lain dormant or been entirely unrequited. In fact, the Sunday school is taking a position as the main support and promotion of the active piety and zeal of the church.

Numerically the church is receiving her largest accessions from the Sunday school, and in our populous cities the question is seriously raised whether the church would be able to hold her present numerical status but for its instrumentality.

No cause for trembling, my dear doctor; but let us lift up our voices in loud hosannas to the God of Sunday schools, and mingle our praise and unite our efforts with the shouts and labors of the thousands of active, working, praying Sunday school teachers who are gathering the children for the Lord.

2. We deny that Sunday schools produce the habit of neglecting the church.

Look over any of the congregations assembled for public worship, and we venture the assertion that three-fourths of all the persons present, professors and non-professors, saints and sinners, are now or have been connected with the Sunday school as pupils or teachers.

We mention teachers, for we claim that the Sunday school includes them also in its training and influence.

This proportion is too great to be accidental, or to be other than the effect of a direct cause. The Sunday school furnishes the church-goers, else why do not church-goers come from some other quarter? If Sunday schools create the habit of neglecting church, how can the fact be explained that Sunday school attendants go to church more than any other class of people?

The actual arithmetical analysis of the congregation, the simplest deductions of reason and the plainest sequences of logic, deny it.

We are willing to subject our schools to the same examination that we have given the congregation, and challenge the denial of the proposition: That one-half of all the teachers and scholars who belong to our Bible classes, and advanced and intermediate departments, are regular attendants at church; that the large proportion of the other half are irregular attendants; and that but a small number are habitual neglecters of church. We do not claim that our infant departments are church-goers, for we have not yet advanced them to the duty of regular attendance upon public worship, but are feeding them now with "the sincere milk of the word;" but from past experience we confidently claim that the earlier we can subject to Sunday school training the more certainly they will love the house of God.

We have inquired of the Sunday schools in the country, and get the information that almost every scholar that comes to the Sunday school remains to church; that where there are large and vigorous Sunday schools there are large congregations and prosperous churches.

But for fear a conclusion from general estimates might be questioned, we have furnished ourselves with the actual figures, as taken from the records of the Methodist Sunday school and church in Columbus, Mississippi.

The records of the school show a present membership of two hundred and fourteen; of these sixty-two are in the infant classes, and under eight years of age, leaving one hundred and fifty-two to be the subjects of our examination, and which results as follows:

Teachers and scholars, one hundred

and fifty-two; church members, sixty-eight; church-goers, one hundred and forty-three; not members, eighty-four; neglecters of church, nine. Turning to the records of the church we find upon the register the names of two hundred and eighty present members; of these one hundred and ninety-four are now or have been connected with this Sunday school. Taking all the records we could collect, extending into the time when this church was on a circuit, and when our whole Sunday school system was in its infancy, and consequently weak and unattractive, and we can gather about twelve hundred names, and of these about seven hundred have been connected with this school. How many may have belonged to schools elsewhere, of course, we could not find out.

These figures have been collected as carefully as possible, and this school and church are but average examples of the Sunday schools and churches in the country.

We find, from this examination, first, that of all the names upon our past church records in Columbus, twelve hundred in number, to which we could apply the test of personal knowledge, about fifty-eight per cent. of them are now or have been connected with the Columbus Sunday school. Second, that sixty-nine per cent. of the present membership of the church are now or have been members of this school; and third, that forty-four per cent. of the present school are already in the church; that ninety-four per cent. attend church, and only six per cent. habitually neglecting it. This small number are children, generally, of irreligious parents, and irregular scholars.

We do not pretend that this proportion is in attendance on any one Sabbath. This would be impossible. We consider sixty-six per cent. a fair average Sunday school attendance, and it is reasonable to expect that those who are hindered from coming to school will be also kept from church. Quite a number also who attend school, from various and perhaps good reasons, are compelled to go home, thus reducing the attendance still lower; so that a fifty per cent. average attendance upon church is in harmony with our figures, and fully up to reasonable expectation. We claim that our figures demonstrate that the Sunday school started a majority of its members to church; that the congregations show a majority in attendance; that the church records show a majority among the membership.

Again, we have seen the kneeling board of our altar, the steps of our pulpit and the seats in the gallery crowded with children who could not get better seats. The least religious excitement at the church gathers them by scores, and they crowd in at our revivals with a zeal that is often rebuked by their pastors.

The minister that draws the grown people to church will draw the children also. The popular pastor is popular with the Sunday school. Children will attend church under more difficulties than any other class of people. They are generally assigned the meanest seats in the house, and are less favorably noticed than any other church-goers. If the church is crowded the children are driven out; if a boy or girl is the least restless, or should make a noise, he is sure to become the target for the preacher's remark, or some church officer's notice.

Parents and teachers are sometimes afraid to carry their children to church on account of the sensitive nerves of some dyspeptic clergyman, or exceedingly precise brother or sister. They are not generally expected to take part in any of the church exercises; they are not expected to sing, for fear of making discord with the choir; they are not expected to pray, for the prayers are usually in language above their comprehension; they are not expected to listen, for what is said is not intended for them.

But we have not space to present the argument from the various standpoints, and conclude this branch of the subject by reasserting that Sunday school children, so far from being neglecters of church, are the

most numerous, the most resolute and the most enthusiastic of all the classes who attend.

The last proposition is, that the Sunday school ruins many, perhaps the majority of Sunday school children.

This we also deny, and at the same time, under this head, are prepared to admit all the facts and inferences that a specious and unfair argumentation may demand. We admit that many Sunday school children do not become church-goers; that many do not love sermons; that many are lost to the church; that many are ruined.

No institution should be held responsible for a character it never pretended to possess, or for results it never pretended to accomplish.

The Sunday school never pretended to be an omnipotent instrumentality, nor a universal savior. It never pretended that it could or would make every single scholar, whose name might appear upon its rolls, a regular attendant upon church, or effect the conversion of all the thousands who pass its portals, and that, too, in spite of every opposing obstacle or counteracting influence.

It does claim to be a most powerful agent to accomplish these ends, and that its legitimate results are the preservation of the children to the church and their final salvation.

Will any man argue that because there are exceptions to a rule that claims no infallibility, that the rule creates the exceptions? Will any man argue that the Sunday school ruins the children when the children are ruined by some other cause, in spite of the Sunday school? Does any man contend that the Bible ruins all who read its pages and are not instructed thereby; that the gospel ruins all who hear and are not saved by its provisions; that the ministry ruins all who are not converted by its preaching; that the church ruins all who are not saved by its means of grace? The Bible, the ministry and the church ruin nobody. Something else ruins them, in spite of the saving power of these great agencies. And so with the Sunday school; some other cause ruins the children—the example of wicked parents and evil companions, the previous bad habits, the world, the flesh and the devil are the fruitful agents of ruin, and must be responsible for the deplorable result.

If your propositions are true, doctor, your suggestion of a change from a morning to an evening session appears to us a feeble and inefficient remedy. More than this will be required.

But we trust our presentation places the whole subject in a different light, and that so far from having a desperate case, we have a most hopeful condition of affairs, and all that is necessary is the more vigorous and continued use of the present means.

Your brother in Christ,
W. L. LIPSCOMB,
COLUMBUS, MISSISSIPPI.

ALABAMA CORRESPONDENCE.

MR. EDITOR: The brethren write "News from the Churches" in the summer, but these items are rare in the winter. But can we not gauge the strength and zeal and fidelity of a church better by its winter status than its autumn condition? The winter in Kentucky and in the North is a time of revival; with us it is a season of hibernation. Sunday schools go into winter quarters; and it seems harder to ride through the mud to church than to any other place? Is not the mud stiffer and deeper on Sunday than any other day? Are not Sunday ruins heavier and more dismal than those of the week?

Tuskegee circuit is said to be a "splendid" one. So it is—in the summer solstice. Now it is thirteen miles to W. In July it is twelve. Now we perform two circuits—one around the mud and one under it, making in all a full mile further than when the dog star reigns. The brethren in Pike, Lowndes and Butler counties understand how this muddy feature dims the splendor of a first class circuit like this. Only three times in the month

doth this deponent try these underground passages along the great itinerant highway, obeying the divine command: "Go ye," etc.—You recollect Marengo county in February. This is a fraction better.

This work has suffered much from the exodus toward Texas. Nearly half of one of our best churches is gone. There is a remarkable movement too toward the towns. Where we are losing Texas and Tuskegee are gaining. There is not a house to rent in this place. The Tuskegee Female College, under President Price, is swelling to its antebellum proportions. The spring term begins to-morrow, and the principal informs me he has one hundred and fifty-one on the roll. The senior class is very large, and the spirit of study and good order prevails. Our town puts on new life. Real estate is advancing. Before there was much advance the circuit bought a parsonage here; nearly half the purchase money has already been paid. This is very liberal, considering that \$2,096 had been raised last year for the pastor's support and the three collections. Our church raised last year nearly \$900 for various purposes. But we have lost some of our most active officials and best members by removal. Our statistics will show a net loss of seventy. We have dismissed enough members with letters, for one single county in Texas, to form a good large church, and they are of our best material.

A church that raised \$700 for missions, in 1861, now musters about thirty-five members.

The freedmen hereabout demand high wages. Some are paying them half the crop. The advance is steady from year to year. What they may demand another season none can tell.

Brother E. S. Smith, of the Tuskegee station, is breaking ground well. The completion of the new church is the all-engrossing subject with his congregation now. Brother Blue is detained from his work, for the present, by the continued sickness of his daughter. He goes to the district soon.

May prosperity attend you and the Advocate. I heard a young Baptist brother say to-day: "This is the best religious paper I ever saw," meaning the NEW ORLEANS CHRISTIAN ADVOCATE. This I write to encourage you.
Yours,
B. B. R.
TUSKEGEE, ALA., Feb. 1, 1870.

"Now squirm, old natur!"—A stingy Christian was listening to a charity sermon. He was nearly deaf, and was accustomed to sit facing the congregation, right under the pulpit, with his ear trumpet directed upward, toward the preacher. The sermon moved him considerably. At one time he said to himself: "I'll give \$10," again he said: "I'll give \$15." At the close of the appeal he was very much moved, and thought he would give \$50. Now the boxes were passed. As they moved along his charity began to ooze out. He came down from \$50 to \$20, to \$10, to \$5, to zero.

He concluded that he would not give anything. "Yet," said he, "this won't do—I am in a bad fix. My hopes of heaven may be in this question. This covetousness will be my ruin." The boxes were getting nearer and nearer. The crisis was upon him. What should he do? The box was now under his chin—all the congregation were looking. He had been holding his pocket book in his hand during this soliloquy, which was half audible, though in his deafness he did not know that he was heard. In the agony of the final moment he took his pocket book and laid it in the box, saying to himself as he did it: "Now squirm, old natur!"

This was a victory beyond any that Alexander ever won—a victory over himself. Here is a key to the problem of covetousness. Old natur must go under. It will take great giving to put stinginess down. A few experiments of putting in the whole pocket book may, by and by, get the heart into the charity box, and then the cure is reached. All honor to the deaf old gentleman. He did a magnificent thing for himself, and gave an example worth imitating, besides pointing a paragraph for the students of human nature.—*Presbyterian.*

There are people whose good fortune it is never to be deceived or undecieved, save when their interest requires it. The way the right becomes dim or luminous to them is always marvelously opportune

TEMPERANCE.

THE NECESSITY FOR ORGANIZATION.

MR. EDITOR: Permit me to occupy a small space in your valuable columns with a brief appeal to the friends of temperance everywhere. Ponder, first, a few well authenticated statistical facts:

There are six hundred thousand drunkards in the United States. Of these sixty thousand die every year. One hundred thousand men and women, under the influence of intoxicating liquor, are sent to prison every year.

Two hundred thousand children are sent to the poor house.

Three hundred murders are yearly committed.

Four hundred suicides are yearly committed.

The proportion of deaths of those who use these drinks to those who do not, according to carefully kept records in England and America, is four to one.

Life insurance companies refuse to issue policies on the lives of the intemperate.

When cholera or any pestilential fever prevails nearly all the subjects are of those who use intoxicating drinks. In proof of this Dr. Camwright says that five thousand of the intemperate died of yellow fever in New Orleans, in 1853, before a single sober man was touched.

The testimony of all magistrates, chaplains and prison keepers goes to prove that nine-tenths of all the crimes have their origin in intoxicating drinks, and that seven-eighths of all the pauperism originates in the same cause.

It costs the United States \$9,000,000 annually to support pauperism and crime.

The official reports of 1866 show that one hundred and eighty-million gallons of fermented, forty million gallons distilled, home-made and ten million gallons imported liquors, aggregating two hundred and thirty-six million gallons, are consumed annually in the United States, costing \$500,000,000. On this revenue of only \$47,727,266 is paid making a clear loss of over \$450,000,000 to the country. But what need I say more?

Friends, countrymen, brethren philanthropists, ambassadors of God, organize! organize! In every lot and neighborhood, in every ward, on every hill let the banner of temperance again be unfurled. Rev. W. B. Wellins, Suffolk, Virginia, is the grand secretary of the Supreme Council of the Friends of Temperance—a Southern organization. For further information apply to the undersigned. Eight names and \$10 will secure a temperance Friend, an excellent weekly published at Raleigh, North Carolina, is the organ of the order.

Friends of temperance! act energetically and promptly.

L. R. REDDING,
BROOKHAVEN, MISSISSIPPI.

HOW TO MAKE TO-DAY REMARKABLE.—I do discover a fallacy, whereby I have long deceived myself, which is this: I have desired to begin my amendment from my birth day, or from the first day of the year, or from some eminent festival, so that my repentance might bear some remarkable date. But when these days were come, I have adjourned it to some other time. Thus, while I could not argue with myself where to start, I have almost lost the running of the race. I am resolved thus to begin myself no longer. I see no day equal to to-day; the instant time is always the fittest time. Grant, therefore, that "to-day" I may hear thy voice. And if this day be the obscure one in the "calendar," remarkable in itself for nothing else, may it be remarkable as the day of my conversion.—*Thomas Fuller.*

CONSCIENCE.—It is a very busy faculty of the soul, and it hath many offices. First, conscience is a register, to take notice of and record what we do. Second, conscience is a witness against us when we do amiss. Third, conscience is a judge, and gives sentence; it sits upon a throne as God's deputy to award life or death. Fourth, conscience has the office of a tormentor; it is that worm which dieth not and that fire that never goeth out. The damned shall feel the sting and torture of conscience forever, though they have bribed it and blinded it that it might not trouble them.

The Christian Advocate.

SATURDAY, FEBRUARY 12, 1870.

JESU.

REMARKS OF FORTAINE.

Jesu, the very thought of thee
With sweetness fills the breast;
But sweeter still thy face to see,
And in thy presence rest.

No voice can sing, no heart can frame,
Nor can the memory find
A sweeter sound than Jesu's name,
The Saviour of mankind.

O hope of every contrite heart,
O joy of all the meek;
To those who fall, how kind thou art,
How good to those who seek!

But what to those who find? Ah, this
Nor tongue nor pen can show;
The love of Jesus, what it is,
None but his loved ones know.

Jesu, our only joy be thou,
As thou our prize wilt be;
In thee be all our glory now,
And through eternity.

FATHER TOM AND THE POPE,
OR A NIGHT AT THE VATICAN.CHAPTER II.
HOW FATHER TOM RACKED HIS HOLINESS IN
THEOLOGY AND LOGIC.

Well, the leather's over, and I'm
tired out and out. My bitter curse
be upon the man that invited the
same board! I thought—once I'd
adorned the say or throne; and
that was when I got through frictions
at old Mat Kivanagh's school,
in Fiddlersmore; but its fluxions it
self were set to bottom now, sink
or swim! May I never die if my
head isn't as thorough as any
thing with their ordinals and
cardinals—and, bedad, it's all nothing
to the century leather that I have
got to go to at two o'clock. How-
andiver I mustn't forget that we left
his reverence and his holiness sitting
fervent one another in the parlor of
the Vatican, just after mixing their
second tumbler.

When they had got well down
into the same they fell, as I was
telling you, into larded discourse.
For you see the pope was curious to
find out whether Father Tom was
the great theologian that people
says; and says he: "Misther Ma-
guire," says he, "what answer do
you make to the heretics when they
quote them passages again transub-
stantiation out of the fathers?"

"Why," says his reverence, "as
there is no such passages I make
myself mighty say about them; but
if you want to know how I dispose
of them," says he, "just repeat one
or them, and I'll show you how to
catapomphatize it in two shakes."

"Why, then," says the pope,
"myself disremember the particular
passages they allude out of them
ould fellows," says he, "though sure
enough they're more numerous nor
edifying—so we'll just suppose that
a heretic was to find such a saying
as this in Austin: 'Every sensible
man knows that transubstantiation
is a lie'—or this out of Tertullian
or Plinarch, 'the Bishop of Rome is a
common imposther'—now, tell me,
could you answer him?"

"As easy as kiss," says his re-
verence. "In the first we're to under-
stand that the expression, 'every
sensible man,' signifies simply,
'every man that judges by his nat-
ural senses'; and we all know that
nobody foleying them seven delu-
ders could ever find out the mys-
tery that's in it, if somebody didn't
come into his assistance with an
eighth sense, which is the only sense
to be depended on, being the sense
of the church. So that, regarding
the first quotation which your holiness
has supposed, it makes clane
for us, and teetotally agin the heret-
ics."

"That's the explanation, sure
enough," says his holiness; "and
now what do you say to my being
a common imposther?"

"Faix, I think," says his rever-
ence, "with all submission to the bet-
ter judgment of the learned father that
your holiness has quoted, he'd have
been a thrille nearer the truth if he
had said that the Bishop of Rome
is the grand imposther and top-
lawyer in that line over us all."

"What do you name?" says the
pope, getting quite red in the face.

"What would I name," says his
reverence, "as composed as a docther
or physie, 'but that your holiness
is at the head of all them—troth I
had almost forgot I wasn't a bishop
myself," says he, "the deludher
was going to say, as the head of all
us, that has the gift of laying on
hands. For sure," says he, "im-
posther and imposther is all one, so
you're only to understand *manuum*,
and the job is done. Auvich!"

"If any heretic 'ud go for
to cast up such a passidgo as that
agin me, I'd soon give him a p'late
art of cutting a stick to welt his own
back wid."

"Pon my apostolical word," says
the pope, "you've cleared up them
two points in a most satisfactory
manner."

"You see," says his rever-
ence, "by this time they wor mixing their
third tumbler—the writhings of
them fathers is to be thrated wid

great veneration; and it 'ud be the
height of presumption in any one
to sit down to interpret them widout
providing himself with a gentee as-
sortment of the best figures of
rhetoric, such as metonymy, hyper-
bol, cataphrasis, prolepsis, mety-
lipsis, superlativ, polysyndeton,
hustheronprotheron, prosodypeia
and the like, in order that he may
never be at a loss for shuitable sim-
ilitudes when he comes to their
high-flown passidges. For, unless
we thrate them fathers liberally to
a handsome allowance of tropes
and figures, they'd set up heresy at
once, so they would."

"It's thru for you," says the pope;
"the figures of spache is the pillars
of the church."

"Bedad," says his reverence, "I
dunna what we'd do widout them
at all."

"Which one do you prefer?" says
the pope; "that is," says he, "which
figure of spache do you find
most usefulest when you're hard
set?"

"Metaphour's very good," says
his reverence, "and so's metonymy
—and I've known prosodypeia stand
to me at a pinch mighty well—but
for a constancy superlativ's the
figure for my moives. Scratch he
in me," says he, "but I'd prove
black white as fast as a horse 'ud
throt wid only a good stick of su-
perbation."

"Faix," says the pope, wid a sly
look, "you'd need to have it back-
ed, I judge, wid a small piece of as-
surance."

"Well, now, just for that word,"
says his reverence, "I'll prove it
widout one or other. Black," says
he, "is one thing and white is an-
other thing. You don't contravene
that? But overtything is either one
thing or another thing; I defy the
Apostle Paul to get over that di-
lemma. Well! If anything be one
thing, well and good; but if it be
another thing, then it's plain it isn't
both things, and so can't be two
things—nobody can deny that. But
what can't be two things must be
one thing—Ergo, whether it's one
thing or another thing it's all one.
But black is one thing and white is
another thing—Ergo, black and white
is all one. *Quod erat demonstran-
dam.*"

"Stop a bit," says the pope, "I
can't altogether give in to your
second minor—no—your second
major," says he, and he stopped.

"Faix, then," says he, getting con-
fused, "I don't rightly remember
where it was exactly that I thought
I seen the thav in your premises.
Howsomdiver," says he, "I don't
deny that it's a good conclusion,
and one that 'ud be of material ser-
vice to the church if it was drawen
wid a little more distinctiveness."

"I'll make it as plain as the nose
on your holiness's face, by super-
bation," says his reverence. "My
adversary says black is not another
color, that is white? Now that's
just a parallel passidgo wid the one
out of Tertullian that me and Hayes
smashed the heretics on in Chren-
don street. 'This is my body—
that is, the figure of my body.'
That's a superbition, and we showed
that it oughtn't to be read that way
at all, but this way: 'This figure of
my body is my body.' Jist so wid
my adversary's proposition, it musn't
be understood the way it reads, by
no manner of manes; but it's to be
taker this way: 'Black—that is,
white is not another color, green, if
you like, or orange, bydad, for any-
thing I care, for my case is proved.
'Black—that is, 'white,' have out
the 'that,' by simalaphy, and you
have the orthodox conclusion, 'black
is white, or by conversion, 'white
is black.'"

"It's as clear as mud," says the
pope.

"Bedad," says his reverence, "I'm
in great humor for disputin' to-
night. I wisht your holiness was a
heretic jist for two minutes," says
he, "till you'd see the flaking I'd
give you!"

"Well, then, for the fun of the
thing, suppose me my namesake, if
you like," says the pope, laughing,
"though, by Jaysmine," says he,
"he's not one that I take much pride
out of."

"Very good—never a bitter joke
over I had," says his reverence.

"Come, then, Misther Pope," says
he, "ould up that party face of
yours, and answer me this question.
Which 'ud be the biggest lie, if I
said I seen a turkey-cock lying on
the broad of his back, and picking
the stars out of the sky, or if I was
to say that I seen a gander in the
same intherest' posthure, rayera-
thing himself wid similar astro-
nomical experiments? Answer me
that, you ould swaddler?" says he.

"How durst you call me a swad-
dler, sir?" says the pope, forgetting
the doct man, the part that he was
acting.

"Don't think to hully me!" says
his reverence, "I always daer to
spake the truth, and it's well known
that you're nothing but a swaddling
ould sent or a saint," says he, never
letting on to perceive that his holiness
had forgot what they were
agreed on.

"By all that's good," says the
pope, "I often heard of the im-
perance of you Irish afore," says

he, "but I never expected to be
called a saint in my own house,
either by Irishman or Hottentot.
I'll tell you what, Misther Ma-
guire," says he, "if you don't keep
a civil tongue in your head you had
better be walking off wid yourself;
for I beg lave to give you to under-
stand that it won't be for the good
of your health if you call me by
such an outproibious epithet again,"
says he.

"Oh, indeed! then things is come
to a purty pass," says his rever-
ence (the dear funny soul that he over-
was!) "when the lik or you com-
pares one of the Maguires of Tempo
wid a wild Ingine! Why, man
alive, the Maguires was kings of
Formanagh three thousand years
afore your grandfather, that was the
first of your breed that ever wore
shoes and stockings!" (I'm bound to
say, in justice to the poor Prodesan,
that this was all spoken by his re-
verence by way of a figure of spache.)
"was sint his majesty's arrand to
cultivate the friendship of Prince
Lee Boo, in Bottenev bay! Oh,
Boyan, dear," says he, letting on to
cry, "if you were alive to hear a
boddagh Sassenagh like this casting
up his country to me or the name
of Maguire."

"In the name of all saints," says
the pope, very solemnly, "what
is the maning of all this at all, at
all?" says he.

"Sure," says his reverence, whis-
pering to him across the table,
"sure you know we're acting a con-
thravarsy, and you tiffle the part
of the Prodesan elation. You
wouldn't be angry wid me, I'm sure,
for sarving out the heretic to the
best of my ability."

"Oh, bedad, I had forgot," says
the pope, the good-natured ould
cruther; "sure enough you were
only taking your part as a good Mi-
lesian Catholic ought agin the heret-
ic Sassenagh. Well," says he,
"fire away now, and I'll put up wid
as many contravolous compliments
as you please to pay me."

"Well, then, answer me my ques-
tion, you sautimious ould dandy,"
says his reverence.

"In troth, then," says the pope,
"I dunna which 'ud be the biggest
lie, to my mind," says he, "the one
appears to be about as big a hounce
as the other."

"Why, then, you poor simpleton,"
says his reverence, "don't you per-
ceive that forbye the advantage the
gander 'ud have in the length of
his neck it 'ud be next to impossi-
ble for the turkey-cock lying that
away to see what he was about, by
rasen or his dollars and other ac-
centhments hanging back over his
eyes? The one about as big a
hounce as the other! Oh, you mis-
fortunate cruther! if you had ever
larned your A B C in theology you'd
have known that there's a differ be-
tween two lies, so great that,
bedad, I wouldn't wonder if it 'ud
make a balance or five years in pur-
gatory to the soul that 'ud be in
it. Ay, and if it wasn't that the
church is too liberal entirely, so she
is, it 'ud cost his heirs and succe-
sors better nor ten pounds to have
him out as soon as the other. Get
along, man, and take half a year at
dogmatized theology; go and read
your Deus, you poor docther, you!"

"Really," says the pope, "you're
making the heretic's shoes too hot
to hold me. I wonder how the
Prodesans can stand afore you at all."

"Don't think to delude me," says
his reverence, "don't think to back
out of your challenge now," says
he, "but come to the stretch like a
man, if you are a man, and answer
me my question. What's the reason,
now, that Julius Cesar and the Var-
gin Mary was born upon the one
day—answer me that if you wouldn't
be hissed off the platform?"

"Well, my dear, the pope couldn't
answer it, and he had to acknowl-
edge himself saked. Then he axed
his reverence to tell him the reason
himself; and Father Tom commu-
nicated it to him in Latin. But as
that is a very deep question I never
hard what the answer was, except
that, I'm tould, it was so mysterious
it made the pope's hair stand on
end. But there's two o'clock, and
I'll be late for the leather."

FATHER HYACINTHE is in the full
vigor of physical and intellectual
life. He is forty-two years of age;
about five feet six inches in height;
of a square, well knit, erect person;
inclining neither to leanness nor to
obesity; a splendidly proportioned
head, which, when at rest, slightly
inclines of one side; a massive and
serene, yet thoughtful brow; well-
arched eyebrows, delicately pencil-
ed; an aquiline nose; an equi-
libristly chiselled mouth and chin, in
which firmness and spirituality are
well indicated, with a dash of hu-
mor; his eyes, partially closed—
and the left eye rather more so than
the right—for he is very near-sight-
ed, have a steady, penetrating gaze,
tempered by gentleness, which va-
ries in character as the conversation
itself varies—now lighted by the
fire of an earnest eloquence, and
now toned down to the tenderness
of Christian pity; such is the per-
sonal outline of the eloquent ex-
monk.

THE BIBLE IS THE WORD OF GOD.

BY W. S. PLUMER, D. D.

If the Bible is not the word of
God, it is certain that man has no
revelation from heaven. The books
esteemed sacred by the Mohammed-
ans and Hindoos are not worthy of
even a good man, much less of God.
So that the world has no true and
saving light from heaven unless it
is found in the Holy Scriptures.

There are several short methods
of stating the argument, which have
never been fairly met. Here is one
from John Wesley: "I beg leave to
propose a short, clear and strong
argument to prove the divine inspi-
ration of the Holy Scriptures. The
Bible must come either from good
men or angels, from bad men or
devils, or from God. It could not
be the invention of good men or
angels, for they neither would nor
could make a book, and tell lies all
the time they were writing it, say-
ing, 'Thus saith the Lord,' when it
was their own invention. It could
not be the invention of bad men or
devils, for they would not and could
not make a book, which commands
all duty, forbids all sin, and con-
demns their souls to hell to all eter-
nity. I therefore draw the conclu-
sion that the Bible must have been
given by divine inspiration."

Another short mode of reasoning
is this: Every effect must have an
adequate cause. This is as true of
moral as of physical changes. On
this principle we ought to seek a
cause fit to produce those happy
transformations of character often
witnessed where the gospel is known.
One has briefly stated the case thus:
"There was a man who started from
Jerusalem toward Damascus, on a
mission of persecution and murder,
proud, cruel, vindictive. He came
from Damascus with a heart yearn-
ing toward all mankind, with the
humility of a child, and with affec-
tion as tender as a woman's love.
He went toward Damascus with an
intellect narrowed down to a rapier's
point, and harder than its steel. He
came from Damascus with an intel-
lect broadened and fused with di-
vine fire, and with a legio so invinc-
ible, and with its links so warm with
the Holy Ghost that it molded the
thought of the world for eighteen
centuries." Paul always regarded,
and more than once stated his con-
version as a demonstration of the
truth of God's word.

The challenge of Laetantius has
stood for fifteen hundred years un-
answered: "Give me a man of pas-
sionate, abusive, headstrong disposi-
tion; with a few only of the words of
God, I will make him gentle as a
lamb. Give me a greedy, avaricious,
tenacious wretch; and I will teach
him to distribute his riches with a
liberal and unsparring hand. Give
me a cruel and blood-thirsty mon-
ster; and all his rage shall be
changed into true benignity. Give
me a man addicted to injustice, full
of ignorance and immersed in wick-
edness; he shall soon become just,
prudent and innocent."

This transforming power of God's
word has been noticed and cele-
brated in all ages. "The law of the
Lord is perfect, converting the
soul." Its renewing energy is as
great now as it ever was. The King
of the Feejee Islands, once a fierce
and cruel cannibal, is now a preacher
of the gospel of peace and love.
The word of God was never more
lively or powerful than it has proven
itself to be in the history of modern
missions. What miracles of mercy
it has wrought in Greenland, in
South Africa, in the islands of the
sea, in fact all over the earth. Read
the history of the planting and
growth of Christian churches in
many places.

The gospel exerts not merely vague
and general influence. It lays hold
of individuals, and by renewing
them improves society. Thus the
work is thorough, and thus a little
leaven leaveneth the whole lump.
The following narrative has found
its way into several publications:

"In 1787 the ship Bonny sailed
from England to the Pacific, in quest
of young bread-fruit trees to be re-
planted in the West Indies. On her
way home the crew mutinied, placed
the master and eighteen others in a
frail open boat, with scanty provi-
sions, and committed them to the
mercy of the ocean. Strange to
tell that boat accomplished a voy-
age of more than four thousand
miles, and reached England in
safety. The mutineers, twenty-five
in number, set sail for some island
in the Pacific. They quarreled and
separated. About half of the whole
number were captured by an Eng-
lish vessel of war, carried home and
hung in irons. Nine of these des-
peradoes went to Tahiti, took on
board nineteen natives—seven men
and twelve women—and sailed for
some inhabited island in the ocean.
They found one, Pitcairn's Island.
Shortly after landing the Tahitian
men murdered five of the mutineers,
upon which the twelve women rose
at night and killed their seven coun-
trymen. Of the four remaining mu-
tineers one invented a distillery,
and becoming delicious leaped from
a cliff into the sea and was lost.
Another was shot for attempting to
destroy his messmates. Of the two

then left one died a natural death,
and the other, named John Adams,
alone survived. Here their hiding
place was undisturbed till 1814,
when it was visited, and also in
1825. Strange alterations had taken
place. The number of inhabitants
had increased to seventy. There
was no debauchery among them.
Good order prevailed. Filial affec-
tion and brotherly love pervaded
the entire society. The blessing of
God was invoked on every meal.
Prayer was offered every morning,
noon and evening. The laws of
civilized society were in force. The
rights of property were respected.
A simple and pure morality was
prevailing. How was this? What
had made the change? Had vice
wrought its own cure? Had there
been some good principles combined
with the mutiny and murder, the
heathenism and devilish passions,
which the gang had been guilty of?
No. These evils never work their
own cure, except by consuming, like
a fire, their own materials.

"The cause of the change was
this. Adams had saved, hid and
preserved a Bible, and, when his
comrades were dead, he studied it,
embraced its promises, believed
God's testimony concerning his Son,
was converted; read and taught its
truths to his family and neighbors;
and God blessed his own word to
their conversion also. That very
Bible is now in this country. It is
a small volume, printed in 1765.
'The salt sea and the salt tears of
old Adams have taken away its
gloss and dimmed its print; but it
contains God's testimony of Jesus.
That was the secret of its power.
The worm has eaten it through and
through; but the glad tidings to
sinners can still be read in it. The
Bible has traveled round the globe,
has been the means of reforming a
whole community of outlaws, and
still lives to proclaim its divine ori-
ginal and its life-giving power.
When Adams was brought to his
death he was old in years, but strong
in faith. The friends of the old
salt collected around him, and asked:
'Well, John, what cheer?' 'Land
ahead,' was his characteristic reply.
After a few days they again gather-
ed around him and said: 'Well,
John, how now?' 'Rounding the
point in the harbor,' he replied. At
last he lay upon his dying pillow,
and his relatives were standing all
around in tears, and yet in hope.
One said: 'Brother, how now?'
'Let go the anchor,' was his dying
exclamation, and he fell asleep."

This amazing power in a book to
renew and reform, to sanctify and
bless men, is confined to the Bible,
and to books whose doctrines and
principles are drawn from God's
word. Cicero wrote eloquently, and
often justly, respecting the nature of
God and our moral duties. But
who was ever thereby converted
from sin to holiness, from Satan
unto God?

Nor is the transforming power of
the truth confined to any one doc-
trine, text, chapter or book of Scrip-
ture. So far from this, you may
live half a century, and you will
hardly find two men whose awaken-
ing, conviction or conversion seems
to have been, by the divine bless-
ing, precisely on the same truth.
Paul never knew himself till he saw
the spiritual meaning of the tenth
commandment—Rom. vii, 7. The
Ethiopian treasurer found saving
light in the fifty-third chapter of
Isaiah. "Poor Joseph's" creed was
very short, nor could he be per-
suaded to lengthen it. It was long
enough to give him hope and peace:
"It is a faithful saying that Christ
Jesus came into the world to save
sinners, of whom I am chief."

Nor does the efficacy of Scripture
depend on the greatness of him who
utters it. A little child has often
repeated a truth of God's word with
irresistible power. Paul, the prisoner,
clanking his chain, made Felix
tremble. In the early part of this
century there was a mission school
at Cornwall, Connecticut. Among
the heathen youth brought to it was
Thomas Hoopoo, of the South Sea
Islands. When he had been in this
country about two years he took a
journey with a friend, and spent an
evening in a select company, where
many questions were proposed to
him by an irreligious lawyer, to get
his amusing answers. At length
Thomas said: "I am a poor heath-
en boy. It is not strange that my
blunders in English should amuse
you. But soon there will be a
larger meeting than this. We
shall all be there. They will ask us
all one question, viz: 'Do you love
the Lord Jesus Christ?' Now, sir,
I think I can say, yes. What will
you say, sir?" He ceased; a sol-
emn silence prevailed. The stillness
was awful. At length the lawyer
proposed that the evening be closed
with suitable devotions, in which
Thomas should lead. He did so, in a
meek and affectionate manner.

Soon he prayed for the lawyer, al-
luding to his talents and learning,
and besought God to teach him the
way of salvation by a Redeemer.
At length the lawyer sobbed aloud.
Soon the company dispersed. But
there was no sleep for that lawyer.
The question of this poor boy from
the sea-girl island, "What will you

say, sir?" had pierced his soul. He
walked his room in anguish. Ere
long he was led to cast himself at
the feet of the Redeemer. So out
of the mouth of babes and sucklings
God's word has strength, and stills
the voice of the gainsayer and renews
the temper of his mind.—*Earnest
Hours.*

History of Celebrated Women of China.

HISTORY OF TWO CELEBRATED WOMEN OF THE
WAY CHINESE, 313 B. C., CHOW DYNASTY,
EXTERIOR LAW.

The king of the Ling kingdom,
having overpowered the king of the
Way kingdom, appointed Ling as
governor. When he died his wife
had no heir, and she determined to
live a widow. His second wife had
a son, and she served Mrs. Ling for
eight years without cessation. The
widow at last said to her: "You
and your son serve me thus faith-
fully; it is more than I can bear. I
have never heard that the mother of
the king should serve any one. I
have no son, and according to cus-
tom I should be driven out and sent
back to my family. If it is possible
to remain and spend my days in
widowhood I shall be exceedingly
rejoiced. And now to continue
your faithfulness to me in my wi-
dowhood, as before, I cannot bear
it and have peace. But I desire ex-
ceedingly to go out and dwell alone,
and from time to time we can visit
and see each other."

The second wife, hearing this,
wept and said to Mrs. Ling: "If
you do as you have proposed, then
our family name will suffer reproach
in three ways. First, our lord died
young, which was particularly un-
fortunate. The second is, you did
not give birth to a son, which fell
to my lot. The third is, you wish
to leave the palace and dwell alone,
desiring that I should dwell in the
former residence of our lord. I have
never heard of a faithful officer to
his king slothful in business. A
faithful son looks forward to the
departure of his father and mother
with deep sorrow of heart. How
dare I say my son should be king,
and on this account not do my duty
in serving you, which I feel to be
my strict duty? Why do you take
it so much to heart, and thus dis-
turb your own mind?"

Mrs. Ling answered and said: "I
have no son, and why should I thus
impose a duty on the mother of him
who should be king. Though it is
not your wish that I should do so,
others would say I was wholly un-
acquainted with all ancient rites
and ceremonies. It is still my de-
termination to go and live else-
where."

When she had finished the sec-
ond wife went out and said to her
son: "I have heard that the Liter-
atti understand fully all rules and
rites in the performance of their
duty, and discuss all ancient cere-
monies which are right and proper.
But to-day the wife of the king has
put upon me a heavy burden, when
she has determined to go elsewhere
to live, and require me to live in
the palace. This is against all cor-
rect rules and rites which should
guide us. If I am required thus to
live in this relation of disobedience
to my superior, then I am deter-
mined no longer to live, and will
put an end to my existence."

When her son heard this he wept
bitterly, and kept diligent watch
over her, lest she should commit
some violence, for she would listen
to no words of comfort.

When Mrs. Ling heard what had
happened she was much alarmed,
and said to her: "I am willing,
then, that you should remain as you
are, and continue in the same rela-
tion, observing the same rites and
ceremonies until my death."

The Literatti say: "These two
women, in yielding thus the one to
the other, understood the true rules
of all ancient rites, and did each re-
ceive in return a clear assurance of
having done that which was right,
and their fame has been handed
down to all generations."

J. W. LAMBERT.
SHANGHAI, CHINA, Dec. 17, 1869.

Moral and religious culture, when
viewed as preparatory to a future
state of existence, as necessary to
the appreciation and consequent en-
joyment of heavenly happiness, pre-
sents itself with inexpressible force
to the mind, and exhibits the high
responsibility of parents and teach-
ers.—*M. M. Carl.*

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, FEBRUARY 12, 1870.

Office—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, Register the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

NEW ADVERTISEMENTS.

We call attention to the card of Mr. J. H. Keller, soap manufacturer. He has been long and most successfully engaged in the business. He makes a most excellent article, as we have had occasion to know.

The "South-land" prospectus we call attention to—an agricultural and family paper, weekly and monthly. It begins under flattering auspices. Price, \$4. Office, No. 60 Camp street.

CREOLE INDIANS.—The services were very impressive. I have never seen an assembly better behaved. Not a word was necessary, either of direction or reproof. All fell into ranks as though they had been trained, and were familiar with the duties and services of the time and place. I heard Joshua Soule, a native Creole, preach from the text: "In him was life, and his life was the light of men." He is a grave and impressive speaker, with a good voice and graceful action. I preached on Saturday with "Chicoite," the chief of the nation, for my interpreter. It was an awkward and uninteresting business to me. Next day I tried it again with Mr. Hodges, the United States interpreter, and found the task easier. I preached the funeral sermons of two Indian preachers (Walker Carey and Standing Man), and perceiving the effect of the word upon the people, became interested myself, and began to feel somewhat natural. At night I tried it again with "Uncle Peter," a negro, for an interpreter. He was familiar with the business, having been long employed to travel with the missionaries, and has all the enthusiasm of his race. I magnetized him, or he me, and we rushed along with equal steps—no time was lost. We went up together and came down together. As the musicians say, we corded well in time and tone and gesture. He kept me very busy to prevent a hiatus. I hope "Uncle Peter" will live till I come again. At the close we called for penitents, and there was a rush—some conversions—many joined the church, and the Indians kept up the services till sunrise next morning. At least a thousand Indians were upon the ground. On Saturday I baptized a very aged man—a noted warrior in Jackson's time, in what the Indians call the "Red Stick War." On Sunday ordained several deacons—Creoles and Choctaws. I must not omit to mention that the singing was fine—simple, hearty, natural melody—no science, no squeaking nor screeching, but the rich, mellow tones of full hearts—good old tunes, hallowed by time and memory and association. One man led off, old Methodist fashion, and the song swelled till it was the voice of a multitude. It was praise, not a performance—the praise of God, not a vain catering to itching ears. Oh! that Methodist singing could be restored in all our churches, and the poor substitute, called "music," be ruled out.—Bishop G. F. Peirce.

THE NEW YORK EVANGELICAL ALLIANCE.

The gentlemen managing this proposed "alliance" will have to enlarge their charity greatly if we may judge from the following letter of the Rev. Mr. Spurgeon to the *Examiner*. It is certainly worthy of being put upon record, and is a very damaging document. If Mr. Spurgeon cannot be tolerated, we may well ask who then can stand? We suppose that such an evangelical "secretary" will, if he lives long enough, be sufficiently enlarged to take the whole world in his field of view; but at present he is the narrowest man of whom we have heard.

MY DEAR SIR: I observe in your paper a statement that my attendance at the New York Evangelical Alliance meeting was not improbable, and I have observed in other papers remarks to the same effect. Will you, therefore, save many correspondents further trouble in requesting me to preach, lecture, etc., kindly give publicity to one or two words from me? I never had even the remotest intention of being present at the aforesaid meeting, and in no form or fashion led a single person to imagine that I should be there. My health is most precarious, and my home labor is incessant. I am chained to the oar. I cannot leave home, not even to see the thousands of beloved and honored brethren in America, with whom my heart is warmly united. Moreover, if I could overcome these difficulties, I should still be unable to attend an Evangelical Alliance meeting; not because I would not, but because they have thrust me out privily and uncondemned, and I cannot return to the society unless it repudiates the deed. The secretary wrote me, requesting me to withdraw on account of my sermon on Baptismal Regeneration, and more especially certain remarks in it upon the evangelical clergy. Of course I did at once withdraw. I have been told by members of its council that the letter was unofficial, and that they regret, etc.; but there the matter rests. I am under the ban of the Evangelical Alliance, and should not venture to appear at any gathering connected with it, lest my freedom of speech should again be distasteful.

There should be an evangelical union wide enough even to tolerate such an offender as I am, for I trust I am one of Christ's, and its meetings should be so arranged as not to occasion difficulties with those holding your views upon communion. There could be no objection to those persons holding a united communion service who might choose to do so, but there can be no great benefit in such a service being officially arranged by the society. However, I have no right to give advice, as I am not allowed to be a sharer in the matter.

Permit me to assure Baptist friends in America that I am not at all the enemy of their strict fellowship which they seem to think me to be. If they would let me follow my own convictions of duty they would not find me interfering with them. I do not think you are right, but I set very small store by the question, and have neither written nor spoken on the point, as though it were one great end of my existence to fight with the strict brethren. I wish we all had more light, more life and more love. If I found myself erring in joining communion with my brethren, I should be alarmed, but I do not find it so. That, however, you will probably set down to my deficiency in the first, which will be the kindest interpretation. Wishing success to all brethren laboring for Christ, I am, dear sir, yours truly,
C. H. SPURGEON.

COMMON SCHOOLS.

The question is, shall the American people give up all idea of having common schools for teaching the children of the poor to read, write and cipher? It seems that two powerful influences are at work to destroy them: one that of the Jesuits, the other the Radical Republicans. One of these opponents does not wish the children taught the spelling book unless with catechism; the other does not wish a white child taught unless with a black one—who shall sit on the same form and learn out of the same book. Of these two we do not know which is the more absurd, the Jesuit or the Radical, nor do we care. The main point is, shall the great matter of public education for the people be given up because of the war waged against it by a couple of fanatics who claim to be intensely conscientious in their views? Surely the community ought to know how to deal with such unreasonable elements; they exist everywhere in some form, and always. If we cannot meet them, then we are powerless to accomplish any scheme of public utility. The city cannot afford to give way to absurd people who bring their consciences into prominence upon matters which do not in any way concern conscience. Reading, writing and arithmetic—any more than blacksmithing or carpentering. The church and the family are the places for training children in their duties to God and their fellows. The question of races, whether all are equal, is very interesting, and has already received considerable attention, but cannot be settled by forcing little children to sit on the same bench and read out of the same book. Up to a certain point the views of men, even their prejudices, are to be considered, but no man is expected to commit suicide in an effort to please unreasonable men. They are to be resisted—the place is to be given to men who seek to destroy the most vital institutions of the State, no matter on what plea they base their opposition. Public schools do not go upon conscience, nor upon ethnology, but upon the importance of teaching all persons to read and write. A man may well be accounted an enemy of the country who would destroy this great instrument for good, simply to advance his own social or sectarian views. The *Christian Witness* says:

The issue upon the common school question seems now fairly made up. The Romanists have unmasked their attack, and Protestants now know what they are driving at. We hope to hear nothing more about the Bible in the schools, since the assailants themselves have contemptuously repudiated that as a mere side issue. It is now no common schools at all, for a sectarian school ceases to be a common school. Our children are not safe companions for theirs, our books are poisonous, our teachers have not the Jesuit stamp. We have not seen the ease more neatly or tersely expressed than in the following extract from a Roman Catholic paper:

"The Catholic solution of this middle abode Bible or no Bible in schools is—'hands off!' No State taxation or donations for any schools. You look to your children, and we will look to ours. We don't want you to be taxed for Catholic schools. We do not want to be taxed for Protestant or for godless schools. Let the public school system go to where it came from—the devil. We want Christian schools, and the State cannot tell us what Christianity is." This is from the *Freeman's Journal*.

The *Picayune* of this city says: It must be evident now to the most incredulous among our population that such a scheme is to be persisted in as the procedure of compelling the white pupils in the public schools to associate with the colored and negro pupils—that such is the fixed determination of the Radicals, and that the time has come when a plain declaration on the part of the respectable whites, of all shades of political sentiment, that they will not submit to such an infamous outrage on their rights, should be spoken. The speaker (Isabelle) is a mulatto, who says he represents the Third Legislative District in this city. We respectfully urge upon the meeting called for Saturday night to take this matter into consideration, and make such declarations upon it as free white men should do:

"I say I am sorry to see the gentleman representing the fourth ward, and claiming to be a Republican, seconding the amendment of the gentleman from the ninth; an amendment which would make null and void the whole law. The city has never carried out this law; they have never allowed the colored children into the regular public schools. Now I want the children of this State educated together. I want to see them play together; to be amalgamated. [Laughter.] I want them to play together, to study together, to eat their lunch together; and when they grow up to be men they will love each other, and be ready, if any force comes against the flag of the United States, to take up arms and defend it together."

The vote was put on the amendment, and it was declared lost.

God's word is like God's world—varied, very rich, very beautiful. You never know when you have exhausted all its secrets. The Bible, like nature, has something for every class of mind. Look at the Bible in a new light, and straightway you see some new charms.

The world is more apt to reward appearances than desert.

THE JOHN BROWN RAID.

The conspirators who planned the attack of John Brown upon Harper's Ferry are taking the glory to themselves of having inaugurated a course of things which ended in the abolition of slavery. That this was the initial movement of the war upon the South no one can now doubt. It justly filled the Southern people with alarm. The fifteen hundred pikes manufactured for the use of slaves, and the letters which were found on Brown, written by influential citizens of Ohio and Massachusetts, demonstrated the depth and malignity of the purpose of which Brown was but the agent. We have always thought it a blunder that Governor Wise did not publish the correspondence which was captured at Brown and Cook's headquarters. These events transpired in the October preceding the war. The telegrams of that time were here inserted to revive the memory of the reader:

HARPER'S FERRY, Oct. 19.—The Baltimore Grays started in pursuit of Cook, and the fugitives under him, on Monday night.

On their way the Grays stopped at the farm which had been hired by Brown as the rendezvous of the traitors, where they discovered several wagons loaded with arms and ammunition, consisting of rifles and pistols bearing the stamp of the Massachusetts Manufacturing Company, of Chicopee; also a large number of spears, and bowie-knives attached to poles, indicating that a large number of men were to be supplied with arms for their murderous work.

It is supposed that these munitions were brought through Pennsylvania.

The insurgents did not attempt to rob the paymaster's department at the armory, in which there was a considerable amount of money.

Brown, when he was supposed to be dying, declared his sole object was to free the slaves from bondage.

He also declared that no other persons than those about him were connected with the movement, and that he did not expect aid from the North.

He made the above statement in answer to questions propounded to him.

He also insisted that what he had done was right, and that he ought to be treated as a prisoner of war.

On Tuesday evening a party of United States marines and volunteers visited Brown's house, and found, in addition to the arms above mentioned, a large quantity of blankets, shoes, clothes, tents, fifteen hundred pikes, with large blades affixed to them, and various documents indicating that their plans were deeply laid, with ramifications through several States.

The troops also discovered letters from several prominent Abolitionists—one from Fred Douglas, containing \$10 from a lady, to aid the glorious cause; also a letter from Gerrit Smith about money matters, and a check or draft on a New York bank, from Gerrit Smith, for \$100, indorsed by the cashier of the bank.

Governor Wise has taken possession of all these papers, and has offered \$1,000 reward for the capture of Cook.

The conspirators, after the execution of Brown, infused new life into the strife going on in Kansas between the Sharpe rifle missionaries and the Southern planters who had moved to that Territory. Adding the Harper's Ferry raid to the state of things in the West, it was manifest to every thinking man that an extensive, organized and highly influential body of conspirators existed in the North, with its center in New England, for the purpose of inciting the slave to insurrection, and thus, by force, realize the cherished theories of the Abolitionists. They believed that the slave system of the South was but a mine of gunpowder, and needed only a spark to touch it off. John Brown was sent forth as that spark. Thousands in the South thought the same—that the slave could be induced to rise, if not universally, yet extensively, and that the insurrection of St. Domingo might be repeated with all its horrors. And the world does not yet understand, and never will, how this fiendish purpose was defeated. But so it is that neither during the war nor since has any Southern slave lent himself to any of those efforts against his master or his master's family which he was expected, urged and armed to commit. He disappointed greatly his Northern

friends, and they began to think him unworthy of the freedom which they determined he should have. The providence of God overruling the designs of men, added to the religious training of the negro, alone saved us from such scenes as the mind even now shudders to contemplate. And had not the South at once risen to meet this state of things it would have doubtless been plunged presently in all the unknown horrors of a servile war. As the New England conspirators had tasted blood, they soon threw off all disguise, and proceeded to carry out their plans for ridding the country of slavery. They have succeeded, not by the slow and cheap process of argument or West India emancipation enactments, but by the death of one million of their white countrymen, and the destruction of nine thousand millions of property. Those who claim the glory of this triumph should be permitted to enjoy it. Let them wear the wreath, and go down to all time as champions of liberty who have set free four million of negroes at so cheap a cost! Let this illustration of the Sharpe's rifle gospel of freedom descend for the benefit of all future styles of philanthropy. Let it be understood that while in another field "one soweth and another reapeth," that in this one those who have reaped are the very same who have sowed—that both the honor of this harvest of blood and fire and freedom may not be divided, but be enjoyed throughout all time and eternity by those who alone are entitled to it. The *Marseillaise* of these philanthropists has been fitly adopted by the party in power, for the enthusiasm that attaches to it proved the death-knell of a million of the best men that ever contended on the field of battle. Though

"John Brown's body lies moldering in the grave,"

the terrible truth remains that

"His soul is marching on!"

the spirit that forces its philanthropy upon men at the point of the bayonet is still in the ascendant. The *New York Independent*, the organ of the Boston Freethinkers and Abolitionists, in a recent article on the "Twelve Apostles of Heresy," furnishes a short biographical sketch of each. In two of these sketches we find the following items in regard to the John Brown raid, to which we have referred above:

THOMAS WENTWORTH HIGGINSON.

Colonel Higginson left the pulpit so long ago, and has been so active in war and politics since, that many people forget that he was bred a clergyman. He was, however, and was of an old clerical family, his first ancestor in America being the first minister of Salem, nearly two centuries and a half ago. * * * Wentworth Higginson was born in Cambridge, and spent much of his childhood there; graduated at the college in 1841, and at the Divinity School in 1847, and soon afterward was settled in Newburyport. * * * He is forty-eight or fifty years old, tall, dark, erect and soldierly in his bearing, and was always more of a fighter than a priest. He was a great friend of the fugitive slaves, and in 1854 was one of those who endeavored to rescue Anthony Burns from the Boston court house, the night of the Faneuil Hall meeting, when Batchelder, the Democratic trackman, was killed. Higginson was wounded in this affair. Two years after he went out to Kansas with a party of emigrants, and saw something of the conflict there between freedom and slavery. In 1858 he was taken into the confidence of John Brown, and was one of the inner circle of his friends, who knew his plans and supplied him with money from that time till his campaign culminated at Harper's Ferry, in October, 1859. There were wheels within wheels in that noble conspiracy; and of the inmost wheel of all in New England there were, perhaps, but six or eight cognizants: Theodore Parker, George L. Stearns, Mrs. Stennys, Dr. S. G. Howe, Higginson, Sanborn, and Edwin Morton. By an odd chance, Higginson escaped publicity in connection with it at the time, though I have seen a letter, received by Governor Wise soon after the attack at Harper's Ferry, in which Higginson is denounced by name. He took no pains to avoid publicity; and never regretted his connection with the plot. It was he who went to North Elba to escort Mrs. Brown to Boston on her way to visit her husband in prison; and he was one of a small party who undertook to rescue Brown, till it was seen to be a hopeless enterprise, likely to be

fatal not only to every member of the band, but to Brown himself. Of all the Senate witnesses that winter, Richard Realf was the only one who named Higginson; and his name excited no attention. * * *

WENDELL PHILLIPS.

I need not dwell on the public career of Phillips, of course; but there are some facts not so well known, of which I have been informed. He was the neighbor and bosom friend of Theodore Parker, their houses standing but a stone's throw apart—Parker's in Exeter Place and Phillips' in Essex street. In theology they never agreed, Mr. Phillips having been bred and remaining a Calvinist. But this did not interfere with their friendship. But, while Parker was fully informed of the secret plans of John Brown in 1858, it was not till 1859, and then not fully, that Brown saw fit to communicate them to Phillips, who probably knew of them but generally. Yet after Brown's death Mr. Phillips, who spoke at his funeral in North Elba, brought thence the correspondence between Brown and his Boston friends, which would have made a great stir had it fallen into the hands of the enemy. These papers Phillips deposited with John A. Andrew, and from him, in the winter of 1859-60, the correspondents got back their dangerous epistles.

The following item is taken from the *New York Tribune*:

When John Brown was dragged half dead from the jail to the court house, and then again from the jail to the gallows, there were not many who recognized in the man anything better than a foolhardy fanaticism. Liberal persons in Europe spoke of him with respectful tenderness, but here the best his swift friends could do was to frame elaborate sentences of execration. The rebellion came, and with a sort of poetic justice it came to bestow upon John Brown a good historical reputation. The facts are the same, but the smoke and flame of battle have given them a new color. The cruel rigor which was to conserve and consolidate the slave power for another generation has so swept it from the face of the earth and the eyes of mankind that hardly a vestige of it remains. So, again, we notice that the Senate of Kansas has ordered the portrait of John Brown to be hung in the capital of the State, side by side with the portrait of Senator Lane. He who is able to look keenly into the future, understanding the aspect which slavery will assume in the eyes of the next age, will understand the place which the name of John Brown will take and hold in our annals. His story may become, to a certain extent, tinted by mythical traditions, but his fame will lose nothing by that. He may receive greater honor than that to which he is entitled, but of neglect and contempt he is in no danger.

NEW PUBLICATIONS.

A MANUAL OF THE DISCIPLINE, including the decisions of the College of Bishops, etc. By Holland N. McTear, D. D., one of the Bishops of the Methodist Episcopal Church South. Nashville: Southern Methodist Publishing House. 1870. 16mo, pp. 256.

This work indicates much labor and research by the author, and an unusual power of condensation. Its summary statements of law principles and precedents are very clear, and are arranged in an order at once natural and easily remembered. Of course he has had access to the best sources of information, and therefore presents a reflection of the views and opinions of the ablest minds of Episcopal Methodism upon the discipline of our church. In so far as this book contains the legal decisions of our Board of Bishops it is official. It will supply with us a want that "Baker on the Discipline" has, heretofore but partially met. The Southern Methodist Church differs from the Methodist Episcopal Church both in its organization and in its theory of constitutional law. These differences are few, but very great. This divergence was not an effect of the separation; it was, to no small degree, its cause. The attempt to give a delegated General Conference all the power which originally belonged to a General Conference that was in fact a convention of the entire pastorate, and therefore unrestricted, was the point at which the two branches, Northern and Southern, began. It is worthy of remark that the North and the South, both in Church and State, differ *totum in toto* in their estimate of the importance of constitutional law. The General Conference administers discipline, first, on the Bishops, and, secondly, on the

Annual Conferences (Hedding.) Upon this the "Mannual" comments: "The settlement of the extent and manner in which this discipline may be exercised formed an epoch in American Methodism; and not only helped, with its connected questions, to divide the Methodist Episcopal Church into two independent bodies, but constitutes in part the difference of their constructions of the constitutional powers of the General Conference." By the by, we notice that "Baker" has no chapter on either "General Conference" or "Bishops."

So long as our church appoints preachers on trial to the charge of stations and circumscribes the value of such a treatise on law and, we may say, guide to the right use of the Discipline, cannot be overestimated. It will serve to give to its administration, in the hands of the most experienced, greater uniformity. All of our official members should possess themselves of this work, but especially the lay members of the next General Conference. It will save endless talk and discussion. The style in which the Publishing House has gotten up this work does not exactly please us. There should be more margin to the page—the book increased to a 14mo, and the color of the binding distinctive. We wish our copy bound in red Turkey morocco, gilt edged.

From Mr. G. Ellis, No. 7 Old Levee street:

THE LIFE OF MARY RUSSELL MITFORD. By Rev. A. G. L'Estrange. Two volumes. New York: Harper & Brothers. 1870.

This is a very delightful gossiping work, composed of letters of Miss Mitford. With access to the best society, she gives many items of daily life, of the distinguished statesmen, warriors and wits that flourished in the first decade of this century, both of England and France. Her style is very rare, and she notes a hundred incidents that enable the reader to form a correct idea of the fashion and opinion of her times. She was a beautiful example of *fast* devotion to a father. For him she lived and labored. Her writings, miscellaneous poems and, other, have given her world-wide reputation. We copy the following anecdote from this work about a personage whose name is somewhat before the public at present:

By the way, I heard a curious anecdote of Lord Byron from a very truth-telling person. A gentleman was with him on a visit to an old house in the country which had the reputation of being haunted. They had been telling ghost stories all the evening; and in the middle of the night he was awakened by Lord B., with his hair on end and his teeth chattering, who declared his room was full of strange sounds—that he could not return to it; and begged his friend to allow him to sit by the side of his bed till daylight, which he did. I have always thought he would end by being a Methodist.

A GERMAN COURSE, adapted to use in colleges, high schools and academies. By George F. Comfort, A. M., professor of modern languages in Alleghany College, Pennsylvania. New York: Harper & Brothers. 1870. 12mo, pp. 493.

This copious grammar is admirably arranged; its typography brings out the various modifications of the noun, adjective, verb, etc., to the eye, so that the whole structure can be seen at a glance. Beginning with the concrete, the author advances to the abstract, so that the mind of the pupil is interested from the first lesson and held to the end. The work consists of practical lessons, conversations, letters and forms of business, a German grammar and a vocabulary.

We have from the Southern Publishing House, 112 Camp street: VASURA. By Augusta J. Evans, author of "Benah," "St. Elmo," etc. New York: Carlton. 1869. 12mo, pp. 471.

Miss Evans excites the curiosity of novel readers, first of all, by the very striking names she has given to her creations. Faithfulness to the marriage vow is the well-timed theme of this work. It is with works of fiction as with oratory—the number of the audience determines the comparative value of the performance; and by this rule the writings of Miss Evans have unusual merit. Her characters are very marked;

her lovers have difficulties utterly insurmountable; her heroines are strong-willed, however—able to mold and reduce the most impracticable; which they finally do—in fact accomplishing, before marriage, that which is not infrequently done after. Her prose is often blank verse, which needs only the capital letter and the proper divisions of the line. After reading "Vashti," if we mistake not, most readers will find their vocabulary considerably enlarged. An extravagance in the plot, fancy, adjectives, sentimentality and poetry are exactly that which constitutes the great charm of her works. But over and above all these minor matters we welcome the excellent moral and religious tone which pervades everything she writes.

To the Members of the Mobile Conference

BRETHREN: The books looked for so anxiously, during the session of our Conference, reached Selma soon after its adjournment. It would be a pity to return them to Nashville. The agent is anxious to have them sold, and our people wish and need them. They can be had of Bro. Bonnds, at the same rates charged by the Publishing House, and I hope the brethren will take them at once.

For the accommodation of brethren in this region, I have requested Brother Bonnds to forward a few sets of each work to Brother J. K. Randall, of this city, where they can be had at Publishing House rates.

The works embraced in the bill are Bishop Paine's Life of McKendree, Dr. McFerrin's Methodism in Tennessee, Dr. Sumners' Commentary on Matthew, and General Minutes.

J. HAMILTON.

MOBILE, ALA., Jan. 20, 1870.

SHEETS OF JERUSALEM.—Probably no capital city of equal consequence was ever taken and retaken as many times as Jerusalem. We have no record of the date of its foundation, yet its subsequent history is one of continual contests and continual restorations; and it is no doubt owing to these changes that the ground of the modern city is in many places thirty feet above the level of the old, and that the valleys which formerly intersected its divisions are now filled to their summits with soil and debris. The following are the principal sieges and conquests which the metropolis of Palestine has undergone, not including, however, various brief occupations during the Macedonian and later Syrian disturbances.

Joshua	1425
David	1048
Shishak	974
Joash	839
Assyrians	771
Pharaoh Necho	610
Nebuchadnezzar	587
Ptolemy-Soter	320
Antiochus Epiphanes	170
Pompey	63
Cassius	51
Herod	37

Titus Vespasian	70
Adrian	135
Chosroes	614
Heraclius	628
Omar (Saracens)	637
Seljuk Turks (Tutush)	1078
Godfrey of Bouillon	1099
Saleh-ed-din	1187
Turks	1217
Crusaders	1229
Turks	1245
Schim	1517
Bonaparte	1799
Mehemet Ali	1832
Turks	1840

A good wife makes the poorest and most desolate home a paradise, and molds the most negligent and indifferent husband into a tender and thoughtful companion. The influence of woman—quiet, imperceptible and all-persuasive—is irresistible when directed by woman's instinctive tact and affection.

AN ENGLISH bishop quernously remarked to his servant that he was dying. "Well, my lord," said the good fellow, "you are going to a better place." "John," replied the prelate, with an air of conviction, "there's no place like Old England!"

God loves to have us pray with earnestness. The best proof of earnestness is simplicity. Better in God's sight are the broken but heartfelt utterances of some who think themselves wonderful in prayer.

Married.

In Gretna, Louisiana, on Wednesday, the ninth instant, by Rev. J. D. Parker, at the residence of the bride's mother, Mr. J. PEACE to Miss LOUISA COOMANS.

Obituaries.

IN MEMORIAM.

On the evening of December 28 a message came that I was wanted to bury Ocky LAW. The thought overwhelmed me that one so young, so robust and so happy should be called to leave life, while I, who have numbered my "threescore years and ten," should be left to perform these sad funeral rites for one cut off in the morning of her days.

One by one the companions of my journey have dropped off, while through mercy I am yet among the living. I have witnessed and shared many sad scenes, yet seldom have my feelings been so harrowed up as they were at the burial of Ocky LAW. There, around that grave, mourned a fond, youthful brother, sister, and husband, while the loving father was not there, being unavoidably absent.

Mrs. LAW was snatched away as in a moment, and could not express herself in her dying moments; but as she was raised in the fear of God, and was a member of Christ's church, we leave her trustfully in the arms of everlasting mercy.

Mrs. LAW was the daughter of our brother, James MUSE. He used to call her his "little angel." We hope her redeemed spirit is now mingling with the throng of the "ministering spirits who are heirs of salvation." W. CLAYTON, Louisiana.

Died, at her residence in Upland county, Texas, January 15, 1870, Sister MARIAH SAMPLES.

Sister Samples professed religion in 1818; joined the Methodist Episcopal Church. In 1819 she was married to Mr. James Samples, and that fall migrated to Bibb county, Alabama, where they lived until the first of November, 1850, in which time they moved to Upland county, Texas.

When I was but a boy I saw her at the altar pleading for sinners, and many a one crouched at her feet and called upon her to assist them in their importunities. I was with her last summer, at a protracted meeting held in Gilmer. Though bending under the weight of many years, she prayed and sang and shouted, and her strength failed not. When her husband died she prayed, if it was the will of the Lord, she would like to go too. The next day she was taken sick, and on the eleventh day she was called to pass the Jordan of death, and she passed triumphantly, telling to all that Jesus was with her still.

They had five sons, but they have all "passed the flood." They had also four daughters, two of whom are dead. The death of Sister Samples and Brother Samples is unparalleled. They were married when young, raised a large family, and saw them pass away, one by one, until there were but two left. They had lived peacefully with all men and with their God. They died devoted Christians, and now they rest from their labors, and their works do follow them." B. W. BROWN.

REV. FIDALIAN WOOD was born in Marion district, South Carolina, April 16, 1800, and died at the residence of his son, Jesse Wood, at Mount Pleasant, Gadsden county, Florida, aged sixty-nine years, five months and three days.

Within these brief dates is comprised a life of unusual moral beauty, Christian integrity and usefulness. He was educated at Marion Academy, under the Rev. Joseph Travis as preceptor, from whose hand we have been shown a certificate of Brother Wood's high standing as a student and scholar, and who makes honorable mention of him in his autobiography.

The precise time of Brother Wood's conversion and connection with the church is not known; but it was in early life. His home was ever the preacher's home, and his son, in a letter to the writer, says that the first persons he remembers seeing, outside of his father's family, were ministers of the gospel. He was not very demonstrative in his religious enjoyment, and his religion was not that spasmodic feeling which ebbs and flows according to circumstances, but rather the steady, shining light, which "shineth more and more unto the perfect day."

He was urged in early life to take license to preach, but his constitutional diffidence prevented his doing so, and he was not licensed to preach until about ten years before his death. During this brief period he made full proof of his ministry. He was a close student of theology, and being a scholar of more than ordinary attainments, his sermons were well prepared before delivery, and were of a high order. In whatever community he lived, he labored with unflinching energy to promote education, and to establish Sunday schools and Bible classes; and if there was no Sunday school near him he had one in his own family. Like Abraham of old, he commanded his house after him, and before his death he had the joy of seeing eleven out of his twelve

children professors of that religion which he had so diligently taught them by precept and example. He had just made a visit to California to see a much loved daughter, whom he had not seen for many years, and was permitted by a kind providence to return and die in the presence of his children.

During his sickness he murmured not, complained not. Two or three days before his death he was in a sort of stupor, and oblivious to every other subject but that of religion. When his tongue was paralyzed, so that he could not converse on other subjects, and when spoken to in regard to his future prospects, his countenance would light up with animation and joy, and his tongue was loosed, so that he could praise God and testify of his sustaining grace. Frequently some familiar hymn was sung, and he never failed to raise his eyes and look pleasantly on those who sang.

Thus peacefully, in the midst of his children and his children's children, and having accomplished a long life of usefulness, he was gathered unto his fathers.

SAMUEL STODOLSKY, son of George and Magdalene Stodolsky, was born in Orangeburg district, South Carolina, November 20, 1791, and died December 21, 1869, near Antauville, Alabama—in the far-famed Dutch Bend. He was seventy-five years, one month and one day old. He was of Dutch descent.

His father was a Methodist of the old time, and brought his son Samuel up in the fear and service of God, and at a very early age he joined the Methodist Episcopal Church in South Carolina. The writer of this notice has heard him say that he for several years rode ten miles, when a boy, to Sabbath school, and was the first on the ground.

He settled in Dutch Bend, on the very place where he died, in 1822, and has for more than fifty years been closely identified with Methodism in all that section of the State. Years ago he often went thirty and forty miles to Quarterly Meeting, and never was known to be absent, except in case of sickness. He held the office of class leader for nearly sixty years, and regarded the late act of the General Conference on that subject a great error. He was for fifty years a steward in the church, and ever felt a deep interest for the pastor and his family, and always carried money to the Quarterly Meeting. He gave much attention to the pastor's family, especially in his absence. He had many friends among the preachers who have served in turn here for fifty-four years, some of whom went before him to their reward; and many others yet in the work, to whose eyes this may come, will remember him with great pleasure. He has kept a book with the name, the assessment and payments of every preacher and presiding elder who has traveled or been stationed here for fifty-two years. The name of the writer stands last on his book for 1869.

He was the superintendent of the Sabbath school here for nearly fifty years, and in all that time he missed but few Sabbaths. In forty years his school was suspended but for one week. There are men in this region of country now in the decline of life, and superintendents of Sabbath schools, who went to him when boys. What a host will some day gather around him in heaven!

He was a correct man in all his dealings—made but few debts, and always paid them when due. He spoke evil of no one, and rebuked all who did. He made home happy, and carried sunshine and love with him wherever he went. As he advanced in life he became more devout, and renewed his energy in every enterprise connected with the church. But few men have ever lived who were so abundant in labors as he. He had his place of prayer, and for at least a quarter of a century no business, no company kept him from that consecrated spot three times a day. I was with him in his sickness several times and talked with him, and think he was the best prepared to die of any man I ever saw. He leaves behind a wife and children, who deeply mourn and feel his loss. God bless and bring them all at last to heaven.

WILLIAM A. EDWARDS.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. DAVIS, M. D. To be had of Steel & Co., 72 Camp street; Eyrich, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 339, New Orleans.

OBSERVE.—Dr. D. has removed to No. 19 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention. 6421C

The Child's Corner.

PRETTY IS THAT PRETTY DOES.

BY ALICE GARY.

The spider wears a plain brown dress,
And she is a steady spinner;
To see her, quiet as a mouse,
Going about her silver house,
You would never, never, never guess
The way she gets her dinner!

She looks as if no thought of ill
In all her life had stirred her;
But while she moves with careful tread,
And while she spins her silken thread,
She is planning, planning, planning still
The way to do some murder.

My child, who reads this simple lay,
With eyes down dropt and tender,
Remember the old proverb says
That pretty is which pretty does,
And that worth does not go for naught
For poverty nor splendor.

'Tis not the house and not the dress
That makes the saint or sinner.
To see the spider sit and spin,
Shut with her webs of silver in,
You would never, never, never guess
The way she gets her dinner!

THE CHILDREN'S CRUSADE.—One of the most startling effects of this monkish delusion was the crusade of the little children. A band of fifty thousand children from Germany and France set out in 1212 to redeem the holy sepulcher. A peasant child of Yendome first assumed the cross in France, and soon an increasing throng of boys and girls gathered around him as he passed from Paris to the south, and with a touching simplicity declared that they meant to go to Jerusalem to deliver the sepulcher of the Saviour. Their parents and relations in vain endeavored to dissuade them; they escaped from their homes; they wandered away without money or means of subsistence; and they believed that a miracle would dry up the Mediterranean sea, and enable them to pass safely to the shores of Syria. At length a body of seven thousand of the French children reached Marseilles, and here they met with a strange and unlooked-for doom. At Marseilles were slave-traders who were accustomed to purchase or steal children in order to sell them to the Saracens. Two of these monsters, Ferrers and Porcus, engaged to take the young crusaders to the Holy Land without charge, and they set sail in seven ships for the East. Two of the vessels were sunk on the passage with all their passengers; the others arrived safely, and the unhappy children were sold by their betrayers in the slave markets of Alexandria or Cairo. Other large bodies of children came from Germany across the Alps. Many perished from hunger, heat, disease; a few were enabled to die on the sacred soil of Syria; and it is estimated that fifty thousand of the flower of European youth were lost in this most remarkable of the Crusades.

AN OLD BOY.—Dr. Marsh, an English minister, who died not long ago, over ninety years of age, was very fond of young people. He often invited some cadets from a neighboring school to his home, where he entertained them so pleasantly that they learned to love him very dearly. When leaving him one day, one of the boys said to the others:

"What is the use of being young, when one sees a man of eighty or ninety in better spirits than the jolliest among us?"

Mark this, my merry-hearted boys and girls! Here is an old man in better spirits than the "jolliest" boy in a school. Where did this dear old man get these spirits? They came from God! This old man lived very near God, and God became a fountain of life in his heart. Thus his spirits were so free and fresh even in his old age that the boys who knew him almost wished themselves old men.

Learn from this fact, my children, the secret of keeping your hearts young when you grow old. Invite God, your heavenly Father, to live in you and with you. He will accept the invitation, and when your heads are silvered with the frosts of hoary age, your hearts will be fresher and happier than in the merry days of childhood.

BE GOOD.—We often hear little children in their play tell what they are going to be when they grow up to be men and women. I have overheard them talking on this subject, and some were going to be ministers, some doctors, some lawyers, some teachers, and so on. I once asked a little boy what he was going to be when he grew up to be a man. He looked into my face, and with a smile replied: "I am going to be good." What a beautiful answer! It is right for us to decide what business we are to adopt; but it is not right for us to be so absorbed in the thought as to forget God, and forget to be good. It takes some people a great while to decide what profession they will follow, wishing to choose the one in which they can make the most money. Christ says: "Seek ye

first the kingdom of God and his righteousness, and all these things shall be added unto you."

EVERYBODY BUT BOB.—A very little boy, after giving everybody a good-night kiss, knelt at his mother's side to say his evening prayer. He repeated: "Now I lay me down to sleep," etc., and continued, "God bless papa and mamma, and make them good Christians; God bless little Jimmie, and make him a good boy." His mamma added: "God bless everybody."

At this last sentence he was silent. His mother repeated it a second and a third time; when he raised his head, opened his beautiful eyes, and said: "Everybody but Bob, mamma. Bob drowned my cat to-day." Are there not some older children, who can pray for "everybody but Bob?" Remember that the Saviour has taught us to pray, "Forgive us our debts as we forgive our debtors."

The Farm and Garden.

Exports—Southern and Northern.

As we have said, for the forty years immediately preceding the war, the United States exported domestic products to the amount of \$5,311,000,000, of which \$3,067,087,127 were for three Southern products: cotton, rice and tobacco; leaving only \$2,243,912,872 for the other exports of the country. Of this last sum, the Southern States, we may add, are entitled to claim a very large portion also. Of what are known in commerce as "naval stores," that is, mainly, rosin, tar, pitch, and crude and manufactured turpentine, the exportation has fallen little short of \$200,000,000. It so happens, likewise, from causes which we have not the space to explain, that wheat grown southward from the Ohio and the Susquehanna, makes flour which is worth more in our domestic and foreign markets than that from wheat grown to the northward of those rivers. Nor is this all. Southern flour bears exportation to or through the tropics better than that of the North and West, and hence is chiefly exported to Brazil and other intertropical regions. Thus, therefore, although since 1840 the Southern States have not produced, annually, more than one-third of the wheat crops of the country, yet, so far as exportation is concerned, Southern flour has been exported in value very little, if any, below that supplied by the other States. This may also be said in regard to Indian corn. The whole value of "breadstuffs" exported from 1821 to 1866 inclusive, is stated at \$1,101,817,910, of which we are justified in claiming for the South fully \$400,000,000.*

But besides the leading staples, just enumerated, the Southern States have supplied all the brown sugar and molasses, and well nigh all the hemp, exported, as well as sixty per cent. of the lumber, and thirty-three per cent. of the staves, a fair proportion of the meat, the spirits, refined sugars, wool, and many miscellaneous articles; or, in all, an aggregate of at least \$4,000,000,000 of exportation between 1821 and 1866.

While the Southern States have thus contributed the main part of the exportable products of the country, it will be found they have not been relatively behind in the growth of articles for home consumption, or interchange within the Union. The census returns show that in 1860 domestic cotton goods were manufactured to the amount of \$116,000,000, of which sixty per cent. must be reckoned as the value of the raw material (Southern cotton), that is, \$69,600,000. In like manner, the South produced sixty per cent. of the hemp that year; Kentucky, Virginia, Maryland, Tennessee, Missouri and Georgia yielded forty-five per cent. of all the flax; South Carolina and Georgia harvested 187,140,000 pounds of rice; eighty-six per cent. of the whole tobacco crops grew on Southern soil; Louisiana and Florida produced 302,205 hogsheads of sugar and 12,600,000 gallons of molasses. The Southern States supplied at least forty per cent. of the slaughtered animals of the whole country; Virginia grew 5,000,000 bushels of wheat more than New York, and only 1,000,000 less than Ohio; and even South Carolina produced 1,250,000 bushels of that cereal. Of Indian corn the quantity grown was enormous, Tennessee producing more than any other State in the Union, except Illinois. Virginia garnered 10,000,000 bushels of oats. We might adduce many other articles; but must pause and turn from the prolific products of the soil to the resources of the same section in domestic animals.

The census returns of 1860, prepared for publication during the year 1869, show that the annual exportation of breadstuffs did not exceed \$12,000,000, and of the country. Even in 1860 Virginia grew 13,000,000 bushels of wheat. *Up to 1840 the annual exportation of breadstuffs did not exceed \$12,000,000, and of the country. Even in 1860 Virginia grew 13,000,000 bushels of wheat. †In 1860 the exportations, exclusive of precious metals, amounted to \$215,827,741, of which the Southern States supplied more than \$127,000,000, or more than seventy-five per cent.

war, exhibit the fact that the people of the Southern States owned 2,378,244 horses, and 772,535 mules, a very large number of draught oxen, with other cattle in proportion, including 13,402,000 swine in the seven States of Georgia, Mississippi, Missouri, Kentucky, Tennessee, Texas and Virginia. At the same time, Virginia pastured over 1,000,000 of sheep; Kentucky, Texas, North Carolina, Alabama, Arkansas and Georgia, an aggregate of 4,422,000. Indeed, for sheep growing, no land under the sun is so favorable as large parts of Virginia, North and South Carolina, Georgia and Tennessee.

The subject upon which we have ventured is almost exhaustless; but time and space circumscribe us. We shall, therefore, mention only a few more facts which serve to illustrate the manifest deep-seated influence of Southern cotton and other products upon the trade of the United States and of the world:

In 1864 the exportations of England to the United States were estimated at about \$31,000,000, and her importations therefrom at about \$21,500,000.

Balance in favor of England... \$9,500,000

But no sooner had the war ended and the productions of the Southern States been thrown once more into the commercial scales, as in 1866, than the case stood thus:

Imports from the United States... \$14,000,000
Exports to the United States... \$76,000,000
Balance in favor of U. States... \$78,000,000

2. The cotton of the South consumed in Great Britain in 1866, was estimated at \$126,250,000, while that of India stood only at \$58,500,000.

3. In 1857 \$250,000,000 were invested in the machinery and mills for the manufacturing of cotton in Great Britain. And 2,000,000 of tons of British shipping were employed in the conveyance of the raw material (three-fourths of which came from our shores,) and in the subsequent distribution of the fabrics throughout the globe; fabrics estimated to be worth at least \$500,000,000. The cotton manufacture scarcely had any existence at the beginning of the century. It is now the great industrial interest of Christendom.

4. Even now, under every possible industrial and political disadvantage, upon which we have no occasion here to dwell, the Southern States are contributing more to the exportation of the country than all the rest of the United States. Omitting exportations directly from Southern ports, such as New Orleans, Mobile, Charleston and Savannah, and as late as the week ending April 28, it may be shown that fully forty-five per cent. of the exportations from the port of New York, and other Northern ports, consisted of Southern products.

In conclusion, we repeat that no other portion of the globe has ever had a staple with a hold so firm and vital on the commerce, the industry, and the necessities of man, as the cotton of the United States. Every section of the country is equally interested in the promotion of its culture and its permanent supremacy in the markets of the world. Stricken down by the iron hand of war, the industrial resources of our cotton region have been fearfully crippled; so that, on all sides, broad fields which once teemed with the richest products that ever rewarded human labor, are now overrun with weeds, and thorns, and brush-wood. Shall this continue so? Shall these prolific regions, fraught with such incalculable wealth and prosperity to every section of the country alike, remain comparatively unimproved and desolate, for the want of capital and labor to develop their unparalleled resources? Shall not the North and the South, the East and the West, on the contrary, lay aside every feeling of animosity or ill-will, and unite their gigantic efforts to rebuild, and establish on a permanent basis, the fortunes of the New World? Or, in one word, shall they not learn "wisdom from the things they have suffered," and, resolutely crushing out the seeds of decay, and desolation, and death, cultivate the genius of life, and growth, and prosperity, till every wilderness made by the war is seen to bud and blossom as the rose?

The answer to this question rests with the people of the dominant sections of the country. The Southern people have, within themselves, all the elements of social regeneration, if only let alone; or if not hampered, and harassed, and baffled, in their efforts to re-establish their fortunes by the interference of the philanthropists of the North. If these men, having eyes to see, would only see what philanthropy really is, or what makes for the real good of the land, then, indeed, would every section of the country rise, and sing, and rejoice, in a prosperity and glory never before witnessed on the face of the globe.—*Southern Review.*

VALUE the friendship of him who stands by you in the storm; swarms of insects will surround you in the sunshine.

Scientific.

THE ACCLIMATIZATION SOCIETY OF FRANCE has secured the successful introduction of the salmon of the Rhine into the Lake of Geneva and the upper part of the Rhone. It has been a question whether salmon can be raised where access to the sea is impossible; but this case seems to settle the fact, as the great length of the Rhone, and especially the overpowering force of its current at the spot near Bellegarde, practically disconnects the Lake of Geneva from the sea for all ichthyological purposes. Salmon put in 1857 have been taken out weighing four pounds, and filled with ova; while others, evidently their offspring, have been caught. If we had in this country any similar society, the experiment might be tried in any of the small rivers which flow into the lakes above the Falls of Niagara, which are actually closed.

WE GLEAN from Nature an account of the *Victoria regia* cultivated in Ghent, the finest specimen in any botanic garden. The leaves grew to be nine feet across and supported a weight of five hundred pounds. Every four or five days a new flower appeared, opening in the morning, of a perfectly white color, diffusing about five or six P. M. a powerful odor of vanilla, closing the next morning at eight or nine A. M.; and opening the same day toward evening, this time of a beautiful carmine, and finally closing toward morning. The plant dies toward December, about the time that the seeds artificially impregnated arrive at maturity. They are sown in January, and appear above ground in six weeks. If they pass the critical period of infancy, they grow with astonishing rapidity, gaining their full size in five months, so as to cover over a pond as large as a church.

M. LUERSON makes an observation which may go to explain the apparently self-caused normal movements of protoplasm. He says that the protoplasm of the hair of a nettle or of the common spiderwort (*Tradescantia virginica*) is molecularly disturbed and its structure finally destroyed by the action of the red light, and to a less extent of the blue light, of the spectrum. This dissociative power of light is now coming into notice, and seems caused by the vibrations of which light consists. While long vibrations, like those of sound, affect masses as a whole, small vibrations may have so small a compass as to reach molecules. The report of a cannon may break glass windows, and the action of light may decompose Tyndall's vapors or Luersson's protoplasm.

Among the botanical problems which need solution, and which any intelligent observer may help to settle, is the function of those flowers which are of two sorts—one being conspicuous and generally cross-fertilized by insects, and the other being minute and always closed, and so self-fertilized, but yet producing abundant seed, it may be, from underground blossoms. We suggest for observation in this country the Polygulus; and also those flowers which, like the ginger-root (*Asarum virginicum*), have but one sort of blossom, but that so far covered as to escape cross-fertilization by bees.

GREAT efforts have been made to introduce the quinine-producing trees into India and the islands of the East Indies, so that the civilized world may not be dependent on the wild forests of America. A million of cinchona trees are now in cultivation by the Dutch in Java, besides eight hundred thousand more that were planted in the jungle, but have mostly disappeared. The attempt has met with many obstacles, but seems likely to be ultimately successful.

M. LENORMANT says that the horse was not introduced into Egypt till the time of the Shepherd Kings, while the ass appears frequently on the monuments before that time. The horse is regarded as the native of Central Asia and Eastern Europe, while the ass is an African product. It seems impossible to allow an extreme antiquity for man, or for the settlement of Egypt, if the horse was introduced less than four thousand years ago.

The statement made some time ago that the cuckoo lays eggs of different colors, which mock the appearance of the eggs of the bird whose nest it invades, is vigorously attacked by British naturalists. Will some of our American bird-nesting friends study the subject, and learn whether the eggs of our cow-bird vary more than those of other birds, and whether the eggs laid in the nest of one kind of bird are unlike those laid in the nest of another foster parent?

Under the new English system of the assumption of the telegraph as a part of the post office system, a message may be sent anywhere in Great Britain for twenty-five cents, with an extra charge of one penny if sent from the receiving office by mail, or twelve cents per mile if sent by message.—*Independent.*

MISCELLANEOUS.

STONEWALL INSTITUTE,
Located 12 Miles North of Selma, Ala.

After a week's recess for Christmas the exercises of this School for Boys will be resumed on MONDAY, JANUARY 3, 1870.

1. He has engaged the services of that thorough teacher and master of his art, with ten years' experience as an instructor, Mr. JONAS J. WILLIAMS, to assist him in imparting to his pupils a perfect knowledge of all the Mathematics usually taught, including book-keeping and Field Surveying.

2. He has on hand at the Institute, and has had since October last, the moulting and most studious boys that for two years have been under his instruction.

3. Three of his pupils of 1868 have taken premiums this year at three different Universities—the first in the South—a fact furnishing the highest possible endorsement of his fidelity and skill.

Two features of this School distinguish it from most others: its teachers are on the ground all the time, and actually give instruction nine hours per day; and each instructor is limited to twenty pupils.

The habits and morals of its inmates are carefully cared for, all being treated as gentlemen, and all being required to act as gentlemen, the honor of young men being constantly cultivated in all particulars. And to aid in establishing these results, the Bible is reverenced as authority, its truths being studied and taught in uniform lessons each Sabbath, with ministerial services regularly performed; and the feeling of home is infused into the mind and heart of every student.

Charges from January to July 1, 1870, for board, tuition and washing, will be \$175, paid on entering, or in a thirty days' accepted draft on Mobile or Selma, with \$10 on deposit for books. Payments must be made to W. S. Knox, Selma, Alabama, or Foster & Gardner, Mobile, Alabama.

In the elementary parts of education, even in writing, spelling and reading—which are taught to all—this School defies comparison with any other. Thoroughness in every department is the basis of progress.

The location of the Institute is in the quiet country, and is distinguished for its healthfulness. Here no cigar shops or liquor saloons distract the minds or corrupt the morals of the students. This gives its pupils great advantages in learning books and acquiring habits of clear thinking. Its patrons are at all times invited to visit and see for themselves the admirable daily schedule of duties and toll here executed by both teachers and pupils.

As all are vitally interested in sustaining an institution whose standard of morals and thoroughness of scholarship are so unquestioned, the Principal confidently trusts that he claims to the public, pledging to that public to give his constant and undivided attention to the interests of his charge.

As the number of students will be limited, those parties intending to send will please at once address the undersigned.

Jas 2m D. C. R. CONNELLEY, President,
Near Selma, Alabama.

THE MECHANICS AND AGRICULTURAL FAIR ASSOCIATION
OF LOUISIANA

will hold their NEXT GRAND STATE FAIR in New Orleans, beginning on the twenty-third of APRIL, 1870, and to be continued for nine days.

Premium Catalogues for the Fair can be procured at the office of the Association, or through the Post Office, as desired.

Stockholders holding in their own names ten shares of the Capital Stock of the Association are required to call at the office of the Secretary, Mechanics' Institute, to get their tickets of admission to the Fair Ground for the year 1870, as an entire new class of tickets have been prepared. These tickets will admit the owners with their families and carriages on the Fair Ground at all times, even if said Ground is rented or used for special purposes.

The Directors invite every good citizen to become a stockholder, and to purchase the stock thus required from the Secretary of the Association.

P. S.—Choice Plants, Shrubs and Bouquies are for sale at the Fair Ground.

LITTELL HOMES,
Jas 1m Secretary and Treasurer.

COLEMAN'S LATEST IMPROVED PATENT UNOLATORY
CORN AND WHEAT MILL.

Grinds one bushel of coal and fine Meal in Forty seconds.

Highest premiums awarded at numerous State Fairs, North and South. In the last twenty years, especially the Louisiana State Fairs of 1857-68-69.

For circulars and reduced Price List address II. DUDLEY COLEMAN,
P. O. Box 298,
Factory and Office, No. 205 Tchoupitoulas street, New Orleans. Jas 1y

GENERAL COMMISSION MERCHANTS
IMPORTERS OF RIO COFFEE,

And Exclusive Authorized Agents for the sale of
Phospho Peruvian Guano,
Ammoniated Alkaline Phosphate,
Ammoniated Super Phosphate,
Land-Plaster, etc., etc.

MOBILE, ALABAMA.
Orders will meet with prompt attention.

We are importing our Coffee direct from Rio, and are offering buyers as great inducements as any other market presents, while shorter lines of communication by rail with the West, Mississippi, Alabama, Tennessee and Georgia give us material advantages, in low rates of freight, to supply these sections.

The Fertilizers we offer are of the most reliable character, and may be confidently relied upon by planters.

Jas 2m WALSH, SMITH & CO.

CENTENARY MALE INSTITUTE,
SUMMERFIELD, ALABAMA.

The twenty-eighth annual session of this school will begin on the first Monday in OCTOBER, 1869, and continue nine months.

The expense for tuition, incidental fees, board, washing, fuel and lights, for the session, will be \$231 50, one-half to be paid on entrance and one-half on the 14th of February, 1870.

Persons wishing to patronize this school may address JOHN MASSEY,
Jas 2m Principal, Summerfield, Ala.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD
NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamelled Iron Knobs, the improvements in the covers and entire pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are admitted to stand fire, or others, without charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast Iron Enamelled Reservoir and Finest Tin Ware, Copper, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the pipe, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back will heat as well or better than the middle ones. For sale by

G. W. W. GOODWIN,
62 Camp street.

ALSO, THE MOST

Complete and Perfect Cooking Stove
FOR INTERMEDIATE COAL OR COKE
ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp street. The advantages possessed by this stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care. Oven Doors lined with tin, and furnished with William Rogers' Patent Air Chamber, front doors, patent centres, covers and White Enamelled Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWIN,
62 Camp street,
Sole Agent for States of La. and Texa.

THE TIMES......**THE TIMES.**

THE IMPROVED

LARGE OVEN COOKING STOVE,
with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when Baking, there is no need for removing anything until done.

THE TIMES

is made of a superior quality of Iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Its members, we guarantee them to give entire satisfaction. Duplicate parts can be had at all times, at small cost, by which repairs can be made which will frequently save the price of a new Stove.

ZABELE & DALTON,
No. 115 Poydras street.

A large variety of MANTLE GRATES, House Furnishing Goods, Tin and Japan Ware. Agents for the celebrated Osburn Bins and Animal Cages.

ZABELE & DALTON,
No. 115 Poydras street.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pail. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under full guarantee.

Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charcoal Oak, True Kettlebush, Moll of Orleans, Queen of the South, Beta and others, all of which I offer at a low price.

J. H. CAMPBELL,
no 13 6m 133 Poydras st., New Orleans.

MISCELLANEOUS.

J. BONTOMPS,
DYER AND SCOURER.

182... POYDRAS STREET.....181
Between Carondelet and Baronne streets.
(Formerly of Bourbon street for a great number of years.)

Mr. J. Bontemps informs his friends and the public in general that he has re-established himself in the Dyeing, Scouring and Cleaning business at the above place.

All orders will be attended to with care and dispatch.

A Tailor is attached to the establishment, who will attend to the repairing and mending of clothing.

Specialty for mourning.
Orders from the country promptly attended to.

no 13 3m

BELLS.....BELLS.....BELLS

HUCKEY BELL FOUNDRY.
Established in 1837.

Church, Academy, Factory, Farm, Fire Alarm Bells, etc., made of pure Bell Metal (copper and tin), warranted in quality, tone, durability, etc., and mounted with our Patent Improved Rotating Hangers. Illustrated catalogues sent free.

102 and 104 East Second street,
Jas 1y Cincinnati, Ohio.

BELLS, STEEL COMPOSITION,
For Churches, Schools, Etc.

BLUMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (and Cast Iron or "A" and "B" type) are made of pure Bell Metal, and are more durable, and cost only one-third as much. Send for descriptive circular. Jas 2y

SATURDAY, FEBRUARY 12, 1870.

AN OLD ANECDOTE VERIFIED.

Two students, walking down the road, saw a donkey coming with their load. The boys were full of fun. "Good day, Mother of asses!" shouted they. But mother wit put down their pride: "Good day, my children," she replied.

Boston Transcript.

HOUSEKEEPERS' DEPARTMENT.

AN EXCELLENT RECIPE FOR MAKING YEAST.—Take a small handful of hops and three large Irish potatoes, slice them and boil all together in a quart of water fifteen or twenty minutes, then strain it in a pan and put in enough flour to make a batter about as thick as you would for waffles. Put in your yeast and a small cup of molasses, beat it well and set it to rise. After it is risen add a little more flour and then make it out in cakes and dry them in the sun. When dry, put them in a bag and hang them in a dry place.

SALLY LUNN.—Two quarts of flour lightly measured; mix it with warm milk instead of water; six eggs well beaten, yeast sufficient to make it rise, half a pound of butter, a little salt. Make it up and knead as you would light-bread. After the second kneading make a thin loaf two or three inches thick and set it by the fire till properly risen. Bake in moderate oven. Split, butter and send to table hot.

CREAM PIES.—One cup of sugar, one of flour, teaspoonful of yeast powder sifted with the flour, three eggs beaten separately. Mix the yolks with the sugar and add a tablespoonful of milk. Bake in flat tin or pie plates about ten minutes. Split the pies and put in the cream. This will make two pies. Let them cool before splitting them.

THE CREAM.—Boil one pint of milk. Add two large tablespoonfuls of flour well dissolved in a little cold milk. One cup of sugar and two eggs, and season with vanilla.

PAPER OR CREAM WAFERS.—Take flour, sweet milk, and a little salt. Make the batter the consistency of thick cream and bake in thin water irons.

FIG PRESERVES.—Gather the figs when just ripe, remove the skin by scraping or peeling, put them in salt and water to remove the fig taste. Freshen them by putting them through two or three scalding waters till the salty taste is lost, and in the last water put a small piece of alum, to harden. Make a sirup (a pound of sugar to a pint of water,) put in figs as soon as the sirup is clear, and boil them till transparent. Add more water if the sirup becomes too thick before the figs are done. —(Correspondent of Southern Farm and Home.)

Children Protecting Birds and Animals.

The German societies for the protection of animals, especially the one in Berlin, are doing excellent work by writings, and especially by winter lectures. The discussion on the protection of birds called the attention of the leaders of this movement to the necessity of influencing children to care for animals, and several excellent books have been written for this purpose. One of the most noteworthy of these is "The Notabilities of the Animal World," by W. Ahlers, honorary member of the "Thierschutzverein" of Hamburg, Paris and Riga. It is written especially to attract the love of the young toward animals which are of service to mankind.

A Hessian schoolmaster has set a good example. It was the general complaint in his village that the rough boys were continually guilty of cruelty to animals, of taking away birds' eggs, and of destroying their nests. The teacher, grieved at such conduct among his own scholars, determined, after careful consideration, to form among the children a "Society for the protection of Animals and the Preservation of Plants." The children were delighted when their instructor communicated to them his idea, and with the greatest willingness took upon themselves the duties imposed by the rules of the society. During the past year the children have caught many thousands of injurious insects, destroyed innumerable caterpillar nests, and collected and killed many claspers by the bushel. They are taught, however, to protect the useful animals, and to preserve the birds and their nests most zealously.

This winter the children have undertaken the duty of strewing food in frosty weather to their little winged friends. The communal authorities of the place planted a number of young fruit trees during the last summer, and these are now placed under the special care and oversight of the school youth. The teacher has apportioned to each boy a certain number of trees, and the children are said to have really become very much attached to the charge placed upon them. Strange

to say, no rewards are offered to the children; they feel perfectly satisfied in being able to be of service, and to work for the general good. This village Society for the Protection of Animals and Preservation of Plants certainly deserves encouragement and imitation. We should be glad to hear of one or more being established in every American village. Suitable rewards, however, would not be out of place.

An Idol Maker's Card to the Public.

The following advertisement appeared in a Canton paper, China, a few years since, inserted in a regular business way, and with as single an eye to the profits of trade as if the gods had not been concerned. The advertisement ran thus:

"I, Achen Tea Chingchen, a lineal descendant of Comp. Boi Kache Chingchen, the celebrated sculptor and carver in wood, who, through his unremitting studies to promote national religious worship, by the classical touches of his knife and chisel, has been honored by emperors, kings and rajahs of the East, and supplied with superior idols for public and domestic worship, now humbly offer my services in the same theological line, having traveled from hence, at a considerable expense, to perfect myself in anatomy, and in copying the most graceful attitudes of the human figure, under these able masters, Nollekens and Bacon. Achen Tea Chingchen is now in possession of casts of the most approved models and Elgin marbles. He is ready to execute to order idols from twelve feet high, well proportioned, down to the size of a marionette monkey, or the most hideous monster that can be conceived, to inspire awe or reverence for religion. My charges are moderate. For an orange-outang, three feet high, \$700; ditto rampant, \$800; a sphinx, \$400; a bull, with hump and horns, \$650; a buffalo, \$800; a dog, \$200; ditto couchant, \$150; and an ass, in a braying attitude, \$800. The most durable materials will be used. Of statuary granite, brass, copper, I have provided sufficient to complete orders to any extent. Perishable wood shall never disgrace a deity made by my hands. Posterity may see the object of their father's devotion unmarred by the inclemency of the seasons, the embraces of pious pilgrims, or their tears on the solemn prostrations before them. Small idols for domestic worship, or made into portable compass, for pilgrims. The price will be proportionate to the size and weight.

"No trust; ready money. Any order, post paid, accompanied by a drawing and description of the idol, will be promptly attended to, provided one-half the expense be first paid, and the remainder secured by any respectable house in Canton."

THE INSCRIPTION ON THE SUEZ MONUMENT.—The Greek text of the papyrus inscription for the monument, in honor of the completion of the Suez Canal, has been composed by Dr. Rheinhold Klotz, at the University of Leipzig, under a commission received from Paris. It is literally as follows: "In the year of the Hegira 1282 (1869) under the renowned government of the illustrious Padish Abdul Aziz, Khan, Emperor of the Ottomans, and under the wise rule of the noble Ismail Pasha, Viceroy of Egypt, this monument was erected to celebrate the excavation of the Suez Canal, which is destined to approximate the nations of Europe and Asia, to multiply their commercial relations, to promote the beneficent conquests of civilization, and to favor a more immediate union between all the members of the human family. This great work of peace owes its origin to the courageous perseverance of Ferdinand de Lesseps, with the co-operation of the principal maritime nations, and under the patronage of the Emperor of the French."

FIREST PRAYER.—Bishop Taylor beautifully remarks: "Prayer is the key to open the day, and the bolt to shut in the night. But as the clouds drop the early dew and the evening dew upon the grass, yet it would not spring and grow green by that constant and double falling of the dew, unless some great shower at certain seasons did supply the rest; so the customary devotion of prayer twice a day is the falling of the early and latter dew; but if you will increase and flourish in works of grace, empty the great clouds sometimes, and let them fall in a full shower of prayer; choose out seasons when prayer shall overflow like Jordan in time of harvest."

LAKE DISTRICTS IN FRANCE are given up to the raising of silkworms. On some of the limestone plateaus north of Nismes, which are bare for miles and present no soil, large holes are excavated, and the earth to fill them, in which the mulberry trees are to grow, is brought from a distance of thirty miles, so great is the profit of this culture.

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The general market has exhibited only a moderate degree of animation since our last issue. Some branches of the wholesale trade are doing a good business in filling country orders, but others complain of increasing dullness. The receipts of sugar and molasses have been moderate, and meet a good demand at former prices. The movement in Western produce has been mostly confined to the local trade. There is some export demand for flour, but operations are prevented by scant supplies of the descriptions wanted. More liberal receipts have unsettled the market for provisions, which have sold at easier prices.

The tributaries are still at a good navigable stage, and planters are rapidly shipping their crops to market. The arrivals have consequently continued liberal, even more copious than last week. The recent heavy receipts at all the ports, as well as at this port, have caused a general raising of crop estimates, and it is now variously anticipated that at this port we shall have 950,000 to 1,000,000 bales. With regard to the entire crop parties are wide apart in their views.

The river remains the same—three feet below high water mark.

Correct.—The following are the arrivals since the fourth instant:

Louisiana and Mississippi.....	283,577
Lake.....	45
Mobile.....	808
Florida.....	30
Texas.....	689
Total.....	292,929

On Saturday both the supply and the demand were moderate, and the sales embraced 4,800 bales, at irregular prices, factors in some instances realizing previous rates, while in the bulk of the business they were compelled to submit to a decline of 1/4c, the closing quotations being 23 to 23 1/4c for good ordinary, and 23 1/2 to 23 3/4c for low middling. On Monday buyers came forward with a better spirit, and although factors assumed a higher tone, yet 6,250 bales changed hands, mostly at stiffer prices, but without any quotable improvement. On Tuesday the market opened with very little inquiry, and buyers claiming further concessions, which factors would not admit, but after meridian parties came together more freely, and the business comprised 5,200 bales, mostly at easier prices, which, in some cases, indicated a reduction of 1/4 to 1/2c. In the bulk of the sales, however, low middling showed no quotable decline, and in the lower grades both strict ordinary and strict good ordinary sold up to previous rates. Mixed lists, especially if dirty, on the contrary ruled lower, and we are consequently compelled to give a wider range to our quotations.

This makes an aggregate for the past three days of 16,250 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 685,846 bales, against 598,361 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 412,580 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 206,020 bales to Great Britain, of 20,821 to France, and of 45,760 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	21 1/2 to 22 1/2
Good ordinary.....	22 1/2 to 23 1/2
Low middling.....	23 1/2 to 24 1/2
Middling.....	24 1/2 to 25 1/2
Strict middling.....	25 1/2 to 26 1/2

SUGAR.—The demand has been active since our last review, and advanced prices were obtained.	

MOLASSES.—The demand has continued good at former prices.

Flour.—The demand continues good, and prices are firmer, but with little or no stock in store.

MONEY.—Gold opened on Tuesday at 120 1/2 to 120 3/4, but on the receipt of the opening dispatch from New York, quoting it at 120 1/2, ruled at 120 1/2 to 121 1/4, and closed at 121 to 121 1/4 (against 120 1/2 at New York).

The sales of silver include 7,000 Mexican dollars on Friday at 2 per cent. premium in gold, 16,000 on Saturday at the same, and \$1,000 in American half dollars on Monday at 118 1/2.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, FEBRUARY 19, 1870.

NO. 5.

NEWS OF THE WEEK.

DOMESTIC.

REMARKS ON THE MARKET.—Yesterday was another dull day in cotton. Buyers held off for concessions, which factors were unwilling to make, so that the business summed up only 3,000 bales, at 1c. decline. The receipts proper since last Friday are 2,493 bales ahead of those for last week, and since the first of September 113,987 in excess of last year. The dullness of cotton caused a corresponding limited business in exchange. In Western produce we notice a steady local demand, at former prices for flour, and advanced figures for corn.

There seems to be an expectancy that gold is cheap at anything below 120, and when it opened yesterday in Wall street at that rate, a still further advance was looked for, but it subsequently settled down to 119½, closing here at 119½ to 119½. City and State securities were more in request, levee sixes selling at 63½ to 69½, and city sevens at 73½. The issue of 1,500 additional shares of the Louisiana Petroleum and Oil Company has depressed the stock. A lot sold yesterday at \$75 per share. —*Piney, Feb. 17.*

THE SULPHUR MINE CASE.—In the suit of Eschbach & Co. vs. the Louisiana Petroleum Company, in the Fourth District Court, Judge Theard rendered a decision, concluding with the following decree:

"It is therefore ordered, adjudged and decreed that the prayer of the plaintiffs for possession of the premises leased by them to the defendants, as assignees of J. W. Mallet, be rejected; that the Louisiana Petroleum and Oil Company be decreed to have the sole and exclusive control of the digging and boring of all mines on the property leased, including all the sulphur lately discovered; that the plaintiffs be decreed to be entitled to the one-half of all profits arising from the digging of said mines, to be accounted for to them at least every six months; that the reconventional demand of defendants be rejected; and that they pay the costs of this suit."

THE WEATHER.—Although Monday began a little gloomy, with occasional clouds obscuring the sun, the day was pleasant and agreeable enough, and the soft south wind had in it a touch of spring-like freshness, like the odor of morning flowers. The temperature at six A. M. was at seventy, and by ten o'clock had reached seventy-three degrees.

The subjoined table shows the condition of the weather at other places:

Plaist Cove, N. S., 14, N. W., cloudy; Halifax, N. S., 16, N. W., clear; Boston, Mass., 21, S. E., cloudy; New York city, 35, S. E., cloudy; Buffalo, N. Y., 38, S. W., raining; Philadelphia, 32, N. E., cloudy; Baltimore, Md., 40, S. E., cloudy, cool; Fortress Monroe, Va., 48, S. E., clear; Charleston, S. C., 57, cloudy; Key West, Fla., 67, E., clear; Havana, Cuba, 72, E., clear; Augusta, Ga., 57, calm, clear; Chattanooga, Tenn., 55, S. W., raining; Knoxville, 55, E., raining; Nashville, Tenn., 63, S., cloudy; Memphis, Tenn., 64, N. W., cloudy; Louisville, Ky., 50, S., raining; Montgomery, Ala., 64, S., cloudy; Mobile, Ala., 62, S. W., cloudy; Jackson, Miss., 65, S., cloudy; Natchez, Miss., 66, S. W., cloudy; Baton Rouge, La., 68, S. W., cloudy; Houston, Texas, cloudy.
--

During the last few days efforts have been made to mix the schools in Algiers and Jefferson with those of the other line, which result will certainly precipitate the closing of both places. Judging from the action of the last few months and the now proposed legislative measures, the public will doubtless soon have to bid a long farewell to public schools in this State, which so long have been our pride and boast.

WASHINGTON, Feb. 14.—It is expected that the President will issue a proclamation Saturday proclaiming the ratification of the fifteenth amendment. This is based on information said to have been received that the Nebraska Legislature will adopt it immediately after organizing on Tuesday next, and the official ratification of this action will be instantly forwarded to the State Department. Nebraska makes the requisite number of States without counting New York. —*Times.*

NEW YORK, Feb. 15.—The business tone of day is healthful, but with stocks of merchandise showing a reduction unusual at this time of the year.

Money is easy.

There is some uncertainty in cotton, arising from the doubt as to the quantity yet unmarked in the South.

The late stringency in money has checked speculative operations to a great extent.

WASHINGTON, Feb. 16.—Senate.—The Mississippi bill resumed. An amendment was introduced repealing the fundamental conditions of the bill, which provoked quite a stormy debate.

The Senate adjourned without any action.

HOUSE.—A petition was presented remanding Massachusetts to a territorial condition for disloyalty. It was referred to the Reconstruction Committee.

Mr. Banks introduced a resolution authorizing and instructing the President to maintain an absolute neutrality between Spain and the Cubans. The resolution was referred to the Committee on Foreign Relations.

FOREIGN.

MADRID, Feb. 15.—The Duke de Montpensier arrived here to-day and had a long interview with General Prim.

PARIS, Feb. 15.—The preliminary examination of parties implicated in the recent disorders has resulted in the holding of one hundred and four of them for trial before the courts.

The speech of the King of Prussia on opening the Federal Parliament is not well received here. Nearly all of the journals consider it menacing in tone.

In the Corps Legislatif to-day M. Chasselin, a deputy of the left center, asserted that his party in the chamber represented the majority. Olivier indignantly denied the assertion, declaring that the present ministry were the true representatives of the majority, and, supported by it, would do their duty.

PARIS, Feb. 16.—The prince imperial is skating to-day on the lake of Bois de Boulogne. The emperor was with the skating party.

The Empress Eugenie is quite ill. Olivier yesterday concluded a discussion by saying that "the government would persist in its liberal course, but would resist dangerous agitations in the streets or in the press."

ENGLAND.—The sessions of Parliament were opened to-day. The queen's speech was read by a commission, her majesty excusing herself on account of recent indisposition.

The queen comments on the tranquillity which prevails in all quarters of the globe, and notices the growing disposition of all countries to appeal to friendly mediation rather than resort to arms; asserts the favorable condition of the finances and revenues of the realm; suggests continuation of the inquiry, commenced during last session, into the mode of conducting Parliamentary elections; announces the probability that government will propose land reform measures for Ireland, and will introduce a bill to define the status of citizens of foreign countries who may desire naturalization; recommends such legislation on the subject of religious tests in the Universities of Oxford and Cambridge as will increase the usefulness of those institutions; comments upon recent agrarian outrages in Ireland, and, after a resume of various measures of domestic reform to be submitted to Parliament, closes as follows:

"Upon these and all other subjects her majesty devoutly prays that your labors may be constantly attended by the blessing of God."

HAVANA.—Spanish hatred of Americans has culminated at last in the deliberate assassination of American citizens. Four Americans—Isaac Greenwall, Henry K. Foster, Hugh Johnson and Gardner Wells, all of New York—while on their way to a photograph gallery, were set upon by a mob. Greenwall was killed by a pistol shot, and Foster and Johnson were severely wounded and afterward maltreated by the ruffians. Wells managed to escape by flight, though he was followed by a crowd shouting "Stop him!"

No cause for this outrage upon peaceable strangers can be imagined, except that the four gentlemen wore neckties of blue—possibly an obnoxious color. The assassin of Greenwall, supposed to be a volunteer, escaped, and is unknown. Much excitement prevails in Havana. The captain general is highly indignant, and the whole police force is in motion to discover the parties concerned in the murder. The dispatch asserts that the assassin, if found, will be tried by a drum-head court-martial, and executed

within two hours after conviction. Secretary Fish, upon learning the news, telegraphed at once to Havana for particulars.

GERMANY.—An ordinance, condemnatory of civil marriage, has been issued by the Prussian archbishopric vicariate. The document pronounces it to be a debasing community of the sexes, and maintains that it is only after the nuptial ceremony has been duly performed in a church that the parties concerned can be regarded as being man and wife. The administration of the Eucharist and the other consolations of religion, not excepting Christian burial, are to be refused to all such as have contracted a civil marriage.

SPAIN.—The agitation for separation of Church and State in Spain is on the increase. Senor Castelar, in the Cortes, made a strong speech against the payment of the clergy out of the national treasury.

TREATY WITH THE CHINESE.

The President has issued a proclamation announcing the ratification of an additional treaty with China. The following is a summary of its provisions:

Article first provides that in making concessions to the subjects of foreign powers of privileges of residing on certain tracts of lands or resorting to certain waters of the Empire of China, the emperor by no means relinquishes his right of the government of the domain; agrees that no such concession shall be construed to give to any power or party which may be at war with or hostile to the United States, the right to attack citizens of the United States, or their property, within said lands and waters.

It is also agreed that the United States shall abstain from attacking offensively citizens or subjects of any foreign power with whom they may be at war, and the right of jurisdiction of the Chinese government over persons and property is retained, except so far as that right may have been expressly relinquished by the treaty.

Article second provides that any privilege or immunity in respect to trade or navigation within the Chinese dominions, which may not have been stipulated for by treaty, shall be subject to the discretion of the Chinese government.

Article third authorizes the Emperor of China to appoint consuls at United States ports, who shall enjoy the immunities and privileges of Great Britain and Russia.

Article four guarantees entire liberty of conscience to American citizens in China, and citizens of China in America, and exempts them from all disability or persecution on account of religious faith or worship in either country, and provides that cemeteries for the dead shall be held in respect, and free from disturbance or profanation.

Article five provides for absolute freedom of emigration and immigration of citizens of both countries, and that the taking of citizens of either country to the other without their consent be made a penal offense.

Article sixth guarantees to every citizen of the United States visiting or residing in China the same privileges, immunities or exemptions in respect to travel or residence as may be there enjoyed by citizens or subjects of the most favored nations, and reciprocal privileges to citizens of China in the United States; but this stipulation is not to be construed as conferring naturalization in either.

Article seventh provides for reciprocal enjoyment by citizens of the two countries of public educational institutions, under control of either, which are enjoyed in the respective countries by the citizens of the most favored nations. It also gives the privilege of establishing and maintaining schools within the empire of China at the places where foreigners are by treaty permitted to reside, and Chinese citizens are to enjoy the same privileges and immunities in the United States.

Article eighth. The United States disclaims all intention or right to interfere with railroads, telegraphs or other material improvement in China, the emperor reserving the right to decide the manner and time of their introduction, and the privilege of applying to the United States or any other Western power for engineers, which the United States shall give on application.

To rejoice in the happiness of others is to make it our own; to produce it is to make it more than our own.

SANDY SCOTT'S SERMON.

Two weeks ago we were disappointed of supply at our mission hall—the letter to the minister who was to officiate having been misdirected. The people were assembled, and the earnest young men who take charge of the meeting were unwilling that so good an opportunity of preaching the gospel should be lost. Two of them accordingly conducted devotional exercises, and good old Sandy Scott, the elder, gave the following address, which some people said wanted nothing but a little polish to be as good as a sermon. I fear I shall lose his good will by sending you this report of it.

"Taking his seat at the desk, Sandy took a pinch of snuff, wiped his nose with deliberation, read a few verses from the fifth chapter of Matthew, and began: 'Ye are the light of the world.' When Jesus spake these words he had some thousands of folk sittin' on the hillside afore him, an' 'round about him, but he didna mean that they were a' the light o' the world, that ilka ane o' them was a candle glein light to his neighbors. He spak' to his freens—his scholars—to sit men as Peter and his brother Andrew—to a' that theicht that Jesus was God's ain Son who had come frae heaven to earth, an' that liket him an' were doin' what he had them. The men that write books an' lang sermons in the newspapers, that gie lectures to the young lads at the college; and the men that mak' speeches in Parliament, whyles think they are the light o' the world, and gay bright lights, too, but I want ye to observe an' mind that it was Christians—his ain freens an' followers an' servants—that Jesus ca'd the light o' the world; an' if ye're no Christians ye're no lights; it's for yersels to fin' out whether ye're Christians or no, an' a matter o' sae muckle importance common sense says the sooner ye fin' that out the better.

"To be a licht is just to have knowledge an' to gie that knowledge to ither folk—to be a bonnie, white, clean, shining, happy, intelligent creature. Ye often speak yersels o' getting light on a subject that was dark to you afore, an' everybody kens that ye think ye're gettin' some information noo that ye hadna afore; ye whyles speak about dark doin's an' dark chariters, an' everybody kens ye mean sinfu', indecent, wicked conduct—swearin', stealin', whoredom an' sic like; ye whyles speak o' dark chads coupin' down on a man's hoose, an' everybody kens that ye think that some great disaster is about to befal him, like a rottin' o' his crops, the deelin' o' his sheep and kye, the rumm' awa' o' America's somebody that was awin him a big account, or the droonin' o' his son, or his wife gaugin' out o' her head, or his docht's gaugin' wi' some wild worthless rake. Noo, I think ye shouldna hae any difficulty in kemin' what Jesus meant when he said to his freens, lang syne, an' when he says to his freens noo—'ye are the light o' the world.' I think he meant twa things; first, that they were licht; an' secondly, that they were gien licht. They were aince dark—just as dark as they're neighbors—as ignorant, an' donnet an' thoctless. Some o' them were kenne'd as the deil's bairns through a' the country side, for they were their father's very image; if they had a Bible in their hoose they might as weel hae want-ed it as far as makin' any guid use o' it was concerned, for it lay on the drawers'heid frae a week's end to another, after covered wi' dirt an' stour; their tongues were as loose as they could be, for they swore like dragoons, an' led like a mill shillin'; they daidd an' drank an' got fou an' made their wives an' bairns miserable, an' dinn'a care for the laws o' either God or man; they cheated, they stekit, they promised to marry, an' then ruined an' launched at the simple lasses that believed them; they spent the Sabbath day in loamin' in their beds, stamin' at the close-mouth wi' a pipe in their cheek, sneakin' about the hedges, girrin' rabbits, harreying nests an' stealin' neaps; or, in cauld days, beekin' their legs at the fire readin' bunks that it wad hae been gien for the warl if they had never been written—silly, filthy, profane ballants' stories without either pith or point, an' whose only recommendation is their gibin' an' suckrin' at guid folk an' guid things. That's the kin' o' folk they ance were, an' I'm sure they were any thing but the light o' the world. It was as dark as pitch wi' themselves—it was mirk an' dreary nicht wi' them, but they're licht noo. Jesus is the sun o' righteousness, the real sun, the

richt sun, the sun o' the soul; an' he has gien them licht; his word has been a bricht burnin' lamp, an' his Spirit has been like oil. Every ane o' them is noo like the mine, an' ane o' the sun, shinin' a' wi' licht an' beauty like dew drops.

There's no ane o' the freens o' Jesus as bricht an' big a licht as he might be. Some o' them canna comoo' twa thochts together, either on religion or on ither thing. Their minds are like the yard or the slaggard, where ye may fin' a wheen sweet-sinellin' bonnie flowers growin' aside bunches o' nettles, an' ragweeds an' docken; or like a thrifty wife's rag pock, where there are a kinds o' clouts, clippens an' parin's o' silk an' satin an' pludin' an' packsheet—their thochts are like the leaves blawin' frae the trees in October after a nicht's snell frost, an' no the least like a regiment o' soldiers. When they are speakin' to you, you are like a man in a crowd, swayed whyles to ae side an' whyles to the ither, gettin' a bash in the face noo, an' a squeeze i' the ribs than, an' a clout atween the shenters belyve. An' some o' them gang all the straght sae often that aye's puzzled to say whether the licht or the darkness will bear the gree i' the end. They're like will-o'-the-wisp—spunkie, we use to call him—they get fou on a market night, or a New Year's day; they fly like tinklers, and behave in sic ways that it seems natural to conclude that Jesus wad disown them. If they're moonstruck they're like the new moon, wi' a bit thread o' yellow licht roun' the edge o' the auld black moon, if wark's scarce an' the mill put on short time, or if it has been a hute wad hairst, an' braid an' meal are dear, or if a bairn does i' the hoose they yammer an' greet an' complain, as if they thoct the Almighty wadna be as guid as his word—the word o' promise sue fin' o' comfort.

"They dinn'a tak' him at his word, but are as suspicious as oor manager is wi' some o' the callants that he has fund out tellin' lees owro an' ower again, or as the baker's wife is wi' some o' the muck now lookin' half-croons that are whyles laid down on her counter. I dinn'a say they've aye knowledge an' aye faith, but I say it's far less than it should be; they're no like fu' grown men an' women—they're like bairns; na, they're natir's playthings—Tam Theon's, that it wad be a guid sign if they were sae uncommon as to be a show; pair, ill-thriven dwarfs.

"But if the licht in man is o' the richt kind, it's aye growin' mair an' mair. Some liches gang out in a minute, like the licht frae the blast o' a quarry, or a poacher's gun in a dark nicht; some gang flickerin' up an' down like the lights frae the air-works about Coathrigg or Airdrie, or the steamers that glint athwart the lift; but the sun's licht is stoady an' growin'—the hill-tops i' the early mornin' are like the pinnacles o' the temple, or like bonnie wee islands in the sea; by an' by the hail face o' natir's refreshed, an' the dew is drunk up frae an' her leafy locks. Noo, the freens o' Jesus are like the licht o' the sun in this respect. They dinn'a stan' still; their souls ken mair about God an' beev'n than they ance did, an' they dinn'a wander sae often or sae far frae the richt road. There's something aince far wrang wi' them if they're no better this year than they were last year. If they're no a bit wiser an' no a bit better, they may weel doot, an' ither folk may doot too, if they raley are the freens o' Jesus. Hoo can they think they are like the growin' corn, an' Jesus says a' his freens are like it? There's the sma' green baird in the conversation—a pile o' grass here an' another there—in twa or three weeks the clods are covered—in coorse o' time the bear awas an' the tap pickles peep out, an' tell that we're ganna get the appointed weeks o' harvest—an' then, in the end, there's the stock bendin' its heid o' ripe corn in reverent worship o' the God o' the seasons.

"An' the freens an' followers o' Jesus gie licht to ither folk. Their Maister tells them they're no to be so stupid or cruel as a man that wad licht a candle an' pit a tub owre the tap o' it; even a wean nicht ken there wad be a use sense in doin' that; nobody but a daft body or a born idiot wad ever think o' sic a thing. If they've any good gift o' utterance, an' any guid command o' language, they should gang an' tell the story o' God's great love—in gien his Son to die for pair sinfu' creatures like doo's; if they canna tell that story to men an' women, they may tell to bairns; they may gather in half-a-dozen o' the callants and lassies that hae drucken

fathers and mothers, pair, wee things that gang shiverin' about the streets in the cauld winter nights, wi' feet a' swallin' an' blidin' an' hackit. Or, if they canna do that themselves, they may help some ither body to do it; they can pit their hands i' their pouches an' the siller they gie awa' for this wad be the best wared part o' their walth, they wad fin' that they got as muckle good as they gied, and that their kindly, gratefu' imitation o' him that gied about doin' guid is like a clear an' cool stream runnin' through their souls, an' refreshin' them amidst the din an' stour o' the warl.

"Mony a ane o' the freens o' Jesus are very bricht an' cheerfu' lights, though the big outside warl kens naething about them. Their tongues are never heard ayont the fur wa's o' their ain hoose, and they're no very loud there, but their love gaugs quietly out in a thousand ways, and fa's like a sunbeam's ray on cauld an' hard hearts. Ah, ye wives an' mothers, think o' this. Dinn'a hae your men an' callants comin', after workin' hard a' day, into a huggerty, nuggerty, dirty, ill-red-up hoose, try to hae everything clean an' neat; draw them and keep them out o' the public hoose wi' the cords o' love; dinn'a bring up your dochters to think that lang earrings an' braw gowms, an' a rich goldman, an' a smatterin' o' French are the grand ends o' life. Teach them by your guid advice an' guid example to be truthfu' an' kind, an' modest, an' thrifty; in this way will ye be the licht o' the warl, an' even when ye come to doo yer licht 'll na gang out, excep' like the wee twinklin' stars gan' out i' the mornin'. Your memory will be like a star shinin' the read o' a' that kenne'd you, leadin' them to Jesus like the star lang syne that brocht the wise men to Bethlehem, an' you yoursel's will gang to the lan' where the sun shall set nae mair, where God shall be your everlastin' licht, an' the days o' your mearnin' shall be ended." —*League Journal.*

A pigeon weighing half a pound flies at the rate of two or three miles in a minute. The force of so small a body moving at such speed is shown by the following incident:

A man in East Saginaw, Michigan, while walking in the street, was struck by one of a small flock of flying pigeons, when both fell, the pigeon and the man, the latter recovering first. His cheek was torn, one tooth was knocked out and several others loosened, besides the jaw badly injured. The pigeon was picked up by a boy, whether dead or not was not known to those who witnessed the accident.

GENERAL R. E. LEE, writing under date of January 12, 1867, says: "Its simple mechanism, and the experience my daughters have had in operating it, makes the Wilcox & Gibbs sewing machine a great favorite in my family." For sale by M. S. Hodrick, 87 and 118 Canal street, New Orleans.

RIGHTER observes, with justice, that "no school is more necessary to children, than that of patience, because either the will must be broken in childhood, or the heart in old age."

GUARD against reading too much or too rapidly. Read rather with attention; lay the book often down; impress upon your mind what you have read, and reflect upon it.

THERE is a voice from the tomb sweeter than song; there is a remembrance of the dead to which we turn, even from the charm of the living.

EVERY one must find out for himself the key to the riddle of life. It is of no use to have it told. Some do not hear, others misunderstand it.

A FOOT in a high station is like a man on the top of a high mountain—everything appears small to him, and he appears small to everybody.

GOD is the safety of his people; but we tempt Providence if we do not make use of the necessary means for our preservation.

OUR prayers and God's mercy are like two buckets in a well—while the one ascends the other descends.

I NEVER knew how it was, but I always seemed to have the most come in when I gave the most away.

PLEASANT words are as a honey-comb—sweet to the soul and health to the bones.

The Christian Advocate.

SATURDAY, FEBRUARY 19, 1870.

THE OLD-FASHIONED CHOR.

I have fancied, sometimes, the better-beat beam
That trembled to earth in the patriarch's dream
Was a ladder of song in the wilderness rest,
From the pillow of stone to the blue of the west,
And the angels descending to dwell with us here,
"Old Hundred," and "Corinth," and "China,"
and "Mear."

All the hearts are not dead, not under the soil,
But those breaths can blow open to heaven and God!
Ah, "Silver Street" leads by a bright golden road—
O, it is not the lullaby in harmony, slow,
But those sweet-humored psalms in the old-fashioned choir,
To the girls that sang alto—the girls that sang alto.

"Let us sing in His praise," the minister said;
All the psalms-books at once fluttered open
at "York."
Banned their dotted wings in the words that he read,
While the leader leaped into the tune just ahead,
And politely picked out the key-note with a fork,
And the jealous old viol went growling along
At the heels of the girls, in the rear of the song.

I need not a wing—bid no gent to come,
With a wonderful web from Arabian loom,
When the world was in rhythm, and the life
was its rhyme;
Where the streams of the years flowed up
noiseless and narrow,
That across it there floated the song of a sparrow;

For a sprig of green caraway carries me there,
To the old village church and the old village choir.

When clear of the floor my feet slowly swung,
And timed the sweet praise of the song as they sung,
Till the glory saint from the afternoon sun
Seemed the rafters of gold in God's temple begun.

You may smile at the nasal of old Deacon Brown,
Who followed by scent till he ran the tune down;

And the dear Sister Green, with more good-nature than grace,
Rose and fell on the tunes as she stood in her place;

And where "Coronation" exultingly flows,
Tried to reach the high notes on the tips of her toes!

To the land of the leaf they went with their song,
Where the choir and the chorus together belong.

O be lifted, ye gates! Let me hear them
sing in the temple!

Blessed song, blessed Sabbath, forever Amen!
Magna Charta and the Papacy.

At this time, when the pope is insisting before the Ecumenical Council on the unity and infallibility of the papacy, it may not be uninteresting to consider the relations of this infallible embodiment of ecclesiastical authority and power to the Magna Charta—the basis and palladium of the liberties of the English-speaking nations.

White, in his history of England, page 239, says: "That the charter was considered a great blow to despotic authority was soon proved by the view taken of it by the king and the pope. Scarcely had the barons retired from the field of meeting, and relieved John of their hateful presence, before he applied to Pope Innocent III for an absolution from his engagement, and sent an agent to Manders, Poitou and Gascony, to enlist as many freebooters and mercenaries as his treasure could collect. Both answered his call. The pope excommunicated the barons, annulled the charter, and anathematized the archbishop (Stephen Langton, of Canterbury, who had united with the barons to demand the charter from the king) from his ecclesiastical powers."

Now if the papacy is the infallible head of the church, it follows that their decisions are immutable, and that a decree once given can never be changed. Whatever, then, was the policy of the papacy in times past must be the policy of the papacy now. The pope did annul the Magna Charta, and did absolve the tyrannical, the perfidious and cowardly John from his solemn engagement to keep and maintain it. In view of this historic fact, what must an intelligent world think of the assertions and pretensions of papal writers and politicians to be the lovers and advocates of civil liberty? We submit that the claim to infallibility, or the claim to be the lovers of equal rights, must one or the other be abandoned. The paradox cannot be maintained.

LOUISIANA CONFERENCE.

REPORT OF COMMITTEE ON EDUCATION.

Your Committee on Education do not deem it necessary to enlarge upon the subject intrusted to their consideration. Its importance has often been presented to your notice, and often acknowledged by you. Indeed your appreciation has been manifested, not only by words but by acts. It is believed that no Conference in the Southern Church has done more to build up institutions of learning than our own, especially when its age, size and strength are considered. From this high position we must never depart. Indeed, in view of the circumstances which surround us, we shall put forth new efforts, and occupy, if possible, higher grounds. To establish any permanent and reliable system of instruction, money, and much of it, will be required, and we hope that our brethren in the laity will feel it to be their pleasure and their duty to respond to any appeals which may be addressed to them. The Lord is blessing the labors of our people, and filling their coffers with gold; and surely they can make no better investment than to contribute a portion of it to the relief of those institutions of learning which have been established among us, and to the promotion of broad, religious education. With these remarks we proceed to consider our several institutions.

CENTENARY COLLEGE.

Your committee are gratified that Dr. Keener has been enabled to give some of his valuable time to the interests of this institution. We trust he will continue his efforts, and that the \$15,000 or \$20,000, which are needed to restore the buildings, will be secured even before the meeting of the next Conference session. Your committee firmly believe that Centenary should be regarded as the great institution of the Conference; and that we should never abate our efforts until its buildings are thoroughly repaired, and it shall be made the compeer of any institution in the land. Your committee recommend the adoption of the following resolution:

Resolved, That it is of the first importance to this Conference, and to Methodism in Louisiana, that the buildings of Centenary College should be repaired, and that the institution should be fully established by completing its faculty, and by making provisions for its endowment; and that we will heartily second any efforts which may be made for these purposes.

HOMER COLLEGE.

Your committee congratulate you upon the excellent condition of this valuable institution. Its buildings have been repaired, and its debt is small, and may, in a short time, be liquidated, while proper arrangements have been made to secure a competent and permanent faculty, and to push forward the work of instruction.

We recommend the adoption of the following resolutions:

Resolved, That we have heard with great satisfaction of the election of Rev. J. E. Cobb to the presidency of Homer College by its trustees, and that we do hereby confirm the said election and recommend to the Bishop his appointment to that institution.

Resolved, That the trustees of Homer be and are hereby instructed not to create further debt of any kind which may involve the college, without special authority from this Conference.

Resolved, That the following named persons be and are hereby elected a Board of Trustees for Homer College, to wit: Messrs. William E. Moreland, W. B. Gill, J. McHenry, J. B. Wilder, J. M. White, J. C. Calhoun, R. J. Davidson, W. C. Haislip, S. Armstrong, A. Cravens, J. A. Miller, S. S. Scott, T. B. White and T. J. Upton.

Resolved, That the trustees of Homer College be instructed and authorized to take such measures as may seem to them most advisable, during the ensuing Conference year, for the endowment, respectively, of the two chairs of languages and pure and mixed mathematics.

PIERCE AND PAINE COLLEGE.

Your committee recommend the adoption of the following resolutions:

Resolved, That the church at Pleasant Hill be permitted to use for the period of five years, for religious purposes, one of the buildings

of Pierce and Paine College, upon the condition that they put and keep it in repair; and that the trustees be requested to make some arrangement by which the other buildings may also be kept in good condition.

Resolved, That the following persons be appointed trustees of Pierce and Paine College for 1870, to wit: Revs. B. Clegg, J. Pipes, L. Parker, P. M. Goodwyn, J. E. Walker, T. B. White, B. F. Alexander, J. C. Keener, W. H. Moss, J. Falton, R. S. Trippett, J. C. Reed; Messrs. John Jordan, J. M. Gibbs, G. H. Childers, W. Fanley, C. L. Walmsley, H. J. Davis, Dr. E. C. Wilson, J. C. Porter, A. G. Jordan, W. D. Goode, Dr. J. L. Wagley and A. M. Chapman.

MANFIELD FEMALE COLLEGE.

Your committee recommend the adoption of the following resolutions:

Resolved, That we are gratified to learn of the continued prosperity of our educational enterprise at Mansfield, and heartily commend it to the confidence and patronage of our people and the public.

Resolved, That the Conference receive and approve of the report of the Board of Managers of the Mansfield Female College for the year.

Resolved, That the Bishop appoint a Board of Managers of the Mansfield Female College for this year, to hold according to the pleasure of the Conference.

THE CHINA MISSION.

Bishop McTear has requested me to continue my efforts to raise money for the support of Brother Lambuth in China. Hence I renew the call for means to enable Brother Lambuth to give his whole time and energies to the work of a missionary. If his cost too much to send him there and support him thus long, and has cost him too much time and labor to prepare himself for the work, to allow him to be out of that legitimate work. God has called him by his Spirit to be a missionary to China, and we ought to support him in that very important field. Let us open our hearts and purses for that purpose. The money is in the country and towns and cities, and some of it ought to go in this way. Shall we have it? Say that we shall, and forward it without delay.

Will the preachers of the Mississippi Conference ask the people for it? If they will it will be forthcoming. Tell them that our Conference, in 1853, pledged to support Brother Lambuth in his missionary field by sending him a sum annually for his support, but that it has never yet fully redeemed that pledge. Let us do it this year. I hope to receive responses to this call promptly, so that I may make a remittance early in the spring. Will the brethren give attention to this at an early day? Send to me by express or post office order, at Canton, Mississippi; or, if this cannot be done, register your letters.

Now to the ladies—the good sisters! Brother Lambuth is anxious to establish a school for orphan boys at Nanking, where they can have a home, clothing, food, tuition, and be under the constant guidance and protection of Christians. He says the grounds and buildings to accommodate forty boys, and their teachers and attendants, will cost about \$1,140, Mexican, and asks the question: "Are there not eleven hundred ladies in Mississippi and Louisiana who will send me this money?" Who will respond and say, Yes? One lady in Jackson, responded by giving me \$10 in currency, and another lady in Canton by giving me \$20 in gold for this object! That is the way to respond; and you may all speak at once in the same way. It will not create confusion if you do. I am waiting to hear the responses. Let them come in fast, with whatever amounts you can send, with a hearty will and fervent prayer. Let us have a school where thousands may be educated and Christianized, and from which they may come to heaven, and make report long years after our names shall be forgotten among those on earth.

Brother Lambuth is greatly encouraged in his work. Let us try to encourage him yet more by giving him the means to do what his heart is so longing to do.

May the Lord help us! Amen.

H. H. MONTGOMERY.

ALABAMA CORRESPONDENCE.

Mr. Editor: Reaching this place, near the upper end of the Lafayette district, after a trip of one hundred and fifty miles over some very rugged country, the unpleasant intelligence was given me that I had come so far, and in much weariness of the flesh, only to meet a disappointment, as the circuit had had no official notification of my coming. This is attributable mainly to the fact that your excellent paper has not reached these ends of the earth, and the people lack the light its luminous pages would have scattered among them. Most earnestly it is to be hoped that this will not longer be the case, as every minister and member of the church ought to read the papers, and especially the one radiating from the Crescent City. Don't you think so, Mr. Editor?

The church in Alabama has suffered very materially, during the last few months, by the unparalleled exodus, from her midst into the flourishing State of Texas. It is, however, comfortable to hope and believe that what is our loss will prove her gain, as these valuable elements of church power and influence will assuredly be found in their proper places, exercising their Christian graces and usefulness in the new field of operation and influence into which they have entered. And when they bow in humble and earnest prayer at the pious, blood-bought mercy seat, to beseech the blessing of God on their new homes and recent acquaintances and friends, will not memory carry them back to the land in which they rested so long, and the feeling heart and the earnest spirit incline them to plead that the benediction of heaven may ever rest upon the churches and camp grounds and cheerful firesides where they heard the word of life, sang the sweet songs of Zion, and talked of all his mercy to them, until their hearts burned within them and their loosened tongues proclaimed his glorious praise! We hope so. If they could see the tear-dimmed eyes, and hear the earnest amens when their names are mentioned and applications sent to heaven in their behalf, they would know, most assuredly, that they are not forgotten here. And as these sad farewells and mournful partings induce an increased spirit of prayerfulness, both in those who go and those who stay, may we not hope that He who hears prayer in the same instant, whether it be offered in the near-by Alabama or the far-off Texas, and who can and will answer them equally and powerfully in both places, regarding with his fatherly heart the entreaties of his children when offered in faith and humility, will grant abundant blessing to each section in mighty and glorious revivals of his work? What a blessed consummation it will be if tidings of salvation to many precious souls should go from State to State at the same time, and the angels of God from Texas and Alabama should enter the gates of New Jerusalem above, singing in one united voice: "The dead are alive, the lost are found, and many sinners are coming to God!" Amen. So may it be, for the blessed Saviour's sake.

Yesterday I called to see a poor man afflicted with the palsy, who has lain now utterly helpless for the space of nine years. His occupation, when in health, was that of a gold digger in these auriferous regions, for we have mines of the precious metals away up among these lofty hills and lowly valleys, though the yield is so small as not to be as tempting as those of California used to be. From comparative comfort and good living he has been reduced to abject poverty, and lives by the doings of poor rates and the constrained charities of the public. From gold to beggary! Ah! what a fall was that! Yet his ruin temporally, he hopes, has been his salvation spiritually. Like the Psalmist, "before he was afflicted he went astray, but now hath he respect unto the commands of God." Once intemperate, profane and reckless, but now, "behold, he prayeth." He seems to have the tenderness and simplicity of a child when

speaking of his sins, and flowing tears and broken sobs attest a broken spirit as he prays for pardoning mercy and saving grace in Christ.

May God bless that poor man in his great and grievous affliction, comfort him in all his sorrows, and raise him at last to that happy clime where they never say, I am sick.

Hoping to have the privilege yet of communicating good tidings from this district, and beseeching the blessing of God, even our Father, upon all his people, whilst humbly and earnestly asking an interest in their prayers, I am yours, truly and fraternally,

F. L. B. SHAVER.

ANDALOOCHIE, ALA., Feb. 2, 1870.

M. DE LESSEPS.

Ten years ago the map-makers had never heard of M. de Lesseps. Ten years ago the Clyde and East End shipbuilders had not had their first gulf over the wild suggestion of attempting afresh what the great Macedonian and his Alexandrian successors, with all the best wealth and power of the Levant at their disposal, had not succeeded in achieving.

Still earlier Pharaohs had made the same attempt and failed; yet they could groove all Egypt with canals for irrigation, and convert the Fayoum of the Libyan desert into a paradise of vineyards.

And now that Pharaohs, Ptolemies and Caliphs, Kings and Emperors of the Orient had all in turn laid down the shovel and the hoe, and gone their ways into the unknown; then comes along a lone gentleman out of the West; not a crocodile worshiper, but a frog-eater; with a plain de before his name, a title which means next to nothing—anything, in fact, except *defected* or *discomfited*, and takes up again the shovel and the hoe.—Shaking his head and muttering something about *pas comme il faut*, he shouts across the French lake to the mechanics of Paris and Marseilles, something about *machines a vapeur*, and *fabrication de beton*. He collects six thousand workmen on a spit of sand between a morass and the open sea. He puts up miles of houses and shops, which soon resound with the clang of Nasmyth hammers, and the roar of forges. He fetches shiplands of bread from Odessa. He conduits streams of fresh water through two great iron pipes, forty miles long, from the Pelusiac arm of the Nile. He builds a city, which he calls Ismailia, filled with ten thousand Ishmaelites; and turns its arid sandy land into a paradise, erecting a shanty palace of French comfort and elegance in the midst thereof. He excavates a preliminary canal, on an upper level, from this Ismailia to the city of Suez at the head of the Red sea, and floats thereon sixty vast dredging machines to as many points of his main line, and sets to work their long and high swinging, far-reaching arms, toward inclined planes, and hoisting engines, and trains of cars, plunging their iron-shod scoops into the deep and lifting tons of the sand at once, over the high levees, to deposit it half a furlong behind them on the desert, whence the Khamsen shall not be able to drift it back again into the excavation. He blasts, with detonating powders undreamed of by the Pharaohs and the Ptolemies, his broad deep avenue of waters, through the rock strata of what, in geologic ages, were islands in a sea then covering the present area of the Delta, and separating widely the shores of the African and Asiatic continents. And when his work is done, and his long piers have been projected into the Mediterranean to protect Port Said, and his workshops have become as silent as the cells of the anchorites in the cliffs of Gebel, and his dredges have ceased their groaning toil, and stand like mighty and obedient brutes stupidly contemplating the gradual rise of the softly flowing waters to the determined level, he sends to all the capitals of Europe an invitation to the kings and emperors to come and see.

It was but yesterday, the tale we tell. At the invitation of this common engineer, this man of the people, the royal yachts, and ships of war, and ocean steamers made a rendezvous at the southeast angle of the Mediterranean. Eighty of these floating miracles of the nineteenth century assembled, like a crowd of noble guests waiting at the portal of a palace, impatient to enter and pass through into the sacred Indian seas. Another crowd collected, also, to behold the pageants; statesmen and savants, merchants and wealthy travelers, artists and correspondents of the daily press. History, medicine, science and religion were all represented in the spectacle, and by those greatest names which they will carry furthest into the future.

Of course flags waved, artillery roared, multitudes shouted, processions formed. The place of ancient desolations suddenly became the

bull room of modern magnificence. Tables were spread in the desert, and loaded with all that is costly and delicious in the world. Fireworks illuminated the earth, the waters and the sky. And Amazons were there; the empress of the French and all her train of fashion from all lands. "Like Troy's proud dames, their garments swept the ground."

Three days the festival continued; the first day at Port Said, the second at Ismailia, the third in Suez. Then the great fleet dispersed, and the crowds vanished like a dream. The royal guests went off to see the Pyramids; the commons set their various sails for a winter at the First and Second Cataracts, to dine upon the top of Dondereh, to spread their carpets in the Hall of Kings at Thebes, to mount their camels at Assouan, and explore the rock temples of Ipsamboul.

Could the poets of the world now meet upon the top of the Pyramid of Cheops, and look across the valley, over the domes and minarets of Cairo, toward the eastern horizon, what a poem they might sing! The most modern and the most ancient mighty works of man lie spread before them. Railroad and canal, locomotive and ocean steamer there; here Pyramid and Sphinx, Memphis and Great On, and Sarcophagi, meditating between the forgotten and the forgetting worlds.—*Old and New.*

ALWAYS AFTER MONEY.

Yes, it is a fact. The church is always after the people's money. No sooner is one thing out of the way than another is got up. Nay, we may think ourselves very well off if two or three first class schemes are not on foot at once, every one of the highest importance. Now it is a church, now a mission chapel, now a college or seminary endowment, and now a collection to make up a deficiency in current receipts, now for a Sabbath school at the West, or for a Tract Society, or Refuge Wanderers' Home in the city; to say nothing of the regular procession of church crosses, ten or twelve in the year. Yes, it is true; and it is equally true that it would be a very miserable sort of church of God on earth that was not always asking for money. Only a dead church does not want money. That which is alive, pulsing, enterprising, with keen eyes fixed upon the passing world, and seeking opportunity to save it by preaching, by missions, by tracts and books, by schools and colleges, will of course be asking money. That which is bold and aggressive; which strides forward to keep pace with increasing population; which, in this age of vast secular interests and commercial enterprises, is thrilled with ambition to keep the church in advance, will want great sums of money. Just as every call for men during the war proved the steady purpose of the administration to maintain our nationality and cheered the heart of the patriot, although to respond to it often proved exceedingly inconvenient, so every call of the church for enlarged resources is really a now proof of inward vigor and a presage of victory.

Imagine the Saviour weary with his people's praying; complaining that these Christians are always wanting something! Imagine a parent frowning at a child for being hungry, and scowling whenever it asked for bread! The child that ceases to crave nourishment is sick and all arts are used to revive its appetite; when it begins to ask for food again, there is joy in the house; the sick one will get well. The surest sign of spiritual declension is a lessening of the number of our requests before God. The individual Christian or the church that ceases to ask from God or man is becoming paralyzed.—*American Presbyterian.*

A WOMEN'S AMBITION.—The London *Athenaeum* says: "The late Rev. Dr. Robert Lee, of the Scotch Kirk, during his residence at Campsie, where he won the enthusiastic love of his people, wrote in one of his private books of memoranda, 'Let this be my ambition, to be known in my parish, to be unknown out of it—e. g., to be known for use and edification, to be unknown to fame and man's speeches; a sentiment which every parish priest would do well to engrave on his heart.'

Earth is midway between heaven and hell; and our destiny for a long eternity hangs trembling in the balance of our present probationary existence. We shall soon fly to the one, or sink to the other. Holiness lifts the soul upward to its God; sin sinks it down to the devil. Holiness prepares the way for everlasting happiness; sin for eternal misery! How important, then, is the brief period of probationary existence allotted to man on the earth!

To tell your secrets is generally folly, but that folly is without guilt to communicate those with which you are intrusted is always treachery, and treachery for the most part combined with folly.

The Christian Advocate.

SATURDAY, FEBRUARY 10, 1870.

WINTER PICTURE.

When winter winds are piercing chill,
And through the hawthorn blows the gale,
With solemn foot I tread the hill,
That overtops the lonely vale.

Over the bare upland, and away
Through the long reach of desert woods,
The embracing shadows chastely play,
And gladden these deep solitudes.

Where, (distant) round the barren oak,
The summer vine in billows ching,
And summer winds the stillness broke,
The crystal icicle is hung.

Where, from their frozen urns, mute springs
Pour out the river's gradual tide,
Shrilly the skater's iron rings,
And voices fill the woodland side.

Alas! how changed from the fair scene,
When birds sang out their mellow lay,
And winds were soft, and woods were green,
And the song ceased not with the day.

But still wild music is abroad,
Pale forest woods, within your crowd;
And gathering winds, with hoarse accord,
And the vocal reeds pipe loud.

Call it and whither winds! my ear
Is grown familiar with your song;
For it in the opening year—
I listen, and it cheers me long.

—Longfellow.

FATHER TOM AND THE POPE,
OR A NIGHT AT THE VATICAN.

CHAPTER III.

HOW FATHER TOM MADE A HARE OF HIS HOLINESS IN LATIN.

Oh, Doctor! Whateley, Doctor! Whateley, I'm sure I'll never die another death if I don't die either of consumption or production! I ever and always thought that as a man of letters was the hardest science that was till now—and it's no lie I'm telling you, the sanctification of a tough enough morsel to make a man's fast upon—and geology is middling and hard too—and by the way, I don't think I'm the only one who's been reading the books of science that ever was opened and shut, that book upon Plutarch's lives of the great men. Well, well, if they wait till they persuade me that taking a man's ribs out of the country, and spinning them in for rain parts isn't doing us out of the same, they'll wait a long time in truth. But you're waiting, I see, to hear how his reverence and his holiness got on after finishing the dissertation I was telling you of. Well, you see, my dear, when the pope found he couldn't hold a candle to Father Tom in theology and logic, he thought he'd take the shine out of him in Latin anyhow; so, says he, "Misther Maguire," says he, "I quite agree with you that it's not lucky for us to be speaking on them deep subjects in such languages as the evil spirits is acquainted with; and," says he, "I think it 'ud be no harm for us to speak from this on in Latin," says he, "for fraud the devil 'ud understand what we are saying."

"Not a hair I care," says Father Tom, "whether they understand what we're saying or not, as long as we keep off that last pint we were discussing, and one or two others. Listeners never hear good of themselves," says he, "and if Belzebub takes anything amiss that either you or me says in regard to himself or his faction, let him stand forth like a man, and never fear I'll give him his answer. Howsoever, if it's for a taste of classic conversation you are, just to put us in mind of our old Cordarius," says he, "here's at you; and what that he lets fly at his holiness with his health in Latin."

"Vestire Sanctitatis salutem volo," says he.

"Vestire Revertit salutem trinitati," says the pope to him again (ha! it's no joke, I tell you, to remember such a power of learning). "Here's to you vid the same," says the pope, in the real Ciceronian.

"Nunc poculum alterum," says he, "Cum omni jucunditate in vita," says his reverence.

"Cum summa compunctio et amicitia," says he, "as much as to say, 'wid all the tears of my heart I'll do that same'—and so vid that they mix'd their gun a piece."

"Aqua vite vestra sane est liquor admirabilis," says the pope.

"Verum est pro—it's true for you," says his reverence, forgetting the idiom of the Latin phraseology in a manner.

"Prava est tua Latinitas, domine," says the pope, finding fault like wid his etymology.

"Parva culpa mihi," "small blame to me, that's," says his reverence, "nam multum laboro in partibus inferioribus," says he—the dear man! that never was at a loss for an excuse!

"Quid tibi incommodi?" says the pope, axing him what ailed him.

"Habesne id quod Anglice vocamus, a looking glass," says his reverence.

"Immo, habes speculum splendorum subter operum pyxidibus stantioribus," says the pope, pulling out a beautiful gold box, wid a looking glass in under the lid, "another operculum pyxidibus stantioribus—no—"

"Quam dono accipi ab archidice Ansthraco siptingisima pithierita," says he—as much as to say that he got the box in a present from the Queen of Spain last lint, if I rightly remember.

Well, Father Tom laughed like to burst. At last says he, "Pater Sancte," says he, "sub errore jaces. 'Looking glass' and nos habet significationem quendam peculiarem extempore dependentem—there was a stirring of acensatives for you—'nam—mano speculum sonat,' says he, 'post prandium vero mat—mat—mat—'—sorra be in me but I disremember the classic appellation of the same article. Howsoever, his reverence went on explaining himself in such a way as no scholar could mistake.

"Ho, ho, ho!" says the pope, grabbing up his box, "si inquina-visses manum pyxidum, excimeri debuisses—hillo, Anthony," says he to his head butler, "fete! Misther Maguire a!"

"You spoke first!" says his reverence, jumping off his seat; "you spoke first in the vernacular! I take Misther Anthony to witness," says he.

"What else would you have me to do?" says the pope, quite dogged like to see himself bated that way at his own waysons. "Sure," says he, "Anthony wouldn't understand a B from a bull's foot if I spoke to him any other way."

"Well, then," says his reverence, "in consideration of the needessity," says he, "I'll let you off for this time! but mind now, after I say *præsto*, the first of us that speaks a word of English is the hare—*præsto*!"

Neither of them spoke for near a minute, considering wid themselves how they were to begin such a great thing or shikill. At last, says the pope—the blessed man, only think how 'ente it was ov him!—"Domine Maguire," says he, "vale desilhero, certiorum fieri de significatione istius verbi *exorsor* quo jam usus es"—(well, surely I am the boy for the Latin!).

"*Exorsor*, id est cyathus," says his reverence, "nam apud nos *tumbleri* seu *exorsor*, dicti sunt ab evertendo ceteroniam inter amicos; non, ut Temperantia Societatis frigidis fantoribus placet, ab evertendis ipsis potatoribus." (It's not every mather under the board, I tell you, could carry such a car load of the dead languages.) "In agro vero Louthiano et Midensi," says he, "nomine gaudet quodam secundum linguam Anglicanam significante bouardam seu tormentum; quia ex eis languem ex telis jaculatoris liquorem fabulis immittitose sent. Etiam inter heretico illos melano-mos" (that was a touch of Greek). "Presbyterianos Septentrionales, qui sunt terribiles potatores. Cyathi dicti sunt *faccres*, et dimidium Cyathi *hep-a-glossus*. Dimidium Cyathi vero apud Metropolitanos Hibernicos dicitur dandy."

"En verbum Anglicanum!" says the pope, clapping his hands—"loquom to teisti!" as much as to say that he had made a hare of himself.

"*Dandus, dandus verbum erat*," says his reverence—oh, the dear man, but it's himself that was handy ever and always at getting out of a hubble.

"*dandus verbum erat*," says he, "quod dictum erat, cum me intherpillavisti."

"*At ego dico*," says the pope, very sharp, "quod verbum erat dandy."

"Per tibi sine qui Coram Mose modulatus est," says his reverence, "id tagellat mundum! *Dandus* dixi, et in dicit dandy; ergo tu es lepus, non ego—ah, ha! Saccavi vestram Sanctitatem!"

"Mendacium est!" says the pope, quite forgetting himself, he was so mad at being sacked before the survivors.

Well, if it hadn't been that his holiness was in the Father Tom 'ud have given him the contents of his tumbler betwixt the two eyes, for calling him a liar; and, in troth, it's very well it was in Latin the office was conveyed, for, if it had been in the vernacular, there's no saying what 'ud have been the consequence.

His reverence was mighty angry anyhow. "Ta senex lathro," says he, "quomodo andes me mendacem pendere?"

"Et tu, sacrilege nobilo," says the pope, "quomodo audicetum libens, me Dei in terris vicarium, lathronem conviciari?"

"Interroga circumcirea," says his reverence.

"Abi ex edibus meis," says the pope.

"Abi tu in malum cruceum," says his reverence.

"Excimicabo te," says the pope.

"Dipobus curat," says his reverence.

"Anathema sis," says the pope.

"Osenla meum pod"—says his reverence—but, my dear, afore he could finish what he was going to say, the pope broke out into the vernacular: "Get out of my house, you reprobate!" says he, in such a rage that he could contain himself within the Latin no longer.

"Ha, ha, ha!—ho, ho, ho!" says his reverence, "who's the hare now, your holiness? Oh, by this and by that I've sacked you clane! Clane

and clever I've done it, and no mistake! You see what a bit of desote will do wid the wisest, your holiness—sure it was joking I was, on purpose to aggravate you—all's fair, you know, in love, law and contrahance. In troth if I'd thought you'd have taken it so much to heart I'd have put my head into the fire afore I'd have said a word to offend you," says he, for he seen that the pope was very vexed. "St. Pether forbid that I'd say anything agin your holiness, barring it was in fun; for aren't you the father of the faithful, and the three vier of God upon earth? And aren't I ready to go down on my knees this blessed minute and beg your apostolical pardon for every word that I said to your displeament?"

"Are you in earnest that it is in fun you ver?" says the pope.

"May I never die if I aren't," says his reverence. "It was all to provoke your holiness to commit a brache or the Latin that I tuck the small liberties I did," says he.

"I'd have you to take care," says the pope, "how you take sich small liberties again, or may be you'll provoke me to commit a brache of the pace."

"Well, and if I did," says his reverence, "I know a sartin preparation or chymicals that's very good for curing a brache either in Latin or friendship."

"What's that?" says the pope, quite mollified, and sitting down again at the table that he had ris from in the first puff of his indignation. "What's that?" says he, "for 'pon my opistolical davy I think it 'ud be asy to bato this miraculous mixtur that we've been thyring to analyze this two hours back," says he, taking a mighty scientific swig out of the bottom of his tumbler.

"It's good for a beginning," says his reverence; "it lays a very nate foundation for more serious operation; but we've now arrived at a period of the evening when its time to proceed wid our superstructure by compass and square, like free and excripted masons as we both are."

My time's up for the present; but I'll tell you the rest in the evening at home.

THE CHIEF CAUSE OF IDIOCY.—Visitors to the Earlwood Idiot Asylum, and persons who read the reports of that valuable institution, will have gained some acquaintance with the exceedingly curious species of physical degeneracy known as "permanent childhood."

Imagine an infant, pure and simple, of the mature age of twenty-two years, perfectly formed, but in growth, intellect and taste exactly resembling a child of twelve months. Some remarkable particulars with regard to this were given by Dr. Langdon Down at a meeting of the Pathological Society. An illustrative case was exhibited—that of a child of five years, which had intellectually and physically the condition of nine months. The case, Dr. Down remarked, was a typical one of a class, all the members of which possess the same characteristics, and form a sort of a natural family. He stated that he had seen a permanent infant of upward of twenty years of age, just able to stand by the side of a chair, uttering monosyllabic sounds, amusing itself with toys, and otherwise comporting itself exactly as an ordinary child would, that was making its first attempts to speak and walk. The doctor has a theory of his own—and he is entitled, from his experience in such matters, to form one—as to the cause of this extremely curious and painful species of degeneracy. All such children he has found are the offspring of habitually drunken fathers—the arrest of growth and development is the result, and thus the "iniquity of the father is visited upon the children."

Those gentlemen who are waging deadly warfare with the alcoholic "monster" ought to be grateful to Dr. Down for the sharp arrow which he has added to their already well furnished quiver.—*Birmingham Daily Post and Journal*.

A few weeks ago Mr. O'Donovan Rossa, one of the Fenians now undergoing imprisonment with hard labor at Chatham, was elected member of Parliament for the county of Tipperary. Being a prisoner for "treason felony," as it is called, he cannot, of course, take his seat in the House. If the gentleman who was second in the poll, Mr. Heron, should petition Parliament, O'Donovan Rossa's election would at once be declared null and void, and the petitioner would be declared duly elected. But for some reason or other he is not going to do this, probably because it would make him very unpopular all over the county. It was only the other day that I became aware, after questioning an officer of the House of Commons, what would be the proceedings and forms taken under these circumstances. It seems that directly after the meeting of Parliament Mr. O'Donovan Rossa will be summoned to the bar of the House of Commons, and will be then and there informed by the speaker that he cannot take his seat, and that, being

a prisoner for felony, the election is void. This ceremony must be gone through, and the appearance of a convict, in convict garb, will certainly be a novelty in the British Parliament. There is little doubt but what we shall have a disturbance on that day, and that it will take many troops as well as policemen to protect the House of Lords and Commons. The Fenians have got wind of the affair and are already preparing themselves.

The Emperor Adrian and the Martyr Symphorose.

Early in the second century, by the death of Trajan, the scepter of imperial Rome passed into the hands of his nephew, Adrian. Christianity was by this time widely extended throughout the Roman world. As the new religion gained in strength, the antagonism of its opponents grew more virulent.

Adrian had erected upon the Tiber, near Rome, a magnificent palace. With characteristic fickleness he decided to dedicate it with imposing pagan ceremonies to the gods. The oracles were consulted. They returned a response—probably through the cunning of the idolatrous priests—that the Christian widow, Symphorose, with her seven sons, was exciting the anger of the gods by their worship of the Christian God. And the emperor was promised that if he would sacrifice them he should be blessed in all his undertakings.

Adrian offered Symphorose and her children to be brought before him. At first he employed very mild measures, and in kind tones entreated them to offer sacrifice to the gods. Symphorose replied:—"My husband and my brother were both your tribunes. They suffered many torments for the name of Jesus rather than sacrifice to idols. By their death they have vanquished your demons. They chose rather to be healed than to consent to sin. The death which they have suffered has covered them with ignominy in the sight of men, but has crowned them with glory before the angels."

The emperor was irritated, and began to threaten. "Unless you sacrifice," said he, "with your sons, to the all-powerful gods, I will offer you all up in sacrifice to them."

The Christian matron replied:—"Your gods cannot receive me in sacrifice. But, if I am burned for the name of Jesus Christ, my God, I shall render the flames to which your demons are consigned more tormenting."

The emperor earthily rejoined: "Either sacrifice to my gods, or die miserably."

"Do you think," said Symphorose, meekly, "that fear will cause me to yield? It is my desire to rejoin my husband, whom you have slain for the name of Jesus Christ."

The emperor ordered her to be taken to the Temple of Hercules. There she was cruelly scourged. Then, with her bleeding wounds, she was hung up by the hair of her head. As she still remained firm, the emperor ordered her to be thrown into the river Tiber, with a large stone tied around her neck. The savage deed was immediately performed, and the body of the heroic Christian martyr disappeared beneath the waves.

The next day the emperor caused her seven sons to be brought before him. In vain he exhorted them to sacrifice them to the idols. Seeing all his menaces to be unavailing, he erected seven stakes, and bound the brothers to them with cords. He ordered a different death for each one. The first, named Crescent, had his throat cut. The second, Julian, was pierced through the breast with a pike. The third, Nemesius, was struck to the heart with a dagger. Thus they all perished.

The next morning the emperor ordered the corpses to be collected and thrown into a ditch.—The Christians subsequently gathered up the remains, and buried them about eight miles from Rome. The ruins of a church are still to be seen, which in after years was erected upon that spot, called "The Church of the Seven Brothers."

Such is the narrative which has come down to us from those distant ages. We have no reason to doubt its essential accuracy.—*Independent*.

THE FATHER OF FREDERICK THE GREAT.—The king was scrupulously clean, washing five times a day. He would allow no drapery, no stuffed furniture, no carpets in his apartments. They caught dust. He sat upon a plain wooden chair. He ate roughly, like a farmer, of roast meat, despoiling all delicacies. His almost invariable dress was a close military blue coat, with red cuffs and collar, buff waistcoat and breeches, and white linen gaiters to the knee. A sword was belted around his loins, and a stout raton or bamboo cane over in his hand. A well worn, battered triangular hat covered his head. He walked rapidly through the streets, surrounded by his palaces at Potsdam and Berlin. If he met any one who attracted his attention, male or female, he would abruptly,

menacingly inquire: "Who are you?" A street lounge he has been known to hit over the head with his cane, exclaiming: "Home, you rascal, and go to work." If any one proffered or hesitated, he would sternly demand: "Look me in the face." If there were still hesitancy, or the king were dissatisfied with the answers, the one interrogated was lucky if he escaped without a caning.

The boorish king hated the refinement and polish of the French. If he met a lady in rich attire she was pretty sure to be rudely assailed; and a young man fashionably dressed could hardly escape the cudgel, if he came within reach of the king's arm. The king, stalking through the streets, was as marked an object as an elephant would have been. Every one instantly recognized him, and many died at his approach. One day he met a pale, threadbare young man, who was quietly passing him, when the king stopped in his jerking gait, and demanded, in his coarse, rapid utterance: "Who are you?" "I am a theological student," the young man quietly replied. "Where from?" added the king. "From Berlin," was the response. "From Berlin?" the king rejoined; "the Berliners are all a good-for-nothing set." "Yes, your majesty, that is true of many of them," the young man added; "but I know of two exceptions." "Of two?" responded the king; "which are they?" "Your majesty and myself," the young man replied. The king burst into a good-humored laugh, and, after having the young man carefully examined, assigned him to a chaplaincy.—*Harper's Magazine*.

HOUSEKEEPERS' DEPARTMENT.

TO PRESERVE SALSAGES.—In making sausage, pack in a pan and cover with lard. This will save it sweet and fresh till spring.

SALLY LUX (ROSE'S).—One quart flour, one pint milk, one egg, one tablespoonful of butter, one of sugar, a little salt, two tablespoonfuls cream tartar, one tablespoonful soda.

HOW TO MAKE SOFT SOAP.—Boil twenty-five pounds of fried grease in two pails of strong lye. Next day add another pailful of strong lye; also the following day, if there is grease on the top of the soap. Afterward add a pailful of hot water each day until the barrel is filled.

JENNY LIND'S PUDDING.—Grate the crumb of half a loaf, butter the dish well, and lay in a thick layer of the crumbs; pare ten or twelve apples, cut them down, and put a layer of them and sugar, then crumbs alternately, until the dish is full; put a bit of butter on the top, and bake it in an oven. An excellent and economical pudding.

MOths IN CARPETS.—Wring a coarse crash towel out of clear water, spread it smoothly on the carpet, iron it dry with a good hot iron, repeating the operation on all parts of the carpet suspected of being infested with moths. No need to press hard, and neither the pile nor color of the carpet will be injured, and the moths will be destroyed by the heat and steam.

PLAIN CAKE.—Two cups of flour, one cup of soda, two eggs, one-half cup of butter, half cup of sweet milk, half a teaspoonful of soda and one of cream of tartar sifted with the flour. Bake slowly in an oven not too hot, and cover with a paper until nearly done. The paper, if put on when the cake is first set into the oven, prevents it from rising in the griddle and bursting open. This last is a good rule for all cake.

CORN VINEGAR.—Boil a pint of corn until it is a little soft; put it into a jar, add a pint of molasses and four quarts of water; mix well together, and set near the stove. In two days it will be good beer, and in two or three weeks it will be good vinegar. The same corn will do for six months. When the vinegar is made, pour it off and add molasses and water to the corn. In this way you will have a constant supply.

ESSENCE OF BEEF.—Take a pound of fresh beef, as free as possible from fat; cut it up into very small pieces, or, what is better, shred it with a fork. Sprinkle over it a little salt, and put the meat into a stout stone bottle, such as mead or Scotch ale comes in; cork tightly, and tie the cork down with a string. The cork is usually not put in until steam begins to escape from the bottle. Stand the bottle in a vessel of cold water, which should slowly be brought up to the boiling point, and kept at it for at least four hours. To prevent the bottle from breaking against the side of the vessel, by the movement of the boiling water, it should be secured by a piece of cord. Strain through a piece of coarse linen; then let the liquid stand awhile in a cup, and with a spoon carefully skim off any fat which may have arisen to the surface. It may be seasoned to the taste with pepper and salt. The liquid obtained in this manner is one of the most agreeable and highly nutritious articles of diet which can be prepared for the sick.

The Farm and Garden.

WITNESS a generation plows have been so improved that one horse can now turn as much as two could.

INvariably one sees the best farming on soils that naturally contain lime, or when this mineral is brought for manure as regularly as salt or cloth.

It is said that the olive has been cultivated in Florida and on the coast islands of Georgia for nearly half a century. The oil yielded by them is represented as fully equal to the best quality of French oil.

It is stated that every farm of one hundred acres in eastern Kansas is underlaid with one million five hundred and fifty thousand tons of coal, or nine times more fuel than if the surface was covered with heavy timber.

AN English farmer thus gives his condensed conclusions about guano: Powder it, mix with plaster, apply broadcast; if used in the hill or drill, mix largely with loam; sixteen pounds of it are equal to a load of average barn-yard manure.

EXPERIMENTING WITH STRAWBERRIES.—Mr. Knox, of Pittsburg, has tried several modes of cultivating the strawberry, and has finally settled down in favor of rows two feet apart, and the plants one foot in the row, with hand culture and the hilling system.

PROTECTING APPLE TREES AGAINST MICE.—A Western farmer states that he has secured his young apple trees from the depredations of rabbits and mice during the past four years by leaving shocks of corn in the orchard through the winter. He finds that these mischievous creatures will not gnaw the trees when such shelter and feed are at hand.

RAISE FRUIT FROM SEED.—When you eat a good apple, pear or plum, plant the seed. All the excellent varieties of these fruits in the world have originated in this way. And from good fruit you may be tolerably certain to get a good seedling, even if not the very best. There is another advantage in seedlings—they are hardier, more healthy and longer lived than grafted or budded trees.

CHARCOAL FOR FOWLS.—A writer in the *American Agriculturist* gives a statement how one of his turkeys was unaccountably dying off, and how he resorted to different methods to arrest the mortality without success, until, by accident, some charcoal, along with the ashes, was thrown out from his smoke-house. This charcoal the turkeys very greedily devoured, and the strange mortality at once ceased. May not pulverized charcoal, mixed with chicken feed, be also a remedy for chicken cholera?

HOGS IN ORCHARDS.—If you are not particular about the looks, turn your hogs into the orchard. But keep the wire out of their snouts. Let them root to their heart's content and mellow the soil. They are equivalent to a cultivator—better in soil, and they are continual workers. They will meet three important things: they will work the soil, manure it and destroy the infected fruit. This remedy, for at least two years, is advisable.—Then grow soil, if you like, and your soil is rich enough. In olden times hogs were in order in orchards, and so was fruit.—*American Stock Journal*.

SEED WHEAT.—An anecdote is told of a former Emperor of China, to the effect that, walking by the side of a wheat field, he saw a stalk of wheat much larger and ripier than the rest of the field, and that he plucked it and saved the seed to be sowed, and from it derived a variety of wheat much earlier and more prolific than the wheat in common use, and thus conferred a great benefit upon his people. When wheat is sown in drills, we can pass through the field and cut into a basket the heads that are the plumpiest and first ripe, and beat out the grains for seed. In a day's time a careful man might thus collect several pecks of seed wheat, that would be as much better than the average of the field as the ears of corn that we select for seed are better than the average corn of the corn crop. When we come to sow with the drill only about a peck to the acre, this will not be so great a job as it would now seem when we sow two bushels to the acre.

It is of the greatest moment that we walk with a sincere, honest, upright heart before God. If evil be practiced or labored and connived at, the channel of communication between our souls and God (for the time being) will be cut off. It is all-important to remember this. Infirmities and weaknesses will cleave to us as long as we remain in the body; but this is a different thing from willingly allowing evil. I must be able, with a true, honest, upright heart, to look my heavenly Father in the face, and say: "Here I am, blessed Lord; do with me as thou wilt."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, FEBRUARY 19, 1870.

Office—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS.

FOR MONTGOMERY CONFERENCE:

REV. W. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MEETING OF PUBLISHING COMMITTEE OF THE ADVOCATE.

Met February 12, 1870, at nine A. M., at Depository building.

Present—From Mobile Conference: Rev. Dr. A. S. Andrews.—

Montgomery Conference: Rev. Mark S. Andrews and Rev. J. B. Cottrell.

Mississippi Conference: Rev. W. H. Watkins and Rev. William P. Barton.

Louisiana Conference: Dr. J. C. Keener, J. B. Walker and Linus Parker.

On motion the committee was organized for business by the election of the Rev. A. S. Andrews as chairman, and L. Parker as secretary.

The following resolution, offered by Rev. J. B. Cottrell, was adopted:

Resolved, That we approve of the strictly cash system as at present pursued, and that we will adhere to it in the future.

On motion the chairman, Dr. A. S. Andrews, was requested to prepare an address, on behalf of the Publishing Committee, to be published in the ADVOCATE.

On motion, J. C. Keener, J. B. Walker and L. Parker were re-elected Executive Committee.

The following resolutions were offered by Dr. Watkins:

Resolved, That the committee highly approve the course pursued by the Executive Committee, and that the hearty thanks of the patronizing Conferences are due to that committee, to whose untiring efforts and ability we are indebted for the present prosperous condition of the ADVOCATE; that we confide the financial and editorial management of the ADVOCATE to the present Executive Committee.

Resolved, That the preachers in the patronizing Conferences be requested to call the attention of their people to the claims of the NEW ORLEANS CHRISTIAN ADVOCATE, especially during the months of March and April.

Resolved, That the presiding elders be requested to call the attention of the Quarterly Conferences to the paper.

On motion the Publishing Committee adjourned, to meet at Memphis in May next, on call of the chairman, Rev. A. S. Andrews.

—LINUS PARKER, Sec.

Work for Christ is witnessing for him. As there is no other name given under heaven whereby we can be saved but the name of Jesus, so there is, in the main, no other work to do to save men except that of pointing them to him for salvation.

Our present frail existence is the unsubstantial basis upon which too many are building the fabric of their happiness; but it is building a nest upon a wave.

The memory of good actions is the starlight of the soul.

THE PUBLISHING COMMITTEE.

This committee met at the office of the CHRISTIAN ADVOCATE, according to appointment, on Saturday last. The proceedings of it are, in part, given by the secretary in this paper. There will appear in our next issue an address from the committee to the patronizing Conferences, and the Methodist people of the Southwest, in behalf of the ADVOCATE. The whole committee was well represented in the meeting. The Revs. M. S. Andrews and Joseph B. Cottrell were present from the Montgomery Conference, the Rev. Dr. Watkins and Rev. W. P. Barton from the Mississippi, the Rev. Dr. A. S. Andrews from the Mobile, and the Revs. L. Parker, J. B. Walker and J. C. Keener from the Louisiana.

This was the first time, since the war, that a meeting of those who actually own and control this journal has been held. The most earnest attention of the committee was directed to the best way of securing an immediate and large increase in its subscription list. Whatever can be done, it was thought, could be done at once, if the preachers will only so determine. It is highly important that before the meeting of the General Conference the subscription list be swelled to at least seven thousand. If each preacher will determine that the people on his work shall have the ADVOCATE, and insist, as a part of the machinery of Southern Methodism, that this Conference newspaper be set up in every household of our membership, the work will be accomplished. If the preachers will send us lists of those who ought to take the paper, who yet do not, we will forward to these persons specimen copies. Ten new subscribers, besides renewals, from each preacher, would accomplish the object. There is scarcely a circuit or station in which that number of persons might not be selected, who are not taking the paper, but to whom it might be ordered by a pastor, with the almost absolute certainty of their approval. We do not wish our agents to go in debt; but we do wish them to cut short this work, and finish up a matter that may be somewhat disagreeable, and therefore had better be gotten through with as early in the year as possible. If an ADVOCATE starts with the preacher, in his visits to a family, he will have the benefit of its columns all the year in his efforts to mold it for usefulness and heaven. We will venture to say that no family ever took the ADVOCATE, and read it, without giving more to the cause of God than it would have given without these weekly promptings. On the other hand, a member that does not read a church paper is a rather poor stock to expect fruit from. Frequently we get letters stating that certain meetings have been failures, because the neighborhood had not seen the ADVOCATE. For our part, we don't wonder at any failure that may be reported from such a region. Command us to the good sense of the farmer, out in the Anacoco country, who said he could "get along very well with half a crop and the ADVOCATE."

The fact that the General Conference meets this year is an additional reason why the paper should be in the hands of every one of our people. The healthy development of our church, and indeed of the whole church of Christ, demands that every follower of the Saviour should be put in connection with the labors of godly men of every name, and in harmony with the spirit of truth that seeks to dispel all shapes of error from all parts of the earth.

NEW ADVERTISEMENTS.

WE CALL attention to the Wilcox & Gibbs sewing machine, advertised this week. One excellent point in this style of machine, to a quietly disposed household, is that it makes no noise, and does good work. M. S. Hedrick, 87 and 118 Canal Street.

Messrs. BODLEY & Co. are extensive dealers in agricultural implements, steam engines, saws, bells and other sorts of ready-made machinery. See advertisement in this week's paper. No. 9 Perdido street.

THE SAVIOUR'S STAR.

God was pleased to announce the birth of our Saviour at two points on the earth widely separate, and by two distinct methods: at the one by angels, the most beautiful of intelligences, at the other by a single star, the most brilliant of natural objects. These started forth from the Father at the same instant. The angels soon made themselves understood by the shepherds—the light so dazzling and sudden, the song so entrancing, the company so great and the message so sweet, that it thrilled those humble herdsmen of the plains with eager desire to "see this thing which had come to pass"—the holy babe. How the star impressed the Magi of the distant Babilonites or Tigris we are left to imagine. Students are not as impressible as shepherds, and the supernatural theme was, no doubt, a better agency to awaken faith in them than any more direct revelation.

While the shepherds were drowsily watching their sheep those Eastern sages were observing the heavens. May be the sudden gleam of a radiant lamp, hanging like the evening star against the clear body of the sky, was the first intimation given them of the "Star out of Jacob." There must have been a certain strange intelligence in its movement that distinguished it at once from all these well known bodies of light that stand silent and fixed above us in the night, or only move as the eyes of eternity. But no change of elevation, no coming near or going off, or elliptical motion could give notice of the import of its beams—that it shone in honor of a Divine Son, who had come into the world a royal babe, then upon the breast of a Jewish maiden. After their minds had been filled with wonder by the marvelous behavior of the new star, the word of God must have come to them in vision or in dream, or by angelic visitant, telling them that this was heaven's symbol of the new glory that had burst upon the earth; that in his honor who was the true Light, the Glory of his people, the Son of the Father of Lights, this gem of purest radiance had been sent; that it now waited to guide them to the spot that gave him birth. Then, too, there must have been a very full revelation made to them of the future, fame, majesty and rule of the new-born King of Glory. This star, with these heavenly renderings of its splendor, roused, gathered and drew on this intelligent company from regions beyond the farthest limits of the Roman empire, across deltas of broad streams, over arid sand wastes to the eastern margin of the land of Judah. We see in its progress a type of the gathering of the latter day, of which Isaiah so beautifully speaks: "The Lord shall arise upon thee, and his glory shall be seen upon thee. And the Gentiles shall come to thy light, and kings to the brightness of thy rising."

The multitude of camels shall cover thee, the dromedaries of Midian and Ephah; all they from Sheba shall come; they shall bring gold and incense, and they shall show forth the praises of the Lord." Not so large a company as the Queen of Sheba brought with her to visit Solomon, yet a company sufficiently imposing to impress a large city with their arrival. When they traveled by day this floating body of starlight must have shone with a brightness above the sun. As it went before them through valleys and over hills, now by night shining through the forest, and now waiting for them on the farther bank of some river until their passage, it determined the stages of the journey, and may be the places of encampment. As the children of Israel traveled for forty years by the guidance of a pillar of cloud, the angel in muffled outline, so these, starting from where Abraham first heard the call of God, journeyed for forty days, it may be, toward the city of David.

Sudden was their appearance at the gates of Jerusalem, and marvelous their story. And yet it tallied with the general expectation that a Deliverer was at hand. Herod was then in his seventieth year and in his last sickness. He had murdered Marianne his wife, his sons Alexander and Aristobulus, because they, as he believed, aspired to the throne; and his third son, Antipater, was then under sentence of death for the same crime. It was at such a juncture that a large caravan was reported to him as having arrived, headed by distinguished persons, with the ominous inquiry: "Where is he that is born King of the Jews, for we have seen His Star?" We can easily see that such an announcement must have brought the rage and terror of this unnatural monster to a climax. The "dragon" had in Herod a fit representative of himself, ready to devour the seed of the woman. The king's agitation spread throughout Jerusalem. He called the Sanhedrim and ordered them to answer the question which these sages put to him: "Where Christ should be born?" The light of the star having gone out, the light of prophecy was invoked to supply the want. An answer, distinct, positive and accurate, was given—a tyrant would have accepted none other. "Bethlehem" was officially declared to be the prophetic birth-place of Messiah the Prince. Immediately upon this answer Herod gave audience to the illustrious strangers, and after many questions in regard to the star, sent them forward on the route to the little town southwest of the city some five miles. When the caravan had cleared the gates, and got fairly out into the open country, lo! the star reappeared. The joy of the company now knew no bounds, their perplexity was at an end, and the truth of their hearts was fully vindicated. The beautiful herald moved steadily forward to the town, and then stood immediately over the house "where the young child was."

Six weeks had transpired since the shepherds had visited this child and had filled the village with rumors of his greatness. Now these solemn-looking men from the Orient, with strange speech and wearing a garb of rich material, present themselves in adoration and holy song before this same tender babe! They declare him to be the long looked-for Messiah—the King; and they point to the star which still hung resplendent over the young child and Mary his mother! After the manner of the East they brought gifts worthy of the Divine Infant—"gold, frankincense and myrrh." It was a tribute due from earth to the only King Immortal. This timely gift enabled Joseph and Mary to save the life of the babe. The danger was indeed imminent, for Herod's smothered malice was about to search after the child to destroy him. An angel of God directed Joseph to move quickly if he would save the mother and infant. Having the means in hand, he acted promptly, and on the very night, probably, the Magi left he was already on the way to Egypt with his precious charge. It is not easy to estimate how much, therefore, we owe to the faith of the Orient and to the treasure which it presented to the Infant King. We may at least try to pay back a part of the accumulated interest of the "gold" in sending the written Testament of his life to the myriads of China.

Led by the star first, next by the Scriptures, and then again by the star, the Wise Men had visited the fountains of Light. With joy and wonder they saw the mysterious, serene flame dissolve in the abiding glory of the Saviour. Then by divine counsel they turned their steps swiftly homeward—not toward Jerusalem—and left upon the eternal record the story of their visit and discovery.

There are cases in which a man would be ashamed not to have been imposed upon. There is a confidence necessary to human intercourse, and without which men are often more injured by their own suspicions than they could be by the perfidy of others.

There is no doctrine of our blessed Saviour that more concerns all Christians, or is more essential to their salvation than this: "Blessed are the pure in heart, for they shall see God."—W. Law.

THE COLORED PEOPLE.

The chairman of the committee appointed by the Louisiana Conference, at its last session, upon the Religious Interests of the Colored People, reported the following resolutions:

1. That we hail with pleasure the return of an opportunity of ministering to the wants of the colored people of our State.

2. That we will give to the people of color of our church encouragement, and aid them, as far as practicable, in the erection of churches and the organization of Sunday schools for the religious instruction of their children.

3. That in the judgment of the Conference the period has arrived to move for the organization of the colored people into churches, according to the provisions of the Discipline.

4. That the presiding elders, and the preachers under their charge, be and they are hereby instructed to take the matter in hand, organize colored churches as far as possible, and make full reports of their operations at the next Annual Conference.

The minutes of this session of the Louisiana Conference show an increase of seven hundred colored members for the year past. This is a symptom of returning reason. Ever since the war the colored man has been entirely beyond our guidance. His political and social status had been so much changed, so violently and so entirely without his instrumentality, that he felt borne on by those events of his history completely away from all old channels and associations. His instincts lead him to cleave to the men who had been the occasion, if not the cause, of this change. When among the various military characters of the invading army he saw a portly person, who seemed to be a bishop clothed with extraordinary powers by the government for seizing and converting all colored churches and members in block, we can imagine how numbing must have been his acquiescence. Ever since then he has been worshipping and voting, and voting and worshipping under the ample folds of Liberty, until he can hardly decide whether he belongs to the government or the Methodist Episcopal Church. It is beginning to occur to some of them, at last, that religion and politics do not of necessity go together; that a man may possibly vote the right ticket and still not be a part of that church. No matter from what cause, numbers of them are finding their old places in our church. We have already four or five colored Conferences, and it is not improbable that before the year ends we shall have the material for forming one in Louisiana.

RAISING CORN AT HOME.

During the past week on one day twelve thousand, and on the next eight thousand bales of cotton were sold at good prices. Still exchange on the North was not affected, because all this money is directly licked up by the West and other grain-growing portions of the country. This is the policy that keeps us a dependent people, when we might be of all the most independent. One-half the cotton we now raise would yield as much money as a crop would twice as large as the present. There is, therefore, no necessity for neglecting either cereals or stock, nor is there any excuse for it. Men who will not raise their own corn, because they will not plant it, often fail, and scarcely deserve to succeed. All the skill of politicians, however successful, cannot accomplish for us the security of our rights half so effectively or so speedily as can the well directed labor of our farmers and planters. But men who are so eager to make cotton that they will not raise food enough for their laborers and families are bad planters and worse patriots. Wheat, corn, pork, rice and beef are as truly staples of the South as are tobacco, cotton, sugar, hemp or indigo.

I have seldom known any one who deserted truth in trifles, that could be trusted in matters of importance.—Paley.

THE DIME SOCIETY.

Mr. Edron: Some months ago some of the ladies of our congregation (the Coronet street church) organized what they called a "Dime Society." The primary purpose contemplated in this social organization is to facilitate the introduction of our members to each other; and the secondary object is to raise a fund for Sunday school and church improvement purposes.

We think this organization so valuable, and likely to be productive of excellent results. Our members come from various States, and even foreign lands. They are scattered all over the city, from end to end and side to side. They are necessarily ignorant of each others' residences, and only meeting in the public congregation, could never be personally acquainted. This society is likely, in a good degree, to obviate this social difficulty.

The society has a president and treasurer. It meets once in two weeks, at some selected house, to which the society has been invited, and the place of the meeting is publicly announced. Members of the church, and its friends who attend the congregation, are generally and cordially invited. Persons attending are expected to pay to the fair treasurer—who sits in a conspicuous place with the strong box—a dime, and as much more as their liberality may move them to give. The hostess prepares some simple and palatable refreshments, only three articles being allowed. The society begins to meet after seven P. M., and must close by eleven P. M. We get introduced; we talk; the young folks play the piano and sing. The whole is meant to be social, cheerful and informal. It is intended to discourage, as far as we may, excess in dress and expense in entertainment.

Yours truly, J. B. W.

[We have attended; and many inventions not half so good have been patented. In talking with some of the ladies who have attended the meeting, we learned that two dozen eggs, one hundred oranges, a few coconuts, some sugar and flour, costing not less than \$5 nor more than \$10, sufficed to furnish the frugal repast. Eating is introduced to take away any stiffness, but is not to be treated seriously. In the country, where milk, strawberries, peaches, chickens, celery and lettuce can be had with some little effort, it will be easier still to get up this "feast of reason." A large table is not required, as the company does not eat all at once, but in small parties, standing. It is a love-feast without the speeches Edron.]

THE WORLD'S GRATITUDE.

Philip Melancthon, at dinner with Doctor Martin Luther and some other friends, the conversation happening to fall on the ingratitude of the world, introduced the following story:

A big serpent fell into a cave, and cried piteously. A firmer came to the entrance to know what was the matter, when the snake begged him to help her out. "O, no!" said the man, "no good can come from serving bad creatures. I might nourish a snake in my bosom." But the snake entreated, and by the God who once spoke by her, she promised the firmer the best reward which the world is in the habit of giving. Malice, cunning and rich promises befell even the wise; the firmer helps the bad, treacherous serpent out of the hole, and then, as his reward, she prepares to drown him. "Have I deserved that of thee?" Does that agree with thy promise?" asked the firmer. "I am double-tongued," replied the snake. "That's the way the world rewards. He whom you save from the gallows generally brings you to it." The firmer is confounded, and the snake further says: "As thou wilt not believe me, let us appeal to the next two we meet, and abide by their decision, or matter whom of us it may benefit or hurt."

Soon an old horse comes along; they submit the case to him. He says: "Fifteen years have I served a carman; to-morrow he will turn me over to the knacker. That's the world's reward." Likewise appeals the old dog to whom they next appeal: "I have for ten years assisted my master in hunting and catching foxes and hares; now he has directed the game-keeper to hang me to the willow tree. That's the world's

The Child's Corner.

ONLY A BOY.

Only a boy, with his noise and fun,
The veriest mystery under the sun;
At a trifle of mischief and wit and gloe
As ever a human frame can be,
And as hard to manage as what? ah me!
Tis hard to tell,
Yet we love him well.

Only a boy, with his fearful tread,
Who cannot be driven, but must be led;
Who troubles the neighbors' dogs and cats,
And tears more clothes, and spills more hats,
Loses more tops and kites and bats,
Than would stock a store
For a year or more.

Only a boy, with his wild, strange ways,
With his idle hours on his busy days;
With his queer remarks and his odd replies,
Sometimes foolish, sometimes wise,
Often brilliant for one of his size,
As a meteor hurled
From the planet world.

Only a boy, who will be a man,
If nature goes on with her first great plan—
If water or fire, or some fatal snare,
Conspire not to rob us of this our heir,
Our blessing, our trouble, our rest, our care,
Our torment, our joy!
"Only a boy!"

History of Celebrated Women of China.

TRANSLATED BY REV. J. W. LAMBETH.

HISTORY OF YEN-CHOW, WIFE OF EMPEROR TAI-SIEN, WHO REIGNED 826 B. C., IN THE CHOW DYNASTY.

Kyangur was the daughter of one of the nobility in the Tsee country. She was wise, prudent and good above all those around her. She would not speak except in the best style, and she would not do anything that was not according to the most approved rules of propriety. The emperor was in the habit of retiring early and rising late, on which account the queen refused to leave the room. She removed from her person all her ornaments, and remained very quiet. She sent her preceptress to say to the emperor "that she was, in fact, and had caused her lord to violate the rules of propriety, and he was then late in appearing in the presence of his assembled officers; that he loved women, and had forgotten the true rules of virtue. Thus, by an inordinate love of women, and too great a desire to eat and drink to excess, his kingdom would soon come to an end by becoming turbulent and rebellious. As this rebellious and turbulent disposition would arise on her account, she besought the king to say what her punishment should be."

The emperor answered and said: "I am the one to be censured, for I have done wrong, and not you. Put on your ornaments again, and I will, early and late, earnestly engage in the administration of the laws of the country."

The Literatti say that "she was virtuous and good, and dignified in all her actions." The queen was careful to observe all rites and ceremonies, and as the evening approached she was lighted to the apartments of the emperor, where she laid aside her embroidered garments, and clothed herself in other garments to meet the emperor. It was their custom to rise at the cock-crowing, and at the sound of music. The Book of Odes says: "They were strict in the observance of this custom." The Book of Odes also says: "The love of the emperor for the queen was so great that it could only be compared to a mulberry tree by the side of a beautiful fountain of water, whose leaves give out a beautiful light, which was admired by every one who passed. Thus the love of the wife, when connected with virtue and true devotion, shines forth as a light, and makes strong the affections of the husband."

It is said the father of the Emperor Tser Sien was a wicked king, and that his son followed in his footsteps. His prime minister, Sung'oo, who was a man of great ability, saw that the affairs of the government were conducted in a proper manner, while the queen, with all wisdom, conducted the affairs of the palace. At one time a disturbance occurred in the Loo kingdom, and also in the country of Loney, but the emperor refused to do anything to restore peace. The Queen Kyangur protested against such action, and went herself in company with the prime minister, and restored order. It had been the custom for women to have nothing to do with the affairs of government; but in this case the

queen took the responsibility upon herself, and aided the emperor in the government of the country.

HISTORY OF TING KYANG.

Ting Kyang was the wife of Way Ding-koong, king of the Way country. The son of Ting Kyang married and died quite young, without any son, and his wife mourned for him three years. Ting Kyang then desired to visit her own family, when her daughter-in-law followed her into the wilderness, weeping bitterly and refusing to leave her. As she stood afar off, weeping bitterly, she said: "As two swallows when flying, with wings unequal, so you return to the land of your birth, and I stand afar off weeping. Not beholding you, I weep showers of tears." Thus she stood watching and weeping long after her mother-in-law was lost to sight. She again said: "My husband is dead, and now I am a widow. My hope is in you; I cannot leave you."

The Literatti say that among all mothers-in-law Ting Kyang was the most merciful. At one time Emperor Ding Keong became angry with Sung-ling-foo, his prime minister, who fled to the Ching country. The king of the Ching country sent a messenger with him to Ding Keong, requesting him to receive his prime minister again, but he determined not to do so. Ting Kyang answered the king and said: "It is not well for you to refuse this request, for Sung-ling-foo received his office originally from his forefathers, who had the office from ancient times, and now that a king of great power has returned him to you, with a request that you would receive him, is it not better to receive him, though you be angry, than not to receive him, and lose your kingdom? I beg you to have a little patience, and bear with him. Can you not forgive him, and thus continue the peace of your people?" The King Ding Keong then received him again.

The Literatti say that "Ting Kyang was able to avert a great calamity to the country." The Book of Odes says her observances and customs were blameless, for which reason she was known and revered in all kingdoms. At the death of the King Ding Keong, Keer, the son of one of his concubines, was made king, and was afterward called She-koong. Immediately after the death of his father, he manifested a haughty spirit. Ting Kyang, the widow of the king, finding that She-koong manifested no sorrow, she wept and said: "Alas! the Way kingdom will soon come to an end. The good was rejected, and thus calamity was brought upon the country. I could not have Tsay to reign as king."

All the officials of the kingdom, hearing this, feared greatly, but Sung-ling-foo refused to give up the duties of his office. Tsay, the younger brother of She-koong, was a good man, and Ting Kyang desired him to be king, but was not able. She-koong continued to manifest a proud and haughty disposition, until the people could bear with him no longer. He was driven from the throne, and took refuge on the borders of his kingdom. He then sent messengers to the ancestral to say to his ancestors that he had left the throne, and that no blame was attached to him. Ting Kyang, hearing this, said: "It could not be allowed. If there be no holy spirits of the dead, then he is without sin. But how can he say to them he has no sin? He has fled and forsaken his prime minister, to contend alone with officers of a lower grade; that is a sin. Before the death of the king, Sung-ling-foo was honored as his teacher, and now you have disregarded his counsel; that is a sin. I am but a woman, and served faithfully the emperor before his death, and now you accuse me of unfaithfulness; that is a sin. You may tell to your ancestors that you had vacated the throne, for that is true. How can you say you are without sin?" When Tsay became king he sent for his brother She-koong to return. The Literatti say: "Ting Kyang was able, by her wisdom, to teach all around her." The Book of Odes says: "Whatever she said all were willing to listen to."

At this time Wongur, from the Tseing kingdom, led an army to fight against the Way kingdom. Sung-ling-foo then consulted the necromancer, and found the image to represent a hill with many trees, and that if he led an army to fight they would be destroyed. He immediately made this known to Ting Kyang. She said: "It is certain that some will be killed; but it is nothing but right that they should oppose an invading force." He then led his army to meet the enemy, and defeated them in battle. In the pursuit Wongur, their leader, was taken prisoner at a place called Threcher. The Literatti say: "She was a woman well informed in everything." The Book of Odes says: "Whatever she said was true, and that all ought to give heed to her words."

Scientific.

THE TOAD AS AN ENTOMOLOGIST.

The toad is of a retiring disposition, loving dark corners and shady places. It has a slow, crawling motion, and is of a very timid disposition. Numerous instances might be cited of pet toads, and of their becoming quite tame.

The toad differs in some respects from the nearly related frog. The structure of the mouth is, however, nearly the same. The tongue is attached by the root, as it were, to the base and front of the mouth, the tip being reversed and pointing down the throat when the animal is at rest.

The moment it sees an insect its eyes brighten and sparkle, the toes twitch, and quicker than the eye can follow, the tongue is thrown out, the insect transfixed, and withdrawn into the mouth.

Unlike the frog, the toad does not spring after its prey, but remains seated. Having kept frogs in the aquarium, I have noticed that they will spring two or three times their own length from the moss to catch a fly on the glass, using their tongue, as it were, on the jump. They seldom miss their mark. As far as my experience goes, neither of these animals will eat anything without life or motion. I have, however, often deceived a frog by moving a dead fly in the sight of the creature, which it always took readily. Many stories have been told of toads in rocks, and reasons have been given by authors as to the way in which they have become so embedded. My subject has, however, nothing to do with these "old great toads," but to one of our own day and generation. After this digression, I shall now introduce my friend, the toad, in his capacity as a collector of beetles.

The entomologist has recourse to different methods to obtain the object of his interesting study. The following is one of many:

Starting at six o'clock one morning, in the summer of 1864, for a walk to our beautiful mountain, to collect insects, provided with the requisite apparatus, a wide-mouthed bottle, with spirits, for beetles, and a small flat box, lined with cork, for butterflies, etc., my success was particularly good. The first captures were eleven specimens of carrion beetles, comprising three species, viz., *Staph. pelata*, *S. marginalis*, and *S. inaequalis*. These were obtained from the body of a dead hawk-owl (*Surnia ulala*). Having secured them in the bottle, and walking leisurely along, I noticed a toad (*Bufo Americanus*) sitting contentedly at the root of a basswood tree (*Tilia Americana*). Having never made use of my dingy friend as an insect collector, although aware of his propensity that way, my mind was up to press him into the service—but how? He must be dead first. As he sat looking at me with his beautiful eyes (for although his appearance is not very prepossessing, still those beautiful, bright, yet languid eyes go a great way to improve his appearance,) I had certain quibbles of conscience about taking life; still it was in the cause of entomology, and for the furtherance of science his life was sacrificed. Now he was dead; how was I to proceed? I had cut up and dissected many insects as well as birds, but to cut up a toad, and before breakfast—"there's the rub"—that gray, varly toad, no beautiful eyes now. One slash of the knife through the skin, another through the walls of the stomach, and the poor creature's breakfast was exposed.

I was a little disappointed at first, as one or two common forms of beetles presented themselves, that might have been obtained without sacrificing the poor animal; still, I reasoned as he had been up nearly, or perhaps all night, collecting, and I had not, he must have taken some species not in my collection. Having scraped the contents of his stomach into my bottle of spirits, I started home, resolved to see what the insects were before breakfast. I spread them out on a sheet of

blotting paper and counted them; the result being thirteen perfect specimens.

I have killed several toads since, with similar results; one, I may mention, had the stomach filled with a species of *Chrysomelidae*, *Doryphora trimaculata*, amounting to eleven specimens. He had evidently come across a colony of that insect, and made a hearty breakfast. I may state that this insect was in great abundance, during 1864, on the Island of Montreal. The same may be said of last summer, 1868; taking them by the score on the mountain, along the river at Hochelaga.

The earlier you go out in the morning the better; before sunrise, if possible, before the process of digestion has gone too far.—*Correspondent of Scientific American.*

THE SPECTROSCOPE.—We are gratified to learn that Prof. George F. Barker, M. D., of Yale College, will deliver two lectures at the Academy of Music, in this city, on Monday and Tuesday evenings next, on the "Spectroscope" and "Sight." The professor will explain verbally and prove by experiment with the spectroscope all the various principles of light, showing the spectroscope itself to be one of the grandest discoveries of the age. Although an exceedingly simple instrument, the results are truly astonishing. By its aid the flames of all bodies can be analyzed. A ray of light from a heavenly body passing through it indicates to the observer the substance burning to produce the light. And so perfect are its workings that the one hundred and ninety-fifth millionth of a grain of any body can be detected by its aid. Its practical applications are various. It detects impurities in dyestuffs, adulteration of liquors, poisons in the human system, etc. To our iron manufacturers it is especially valuable to tell the instant when carbon is all burned from the iron and it has become steel, and is thus used in the mercurial manufacture of steel rails. The experiments accompanying the lectures are of the most brilliant character, and have elicited the most intense interest and applause wherever they have been produced.—*New York Presbyterian.*

MEDICAL DEPARTMENT.

SNAKE BITE CURED BY THE APPLICATION OF A COAL OF FIRE.—Dr. Perkins writes: "A young man, eighteen years of age, was bitten by a very large rattlesnake (five feet long) on the arm above the elbow. A coal of fire was applied a short time after he was bitten. I saw him two hours after the accident, when he appeared very much prostrated and was vomiting every few minutes—pulse very small and frequent, complaining constantly of the burn, which was pretty severe. I gave him freely of diluted alcohol. His recovery was rapid and the swelling in the arm slight."

"The question now is, did the fire do any good? I think it did; not only destroying the virus to a considerable extent, but also by producing a local incision in the vein and absorbent vessels to perform their functions."

TWO MEALS A DAY.—If any man or woman of forty-five or over, not engaged in hard manual labor, especially the studious, sedentary and in-door lives, would take but two meals a day for one month, the second not being later than three in the afternoon, and absolutely nothing afterward, except it might be in some cases an orange or lemon, or cup of warm drink, such as tea, broma, sugar water, or ice cream, there would be such a change for the better in the way of sound sleep, a feeling, on waking, of having rested, an appetite for breakfast, a buoyancy of disposition during the day, with a gentleness of temper and manner that few, except the animal and glutton, would be willing to go back to the flesh pots of Egypt.

THERE is a good deal of sound sense and philosophy in the following from the Galesburg (Illinois) Free Press: "Pay up. If you owe one but a single dollar, go and pay him; when there is so little money, we ought to keep it moving around lively." Jim owed us, and we owed Bill, and Bill owed Jim. Jim got mad because we made him pay last week, one morning; but we paid Bill, and Bill paid Jim, and Jim went to bed that night happy as a clam, with as much money as he had in the morning, and three men out of debt."

IN SELECTING methods of exercise every person should be guided by his own individual taste. The exercise which is most agreeable is, as a general thing, most beneficial. So, as a rule, the food which is best enjoyed is best digested.

"A SINGLE SNOWFLAKE! Who cares for it? But a whole day of snowflakes, obliterating the landmarks, drifting over the doors, gathering upon the mountains to crash in avalanches—who does not care for that?"—*Becher.*

BOOKS AND STATIONERY.

ROBERT J. HARR,

AGENT OF THE

SOUTH. M. E. PUBLISHING HOUSE,

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD.

NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors, and Patent White Enamel from Knobs, the improvements in the covers and centre pieces, all of which have been covered by Letters Patent, and are used in no other Stove. They are adapted to stand fire, or others suit free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast Iron Enamel Reservoir and Patent Air Working Closet, Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the plate, can be removed at pleasure, thereby forming a six-hole Stove—the best in use, as the back holes will heat as well or better than the middle ones. For sale by

G. W. W. GOODWYN,

62 Camp Street.

ALSO, THE MOST

Complete and Perfect Cooking Stove

FOR RUMINOUS COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR.

which can be seen at 62 Camp Street. The advantages possessed by this Stove over all the other Coal Cooking Stoves are so numerous, and so patent to every sensible observer, that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with extra care, Oven Doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent covers, corners and White Enamel Knobs.

The operation of every Stove guaranteed. Directions for putting up and using same accompany each Stove.

G. W. W. GOODWYN,

62 Camp Street.

Sole Agent for States of La. and Texas.

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE,

with extended Fire Chamber and Feeder Top—one of the best Baking and most economical Stoves made.

The Flues are constructed so as to insure the most perfect draft. The heat of the Oven is so equal that when baking there is no need for removing anything until done.

THE TIMES.

Is made of a superior quality of iron, very heavy, of neat design and fine finish. The Top Plate is put together in sections, to permit of the greatest expansion without cracking.

We invite the attention of Housekeepers to the advantages of this Stove. Remember, we guarantee to give entire satisfaction. Duplicate parts can be had at all times at small cost, by which repairs can be made which will frequently save the price of a new Stove.

A large variety of MANTLE GRATES, House Furnishing Goods, Tin and japanned Ware. Agents for the celebrated Dorn Bird and Animal Cages.

ZABE & DALTON,

No. 115 Poydras Street.

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Thus a new arrangement for heating water can be had at all times, heavier than any Stove in the market, sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee.

Besides the above named Stoves, I have on hand the celebrated Canton Plant, Charter Oak, True Kentucky, Maid of Orleans, Queen of the South, Delta and others, all of which I offer at a low price.

J. H. CAMPBELL,

No. 131 and 133 Poydras St., New Orleans.

The Christian Advocate.

SATURDAY, FEBRUARY 19, 1870.

RUM IS POISON.

It will rob the heart of sense,
It will rob the purse of peace,
It will rob the mouth of food,
And the soul of heavenly good.

It will wear the tender heart,
Make the young from good depart,
Change the honest into knaves,
Dig for souls in many graves.

Method of Treatment of Idiots in the
Protestant Asylums of France.

From a most interesting volume entitled "Six Months Among the Charities of Europe," we extract a brief account of the successful management of such difficult cases, at Mr. Bost's orphan establishment at Laforee.

The providential origin of the enterprise is described as follows: A girl, who was a perfect idiot, died one day in Mr. Bost's lobby. The aspect of the hideous looking creature was so sickening that Mr. Bost could not possibly permit her to be taken into the establishment; but still less could he send her away. If ever there was a subject for compassionate, saving love, it was here. The power of prayer and the perseverance of charity could now be put to the test. Mr. Bost resolved to keep the girl in his own house. The doctor declared it perfectly folly. "He had better try to train a monkey or a dog." He suggested the establishment of an asylum for such creatures, but his proposal was listened to as if it was for a drawing school for blind people. So he was left alone with the miserable girl. With that pertinacious decisiveness, which is one of the prominent features in his character, he set about trying to strike a few sparks of intellect out of this hard nut. During three months he labored as if dealing with a brute of the lowest species. All his efforts, unwearying and varied as they were, proved a total failure. Still he continued praying and laboring, hoping against hope. One evening at worship, while the hymn was being sung, he heard an articulate and harmonious tone proceed from the brutish-looking creature. The child evidently tried to put its voice in accord with the sound which it was hearing. This was a gladdening ray of light. Now, Mr. Bost is a musician, and an excellent performer on the piano. On discovering that the mind of the child could be best approached through the medium of music, he at once applied his talent to the benefit of his unhappy pupil. Under the softening and cheering influence of sound, it was affecting to see how gradually, first with painful struggles, then with growing ease, the mind of the child emerged from the dark deep in which it had been confined. By little and little the idiot succeeded in uttering articulate sounds, then in uniting them into syllables, and finally into words. At the same time her health improved visibly, her nervous system became less irritable, her face assumed more and more a rational expression. She began to show joy and surprise when receiving something that was agreeable to her. Then tokens of gratitude and affection followed. In short, after a lapse of two years, the idiot had disappeared to make room for a child which appeared to be behind by a few years only, when compared with other children of her age. At the present moment that same child, formerly beneath the level of the brute, speaks well, sews and knits like some children of her age, and might be the teacher of those whose intellect is not smitten to such a low pitch as hers was when she first put her foot on Mr. Bost's threshold.

From my personal acquaintance with Mr. Bost, and my conversation with several of his assistants, I believe I am safe in saying that, if one wishes to witness the right administration of the gospel as a healing power both for body and soul, he can do no better than to spend a week at Laforee. The method which Mr. Bost applies is very simple. He tries to restore peace and joy to the mind of his patients by constantly telling them the good news that there is a Saviour who cordially loves them; who thoroughly understands their sufferings, because he himself suffered even more than they; who, in order to rescue them from all sufferings and to restore them to perfect, everlasting happiness, came down from heaven to do all that was required for their redemption. Hearts broken under the strokes of suffering and misery, with few exceptions, prepared to receive and to believe such gladdening intelligence. The calmness which this belief imparts to the mind cannot be overestimated. Prayerful submission takes the place of rebellious resentment. The movements of passion, so injurious to health, are allowed to have their own course, are kept in fetters by the power of him who says to the wind and sea:

"Peace, be still." And if the cheerful state of mind which enlivens the patients cannot always remove the complaints that vex them, it at any rate makes them feel less miserable in their sufferings and more thankful for their comforts. Mr. Bost's reports lead us to many sick beds and death beds, which, in a most affecting way, confirm this observation. It is there shown how Christ is mighty to change a poor, weak, miserable child into a hero, fighting the hardest battle with unflinching courage, till it leaves the field as a conqueror.

GOVERNMENT BY NEGROES.

A NEW VIEW OF RADICAL TACTICS.

* * * Except in the case of the United States there has been great uniformity in the history of the suppression of rebellions in modern times. First, there has been severe and often sanguinary punishment inflicted on the chiefs of the revolt; then has succeeded a period during which the successful empire has enforced strict obedience to itself from its subjugated dependencies; and finally has come a strong desire, growing sometimes out of policy, sometimes out of a sense of justice, and sometimes out of mere emotion, to win its affections, or at all events its voluntary acquiescence in accomplished facts. England is just at present feeling an almost passionate wish to be reconciled to Ireland, and to be beloved by the natives of India; Austria has done her best to come to terms with Hungary, and there are signs that the sufferings of Poland are beginning to cause discomfort and compunction even in Russia. The United States seem destined to an experience of a different kind. On the morrow of the conquest their treatment of the Southern leaders was marked by a gentleness which will always be remembered to their honor. But in the next stage of their relations with the South the necessity for combining despotic rule with something like the forms of local self-government, forced them to adopt a policy which has more than made up for their abstemiousness from bloodshed. Nobody whose intelligence has not been impaired by the habit of repeating formulas about universal suffrage can doubt that the punishment inflicted on the Southern whites is far the severest which one community has ever inflicted on another. England governed Ireland through a minority which the masses of the Celtic population, however it might hate, never dreamed of despising; the United States rule the South through a majority of negroes, contempt for whom was almost a religion with the planter before the attempt of secession. We are not considering whether the punishment was deserved, or whether the Northern States could possibly help inflicting it; we merely say that, after the capacity of the negro for improvement has been rated as highly as possible, and after all possible deductions had been made from the credibility of the stories published by the Democratic press, the fact remains that government of white men by colored ex-slaves is the nearest form of moral torture which has ever been applied to a community. How unfortunate it has been that the punishment of the South has taken this shape. The United States is not likely to feel until the time comes (and it will certainly come) when the people of the North will be animated with the strongest wish to be reconciled to even the most obstinate zealots of secession. We should be sorry to lay down that the United States would have done well to have shed blood like water in the first moments of triumph, if only they could have devised some less degrading contrivance for the provisional government of the South. Yet it is quite certain that bloodshed is easily forgotten; personal outrage with the greatest difficulty. The Hungarian nobles appear to have forgiven the Emperor Francis Joseph for his wholesale executions of their brethren; but nobody can fail to see that the "irreconcilability" of some of the most eminent of French politicians is greatly due to recollections of the personal dishonor to which they were subjected on the memorable morning of the coup d'etat. At the present moment we are well aware that nothing seems less important to the great majority of the Northern people than that the experiment which they are trying in the South, causes excessive discomfort to a parcel of conquered rebels; but they will, probably, hereafter view this experiment with other eyes when there comes the inevitable waking to sympathy and pity, and when, much about the same time, it appears that the negroes, who are the instruments of punishment, have become not only a Southern but a Northern power, weighing heavily in the scale whenever a national decision has to be taken. — *Pall Mall Gazette*.

Those bravely the object of your worst apprehension, and your stoniness will commonly make your fears groundless.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

41 CAMP STREET, Corner Commercial Place, N. O.

Open day and evening the entire year.

Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Fee, Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1841. For circulars, giving terms, etc., address J. W. BLACKMAN, New Orleans.

Jas 1y

METHUEN FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Pupils are required to attend in advance. Pupils entering within the first month will be charged from the beginning. Itinerant ministers

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited no material change since our last issue. Only a moderate business has been done in most branches of the wholesale trade, and in some departments operations have been restricted by low water in the lake interrupting shipments. The receipts of sugar have been fair, and meeting only a moderate demand. Molasses has been in good request, at previous rates. The business in Western produce has been mostly confined to the local trade. There has been some demand for export, but without resulting in sales of any magnitude. The time for cheap freight appears to have passed by, and it is generally anticipated that the market will rule higher for the rest of the season.

The tributaries are still at a good navigable stage, and planters are rapidly shipping their crops to market. The arrivals have consequently continued liberal.

The river is now two feet eight inches below high water mark, having risen four inches since our last.

CORROS.—The following are the arrivals since the eleventh instant:

Louisiana and Mississippi bales	26766
Arkansas	1920
Lake	221
Mobile	458
Florida	41
Texas	186
Total	29502

On Saturday the movement commenced with a lively demand, which subsequently became still more active, and the sales summed up 9,950 bales, at stiffer rates generally, showing an improvement of $\frac{1}{16}$ in good ordinary, low middling and strict middling, but no quotable change in other grades. On Monday buyers came forward with unabated spirit, and although factors were more stringent in their pretensions, the demand continued active throughout the day, and 9,750 bales changed hands, at still stiffer prices, but without any quotable advance. On Tuesday the market opened with a marked falling off in the demand, and although factors evinced a willingness to make some concessions, yet it failed to bring out buyers with any degree of spirit, and the business was confined to 3,200 bales, at easier prices, virtually $\frac{1}{16}$ weaker than on Monday, although requiring no other change in quotations than a reduction to that extent in the outside figures of low middling. Hence, notwithstanding Tuesday's depression, the closing rates show a slight advance on last Friday's figures.

This makes an aggregate for the past three days of 22,950 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 738,711 bales, against 625,418 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 444,467 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 215,619 bales to Great Britain, of 22,930 to France, and of 52,292 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	24 1/2 to 25
Good ordinary	24 1/2 to 25
Low middling	24 1/2 to 25
Middling	24 1/2 to 25
Strict middling	24 1/2 to 25

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	29502
Arrived previously	74997-77949

Exported past three days 18037 || Exported previously | 524387-542424 |
| **Total** | 237845 |

MOLESSES.—This article has been only in moderate demand, but the supplies are falling off, and prices were sustained in consequence.

FLOUR.—The demand has continued good, at firmer prices, with a light supply and a scarcity of the medium and lower grades, the descriptions most in request.

MONEY.—Gold opened on Tuesday at 119 1/2 to 120 (against 119 1/2 to 120 at New York), and closed at 119 1/2 to 120 (against 119 1/2 at New York).

The only sale of silver reported is \$1,500 in American half dollars on Tuesday at 118 1/2.

The sales of bonds include \$6,000 new State sixes on Saturday at 69, and \$2,000 5-20s of 1865 at 113 1/2; and \$100,000 City Bonds, Railroad issues, May and November coupon, on Tuesday, at 70 1/2.

CATTLE MARKET.

NEW ORLEANS, Feb. 15, 1870.

VOL. XVI.

NEW ORLEANS, SATURDAY, FEBRUARY 26, 1870.

NO. 6.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Feb. 22.—The consul at Santiago de Cuba, under date of January 3, writes to the Secretary of State on the merits of political affairs in that consular district, which are in a most deplorable condition.

The planters are persecuted to such a degree as to be compelled to flee from their estates, and their crops are immediately sequestered and appropriated to private purposes. Very little credit can be placed upon the Spanish press, it being a government organ, maintaining that the insurrection is finished in this department, which is far from the truth. The insurrection continues in full force, and numerous encounters take place, which is seen by the frequent arrivals of the wounded Spanish soldiers.

The Cubans, being better armed and disciplined than formerly, in many cases take the offensive, and have had their numbers increased by desertion from the Spanish troops, who find it impossible to endure the climate. It is estimated that fifty per cent. of the Spanish volunteers from sickness are put hors de combat. The hospitals are full to overflowing. It is impossible for any force that Spain can send to exterminate the rebel forces, owing to the climate and topography of the country, while both the contending forces destroy every vestige of agriculture.

WASHINGTON, Feb. 23.—Senate.—Unimportant.

The President has accepted Ames' resignation.

House.—Four Mississippi members seated. Consideration of Utah resumed.

Senate.—The admission of the Mississippi Senators provoked a long debate. The colored Senator, Revels, was on the floor to-day. The question the discussion turned upon was the legitimacy of the credentials, and no objection, so far, has been made on account of color. The credentials were finally received, and the question at the time of adjournment was upon their reference to the Judiciary Committee. The Republican members manifest no disposition to refer them, and Mr. Revels' admission to a seat in the Senate is a question of but a few hours. There was no executive session to-day.

House.—Mr. Burlingame's death was announced.

APPEARANCE OF GOVERNOR WARREN BEFORE THE GRAND JURY.—As was announced would be the case, by the Times, immediately after the interview of the "Committee of One Hundred" with Governor Warmoth, the grand jury yesterday summoned before them the State Executive, for the purpose of taking his evidence and of indicting those prominent parties who have been notoriously engaged in the work of official bribery and corruption.

The names of the contractors, brokers and lobbyists engaged in the transaction are almost too notorious at present to have made the matter one of much conjecture; and Governor Warmoth, it is understood, is preparing a full answer to the resolutions of inquiry upon this subject which have passed the Senate. He, however, in obedience to a summons from the grand jury, appeared yesterday, at ten o'clock, before that body, with the following result:

1. He was asked the names of the bank presidents who were lobbying the \$7,000,000 rebel bond bill through.
2. What brokers lobbied the \$5,000,000 principal and interest, payable in gold, city bond bill.
3. What consideration Mayor Conway offered him to sign the said bill.
4. Who it was that laid upon his desk the check for \$50,000 to induce the signature of said bill.
5. The name of the man who offered \$50,000 to sign the Nicholson pavement bill.

The Governor declined to answer these questions for the reason that there was no law in this State which would either punish the person offering the bribe or accepting it. The only law on the subject was section sixty-one, p. 145, R. Stat., which relates to the offering of bribes to "a judge or other person concerned in the administration of justice."

The grand jury then referred the matter to the district attorney, who gave it as his opinion that the Governor should answer the questions. The Governor, notwithstanding the opinion of the district attorney, refused to answer the questions.

The grand jury thereupon went into court and informed the judge of the Governor's contumacy. The Governor in reply stated to the court that he was ready and willing to answer the questions propounded if there was any law on the statute book punishing the offenders; but that he regarded the action of the grand jury as unwarranted in law, and only calculated to produce scandal without subserving the ends of justice.

Judge Abell decided that there was no law on the statute book punishing the offense of bribery, unless, in the language of the statute, the bribe was offered to "a judge or other person concerned in the administration of justice."

The Governor thereupon was discharged from answering the questions propounded by the grand jury. Times, February 22.

FOREIGN.

PARIS, Feb. 18.—Henri Rochefort writes from prison to his paper that the prefect of police had seized his editorial articles. He complains that while up to the present time incarcerated, journalists have been allowed to write to their newspapers, he has been denied that usual privilege, notwithstanding he is a deputy in the Corps Legislatif, and has not been deprived of his civil rights.

The government has proofs of a plot to assassinate the emperor and prince imperial, by throwing bombs through the emperor's window.

France objects to the dogma of the infallibility of the pope, because, if admitted, the French bishops will no longer be answerable to the common law.

MADRID, Feb. 18.—The signs unmistakably show that the Carlists are plotting a general outbreak. The government will be prepared for it.

MEXICO.—Progress of the Civil War.—We find the following in the Brownsville Ranchero of February 5. Though not so late as the advices given in Saturday's dispatches, as received per steamship Tabasco, from Vera Cruz, it will still be found quite interesting and important. It will be seen that the Pronunciados have won a very decided victory over the government forces, and that they control a very large and important section of the republic.

A private letter from San Luis Potosi, dated the twenty-second ultimo, to the Matamoros Observer, says:

The first news that reached here on the fifteenth ultimo, of the battle which took place on the previous day, was favorable to the government troops, as it is said that after a bloody conflict, which took place at Tejon, on the other side of the hacienda of Pelotillos, and which lasted from five to seven o'clock P. M., General Pedro Martinez had been defeated by the Federal troops, under command of General Rocha; but it was afterward ascertained on the contrary, the vanquished being the victors, although this news was not confirmed until evening, when the official dispatch of General Martinez, dated at Tejon, was published.

Meanwhile the news reached here that Zacatecas had pronounced against the general government, and captured the conducta at San Juan de los Lagos.

Some troops left Zacatecas for Aguascalientes to make the latter place second the movement inaugurated on the former city. They took possession of the place and made it pronounce. From there went into the State of Guanajuato with a large number of troops.

The fact that General Escobedo was at Queretaro concentrating all the government troops to march upon San Luis, prompted the march of General Martinez upon General Rocha to avoid a junction of both troops.

The city is deserted; only women were seen in the street. The men ventured not out doors for fear of being conscripted.

Not only the forced loans imposed upon the inhabitants was the cause of misery, but to this were added heavy and extraordinary taxes each day. The result is, that a great many stores are closed, to avoid the said duties and for fear of being pillaged.

Great many families are leaving the city for places considered more secure, considering also that the city was about to be besieged by government troops.

It was rumored in San Luis that Puebla and Perote had been evacuated and that the government troops had retired to the City of Mexico. It was also reported that General Negrete had taken Vera Cruz and that General Escobedo had been

called to the capital by the government.

On the eighteenth ultimo General Pedro Martinez communicated the following to Aguirre:

At one o'clock P. M., to-day, General Rocha was completely defeated at Puerto de San Jose. I have in my power five pieces of artillery, two wagons loaded with rifles, good many prisoners and plenty ammunition. More later I will give you a detailed account.

Independence and liberty!
PEDRO MARTINEZ.
PUERTO DE SAN JOSE, Jan. 18, 1870.

This news was received at San Luis with great enthusiasm, and the rebels had a great public rejoicing over the defeat of Rocha.

After the battle of Tejon, on the fifteenth ultimo, General Martinez said that General Rocha had retired to Puerto de San Jose, and if he did not retire he would pursue him, which promise it seems he complied with, according to his communication of the fifteenth ultimo, in which we are informed that two encounters took place at some points very near each other.

General Toledo communicated to the rebels of San Luis the pronouncement of Leon, saying it occurred in the moments when General Escobedo was arriving at the said city. Escobedo returned to Queretaro.

The stage which arrived from the City of Mexico at San Luis brought the news that General Alatorre, commander-in-chief of the second division, who was formerly at Puebla, was advancing on San Luis at the head of over three thousand men, which, united to the forces of Escobedo, Eguiluz, Corona, Portugal, and other leaders who were near San Luis, would make up a powerful army, which would be brought against the rebel city.

At the latest accounts nothing was known regarding the movements of the government troops, although the city was fortifying with great activity.

Still Later from San Luis.—On the evening of the twenty-second ultimo General Martinez entered the city of San Luis at the head of three thousand men and eight pieces of artillery, escorting over four hundred prisoners, twenty-three officers, seven pieces of artillery, and over seven hundred rifles, taken from the forces of General Rocha at the battle of Puerto de San Jose.

Generals Escobedo, Antillon and Alatorre were at San Felipe, thirty leagues from San Luis, but at the advance upon them of the Zacatecas and San Luis troops, six thousand strong, they retired to Queretaro, where they were joined by other troops.

This news does not seem reliable, because we were informed at first from San Luis that General Alatorre was bringing over three thousand men—consequently, after being united with the troops of Escobedo and Antillon, the number of troops at San Felipe amounted to at least five thousand men. On the other hand, we also note that the forces of Zacatecas could not have been at San Luis on the twenty-second, as by a communication from that city we learn that on the same day they had moved from Aguascalientes to Guanajuato.

Moreover, we also learn that the towns of the State of Zacatecas had protested against the pronouncement of Governor Garcia de la Cadena, and a force of six hundred horsemen was in the neighborhood of Zacatecas, hostile to the rebels.

The news that Vera Cruz had pronounced against the government is not true; on the contrary, the said State was preparing to aid the government the same as Durango, Nuevo Leon, Coahuila and Tamaulipas.

At Tampico they had two regiments, one thousand five hundred strong, belonging to the third division, and at Ciudad Victoria they had over one thousand men ready to defend the government.

Cortina, at the head of six hundred cavalry, is near San Luis, acting in accord with General Escobedo.

The dryness of the Egyptian climate is such that rain scarcely ever falls in the upper province, and not more, formerly, than five or six days a year in the Delta. But Mehemet Ali has planted twenty million trees in these districts, and the annual average has now increased to forty days.

"Judge Not," saith the Lord; the justice of which is obvious in a world where there are no innocent to judge the guilty.

DECADENCE OF NEW ENGLAND.

DEPOPULATION OF COUNTRY TOWNS.

The decrease in population among the country towns of Massachusetts is quite startling. The same may be said of Connecticut, New Hampshire and Vermont. Railroads and factories have changed the ancient order of things. The population of the hills has slid into the valleys, and with it the wealth also. Farms can now be bought for less than what the buildings are worth, and several farms are often merged into one, and briars and brambles spring up where once was the garden and the rose. Rev. Dr. Gale, of Lee, in a recent sermon, drew a gloomy picture of this decrease of population in the hill towns of Berkshire county. He stated that four towns contain half the population and half the wealth of that county. Of the remaining twenty-seven towns, fourteen have less than a thousand inhabitants. There are thirty-three Congregational churches in the county, and only fourteen settled pastors. Five of these churches have no regular service, and fourteen hire clergymen for a stated time. In 1829 there were twenty-six Congregational churches, and twenty-three pastors. The membership in these churches has increased only thirty-four in the last forty years, being four thousand five hundred and forty-four in 1829, and four thousand five hundred and seventy-eight in 1869. In ten of the churches the membership is less than fifty each, and in these ten churches the number of male members averages only ten. In most of these mountain towns were once large churches, and the sanctuaries on the Sabbath were filled with devout worshippers. Now, in some five places, the people have forsaken assembling themselves together on the Sabbath, and in many towns the ministers preach to a very lean congregation. We can add our testimony to that of Dr. Gale, and apply the same to other counties in western Massachusetts. In the last four years we have traveled thousands of miles among the hill and mountain towns, treading their back roads and by-ways, wherever the remnant of a once prosperous population lingers. One is surprised at the indication of decay witnessed at almost every mile. For long distances there are no human habitations. You pass the wreck of once elegant mansions, or the foundations where they stood. Others are crumbling back to dust, the elements covering hardly keeping the structure from reaching the inmates within. There are scraggy remnants of large and once fruitful orchards, now moss-grown and choked with underbrush. Occasionally, at the cross roads, may be seen a dilapidated school house, long since deserted by children and teacher, and oftentimes we have traveled a half a day without seeing a solitary human being, except as we entered a dwelling. A thickly tenanted, but sadly neglected burial place, here and there, is evidence that there once dwelt among the hills and mountains a more numerous population.

These signs of destruction and decay suggest an inquiry as to the cause, and the answer comes in the conclusion that they have been brought about by extravagance and fashion. It has become the fashion to have fewer children, and the farmer who once raised a dozen boys, who helped carry on the farm prosperously, is succeeded by another who hires his help, outdoor and in, and finds at the end of the year that he has scarcely saved enough to pay his employees. If he has one or two sons or daughters, they cannot be content with humble fare at home, but must ape the fashions of the city or village, and force the "old folks at home" into more style in living than they can afford. The result is soon reached. The farm runs down and is ultimately sold, the proprietor moving away to seek his fortune where money is easier to be got, and his family can move in more fashionable society. Dr. Allen, of Lowell, has shown by reliable statistics that the Yankee race of New England is running out, and the reasons for it are those we have given above. Extravagance and fashion are exterminators more potent than all the "ills that flesh is heir to." Unless a reform is commenced in this regard, the hill and mountain towns of this and other States will soon become a wilderness. Every year they decrease in population and valuation, and every succeeding generation will have a frailier hold upon life. While all are urging reforms of other kinds, what

a pity it is we cannot reform the fashions and habits of our men and women, wherein lies the only hope of a perpetuation of our name and race.—Palmer (Mass.) Journal.

HYPOCRISY.

A paper called the *Advocate of Peace*, published in Boston, has been returned by us two or three times for its bald hypocrisy in pretending to be an organ of universal peace, an enemy to war—and yet justifying the war made on the South, and glorying in its peaceful results. Our friend of the *Christian Neighbor* is puzzled by the attitude of such a collaborer in the cause of peace, and holds that the peace arguments, which the *Advocate* advances, become very good war arguments for the other side. Being puzzled by the palpable absurdity of the Boston promoter of peace, he says:

"In indorsement of 'the military'—'beautiful to behold'—as exemplified in the 'glorious' achievements of General Sherman, and as uttered by the said general himself 'at the Centennial Celebration at Dartmouth College,' the *Advocate of Peace*, Boston, Massachusetts, after printing the utterances of this war-pence oracle, thus speaks:

"This exposition of a soldier's duties just makes him merely an assistant of the government in executing its laws; a special police under military organization and drill, to enable it in extreme cases to maintain its authority and preserve the public peace and order. If an army meant only this, few peace men would object to it; and when all armies shall become only such conservators of law and lawful authority, nothing more than an armed police at home, all wars will in fact be brought to an end, and little, if anything, be left of the war system except the name. Such was the position taken by our government in putting down our late rebellion. It professed to attempt nothing more than a due and indispensable execution of our laws against their wholesale violation by rebels; in principle as truly an enforcement of law as would be the suppression of a mob or the arrest and condign punishment of a burglar or a pirate. Sooner or later all armies will melt away into a forcible but peaceful police."

Here we have a type of peace doctrine which any one can embrace, even a "burglar or pirate," provided it is supported by "authority," and is directed against "rebels," i. e., those who decline such terms of peace, and in like repudiation of Christianity choose terms of peace according to their judgment. As the *Advocate* stands by General Sherman and preaches peace according to the law of the military as expounded by General Sherman on that side, so might we stand by General Lee and preach peace according to the military and General Lee on the other side. We could say the Southern people attempted "nothing more than a due and indispensable" defense of their rights against their wholesale violation by tyrants; "in principle as truly" resistance against oppression as would be resistance against "a mob," "a burglar or pirate."

We confess to the need of light or of ability to comprehend it. Brother *Advocate*, we believe you will not shoot at us, but please shine on the subject—not with the flashings of Mr. Sherman's gunpowder or the blazes of burning dwellings, but with the light of Christian truth.—*Southern Christian Advocate*.

THE NEXT RICE CROP.—The rice plantations are now preparing for the next crop. The hopes previously entertained of a large increase in the area of land devoted to the cultivation of this cereal, we are sorry to say, will not be realized. A deficiency of labor is one great impediment, and the planters are not well satisfied with the prices obtained. However, the better grades have, during the whole season, been in request and brought remunerative prices. The remedy, it seems to us, should be in improving the quality, by paying more attention to the seed and the threshing and dressing. At seven and eight cents for choice rice its production cannot but be remunerative. As much as the quality of Louisiana rice has been improved, there is still room for a further advance. We have seen the first year's growth from Carolina choice seed, that could not be surpassed for color, size and quality of the grain; in fact, a lot of this kind was sold in this market for prime Carolina rice and shipped as such. The incoming crop will be about

what we previously estimated it at; that is to say, 100,000 barrels clear. The total receipts here since the first of September to date are 47,298 barrels and sacks, against 33,131 for the same period last year, showing an excess of 14,166 barrels and sacks, or 43 per cent. The next crop, with a fair season, will be about 100,000 barrels, of 200 pounds each, or perhaps a little more.—*Picayune*.

General Conference Daily Christian Advocate.

A daily paper, to be styled the *General Conference Daily Christian Advocate*, will be published in the city of Memphis, Tennessee, during the session of the approaching General Conference. Arrangements have been made with the office of the Memphis and Arkansas *Christian Advocate* for its publication.

No previous session of the General Conference of the Methodist Episcopal Church South has been invested with so much importance as the one to be held in Memphis, commencing May 4, and to none has the church looked with more anxious interest.

In order to place the daily in the hands of all who desire to keep fully and promptly advised of the proceedings of the General Conference, we offer it at the exceedingly low price of \$1 per copy.

Any preacher or other person who may send us ten subscribers shall receive an extra copy free.

Subscriptions and money may be sent to the editors of our church papers.

All the traveling and local preachers of the church are our agents.

We request the subscriptions to be sent as early as possible.

A. H. REDFORD, Agent.

ROMISH INFALLIBILITY.

The *Pall Mall Gazette*, one of the ablest London journals, puts the case adroitly but candidly. It says:

"The whole process of arriving in this way at dogmatic truth, viewed with profane eyes, is one strangely humiliating to the human understanding. So much the better, most of those who partake in it would probably declare. We all know what 'universal suffrage' majorities are; how composed, how led, how packed, how manipulated. We submit to their decisions in practical life because we cannot help it; and we prefer, on the whole, this way of governing human affairs, because in truth human affairs are the affairs of the majority itself, and because we have as yet found out no way of inducing that majority to defer to the best judgments. But we never dream of regulating our opinions by those decisions. Mr. Gladstone's majority has disestablished the Irish Church. No one on that account thinks, or deems himself bound to maintain that disestablishment was right, unless he was of that opinion before. These seem trivial truisms, but they have their force when applied by comparison to the pretensions of a council in matters of faith. No matter how small in number, how weak in argument, how contemptible individually, a bare majority—a majority of one—has the power to lay down, not what men must do or avoid, but what they must believe on pain of eternal perdition. And this because—far from us being thought of as wanton irreverence in writing down words of such terrible import—the voice of this ignorant, weak, fanatical majority is that of the Holy Spirit. We may not, without stepping beyond our province, pursue the subject further. But what concerns us at this moment is the triumphant retort (as to us it seems) of the Ultramontane to the Liberal. You, he has a right to say, believe of councils just what I do; nay, more, for you would confine infallibility to them; well, then, be consistent. Oppose the adoption of the tenet to which you object as long as you fairly can; speak against it, vote against it; but when outvoted, outmaneuvered, jockeyed, met with ill talk or contemptuous silence, submit at last; for on your own principles this is the voice of God."

HAPPINESS consists in being perfectly satisfied with what we have got and with what we haven't got.

TROUBLES are like babies—they grow bigger by nursing.

The Christian Advocate.

SATURDAY, FEBRUARY 26, 1870.

SONG OF THE WIND.

BY JOHN K. STAYMAN.

I am lord of the realm of the air;
Many a palace of cloud I own;
Gold and purple and azure, there,
An' round about my throne.

Shrill are the whistling pipes I blow;
Rain is the patter of my feet;
Wrapped in a fleecy robe of snow,
I glide o'er lee and sheet.

Crawled within the floweret's cup,
Slipping the odor of drops I lie,
While, to the swaying down and up,
The moments swiftly fly.

Here, on the streamlet's breast, I rock.
The lazy lilies and flags asleep;
There, I dash with a timber-shock
Across the billowy deep.

May is out: I open the buds,
And I snow the sword with blossoms white;
'Tis November: I strew the woods
With autumn's leafy blight.

Now the darkening fog I drift,
Blowing the blindness whither I list;
Now from the upland slope I lift
The trailing skirts of mist.

Now I scatter the welcome rain,
Giving the cloudy clusters out;
Now, athirst, I shrivel the plain
And drink the water-spout.

Now I wander among the leaves,
Far in the gloom of the woods; and now
Fill the sails of the ship that cleaves
The sea with arrowy prow.

Hush! the gossamer safely swings,
Though it is beaded thick with dew;
Hark! I snap the silvery strings
Of cord and cable in two.

From the cliff, by the mountain glen,
Over I topple the rocks that frown;
Well may the valleys tremble when
The avalanche comes down.

In the desert I whirl the sand,
Round and round to a merry tune;
I catch the caravan in my hand,
And breathe the hot Simoon.

Look! I hutter each garden shoot,
Daintily kissing the white and red;
Look, the forest is out by the root,
For the hurricane hath sped.

Will, on the polar main I rave,
Crunching the jagged crags of ice;
Softly I ripple the seas that lave
The tropic isles of spice.

When the branch of the pine I shake,
Mournfully Arctur' doth complain;
When I rush by the reedy brake,
Pan plays his pipes again.

Close by the lattice I whisper low,
Where the happy lovers are met;
Round the howling gables I go,
When the night is dark and wet.

Thus I travel over the world,
Now in the blue, and now on the green;
The oak is crashed and the cloud is curled,
But I am all unseen.

CHINESE IMMIGRATION.—NO. I.

ABINGDON, VA., Dec. 27, 1869.

REV. C. K. MARSHALL, D. D.—Dear Brother: Circumstances which I could not control, and which need not here be stated, have prevented an earlier response to your request. It is with much diffidence that I now undertake to answer your question: "What are your views on the subject of Chinese immigration?" I answer promptly, I am opposed to it, and shall proceed briefly to give my reasons for opposing it.

No thoughtful Christian can contemplate our present social and religious condition as a people, to say nothing of our political disorders, with feelings other than those of profound anxiety. The radical tendency of the times is demoralizing everything. The foundations of society are shaking; and institutions we once thought as permanent as the everlasting hills show signs of approaching dissolution. Nothing seems active but evil. The conservative forces, which in better days held society together, were fearfully weakened by the recent war; and latent causes of danger to our national peace and prosperity developed subsequently by an unfortunate administration of partisan power. The restless elements of an aggressive fanaticism still live and foment the sectional animosities which have already wellnigh wrought our ruin.

The rapid increase of infidelity, under the various disguises of social and political reform which it has recently assumed; the undisguised worldliness of some churches; the secular tendencies of the pulpit; the increase of ritualism, and consequent decay of true religion; the increase of intemperance and kindred vices throughout the land, furnish cause of serious alarm to every good man. We seem to be in a transition state. Utopian and

agrarian schemes, as wild and impracticable as ever fermented in the brain of fanatic, are patronized by leading men in Church and State. An insane attempt to confound all pre-existing distinctions among men—to tear down the whole fabric of society, and reconstruct it upon a new model—threatens now to become the mania of our times.

To increase the danger of our situation, Europe is disgorging her surplus thousands upon our shores. These bring with them crude notions of government—peculiar national prejudices—religious creeds of all phases, and many with no creed at all. They find our government, with no religion—tolerating all kinds and patronizing none. They see Christian churches, Jewish synagogues, Mormon and Buddhist temples under the same general toleration, and naturally infer that one kind of religion is considered in this country about as good as another. The moral forces that govern society thus weakened and divided, what is to mold this heterogeneous mass of foreign material into a homogeneous national character?

To all these diverse elements of social and religious life among us must be added three millions of Africans, as tropical in nature as the monkey or coconut, and as distinct in elementary character from the Anglo-Saxon as their relatives in Ashango land. Centuries of domestication in the home of the white man, under the direct influences of our Christian civilization, has done much to elevate them; but the negro is still an alien—he is "a stranger in a strange land" among us.

Now, sir, it does seem to me unwise and perilous to introduce, just at this critical period in our national history, another alien race, especially when we consider that the race to be introduced is an Asiatic—one entirely dissimilar, in all respects in which races can differ, from those already struggling for place and position in our country. The Chinaman is an alien in every sense of the term. He is ignorant of our language, customs, manners, politics and religion. The feelings of dislike which the people of California have exhibited toward the Chinese are the result of national and race peculiarities as radical as the color of their skin. They hate us, and we hate them, when brought in social contact. The antipathy is, I think, much stronger than that existing between the white man and negro, for it is not only a race instinct, but a violent antagonism in religious creed, social customs, domestic habits, and morals. Is not our national population now seething like the witches' caldron? Have we not already among us enough

"Black spirits and white,
Red spirits and gray?"

This, sir, is my first reason for opposing Chinese immigration to this country. We are not in a condition to take into our troubled bosom the pagan hordes of China. We have had trouble enough, in all conscience, with our alien race to make us cautious, and slow to introduce another.

This letter is long enough. I will therefore close it, and resume the subject in another.

Yours truly,
W. G. E. CUNNINGHAM.

THERE is a deep meaning in the apostle's words: "We love him because he first loved us," for it is the tendency of love to beget love; and if any truth could, by its own proper influence, originate spiritual life in a sinful soul, it would be the truth so often repeated in the New Testament, that Christ suffered for our sins, the just for the unjust, to bring us to God; for this truth presents the highest instance, the crowning manifestation of divine love to men.

If there were no trials to endure the grace of God would be quiescent, and like a standing army in time of peace.

A man is a fool if he be enraged with any ill that he cannot remedy, or if he endures one that he can.

SLANDER kills threefold—him that utters, him that is attacked, and him that hearkens.

FUNDAMENTAL ARTICLES.

—OR—
CONSTITUTION OF AN AMERICAN INDEPENDENT CATHOLIC CHURCH.

1. It is forbidden to any American Catholic congregation to obey or recognize any foreign ecclesiastical authority.

2. In every province there will be established a superior ecclesiastical court, to settle the differences between the bishops and their subordinates in religious matters.

3. The judges of this superior ecclesiastical court shall be elected in the synod of each diocese, for the period of four years, from among the priests who have had not less than ten years of ministry. Each diocese of the ecclesiastical province will have its own delegates, who, while in office, will be supported by their respective dioceses, and be independent of their own bishop.

4. Immediately after their election the same delegates will swear, before the synod, that they will administer justice according to the laws of the Catholic Church, without exception to rank or dignity.

5. Every year, at an appointed time, the parish priest, with a lay member of his congregation, appointed to that effect by the majority of said congregation, will assist at the diocesan synod, and give an account of the state of his church.

6. This synod will elect a private council for the administration of the diocese properties. The members, half clergymen and half laymen, will form a corporate body—own the properties of the diocese, have the deeds of the said properties in their names, receive the Propagation of the Faith money, and attend to the wants of the seminaries, asylums, schools, poor congregations, etc.

7. In every parish, on every first Sunday of January, every member of the congregation being a Catholic will proceed to the vestry, and elect not less than three and not more than six trustees, who will form a corporate body for the management of the parish funds. All the properties of the said parish will be in their names. The parish priest will be, while in office, the chairman by right of the said committee.

8. The bishop, or his delegate, will *de jure* preside over every synod or committee of any kind, either in his episcopal city or through the whole diocese.

9. The bishop and his priests will have an appointed salary. The bishop's salary will be not less than \$2,000 and not more than \$4,000 per annum. A parish priest's emoluments will never be less than \$600 and never more than \$1,500. Of course the perquisites, or the *stolar stipendium*, are not included. A curate boarding with his parish priest will receive from \$200 to \$600.

10. The balance over and above all the expenditures left in the hands of the parish treasurer will be forwarded to the diocesan fund committee, to be appropriated *pro rata* to the general good of the diocese.

11. Every ecclesiastical property purchased by public money, as taxes, subscriptions, gifts, etc., will be made over to the trustees of the parish, or to the diocesan council, as the case may be.

12. Every religious order will be independent and free in the management of their properties; but in religious affairs they will be submitted entirely to the bishop's authority, or, in case of conflict, to the "officiality" or supreme court of the province, whose judgment will be final.

13. Whereas an unobserved law is more for evil than for good, and whereas no Christian church can presume to err in following the footsteps of the primitive church, the clerical edifice and the auricular confession, though good and excellent in themselves, are, however, no more obligatory, having been, and being still, alas! too often the occasions of danger, corruption and scandal.

14. All the ceremonies of the Catholic Church of this present time are to be kept as they are.

15. At the principal festivals of the year the priest will invite his parishioners to the reception of the

sacraments, by a sincere contrition for their sins. He will exhort them to confess them to God, and will give a general absolution from the altar, according to the ancient formula of the Catholic Missal.

16. Nobody will be allowed to make vows of any kind before eighteen years of age for women, and twenty-five for men. These vows will be preceded by at least one year (*sine interruptione*) of novitiate, and made for the lapse of five years only, when they may be renewed or not, *ad libitum*.

17. Whereas every faithful minister of the church must be provided for in his old age or in case of infirmities, the diocesan fund committee will set aside yearly certain sums on the clergy's salary for the support of poor or infirm priests. The religious will not be exempted, as the diocese in many instances must provide for and support priests who have left religious orders after having spent their whole lives in monasteries or convents.

18. To that effect, then, the diocesan fund committee will set aside yearly, on the bishop's salary, \$30; on the parish priest's, \$15, and on the curate's, \$5.

19. It is strongly recommended to the American Catholics to harmonize, as much as possible, with all Christian denominations, but in particular with the Catholics of the old rite, and the members of the Episcopal Church. They should keep in mind that they are, with these two last denominations, all brothers and members of the same spiritual body, and that, in spite of a few insignificant rites, they should be all bound in the same charity, according to St. Augustine's remarkable words: *In dubus libertas; in omnibus caritas*.

20. All elections will be made by ballot; and, the church trustees excepted, all others must be carried by an absolute majority of the votes.

21. As soon as it will be known that the episcopal see is vacant, either by death, resignation, dismissal or otherwise, the vicar general of the diocese will give notice to every parish priest, and call to the cathedral all the members of the diocesan synod, both lay and clerical, to proceed to elect a new bishop.

22. The election will take place in the cathedral after a solemn high mass, all the electors being requested to be present.

23. No one will be eligible if he has not been an active priest in the same diocese for a period of not less than ten years.

24. The new bishop elect will be proclaimed to the clergy and the people by the president of the synod. Immediately after the choir will sing the *Te Deum*, and the ceremony will be closed by the benediction of the blessed sacrament.

25. An immediate notice will be given of the result to the other bishops of the province, and especially to the archbishop.

26. In the space of a month the bishop elect will go to his metropolitan bishop, or, if he is himself elected for the metropolitan church, to the oldest bishop of the province, with the legal document of his election, and will ask for his canonical letters.

27. The metropolitan or the oldest bishop will be at faculty to examine the bishop elect, in the presence of his council, upon his doctrine and morals. If the examination proves to be satisfactory he will grant him his canonical institution; if not, he will give him in writing the reasons of his refusal, and in this case the "officiality" or the supreme court of the province will give a final decision on the matter.

28. The metropolitan or the oldest bishop will not compel the new bishop to take any other oath than that he will conform himself strictly and faithfully to the laws of the Catholic Church.

29. Neither will he ask for the pope's bull to confirm his election; but, in conformity to the discipline of the ten first centuries of our church, he will notify him of his election as the patriarch of the Occidental Church and the *Præsumptus* of its episcopacy.

30. The bishop's consecration will

always take place in his own cathedral, and be presided over by the metropolitan, or, in his absence, by the oldest bishop of the province, assisted by two other suffragants, during the parochial mass, and in presence of the people and clergy.

31. Before the ceremonies of the consecration the bishop elect will, in presence of the clergy, faithfully and solemnly swear to watch carefully over the spiritual welfare of his diocese, and to follow and obey explicitly the laws of the Catholic Church.

32. The bishop will be allowed to choose his own vicar general from among the priests of his diocese who have been at least ten years in the ministry. But he will not be allowed afterward to revoke him of his own private authority without the consent of the same vicar, or, in case of conflict, without canonical causes, judged such by the absolute majority of the diocesan synod.

33. The election of a parish priest, for any vacant mission or parish, will take place in the same manner.

34. As soon as the dean of the county or ecclesiastical district shall be informed of the vacancy of a parish or mission in the limits of his jurisdiction, he will, in the space of a month, call the electors of the said county or ecclesiastical district to fill up such vacancy by election.

35. Every parish priest's election will take place separately for every vacant parish or mission.

36. Each elector, before dropping his vote into the ballot-box, will swear that in his choice he is not actuated either by presents, promises, solicitations, temporal personal motives or threats.

37. Every parish priest's election will take place on Sunday, in the church of the chief town of the said county or ecclesiastical district, after a solemn high mass, at which all the electors will assist.

38. The new parish priest's election will be made known to the people and clergy immediately after the election, and the ceremonies will be closed by the *Te Deum* and the benediction of the blessed sacrament.

39. To be eligible to a donary it will be necessary to have been parish priest at least five years; and, to an ordinary parish, two years in the diocese.

40. In the space of a month the parish priest elect will go to the bishop of the diocese with the legal documents of his election, and ask for his canonical letters.

41. The bishop will be at faculty to examine the parish priest elect, in the presence of his council, upon his doctrine and morals. If he finds him competent, and worthy of his new parish, he will grant him his canonical letters; if not, he will give him in writing the motives of his refusal, and in this case the "officiality" or supreme ecclesiastical court of the province will settle the matter by a final decision.

42. Before granting him his canonical letters the bishop will exact no other oath from the parish priest elect than that he is a Catholic, and will administer his parish in conformity with the laws of the Catholic Church.

43. The installation of a new parish priest will take place on Sunday, before the clergy and the people, in his own church. But before the ceremonies he will take the same oath as the bishop before his consecration. Until such oath shall be taken his acts as parish priest in the said parish will be null and void; and until then, for him as well as for the bishop, the diocesan see or the parish will be reputed vacant.

44. During the vacancy of an episcopal see the vicar general will exercise the episcopal jurisdiction, except in the cases requiring the episcopal character; but in everything else he will act according to his own conscience, always, however, guided by his council's advice.

45. Every parish priest will have the right to choose his own curate; but his choice can only take place among the priests ordained or received by the bishop of the diocese.

46. No parish priest will be allowed to revoke or suspend his curate on his private authority, without

just canonical causes, judged and found such by the diocesan synod.

47. No bishop will be allowed to silence or remove any parish priest from his parish or mission without good canonical causes, judged and found such by the diocesan synod, or, in a case of conflict, by the supreme ecclesiastical court of the province.

48. This "officiality" or supreme ecclesiastical court of the province will *de jure* be presided over by the metropolitan, or another bishop *ad hoc* appointed to take his place.

49. It is expressly recommended to the bishops to be very careful in receiving clergymen from other dioceses. They may receive them for a time on their own authority; but the final admission of the said priests into the clerical body of the diocese will take place only when ratified by an absolute majority of the votes of the diocesan synod.

50. No parish priest will be allowed to make unusual public prayers in his church without his bishop's consent.

51. Clergymen will use, in the religious ceremonies, the vestments of their order and their rank. No one will be allowed to assume the color and the distinctive marks of the bishop.

52. All clergymen will be dressed in a plain black suit of clothes, and will wear a white clerical collar. The bishops will have, moreover, the episcopal ring and the pectoral cross as a sign of their dignity.

53. No religious order will be allowed to have a public church or chapel if the superior is not regularly appointed parish priest of a determined parish; and in this case he will be subject to the general regulations affecting the secular priests.

Girls Should Learn to Keep House.

No young lady can be too well instructed in anything which will affect the comfort of a family. Whatever position in society she occupies, she needs a practical knowledge of household duties. She may be placed in such circumstances that it will not be necessary for her to perform much domestic labor; but on this account she needs no less knowledge than if she were obliged to preside personally over the cooking-stove and pantry. Indeed, I have thought it more difficult to direct others, requiring more experience, than to do the same work with our own hands.

Mothers are frequently so particular that they do not like to give up any part of the care to their children. This is a great mistake in their management, for they are often burdened with labor and need relief. Children should be taught to make themselves useful—to assist their parents in every way in their power, and to consider it a privilege to do so.

Young people cannot realize the importance of a thorough knowledge of housewifery; but those who have suffered the inconvenience and mortification of ignorance can well appreciate it. Children should be early indulged in their disposition to make, and experiment in various ways. It is often but a troublesome help that they afford; still it is a great advantage to them. I know a little girl who, at nine years old, made a loaf of bread every week during the winter. Her mother taught her how much yeast, salt and flour to use, and she became an expert baker. Whenever she is disposed to try her skill in making simple cakes or pies she is permitted to do so. She is thus, while amusing herself, learning an important lesson. Her mother calls her her little housekeeper, and often permits her to get what is necessary for the table. She hangs the keys by her side, and very musical is the jingling to her ears. I think before she is out of her teens, upon which she has not yet entered, that she will have some idea how to cook.

Some mothers give their daughters the care of housekeeping each week by turns. It seems to me a good arrangement, and a most useful part of their education. Domestic labor is by no means incompatible with the highest degree of refinement and mental culture. Many of the most elegant and accomplished women I have known have looked well to their household duties, and have honored themselves and their husbands by so doing.

Economy, taste in cooking, and neatness of the kitchen have a great deal to do in making life happy and prosperous. The charm of good housekeeping is in order, economy and taste displayed in attention to little things; and these things have a wonderful influence. A dirty kitchen and bad cooking have driven many a one from home to seek comfort and happiness somewhere else. None of our excellent girls are fit to be married until they are thoroughly educated in the deep and profound mysteries of the kitchen. *Presbyterian.*

SATURDAY, FEBRUARY 26, 1870.

FATHER TOM AND THE POPE,
OR A NIGHT AT THE VATICAN.

CHAPTER IV.

HOW FATHER TOM AND HIS HOLINESS DISPUTED AT METAPHYSICS AND ALGEBRA.

Good luck be with the time when I went to the classical seminary of Firdammore! when I'd bring my sod o' turf under my arm, and sit down on my shing boss o' straw, wid my back to the mather and my shins to the fire, and score my snm in Dive's denotations of the double rule o' three, or play fox and geese wid purty Jane Cruise that sat next me, as pleasantly as the day was long, widout any one so much as saying, "Mikey Heffernan, what's that you're about?"—for ever since I was in the one lodge wid poor old Mat I had my own way in, in his school as free as ever I had in my mother's sholeen.

Good luck be with them days, I say again, for it's althered times wid me. I judge, since I got andher Carlisle and Whateley. Such strictness! such order! such drilling and lecturing and tutoring as they do get on wid! I wish to gracious the one-half o' their rules and regulations was snuk in the say. And they're getting so strict too about having fair play for the heretic childer! We've to have no more schools in the chapels, nor masses in the schools. Oh, by this and by that it'll never do at all.

The onl' plan was twenty times better; and, for my own part, if it wasn't that the clergy supports them in a manner, and the grant's a thing not easily done widout these hard times I'd see if I couldn't get a sheltered spot nigh hand the chapel, and set up again on the good old principle; and faix I think our metropolitan 'ud stand to me, for I know that his grace's motto was ever and always that: "Ignorance is the mother o' piety."

But I'm running away from my narrait' entirely, so I am. "You'll please to outher up the house-keeper, then," says Father Tom to the pope, "wid a pint o' sweet milk in a skillet, and the bulk o' her fist o' butter, along wid a dust o' sugar in a saucer, and I'll show you the way of producing a decoction that, I'll be bound, will hunt the thirst out o' every nook and corner in your holiness's blessed caridge."

The pope ordered up the ingredients, and they were brought in by the head butler.

"That'll not do at all," says his riv'ence, "the ingredients won't combine in due proportion unless ye do as I bid ye. Send up the house-keeper," says he, "for a female hand is indispensably necessary to produce the adaptation of the parties, and the concurrence of the corners, without which you might boil till morning and never fetch the cruds o' it."

Well, the pope whistled to his head butler, and by and by up there comes a old fagot of a *Chullean*, that was enough to frighten a horse from his oats.

"Don't thry for to deceive me," says his riv'ence, "for it's no use, I tell ye. Send up the house-keeper, I bid ye; I see her preserving gooseberries in the pantry as I came in; she has eyes as black as a shoe," says he, "and cheeks like the rose in June; andorra taste of this celestial mixthie shall cross the lips o' man or mortal this blessed night till she stirs the same up wid her own delicate little finger."

"Misther Maguire," says the pope, "it's very improper o' you to spake that way o' my house-keeper; I won't allow it, sir."

"Honor bright, your holiness," says his riv'ence, laying his hand on his heart.

"Oh, by this and by that, Misther Maguire," says the pope, "I'll have none o' your insinuations; I don't care who sees my whole household," says he, "I don't care if all the faymales under yur roof was puraded down the High street o' Room," says he.

"Oh, it's plain to be seen how little you care who sees them," says his riv'ence. "You're afeard, now, if I was to see your house-keeper that I'd say she was too handsome."

"No, I'm not!" says the pope; "I don't care who sees her," says he. "Anthony," says he to the head butler, "bid Eliza throw her apron over her head, and come up here."

Wasn't that stont in the blessed room? Well, my dear, up she came, stepping like a three-year old, and blushing like the brake o' day; for though her apron was thrown over her head, as she came forward, till you could barely see the tip o' her chin—more be token there was a lovely dimple in it, as I've been told—yet she let it sidlip abut to one side, by chance like, just as she got forrest the fire, and if she wouldn't have given his riv'ence a shot if he hadn't been a priest, it's no matter.

"Now, my dear," says he, "you must take that skillet and hold it over the fire till the milk comes to a blood hote; and the way you'll

know that will be by stirring it onet or twice wid the little finger o' your right hand, afore you put in the butter; not that I misdoubt," says he, "but that the same finger's fairer nor the whitest milk that ever came from the tit."

"None o' your deludhering talk to the young woman, sir," says the pope, mighty stern. "Stir the pot-est as he bids you, Eliza, and then be off wid yourself," says he.

"I beg your holiness' pardon ten thousand times," says his riv'ence. "I'm sure I meant nothing improper; I hope I'm incapable o' any such dirilection o' my duty," says he. "But, marcell man!" he cried out, jumping up on a sudden, "look behind you, your holiness—I'm blessed but the room's on fire!"

"Sure enough the candle fell down that minit, and was near setting fire to the windy curtains, and there was some binstle, as you may suppose, getting things put to rights. And now I have to tell you o' a really unpleasant occurrence. If I was a Prodesan that was in it, I'd say that while the pope's back was turned, Father Tom made free wid the two lips of Miss Eliza; but, upon my conscience, I believe that it was a mere mistake that his holiness fell into on account o' his being an old man and not having either his eyesight or his hearing very perfect. At any rate it can't be denied, but that he had a strong impression that such was the case; for he wheeled about as quick as thought, just as his riv'ence was sitting down, and charged him with the offence plain and plump. "I sit kissing my house-keeper before my face you are, you villain!" says he. "Go down out o' this," says he to Miss Eliza, "and do you be packing off wid you," he says to Father Tom, "for it's not safe, so it isn't, to have the likes o' you in a house where there's temptation in your way."

"Is it me?" says his riv'ence: "why, what would your holiness be at, at all? Sure I wasn't doing no such thing."

"Would you have me doubt the evidence o' my senses?" says the pope; "would you have me doubt the testimony o' my eyes and ears?" says he.

"Indeed I would so," says his riv'ence, "if they pretend to have informed your holiness o' any such foolishness."

"Why," says the pope, "I've seen you after kissing Eliza as plain as I see the nose on your face; I heard the smack you gave her as plain as ever I heard thunder."

"And how do you know whether you see the nose on my face or not?" says his riv'ence, "and how do you know whether what you thought was thunder, was thunder at all? Them operations on the senses," says he, "comprises only particular corporal emotions, connected with certain confused perceptions called sensations, and isn't to be depended upon at all. If we were to follow them blind guides we might just as well turn heretics at onet. Pon my secret word, your holiness, it's neither charitable nor orthodox o' you to set up the testimony o' your eyes and ears agin the character o' a clergyman. And, now, see how aisy it is to explain all them phynomena that perplexed you. I ris and went over beside the young woman, because the skillet was boiling over, to help her to save the drop o' liquor that was in it; and as for the noise you heard, my dear man, it was neither more nor less nor myself drawing the cork out o' this blessed bottle."

"Don't offer to thrash that upon me!" says the pope; "here's the cork in the bottle still, as tight as a wedge."

"I beg your pardon," says his riv'ence, "that's not the cork at all," says he. "I drew the cork a good two minits ago, and it's very partly spitted on the end o' this blessed corkscrew at this present moment; howadiver you can't see it, because it's only it's real prisence that's in it. But that appearance that you call a cork," says he, "is nothing but the outward species and external qualities of the cortical nuthur. Them's nothing but the accidents of the cork that you're looking at and handling; but, as I told you afore, the real cork's drew, and is here prisent on the end of this mate little instrument, and it was the noise I made in drawing it, and nothing else, that you mistook for the sound o' the *pogue*."

"You know there was no contravention what he said; and the pope couldn't openly deny it. Howadiver he tried to pick a hole in this way. "Granting," says he, "that there is the differ you say betwixt the reality o' the cork and these cortical accidents; and that it's quite possible, as you allidge, that the thure cork is really prisent on the end o' the screw, while the accidents keep the mouth o' the bottle stopped—still," says he, "I can't understand, though willing to acquit you, how the drawing o' the real cork, that's palpable and widout accidents, could produce the accident of that simple explosion I heard just now."

"All I can say," says his riv'ence, "is that it was a rare accident, any how."

"Ay," says the pope, "the kiss you gev Eliza, you mane."

"No," says his riv'ence, "but the report I made."

"I don't doubt you," says the pope.

"No cork could be drew with less noise," says his riv'ence.

"It would be hard for anything to be less nor nothing, having algebra," says the pope.

"I can prove to the contrary," says his riv'ence. "This glass o' whisky is less nor that tumbler o' punch, and that tumbler o' punch is nothing to this jug o' *scotch*."

"Do you judge by superficial misure or by the liquid contents?" says the pope.

"Don't stop me, betwixt my premises and my conclusion," says his riv'ence; "Ergo, this glass o' whisky is less nor nothing; and for that reason I see no harm in life in adding it to the contents o' the same jug, just by way o' a frost-nail."

"Adding what's less nor nothing," says the pope, "is subtraction according to algebra, so here goes to make the rule good," says he, filling his tumbler wid the blessed stuff, and sitting down again at the table, for the anger didn't stay two minits on him, the good-hearted ould sawl.

"Two minuses make one plus," says his riv'ence, as ready as you please, "and that'll account for the increased dayverment I mane to take the liberty of producing in the same mixed quantity," says he, following his holiness' epistolical example.

"By all that's good," says the pope, "that's the best stuff I ever tasted; you call it a mixed quantity, but I say it's prime."

"Since it's o' the first order, then," says his riv'ence, "we'll have the less defecibility in reducing it to a simple equation."

"You'll have no fractions at my side anyhow," says the pope. "Faix, I'm afeard," says he, "it's only too aisy o' solution our sum is like to be."

"Never fear for that," says his riv'ence, "I've a good stick o' surds here in the bottle; for I tell you it will take us a long time to extrinet the root o' it, at the rate we're going on."

"What makes you call the blessed quart an irrational quantity?" says the pope.

"Because it's too much for one and too little for two," says his riv'ence.

"Clear it o' its coefficient, and we'll thry," says the pope.

"Hand me over the exponent, then," says his riv'ence.

"What's that?" says the pope.

"The schrew, to be sure," says his riv'ence.

"What for?" says the pope.

"To draw the cork," says his riv'ence.

"Sure the cork's drew," says the pope.

"But the sperits can't get out on account o' the accidents that's stuck in the neck o' the bottle," says his riv'ence.

"Accident ought to be passable to spirit," says the pope, "and that makes me suspect that the reality o' the cork's in it after all."

"That's a barony-misde," says his riv'ence, "and I'm not bound to answer it. But the fact is that it's the accidents o' the sperits, too, that's in it, and the reality's passed out through the cortical species as you say; for, you may have observed, we've both been in real good sperits ever since the cork was drawn, and where else would the real spirit come from if they wouldn't come out o' the bottle?"

"Well, then," says the pope, "since we've got the reality there's no use troubling ourselves wid the accidents."

"Oh, bedad," says his riv'ence, "the accidents is very essential too; for a man may be in the best o' good sperits, as far as his immaterial part goes, and yet need the accidental qualities o' good liquor to hunt the sensible thirst out o' him."

So he draws the cork in earnest, and sets about brewing the other skillet o' *scotch*; but, faix, he had to get up the ingredients this time by the hands o' ould Moley; though never a taste o' her little finger he'd let widin a yard o' the same coction.

It is claimed that the recent experiments by French mechanists have shown that continued steady hydraulic pressure in welding causes complete union of two masses of iron, while the junction is only superficial if produced by the hammer. Among other experiments, two iron bars, one and a half inches in diameter, were heated to the welding point, and brought under the hydraulic press. The welding was effected with extraordinary quickness, the fibres of the iron being thoroughly interrelated with each other, and the joined portion of the bars was quite as strong as anywhere else, a microscopic section of the joint showing a perfectly homogeneous texture.

WAYLAND'S MORAL SCIENCE.

There is not, in the work of Dr. Wayland, a single "definite result," or clear and correct view, which may not be found in the writings of preceding moralists. So far, he is, indeed, from having introduced an era of light into the science of morals, that he has not added a single ray to its former effulgence, or cleared up a single one of its obscurities. There are, on the other hand, many indefinite results, many loose, vague and inaccurate conclusions, in his work, which disgrace the moral science of this age and country, and which even a superficial acquaintance with the writings of his predecessors would have enabled him to correct. So far, indeed, is he from having introduced any "definite results" of his own into the elements of moral science, that he is, in point of clearness and precision, far behind both Aristotle and Butler; and this, too, in regard to the very first and most fundamental questions of the science. To begin, in proof of this proposition, at the beginning, his book opens with these words:

"Ethics, or moral philosophy, is the science of moral law. The first question which presents itself is, What is moral law? Now, is Dr. Wayland's answer to this question, the first and most fundamental of his whole treatise, a direct, clear and precise definition of 'moral law'? It is, on the contrary, indirect, circuitous, unintelligible and obscure in the extreme. He first denies law in general, and then moral law in particular. Let us, then, says he, 'inquire first, what is law; and, secondly, what is moral law.'

"By the term law," he continues, "I think we generally mean a form of expression denoting either a mode of existence or an order of sequence." Now, does Dr. Wayland really intend to say that 'the term law' signifies 'a form of expression'? If so, then he confounds law with the words in which it is expressed. "Thus," says he, "the first of Sir Isaac Newton's laws, namely, that every body will continue in a state of rest, or uniform motion in a right line, unless compelled by some force to change its state, denotes a mode of existence." Thus, according to Dr. Wayland, the first law laid down by Sir Isaac Newton is 'a form of expression,' which 'denotes a mode of existence.' Now, is not this law itself 'a mode of existence,' and not merely a parcel of words denoting such a mode? Is it not really a law of nature, and not merely 'a form of expression'? We suppose, indeed, that Dr. Wayland was aiming, however obscurely, to say that law is 'either a mode of existence or an order of sequence,' for it is obviously something more than 'a form of expression,' or mere thing of words.

But our great objection to his first step in the moral science of Dr. Wayland is that it is an attempt to define law in general; an attempt which never has been, and never will be, crowned with success. We might as well try, indeed, to trisect an angle, to square the circle, or to duplicate the cube, as to give a correct definition of law in general. It is a search for that which has no existence whatever; namely, for some property common to all kinds of laws, by means of which they may be defined. All laws have, indeed, nothing in common—but the name; and the search for a common nature, or property, to serve as the basis of a definition is even more hopeless than the search after the philosopher's stone, the elixir of life, or a perpetual motion. One hundred and thirty-five definitions of law in general have been given by ingenious men, only to be criticised and pulled to pieces by others as ingenious as themselves; and as if this were not sufficient, the endless folly is still repeated by such writers as Dr. Wayland. If he had only read as well known a writer as Dugald Stewart, and reflected on one of the most remarkable passages of his works, he might have been delivered from his worse than futile attempt to draw all kinds of laws under one and the same definition. The false conception on which this attempt proceeds, that because laws have a common nature, or property, they have a common name, or property, has long since been exploded by Mr. Stewart. In the course of his refutation of this 'total misconception,' as he calls it, Mr. Stewart says:

"I shall begin with supposing that the letters A, B, C, D, E denote a series of objects; that A possesses some quality in common with B; B a quality in common with C; C a quality in common with D; D a quality in common with E; while, at the same time, no quality can be found which belongs in common to any three objects in the series. Is it not conceivable that the affinity between A and B may produce a transference of the name of the first to the second; and that, in consequence of the other affinities which connect the remaining objects together, the same name may pass in succession from B to C; from C to D; and from D to E." Mr. Stewart gives this as only one of the

many ways in which a series of objects, without any one property in common, may acquire a common name.

Now this reflection, and the reasoning based upon it by Mr. Stewart, are at once obvious, original and profound. It is produced in answer to the question of Aristippus, 'How can beauty differ from beauty,' and reveals the 'secret source of some of the most obstinate errors that have infested the human mind. How many philosophers, for example, from Plato to Cousin, have labored in vain to frame a satisfactory theory or definition of the beautiful; hoping to find some quality in common with all the objects which are called beautiful, merely because they have a common appellation or name! No wonder they have never succeeded; for they have pursued shadows merely, endeavoring to grasp and appropriate that which has no existence whatever in the nature of things.

The same remark is applicable to all the attempts of ingenious men to define the nature of law in general. If we analyse all those things which are called laws, we shall find that they have no element or property in common; the only thing they have in common being the name. Hence, when any one undertakes to define law in general, or to point out the common property by which laws are distinguished from other things, he must necessarily fail. He mistakes a name for a reality, a shadow for a substance; and, finally, an incoherent dream for science. We may frame a definition of law in words, as others have done; but, however carefully constructed, it can be applied to different kinds of laws only by giving totally different meanings to the same terms. Thus, for example, a law is said to be 'a rule of conduct,' given by a superior to an inferior, and 'which the inferior is bound to obey.' Now, who does not see that the words 'conduct' and 'obedience' have totally distinct meanings when applied to inanimate objects and when applied to the actions of rational and accountable beings? And who does not see that human beings are bound to do their duty, in a very different sense from that in which matter can be said to be under an obligation? The same remark may be extended to all the definitions which have been given of law in general. Indeed, every attempt to draw things, so essentially unlike each other, under one and the same mode of expression, is, not to define them, but only to hide their real nature and differences beneath the ambiguities of language. This, as we shall presently see, is precisely what Dr. Wayland has done in his attempts to define law in general, and moral law in particular. Instead of explaining the nature of moral law, the one great object of his science, he has involved it in the clouds and darkness of misconceptions and errors, from which a little greater respect for the labors of others might have delivered him, and also his Elements of Moral Science.

Mind, as every tyro in philosophy is aware, has no property in common with matter. So, in like manner, moral law has no property in common with material law, or the laws of matter. The enunciation of a material law merely states what will take place; that of a moral law declares what shall be done. The one relates to passive, inert matter; the other to active, self-conscious, intelligent and responsible mind. Matter never departs from, or violates, its laws; it is, on the contrary, the invariable uniformity in the course of matter that constitutes its law. In other words, the observance of the law is identical with the law itself, and not something different from it. Thus, for example, the fact that every particle of matter in the universe attracts every other particle with a certain force is the law of gravity. The observance is the law, and the law is the observance. There is, in fact, no such thing as obedience to law in the world of matter, except in a figurative or metaphorical sense of the term. Moral law is, on the contrary, one thing, and obedience to it quite another. Hence, although every act of every moral agent in the universe should run counter to the moral law, still would that law remain the same, as unchanged and unchangeable as the great Being by whom it was ordained. The formula of material law is, it will; that of moral law is, thou shalt. The one is 'a mode of existence, or an order of sequence'; the other is a command of God to his rational and accountable creatures. 'A mode of existence, or an order of sequence,' is both the law and its observance; for the two things are identically one and the same. Or, strictly speaking, the observance of the law is merely a metaphorical expression denoting the law itself. Moral law is, on the contrary, a command, which may be obeyed or disobeyed, observed or transgressed. It goes before, and stands above, the act by which it is obeyed or transgressed; and is not one with any act, or mode of action, among men or angels.

According to Dr. Wayland, however, moral law is exactly like material or natural law; each being merely 'an order of sequence.'

The third law of motion, says he, 'that, to every action of one body upon another, there is an equal and contrary reaction, denotes an order of sequence; that is, it declares the general fact that, if one event occurs, the constitution of things under which we exist is such that another event will occur.' This 'general fact' is, indeed, the law, and the law is this 'general fact.' They are identically one and the same. But this is not the case with respect to moral law.

Again, he says, 'the axioms of mathematics are laws of the same kind. Thus, the axiom, 'if equals be added to equals the wholes will be equal,' denotes an order of sequence in respect to quantity. Of the same nature are the laws of chemistry. Such, for instance, is the law that, if soda be saturated with muriatic acid, the result will be common salt.'

Thus, Dr. Wayland goes on, and finds the very type and essence of moral law in the region of dead, inert matter, in mechanical philosophy itself, in pure mathematics, and in chemistry, as well as in the world of moral and accountable beings. It is always and everywhere merely 'an order of sequence.' 'The meaning of law,' says he, 'when referring to civil society, is substantially the same. It expresses an established order of sequence between a specified action and a particular mode of reward or of punishment. Such, in general, is the meaning of law. Law in general is 'an order of sequence'; and moral law, in particular, 'is an order of sequence' between a specified action and its mode of reward or of punishment.'

We had, indeed, fondly supposed that the first and great commandment, to love God with all our hearts, and all our minds, and all our strength, had some little connection with the moral law of the world. But, if Dr. Wayland's learned disquisition be true, then were we grossly deceived; for this first and great commandment is certainly 'not an order of sequence.' It is simply the will of God, making known and commanding what is right in the moral sense of the term.

'Moral philosophy,' says Dr. Wayland, 'as well as every other science, proceeds upon the supposition of the existence of a universal cause, the Creator of all things, who has made everything as it is, and who has subjected all things to the relations which they sustain. And hence, as all relations, whether moral or physical, are the result of his enactment, an order of sequence once established in morals is just as invariable as an order of sequence in physics.' Now, if this be true, there is then no such thing as sin, or transgression, in the world. For, if moral law be 'an order of sequence,' and if this 'order of sequence' be 'just as invariable as an order of sequence in physics,' or in mathematics, there is then no such thing as a violation of moral law, or sin, in the world. Or, if sin exist at all, it can do so only as a departure from 'an order of sequence' as invariable as fate itself, or as a gross contradiction in terms! What did the apostle mean, then, when he said: 'Sin is the transgression of the law'? Did he mean that sin is a transgression of an invariable 'order of sequence,' or did he entertain a different idea of moral law from that set forth by Dr. Wayland? The truth is, that the 'order of sequence' between sin and its punishment is no part of the sin itself, nor of the law of which that sin is the transgression. The law stands before, and the punishment comes after the sin. The most that can be said of the inevitable punishment, or the natural sequence, of sin, is, that it is one of the sanctions of the moral law, and not that it is the moral law itself. This is, indeed, the bright and eternal transcript of the divine mind, and not merely 'an order of sequence' between the acts of men and their results. Is it not evident, then, that Dr. Wayland lost both himself and the moral law, in his wanderings amid the mists of his metaphysical speculations with respect to law in general?—*Southern Review*.

Justice is the great interest of man on earth. It is the ligament which holds civilized beings and civilized nations together. Where her temple stands, and so long as it is duly honored, there is a foundation for social security, general happiness and the improvement and progress of our race.

The Bible, so little in bulk, like the five barley loaves and two fishes, what thousands upon thousands in every age it has fed! And what multitudes it will feed in every land of Christendom till the end of time!

Our of Christ as the way there is nothing but wandering; out of Christ as the truth nothing but error; out of Christ as the life nothing but eternal death. Look unto him and be saved.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, FEBRUARY 26, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KNEER, 112 Camp Street, New Orleans, LA.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KNEER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, REGISTER the letter of our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

REPORT OF THE PUBLISHING COMMITTEE.

TO THE MEMBERS OF THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES.

Dear Brethren: Your Joint Publishing Committee met in the Advocate office on the morning of the twelfth instant, and would present the following report:

With \$250 in hand, all that could then be obtained from the patronizing Conferences, on the twentieth day of January, 1866, nearly three months before the meeting of our last General Conference, the Executive Committee resumed the publication of this paper. During the years of 1866 and 1867 the enterprise grappled with many difficulties, but having a house, press and engine of our own, the paper being conducted strictly upon the cash basis, and the editorial department costing us nothing, it was enabled to succeed beyond the expectations of many of its warmest friends. By wise and judicious management it has rapidly regained its former place of esteem and confidence in the hearts of our people, and during the past Conference year the subscription list increased fifty per cent. It is now financially in a safe, healthy and improving condition, and is now acknowledged to be one of the very best weeklies belonging to the church. If so much has been achieved with resources so small, what may not be accomplished under more favorable auspices, if we all do our whole duty? Located in New Orleans, the greatest commercial center in the South, and one of the greatest in the world, a career of usefulness opens before the Advocate, almost without a parallel in the history of Christian journals in the South. To render the paper all that it ought to be, additional monied resources are indispensable. It should have an editor whose whole time and energies can be devoted to its interests. To warrant the Publishing Committee in sustaining an accomplished man at the editorial helm, the revenue of the Advocate ought to be increased at least \$3,000. If its annual income can be augmented by this amount, all difficulties will instantly disappear, and it will at once be made all that can reasonably be expected in a Christian weekly. In that event it would be able to battle yet more successfully against Catholicism, it would raise still higher in sight of the people the standard of a pure gospel, and aid in constituting New Orleans an

important moral center, from which light and truth would radiate throughout our entire church. Your committee have determined that this paper must be placed upon a financial basis equal at least to that of any in the church, and they have pledged themselves and their Conferences to this noble work. Ten new subscribers secured by each preacher, with all the old subscriptions renewed, and the money remitted in a registered letter or post office order, to the editor, would accomplish the task before us. Dear brethren, aid by your efforts to make our own organ one of the first religious sheets in the land. Let every preacher, and every layman who can do so, present the claims of the Advocate, and do all in his power, during the months of March and April, to increase its circulation, so that when the Publishing Committee shall reassemble in May next, in the city of Memphis, to which time and place they have adjourned, they may feel authorized, by the increased resources in their hands, to elect an editor. We should remember that this paper is our own organ, and that it has upon us the first and highest claims. When we have done all that we can for it, we may consistently extend our sympathies and aid to others; but it is simply preposterous to neglect our own interests in order to build up our neighbors, however good and worthy they may be. Whatever we do for the Advocate will be more than returned to us again—the tone of personal piety will rise among our people, and all the benevolent and financial enterprises of the church will increase and grow, as it is read and circulated in our midst. It would be gross injustice, on the part of the chairman of the committee, not to mention the debt of gratitude which the church in our bounds owes to the constant labor and excellent management of the Executive Committee.

In behalf of the Joint Publishing Committee.

A. S. ANDREWS, Chairman.

Felicity Street Sunday School Jubilee.

This annual festival and celebration of the Felicity street Sunday school occurred on the night of the twenty-second of February. The birthday of Washington could not be better remembered. The exercises began, with a full house, at about seven o'clock. Speeches, dialogues and singing by the children, occupied much of the evening. The speeches were all excellent and well delivered—the valedictory best of all, and a perfect gem in every respect. We believe that we express the judgment of all present when we say that the songs and hymns were selected with great taste, and sung with great sweetness. An important feature of the occasion was the presentation of prizes to the scholars. These were numerous and valuable, in the shape of useful and elegantly bound books. The superintendent, W. H. Foster, Esq., was surprised by the gift of a most richly mounted cane from the officers and teachers of the school. The presentation was made through the secretary of the school, Mr. Rochester, who accompanied it with a neat and appropriate speech. The response of the superintendent was handsomely and affectingly made, in which he alluded to his long service in the cause, and that in old age he should lean upon this staff and cherish the memory of the donors. There was a book presented to the pastor—a richly bound volume of Good Words; and then, after a closing song, all adjourned to the basement, where refreshments were served to the teachers and children. We should have mentioned that an interesting report of the condition of the school was read by the secretary, previous to the presentation of the prizes.

From this report it appears that a new and expensive library has been procured, and complete in all its appointments. From this report we learn also that the school sent over \$300 to the China mission last year; and that it has a school in China bearing its own name. A

THE SAVIOUR'S INFANT LIFE.

No man's life was ever so marked with exciting incident as was that of the Saviour. If we divide it into the three periods of his infancy, his active manhood, and that long interesting stretch passed in Nazareth, and of which we know nothing, it will be seen that those events which have ever since filled the world with his name, and with themes alone capable of steadily entertaining the thought and imagination of mankind, were compressed into a very small space of time. Five months will cover the first period, and three and a half years the second. Why we know so much about these short extremes, and so little of the middle part of that precious history is an important question. It may be answered that the Holy Spirit saw fit to put us in possession of the former, but for him we should have been equally ignorant of all that sublime story of human life. The contemporaries of the Saviour, who were not moved by the Holy Ghost, have left scarcely a word in regard to this most illustrious citizen of the world. Tacitus, the wise historian, wrote volumes upon the military chieftains and Roman emperors of his time, whose greatness rose and sat in a day, and page after page upon the wars and warriors of Germanic tribes, but gave only a single sentence to the Man toward whom and from whom all history was to flow. Those disciples, John and James, must have known intimately that middle part of the Saviour's life, but they ventured not a word beyond the movements of Him who was to bring all things to their remembrance in regard to Christ. It is then the silence of the Holy Spirit, extending over nearly thirty years of the life of Jesus, that amazes us. And we suppose that it was the Spirit of God that also prevented and restrained all other writings in regard to the Saviour, excepting that of inspired men, in order that the portrait of the Son of God might come to us all perfect, freed from all false renderings. If we take the most approved chronology, the Saviour was born B. C. 4, in November; in two months Joseph and Mary and the young child are on their way to Egypt, and by the tenth of April following are back again in Galilee. In these two months we have the visit of the angels and the shepherds, the arrival of the Magi and the star, and immediately thereafter the visit of the angel to Joseph, saying: "Arise and take the young child and his mother and flee into Egypt, and be thou there until I bring thee word; for Herod will seek the young child to destroy it." The appearance of the angel probably did not impress Joseph more than did the reason he gave for moving quickly. For Herod was only less than Satan enthroned; and if we may suppose that the powerful archangel fallen was ever permitted to control the kingdoms of earth, we can see the preparation made by him to destroy the Saviour directly upon his coming into the world. Already the war between the Enemy and the Son of God had begun when the birth of Jesus was announced. In the vivid, prophetic and historic painting of the Apocalypse, we have the rage of the adversary, and the deadly venom which he poured out, portrayed in these words: "And when the dragon saw that he was cast unto the earth, he persecuted the woman which brought forth the man child. * * * And the serpent cast out of his mouth water as a flood after the woman, that he might cause her to be carried away of the flood." There was indeed no time to be lost, for Herod was only five miles off; and so on that night, the very one of the day on which the Wise Men left, Joseph started. He seems to have been asleep, and to have been awakened by the angel, and by his order to have gotten up, and without any other counsel, to have started in the dead of night for Egypt. The angel, no doubt, opened the way—as afterward he opened the prison gates for Peter—the beast was saddled, the mother and precious babe were placed upon him, and in silence, as if escaping from

the shadow of death, the little party, protected by the powerful angel, made its way, as Israel of old, out into the wilderness. Pharaoh and Herod were of the same school. It must have amazed Mary to have been called to receive the evidences of her Son's glory and greatness, at the hands of the large company of Eastern sages, and then but a few hours after be aroused to fly her native land, in the greatest alarm and agitation, in order to escape the murderous designs of a man.

The rapidity of the movement defied Herod. The child was rescued between the flash and the edge of his murderous edict. The little children of Bethlehem Ephrath became the first martyrs; their blood witnessed that the Christ had come; and as they died for him the Saviour must have ever looked upon children under two years of age with peculiar grace. The blood of these forty innocents evidenced the ruthless nature of earth, full as much as the subsequent persecutions of the church by Nero, Catharine of Guise, or Philip the Second. Herod supposed that the new-born King was destroyed, but we cannot suppose that Satan was ignorant of the flight; far from it. The stream of land travel at that day between Jerusalem and Egypt was constant. Joseph may have glided into it, but it is far more probable that he went by a coastwise route, and with but few attendants. The angel must have gone with them: the charge was too precious, the enmity abroad too fierce, the company too helpless to be left unprotected. The Presence that ages before waited upon Israel, now protected the Son; or else the Prince of Evil that destroyed the family and flocks of Job might by some hot simoon have stifled the Holy Family; or he might have hung upon it in revolving sand storm, or have overtaken it by the sudden swoop of some wandering band of murderous Edomites. And who shall say how mightily the archangel Gabriel hovered and gleamed, and upon every side, whether in motion or in camp, parried the attack of the Power of Darkness, and on the same road fought over again the battle which centuries before he had waged against the pursuing hosts of hell? Satan there learned that no power, natural or supernatural, angelic or human, would be permitted to harm that Holy Babe. But few months were spent in Egypt. The passage out of it fulfilled the prophecy which, more than any other, must have perplexed the Sanhedrim, but which was realized by a series of events of all the most unlikely, and yet had been seen most accurately by the inspired vision of Hosea.

"THE AMERICAN INDEPENDENT CATHOLIC CHURCH."

Corresponding with the stand now being made by many of the Austrian and French clergy against Ultramontanism, a movement has been started in this country among the Catholic clergy for the purpose of protecting themselves, and the Catholic Church against the encroachments of the Roman Court. The church ideal of the Ultramontanes is the Italianizing of all particular churches, and, above all, the suppression of every shred of individuality in national churches. They consider it the conscientious duty of all nations to mold themselves into the clerico-Italian fashion of thinking and feeling; or, as the *Civiltà Cattolica* puts it: "As the Jews were formerly God's people, so are the Romans under the new covenant. They have a supernatural dignity." (Vol. 3, No. 2.) The Ultramontane knows nothing higher than the breath and law of Rome. When he speaks of the church he always means the Pope, and the Pope only. The *Civiltà* says (vol. 12, p. 86): "It is not enough for the people only to know that the Pope is the head of the church and the bishops; they must also understand that their own faith and religious life flow from him." After asserting that all the treasures of divine revelation, of truth, righteousness and the gifts of God, are in the pope's hand, who is

their sole dispenser and guardian, it asserts (vol. 3, p. 259) that "the Pope carries on Christ's work on earth, and is in relation to us what Christ would be if he was still visibly present to rule his church."

Ultramontanism is therefore essentially Papalism, and its starting point is that the Pope is infallible in all discussions upon matters of faith, in ethics, in the relations of the Church to the State, on State institutions, and that every such decision claims unlimited, unreserved submission, in word and deed, from all Catholics. On this view the power of the Pope over the church is purely monarchical, and neither knows nor tolerates any limits. He is to be the sole and absolute master; all beside him are the mere executioners of his orders; as Cardinal Cajetan has expressed it: "The church is the slave (*serva*) of the Pope."

Against this gigantic Italian machine of ecclesiastical administration, with its hundred arms reaching everywhere, repressing, deciding, denouncing and censuring all things to the death of a rigid uniformity, some forty-seven regular priests in the United States have already united together, and are determined, if possible, to rescue themselves and the Catholics of this country from the insupportable domination of the Ultramontanes. We give now to the public, for the first time, the constitution of this Liberal party of the Catholic Church. It fell into our hands strangely enough; yet it is by authority, and deserving of the most serious attention of all American Catholics in all parts of the Union. Especially are all clergymen of that church invited to give these articles a candid perusal. The movement is wholly within their church, and begins there without any force or influence from without. We were as much surprised at the movement, at its suddenness, strength, breadth and maturity, as any of our readers can possibly be. We have hope that all the Advocates of Methodism, both Southern and Northern, will assist the movement by copying the constitution of this American Independent Catholic Church, printed on the second page of this paper. It is intended to get as many clerical signatures to it as possible, and then forward it to the Ecumenical Council. All clergymen who wish to subscribe are requested to send their names and address, under seal in an envelope, to W. T. Smithson, Esq., No. 14 Wall street, New York, P. O. Box 4730.

The reader will observe that the principal points in which this Independent Catholic Church differs from that of the pure Italian type are:

First. In that "the Bishop of Rome" is recognized as *Primus inter pares*, but not the Pope. This accords with the writings of the Fathers. They cite the various ranks of the hierarchy in the ancient church, but the papal dignity is never named as one of them. Isidore of Seville, in 631, describes all grades of the hierarchy, and divides bishops into four ranks—patriarchs, archbishops, metropolitans and bishops. Gratian incorporates this into his *Decretum*. We have a copious literature on the Christian sects and heresies of the first six centuries. Irenaeus, Hippolytus, Epiphanius, and St. Augustine have left us accounts of them to the number of eighty, but not one is mentioned as rejecting any authority of the Pope. All the Fathers have written on Matthew xvi, 18, and John xxi, 17—Origin, Chrysostom, Hilary, Augustine, Cyril, Theodoret—but not one has dropped the faintest hint that the primacy of Rome is the consequence of the commission to Peter! Not one of them has explained the rock on which Christ would build his church of the office given to Peter; but they understood it either Christ himself, or Peter's confession of faith in Christ; often both together. "The Fathers could the less recognize in the power of the keys, and the power of binding and loosing, any special lordship of the Roman bishop, inasmuch as—what is obvious to any one at first sight—they did not regard a power first

given to Peter, and afterward conferred, in precisely the same words, on all the apostles, as anything peculiar to him, or hereditary in the line of Roman bishops; and they held the symbol of the keys as just the same as the figurative expression of binding and loosing." (Austrian Catholic Bishops.) No single writer to the end of the seventh century—and there are eighteen of them—ever dreamt that the passage in Luke xxii, 32, was anything more than a prayer of Christ that his apostle might not wholly succumb and lose his faith entirely in his approaching trial. Yet upon this one passage the edifice of papal infallibility has been reared!

The second important item of this constitution is that "every religious order will be free in the management of its own properties."

The third is in the thirteenth article:

"Whereas an unobserved law is more for evil than for good, and whereas no Christian church can presume to err in following the footsteps of the primitive church, the clerical celibacy and the auricular confession, though good and excellent in themselves, are, however, no more obligatory, having been, and being still, alas! too often the occasions of danger, corruption and scandal."

The fourth and last we shall notice is that:

"Nobody will be allowed to make vows of any kind before eighteen years of age for women, and twenty-five for men. These vows will be preceded by at least one year (*sine interruptione*) of novitiate, and made for the lapse of five years only, when they may be renewed or not, *ad libitum*."

These "Fundamental Articles" are characterized by moderation, and introduce only such changes in the church as have been rendered absolutely necessary by the party now controlling the Council at Rome, with the Jesuits at its head. The articles of the Syllabus, as proclaimed, condemn all modern civil constitutions, all efforts for self-government, all limitation of arbitrary royal power, as well as the whole existing view of the rights of conscience and religious faith and profession. It inculcates that it is a wicked error to admit Protestants to equal political rights with Catholics, or to allow Protestants the free rise of their worship. It sets forth as an article of faith, for the Roman Catholic world, "that the church has the right of employing external coercion—power of civil and corporal punishment." The two recent canonizations of inquisitors, following in rapid succession, gain in this connection a new and remarkable significance. We may well doubt, when the doctrines of this Syllabus shall have been proclaimed, if all mankind will bow down its proud neck and accept the yoke.

That a body of American Catholic clergymen have moved against this attempted revival of the Isidoro-Gregorian papacy is a most encouraging evidence that the kingdom of the Saviour and the dispensation of the Holy Spirit still abide in power.

NEW PUBLICATIONS.

We have received from the author a copy of

FLOWERS AND FOSSILS, AND OTHER POEMS. By John K. Stayman, professor in Dickinson College—Philadelphia: Claxton, Remsen & Haffelinger. 1870.

We publish this week the "Song of the Wind" from this collection. The writer is certainly a "born" poet. It is refreshing to come across the full thought of the imagination, in the harmony of measured lines, to follow the stirrings of a mind keenly alive to the great and fair things of nature. He seems, however, to be wanting in Christian sentiment, or else to have carefully avoided its expression.

From the Rev. R. J. Harp, 112 Camp street:

THE POPE AND THE COUNCIL. By James. Translated from the German. Roberts Brothers. 1870. 12mo, pp. 346.

This work first appeared three months ago, in a series of articles in the *Allgemeine Zeitung*, and attracted very general attention on the Continent. It is of a Catholic authorship, and discusses the great religious crisis through which the

church and the world are now passing. We have not, at any time, come across a more powerful work on the Catholic question. It was especially designed to bear upon the Ecumenical Council, and it has already, doubtless, had the desired effect upon the Catholic public of Europe, as it has been put upon the *Index prohibitorum*. It is in great evidence of the spiritual vitality which yet exists in the Catholic Church, and its production is not less surprising than the movement for religious liberty now going on in Spain and Mexico. Every preacher who wishes to be informed on the present movements and genius of the Roman Catholic Church should read this book. The amount of original information in it is very great. If we might not be thought extravagant, we should say that it is one of the most important works on that subject which has appeared in the last century.

MANEUVERING FOR A POSITION.

The *Western Christian Advocate*, February 2, discoursing at length on the "Reunion of Methodism," says:

"The subject is now fairly before that church. The Southern Bishops have considered it, and it will come before the next General Conference. We cannot predict the action of the General Conference, but some action must be had. Necessity is laid upon them; they must take hold of the subject, and do something. This is progress. And they must act in the presence of the whole Christian world. This is an advantage to the right. Every Christian denomination in the land will scrutinize their action. Whatever their passions, they will regard the good opinion of Christendom, and seek to do nothing that cannot show some justification before intelligent Christians."

Ever since that passionate act of their General Conference rejecting Dr. Lovick Pierce, Northern Methodists have felt themselves at a disadvantage before the Christian world. Dr. Pierce bore from us greetings, and propositions for fraternal intercourse between the two great bodies of Methodism in America. His mission failed, signally. Those to whom he was sent would not even give him a hearing. They would not admit our ambassador of peace into their presence, but let him find a place in the gallery, where Bishop Soule also was allowed to sit. He was not even invited to preach in their pulpits.

Time moves on, and this attitude of responsibility of Northern Methodism becomes unpleasant. It cannot be excused before the better portion of their own people. The Christian sentiment of the world condemns it. But they do not like to meet the issue squarely, and do the thing that justice and right, and the self-respect of the Church South, require. Their General Conference has not yet sent a delegate clothed with power to accept the offer which they once discourteously spurned; nor to make a similar offer. That would be something like the *amende honorable*.

How to get out of this situation, and to escape the responsibility for the attitude of the "two Methodisms," is their problem.

Passing by several quasi official winks and overtures, which were never regarded, we find their Bishops calling upon us in St. Louis, last May, with vague propositions about reunion. They had no authority, but they came, and used often the words "union" and "reunion." This, it was thought, would have its effect on the public. It would satisfy some who were dissatisfied among them; and mislead some who hung loosely to us. "Has not the Northern Church offered union to the Southern? Now, the latter must answer for the continued separation." Their own press being judges, the mission of Bishops James and Simpson was a movement of strategy. They were maneuvering for a position. But they got an answer they did not bargain for. They did not succeed in putting the working-car into our hands. The reply of our Bishops could not be objected to in its spirit; while its statements reached many in the North, who had not heard our news.

Now, we hear that a commission has been appointed to lay the union matter before our approaching General Conference. By what authority? From their General Conference? No.

Our General Conference in 1870 is to be informed that their General Conference in 1868 appointed a commission to confer with the African Methodist Episcopal Church, and the powers of this commission were, by amendment, enlarged so as to treat "with a like commission from any other Methodist body that may desire to unite with us."

This is an attempt to get us to

take the initiative! But the trick is too bald and shallow. It can hardly deceive anybody.

The *Western Christian Advocate* thinks the position for which they have been maneuvering already gained, and exults prematurely. But we can inform the editor of the *Advocate* that we comprehend the movement.

The Church South stands, and will stand, where she stood when her fraternal offer was made and rejected. Let the Church North take it up when she will. This must be done by equal and competent authority.

All this strategy we understand—this attempt to stir up a charitable dust—these semi-official approaches and quasi authoritative communications and commissions. The way is short, open, plain, simple, to fraternity, if the authorities of Northern Methodism honestly desire it. This dodging the question that naturally and historically comes first, and lies next to us both, cannot succeed.

But that is just the one thing they do not wish—acknowledged recognition and fraternal intercourse with us—and for three reasons:

1. It would be backing down from an assumed loftiness of position, and recanting the old insult.

2. There must follow a rendering up of off property, which has been unlawfully seized, and yet is held.

3. Well, we will not give that now. They would absorb us under the name of union. Their pride of power, greed of numbers, ambition of ecclesiastical area and influence, would be so gratified in that achievement, our sins could be overlooked and all our unworthiness. They do not wish to build up a rival, but are ready to accept a victim.

The Church South knows her position, and the advantages of it, and is not uneasy. She is under no "necessity of acting." She means to stand still, so far as you of the North are concerned. You must take up the negotiations where you broke them off, and by the same authority.

—*Nashville Christian Advocate.*

NEW ADVERTISEMENT.

SOUTHERN PUBLISHING HOUSE IN NEW ORLEANS, 112 CAMP STREET.

By referring to our advertising columns our readers will form some idea of the excellent stock of books kept on hand by the agent at this point, the Rev. R. J. Hump. He not only has nearly everything our people may want in the way of Methodist literature, but of general literature. Smudgy schools can do as well with him as with any bookseller we know of. So can day schools. His assortment of ordinary school books is complete; and whatever may be wanting, which he has not on hand, he has every facility for procuring at the shortest notice. Our friends here and elsewhere are justly proud of the excellent opportunity which the church affords in this store for supplying the whole South with good and valuable and highly attractive books.

AN EARNEST CALL.

Mr. Editor: Will you allow me, through your columns, to call on those secretaries and treasurers of Annual Conference Boards of Domestic Missions who have not reported, to make their returns without further delay? All the Conferences have held their meetings except the Baltimore, and yet we have no reports from the following Conferences, viz: North Carolina, South Georgia, Montgomery, Mobile, Louisiana, Mississippi, Louisville, St. Louis, Missouri, East Texas, Northwest Texas, Trinity, and Columbia. Brethren will confer a special favor by reporting to me immediately at Nashville. My annual report must be made before the meeting of the General Conference, and this cannot be done satisfactorily without reports from Annual Conference Boards. If brethren be at a loss as to what should be embraced in their reports, I refer them to the Discipline, part 2, sec. 7, p. 266, beginning at the figure 2, immediately following article 13, in the Constitution of the Board of Domestic Missions. The treasurers of Conference Boards will find their duty prescribed in article 7 of the constitution. The treasurers of the following Conference Boards have not reported, viz: Baltimore (not yet convened), Mississippi, St. Louis, Missouri, East Texas, Columbia, Florida, Pacific, Illinois.

I greatly desire that our church should know what is doing in the

cause of domestic missions. It may be that some brethren have reported and their letters failed to reach me; if so, please write again.

J. B. McFERRIN,
Secretary B. D. M.

A SIMPLE method of keeping milk fresh for a long time is now extensively practiced in the vicinity of Paris. This consists merely in adding to each quart of fresh milk, before the cream has risen upon it, about six grains of bi-carbonate of soda or potash, and then placing the milk in bottles, which are to be tightly corked for four hours in a water bath, heated to a temperature of about one hundred and ninety degrees, taking care not to go beyond this limit. When the bottles are removed from the bath they are to be made perfectly tight by coating the cork with wax, and the milk can then be kept a long time unchanged.

Married.

On the seventeenth of February, in Vicksburg, by Rev. Dr. C. K. Marshall, Rev. BENJAMIN JONES, of the Mississippi Annual Conference, to Mrs. MARTHA C. REDDING, of Talahatchee, Mississippi.

In Canton, Mississippi, on Sunday, December 19, 1869, by the Rev. H. H. Montgomery, Rev. E. W. SIMMONS, of the Mississippi Conference, to Miss MARTHA E. SIMMONS, of Madison county, Mississippi.

In Madison county, Mississippi, on Tuesday, December 21, 1869, by the same, Mr. JAMES WINFREY to Miss MARY A. FORD, daughter of the late Rev. Washington Ford.

At Way's Bluff, Mississippi, on Tuesday, February 8, 1870, by the same, Mr. F. M. SOUREL, of Holmes county, to Mrs. SARAH C. DARNOL, of Madison county, Mississippi.

In Madison county, Mississippi, on Tuesday, February 15, 1870, by the same, Mr. W. R. WINFREY to Miss MARTHA E. FORD, daughter of the late Rev. Washington Ford.

Obituaries.

Died, November 14, 1869, ARCHIE WHITE, son of Thomas White and Amanda Bowland, aged eight years.

Little Archie was a great sufferer for eighteen months. He had a fall, in which he struck the point of his shoulder against a piece of timber. Though at first his case was not considered serious, it was soon discovered that a permanent injury had taken place. His shoulder began to swell, and grew until his little body seemed nearly absorbed by it. It became larger than he could sustain in an upright position, or even in a sitting posture. He had no natural sleep, day or night, for long months. His mother—whose death has been noticed in the *Advocate*—sank under the protracted nursing and watching, and preceded him to heaven. His affliction baffled all medical skill, and was a marvel to his friends.

Though a sufferer so long, he was remarkably patient, and at times quite cheerful. He is now with his mother, where afflictions never come. God's mysterious providence is always wise, and in the end we shall see his purpose. Our doubly bereaved brother knows whom he has trusted.

A FRIEND.

Died, in Macin, Nottoway county, Mississippi, Mrs. A. McKASKILL, aged seventy-one years.

The subject of this brief notice was truly "a mother in Israel." She joined the church when fifteen years old, and was baptized by a Methodist minister by the name of Knight.

The fidelity and consistency which mark the Christian course of the deceased fully attest the genuineness of her faith in God. She loved the house of the Lord with a pure, spiritual affection, her seat in the class and prayer meeting seldom being vacant until bodily infirmity rendered it impossible for her to attend.

In the community of Macon, Mississippi, where our sainted sister resided for a number of years, the name of "Aunt Alex," as she was familiarly called, is associated with much sincerity and earnestness of Christian character, and her memory is as "ointment poured forth."

Her mortal remains rest sweetly in kindred dust, while her redeemed and triumphant spirit has gone to be reunited with the loved and cherished ones who preceded her to the heavenly, eternal home.

May the dear ones yet living strive to greet her on the shining shore, where "No farewell tear is ever shed."

J. B.

ELAZA HINES (nee Clarke) was born in Wilmington, North Carolina, October 1, 1801; was married to William A. Hines in the year 1818; removed to Georgia in 1819, and, after changing her place of residence once or twice in

that State, removed thence to Tusculoo, Alabama. After residing in that city several years she settled in Marion, Alabama, where she lived for thirty years previous to her death.

Such, briefly, is the path of this devoted pilgrim, who quitted the earth and ascended to heaven on the seventeenth of December, 1869.

While but a girl she gave her heart to her Saviour, and never felt disposed to withdraw her allegiance. At the time of her conversion the Holy Ghost assured her that God, for Christ's sake, had pardoned her sins, and adopted her into his heavenly family. This conviction was so clear and satisfactory that it was never questioned, and continued ever afterward a kind of base-line in her religious experience, beyond which she could not be driven by any assault of Satan. Whatever else was doubted, this was not. This fact, in connection with a "clear, active mind, naturally trusting and hopeful, urged her on to the cheerful performance of religious duty, and made her life a beautiful embodiment of Christian spirit, and a clear exemplification of Christian truth.

Her circumstances, though comparatively humble and fraught with trials, never embittered her spirits or caused her faith in God's providence to falter. The poor and suffering were blessed by her kindly ministrations, and the sorrow-stricken were comforted by her words of tender sympathy and Christian love. Few women have left such a bright and lasting memorial as Sister Hines. Her influence with all classes was great, and truly may it be said:

"None knew thee but to love thee."

Her last illness was very painful and protracted. She was stricken with paralysis while on a visit to the family of her son-in-law, Rev. Thomas Abner, at Enterprise. Her friends and physicians thought she would certainly die, but she assured them that she would be permitted to return home. She desired it earnestly, and had prayed to God that this boon might be granted. Her faith triumphed, and, contrary to all human expectation, she returned to the home of her "dear Lizzie" (Mrs. William Howell) with whom she remained until her death, suffering for almost two years the most excruciating pain. Her faith and patience, amid all this suffering, was remarkable. Nothing less than divine grace could have sustained her. It was a blessed privilege to be about her bedside and hear her testimony to the goodness of God and the power of his grace. She reared a large family of children, all of whom joined the Methodist Church with her.

Her living example was a precious treasure to her family, the church, and the community; and though she has passed away from earth, the memory of her godly walk and conversation, her cheerful smile and pleasant voice, will ever be cherished by those whose privilege it was to know her here. Her name is as precious ointment poured forth, yielding delightful fragrance.

"No cause for sorrow, then, but thankfulness!"

Life's business well performed,
When weary age full willingly
Resigned itself to sleep,
In sure and certain hope.

J. W. RUSH.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. DAVIS, M. D. To be had of Steel & Co., 72 Camp street; Elyrich, 139 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 309, New Orleans.

OSERVE.—Dr. D. has removed to No. 13 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention.

NEW ADVERTISEMENTS.

CHILDREN'S LIVES SAVED FOR FIFTY CENTS.—Thousands of children die annually of Croup. Now, mothers, if you would spend fifty cents, and always have a bottle of Dr. Tobias' Ventolin in the house, you never need fear losing your little one when attacked with this complaint. It is now twenty-two years since I have put up my Liniment, and never heard of a child dying of Croup when my Liniment was used, but hundreds of cures have been reported to me, and many state if it was \$10 per bottle they would not be without it. Beside which it is a certain cure for Cuts, Burns, Headache, Toothache, Sore Throat, Swellings, Mumps, Cholera, Diarrhoea, Dysentery, Spasms, Old Sores, and pains in the limbs, back and chest. No one who once tries it is ever without it. It is warranted perfectly safe to take internally. Full directions with every bottle. Sold by the Druggists and Storekeepers in the United States.—Depot, 10 Park Place, New York.

SUMMERFIELD, ALABAMA.

The Child's Corner.

SUPPOSE.

BY FRIGER CARY.

Suppose, my little lady,
Your doll should break her head;
Could you make it whole by crying
Till your eyes and nose are red?
And wouldn't it be pleasant,
To treat it as a joke,
And say you're "glad 'twas Dolly's,
And not your head that broke?"

Suppose you're dressed for walking,
And the rain comes pouring down;
Will it clear off any sooner
Because you said and frown?
And wouldn't it be nicer
For you to snuffle than pout,
And so make sunshine in the house
When there is none without?

Suppose your task, my little man,
Is very hard to get;
Will it make it any easier
For you to sit and fret?
And wouldn't it be wiser,
Than waiting like a dunce,
To go to work in earnest
And learn the thing at once?

Suppose that some boys have a horse,
And some a coach and pair;
Will it tire you less while walking
To say, "It isn't fair?"
And wouldn't it be nobler
To keep your temper sweet,
And in your heart be thankful
You can walk upon your feet?

And suppose the world don't please you,
Nor the way some people do;
Do you think the whole creation
Will be altered just for you?
And isn't it, my boy or girl,
The wisest, bravest plan,
Whatever comes, or doesn't come,
To do the best you can?

LITTLE THEODORE'S FAITH.

You often ask, my dear young friends, "what is faith?"
Let me illustrate the simple act of faith by the story of little Theodore.

He was a very little boy, but a trusting, simple-minded child. His parents had always been very particular to perform all their promises to him, and he felt a confidence in them which may properly be called faith.

This little boy had for several days had some cents in his pocket, and one day, when his father took out his pocket book to pay a man some money, he said: "Father, I wish I had a pocket book to put my cents in."

His father replied: "My son, I am going to buy a new pocket book for myself, and then you shall have my old one."

This promise made little Theodore very happy, and he often talked about it, and once or twice he said: "Father, have you bought your new pocket book yet?"

One morning he asked his father this question at the breakfast table, adding: "Father, I know that when you do buy a new one I shall have the old one."

"I shall be very busy at my office all day," replied his father; "but this evening, when I go to buy some other things, I will buy my new pocket book, and you shall have the old one."

This satisfied this dear little boy, and he said nothing more on the subject during the day, though no doubt he often thought of the promise. After tea his father went out, and, as Theodore was occupied with looking at pictures, he did not notice his absence.

When the clock struck, his sister said: "Come, Theodore, kiss mother; it is time for you to go to bed now." So he shut his book and went with his sister to his mother's room, for he was so young that he still slept in a little crib by the side of his mother's bed.

He knelt down and offered his simple evening prayer; and when he was ready for bed he said: "Sister, will you please to hang one of my stockings at the foot of mother's bed."

"Why shall I do so?" inquired his sister.

"Oh," said he, "because to-morrow will be a kind of a Christmas day for me, for father is going to buy a new pocket book for himself this evening, and then he will give me his old one, and I want you to ask him to put it in my stocking."

"Why, my dear little boy," said his sister, "you have not spoken to father about it since this morning, and he has so much to do, and so many things to think about, that I am afraid he may forget it this evening."

"Do you think my father would tell a lie?" was his reply to his sister's remark. "Oh, sister, hang my stocking up; I am sure the pocket book will be there when I awake."

His sister did as he requested, and this little boy went to bed happy and contented.

The first question his mother asked of Theodore's father, on his return, was: "Have you bought your new pocket book?"

"Yes," was his reply; "and my little son must have the old one," and when he heard about the stocking that was prepared for the expected gift, he felt himself more than rewarded for having charged his mind not to forget his promise.

Little Theodore was asleep, but the pocket book was carefully put in the stocking.

In the night this little boy's mother was awakened by hearing a rustling in his crib, and looking up she saw by the light of the night taper that little Theodore was climbing over the railing at the foot of his crib.

"Where are you going, Theodore?" she inquired.

"Only to get my pocket book that father put in my stocking when he came home last evening," was his confident answer.

There was not the slightest doubt in this dear child's mind that when he put his hand in his stocking he should find there the promised gift. And he was rewarded.

How is it with you, Christian believer? Are you one of those blessed ones "who see not, yet believe?" Your heavenly Father is "not a man, that he should lie." He has never deceived you, and yet how often you doubt his word—how often disbelieve his promises. Without faith it is impossible to please him.—*American Messenger.*

EASE IN SOCIETY.

"I'd rather thrash wheat all day in the barn," said Reuben Reily to his sister, as he adjusted an uncomfortable collar about his sunburnt neck, "than go to this pesky party. I never know what to do with myself, stuck up there in the parlor all the evening. If the fellows would pull their coats off, and go out and chop wood on a match, there'd be some sense in it."

"Well, I hate it as bad as you do, Rube," said his sister Lucy. "The fact is, we never go nowhere, nor see anybody, and no wonder we feel so awkward when we do happen to stir up."

The remarks of this brother and sister were but echoes of the sentiment of many other farmers' boys and girls when invited out to spend a social evening. But poor Lucy had not hit the true cause of the difficulty. It was not because they so seldom went any place, but because there was a wide difference between their home and company manners. The true way to feel at ease in any gathering is to wear it often. If the pleasing garb of good manners is only put on upon rare occasions it will never fit well and never seem comfortable.

Learn to behave properly at home, to cultivate yourselves. Do not sit or stand or lounge about in ungainly attitudes, but acquire a manly, erect, graceful bearing. I have never seen such vigorous, hearty manhood in any class as among cultivated farmers' sons. Let table manners be especially looked after. If you are so unfortunate as to have a mother careless in this regard, you must do the best you can to remedy the early defect in your home training. Note carefully how well-bred people behave, and do your best to imitate them. It is noble to be an imitator of that which is good and beautiful. Above all, if you wish to be at home in society, fill your brains with ideas. Set your mind to work. Wake it out of the sluggishness it would naturally sink into, if you were only a plodder and nothing more, by good, stirring thought. If you go into society with something in your mind worth talking about, you will not fail to find listeners who will treat you with respect, and where you are well received you will not fail very soon to find yourselves at ease.—*Country Gentleman.*

Scientific.

The French System of Storm Maps.

Behind, or rather beside, the Pantheon in Paris, at the corner of a street that runs toward the observatory, at the far end of the Gardens of the Luxembourg, and in the ground floor and corner room, as if it were an American apothecary shop or grocery store, the traveler, curious in such things, will find a woman sitting at the receipt of custom, taking down subscriptions for the daily bulletin of meteorological observations carried on at the observatory. I have recently learned, however, that the task of making these observations is now transferred to the new observatory, of which M. St. Claire-Deville is the learned and distinguished superintendent.

When we crossed the ocean in October, 1866, from New York to Brest, in the Ville de Paris, we knew that the passage would be stormy, for the time of sailing fell on the bad day of the weekly storm of that year. And so it turned out. We got engaged in the southern rim of a tremendous northeaster just departing, like ourselves, from the States for England, and we sailed nine days in its company, sometimes gaining on it, sometimes beaten back by it, until one night, not having seen the sun for six days, we lay to in front of a lighthouse, not knowing where we were, only that we certainly were not where we should have been—off Ushant. When morning broke the shore appeared. It was the coast of Corn-

wall. We turned therefore at a right angle, and steamed across the mouth of the English channel, and arrived at Brest one day later than we should have been had we made Ushant light.

This lost day permitted our disagreeable companion, the northeaster, who seemed utterly indifferent to our society, to go ahead; and then the sun came forth, and the beautiful and curious cliffs and monuments of Brittany, and the rare scenery of the port of Brest remunerated us for the delay.

Had we been on a voyage from Labrador to Norway, we should have been on the northern rim of the storm instead of on the southern; and it would have been a southwester, instead of northeaster, and have driven us forward, all the way, *pele mele.*

I was so curious to follow the subsequent course of this erratic monster, that on my arrival in Paris I subscribed to the Meteorological Bulletin, and got the back numbers for two weeks.

Looking on the chart for the day before we saw the English light—there, sure enough, was the front rim of our storm drawn in curved lines from north to south, and bellying eastward, over the northwest corner of Europe. The next day's chart showed it further advanced and raging into the North sea; and each successive daily chart marked its position further and further east-southeast, until its form was broken up and lost between the Black and Caspian seas.

That winter I spent in part at Pau, in the Pyrenees, and every morning I had at my breakfast table the mapped climate of all Europe of the day but one before. And every week I had a new storm to follow, from its first appearance on the west coast of Ireland to its disappearance three or four days later in the Levant, or across the Ural mountains.

Sometimes there appeared signs of a disturbance in this regular march, which I could not comprehend, and then the order would be resumed and regularity maintained as before.

In St. Petersburg a similar storm map has been published, for some years, even better adapted for the student than the French. In England there was until recently a distribution of storm information, in advance of time, to all the seaports of England, by telegraph from Greenwich; but the labor and expense was supposed to be inadequate to the results; the designer of the system, on whom it chiefly depended, became engaged in other scientific pursuits; and the daring fishermen and economical merchants of England were impatient of control. So it has ceased. Along the stormy and dangerous coasts of the United States such a system would be of incalculable value, and ought to have been established by the government long ago. One wealthy merchant of Boston or New York, however, could by himself keep up an establishment of the kind they have at Paris, until it became self-supporting—and not have to wait long for that to happen. The Bulletin of Paris is a quarto sheet of four pages, on the first, second and third of which are tables of the state of the barometer, thermometer and sky, the rain-fall and wind-force, at all the places from which telegraphic dispatches had arrived that day, and lagging dispatches of the day before.

The third page, kept permanently furnished with a map of Europe, printed in blue, shows on this map, but in strong black lines, the curves of barometric pressure, geographically drawn through or near the places from which the telegram of the day has come. These telegrams are studied in the evening, and thrown into curves, printed over night, and distributed in the morning. In Paris a man can see at a glance the condition of the atmosphere as it was all over Europe the day before.

The lines of barometric pressure are all concentric in a greater or less degree, because they show the sides of the great waves of air which are rolling forward over the surface of the earth and pressing unequally on the innumerable barometers of Europe. Each curve is marked 700, 705, 710, 715, etc., meaning 700 millimetres of mercury. In America we should mark them tenths and hundredths of an inch. Arrows also appear on the map, showing the direction and force of the winds.—*Old and New.*

If a person possess any tolerable amount of common sense and experience, his own mode of laying out his business is best, not because it is the best in itself, but because it is his own mode.

LITTLE local noises deafen the loudest distant ones; and so it is that this world shuts out from the ears of men, as it does, the voice of Almighty God.

Yes! I rejoice to declare it, and bear witness to the glory of grace that I am dead unto sin and alive unto God, through our Lord Jesus Christ.

The Farm and Garden.

RICE IN THE GULF STATES.

We have many localities, on the seaboard and in the interior, admirably adapted to the profitable growth of rice on a large scale, and yet Alexander S. McKee, anglo-American produce broker, of Liverpool, England, in his circular of November 11, 1869, says: "The American peanut (pindar or ground pea) is nationally unknown to us, and it is very questionable if we have ever seen a single tierce of Louisiana rice." Discussing the comparative profits of Northern farming and Southern planting, an exchange says:

"According to the statement submitted the gross returns for thirty-one and a half acres of wheat in Illinois was \$554. In this section of the South the gross proceeds from the same number of acres of land cultivated in cotton would be, at present price, and at a very moderate calculation, \$2,000 to \$3,600, while the same average in sugar cane would give a gross return of from \$3,000 to \$5,000. The net profits from the cultivation of both cotton and sugar, as is well known, are larger, the outlay being considered, than are ever realized from the growing of wheat, and yet they fall below what is earned by the cultivation of rice. Rice lands in Louisiana, and in healthy locations too, will yield nine barrels of two hundred pounds to the acre, which, at the average price of six cents per pound, will show the gross earnings of each hand employed, estimating in the usual way, to be \$1,344. We have noticed these products particularly, as they are the leading ones of our State; but farming in any of its branches suited to this latitude can be made equally, if not more profitable; so that those of limited means are not without opportunities for doing well.—*Gulf States.*

COMMERCE OF THE WORLD.

France exports wines, brandies, silks, fancy articles, furniture, jewelry, clocks, watches, paper, perfumery and fancy goods generally.

Italy exports corn, oil, wax, wines, essences, dye-stuffs, drugs, fine marble, soaps, paintings, engravings, mosaics and salt.

Prussia exports linens, woollens, zinc, articles of iron, copper and brass, indigo, wax, hams, musical instruments, tobacco, wine and porcelain.

Germany exports wool, woollen goods, linens, rags, corn, timber, iron, lead, tin, flax, hemp, wine, wax, tallow and cattle.

Austria exports minerals, raw and manufactured silks, thread, glass, wax, tar, nut-gall, wine, honey and mathematical instruments.

England exports cottons, woollens, glass, hardware, earthenware, cutlery, iron, metallic wares, salt, coal, watches, tin, silks and linens.

Russia exports tallow, flax, hemp, flour, iron, copper, linseed, lard, hides, wax, duck, eordage, bristles, furs, potash and tar.

Spain exports wine, brandy, oil, fresh and dried fruits, quicksilver, sulphur, salt, cork, saffron, anchovies, silks and woollens.

China exports tea, rhubarb, musk, ginger, borax, zinc, silks, cassia, filigree work, ivory wares, lacquered ware and porcelain.

Turkey exports coffee, opium, silks, drugs, gums, dried fruits, tobacco, wines, camel's hair, carapels, shawls, camlets and morocco.

Hindustan exports gold and silver, cochineal, indigo, sarsaparilla, vanilla, jalap, fustic, campeachy wood, pimento, drugs and dye-stuffs. Brazil exports coffee, sugar, indigo, rice, lides, dried meats, tallow, gold, diamonds and other precious stones, gums, mahogany and India rubber.

West Indies export sugar, molasses, rum, tobacco, cigars, mahogany, dye-wood, coffee, pimento, fresh fruits and preserves, wax, ginger and other spices.

Switzerland exports cattle, butter, cheese, tallow, dried fruit, linens, silks, velvets, lace, jewelry, paper and powder.

East India exports cloves, mace, nutmegs, pepper, rice, indigo, gold dust, camphor, benzine, sulphur, ivory, rattans, sandal wood, zinc and gunpowder.

United States exports principally agricultural produce, cotton, flour, tobacco, provisions of all kinds, lumber, turpentine and wearing apparel.

It is a sure confidence which a man hath in God that, through the merits of Christ, his sins are forgiven, and he reconciled to the favor of God.

SITUATIONS are like skeins of thread or silk. To make the most of them we need only to take them by the right end.

The promises with which God's word is studded are the lamp to our feet and the light to our path.

CONSCIENCE is a judge placed in the interior of our being.

BOOKS AND STATIONERY.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR NOW IN USE.

THE FASHION.

We call especial attention to this stove, which has been produced at great expense, combining all the new and important improvements; also to the extra light of the oven under the fire chamber, the Patent Chamber, Front Doors, and Patent Enamelled Iron Knobs, the improvement in the covers and ceiling of the oven, all of which have been covered by Letters Patent, are used in no other stove. They are arranged to stand fire, or others, without charge in all cases. We have all sizes of the justly celebrated Stove, both

PLAIN AND EXTENDED BACK, the Extended Back with cast iron Enamelled Reservoir and Funnel, Tia Warning Clock, and so on. The part of the top of the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, the heat is forced directly against the surface of the bottom of the Reservoir, the Reservoir being detached from the pipe, is removed at pleasure, thereby forming a six-hole Stove—the best in use, as the holes will heat as well or better than the die ones. For sale by

G. W. W. GOODWIN, 62 Camp Street.

ALSO, THE MOST

Complete and Perfect Cooking

FOR RITIMOUS COAL OR COKE

ever invented, in the estimation of all who have yet seen it. Patented in 1869.

THE MONITOR,

which can be seen at 62 Camp Street, has advantages possessed by this Stove over the other Cook Stoves, as no smoke or soot is sent to every sensible person that it is only necessary to examine it in order to be convinced of its superiority.

All of the above Stoves are fitted with a large oven, open doors lined with tin, and furnished with William Resor's Patent Air Chamber, sliding front doors, patent casters and White Enamelled Knobs.

The operation of every Stove giving Directions for putting up and using, accompany each Stove.

G. W. W. GOODWIN, 62 Camp Street.

Sole Agent for States of La. and

THE TIMES.

THE IMPROVED

LARGE OVEN COOKING STOVE

with extended Fire Chamber and Fender, one of the best Baking and most economical Stoves made.

The Flues are constructed so as to be the most perfect draft. The heat of the fire is so equal that when baking there is no need for removing anything until done.

THE TIMES

is made of a superior quality of iron, heavy of new design. The best of the Top Plate is put together in sections, in full of the greatest expansion without warping.

We invite the attention of Householders to the advantages of this Stove. We guarantee them to give entire satisfaction. Duplicate parts can be had at all costs, by which repairs can be made which will frequently save the price of a new Stove.

A large variety of MANTLE GRATE, House Furnishing Goods, Tin and Jewellery. Agents for the celebrated Osborn and Animal Cages.

STOVES, GRATES AND HOUSE

FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Fley:

The Philanthropist.

A first class Cooking Stove, having the latest improvements that have been invented. Has a new arrangement of flues; also an Ash-pan. The cast-iron body is so constructed that it can be sold under a full guarantee in every way.

The Diamond Rock.

THE Christian Advocate.

SATURDAY, FEBRUARY 26, 1870.

THE COLLECTIONS.

TO THE PREACHERS.

The Apostle of the Gentiles was interested in the collections for the poor, and for other purposes of interest to the church of God. Hence in writing to the Corinthians he says: "Now concerning the collection for the saints, I have given order to the churches of Galatia, even so do ye. Upon the first day of the week let every one of you by him in store, as God hath prospered him, that there be no gatherings when I come."

Although so great a preacher, he found it compatible with his work to look after the finances of the church. He "orders" the churches of Galatia and commands the Corinthians to attend to this matter systematically and punctually, on the first day of the week, and as God hath prospered them. This would be coming up to the measure of responsibility on this point, and sending credit and prompt payments to the church. We ought to so train our people in this age. If they were trained the finances of the church would work smoothly, and be fully up to the necessities that are upon us; for whatever demand God makes upon us in this respect can be met by the means at our command, if appropriated by us at the time, and as he has prospered us.

Many persons, by giving, every Sabbath, ten, twenty-five or fifty cents, or \$1, can pay \$5, \$10, \$15, \$25, or even \$50 a year, and not feel oppressed by the amount given, who could not give that amount at any one time without feeling oppressed. But for this weekly contribution the dimes, quarters, etc., might all have gone in some unprofitable way, and then, at the end of the year, the deep regret that "I have nothing to pay" would be all that the church would get. So thousands have had to regret at the end of the year. So the church has lost millions of dollars that would have come into her coffers if the people had only been trained to give according to the Scripture rule. Are the preachers to blame for this? Have we instructed the people in our sermons on this subject? If not, blame attaches to us! We ought to amend; then the people will amend. Improvement will always succeed proper instruction—in some, if not all.

Some ten years ago or more a journeyman mechanic, who had a wife and two children to support, remarked to me "that if people would observe the Scripture rule for giving, the pecuniary resources of the church would be immense; that any one would be surprised at the amount he could give when compared with what he had given previously. In the spring of 1851 you made an appeal to us in our village in behalf of the missionary cause. I had nothing to give, and felt very badly about it. Why was it so? It came up in my mind. I worked hard and lived hard, and yet had nothing to give to the cause. I could hardly ever have anything to pay toward the support of our pastor. I felt greatly troubled about it. But you quoted Paul's injunction to the church at Corinth: 'Let every one of you lay by him in store, upon the first day of the week, as God hath prospered him.' That fastened upon my mind. I thought of it, prayed over it, and made my resolution to do according to that injunction. So on Monday morning my first work was to make me a box to put the Lord's money in. That week I made \$5, and on Sunday morning put fifty cents into the box; for you had said the scriptural assessment was one-tenth. Next week I made \$50, and put seventy-five cents into the box. And I have made that amount to \$15 per week ever since, and have deposited one-tenth of the amount in the box every Sunday morning. I have paid what the stewards have assessed for the pastor, and have had something for the Bible cause and

for the missionary cause, and other calls that have been made on me for the church. I have never lived so well in my life as since I entered upon this resolution. More than that, I have not earned a dollar without collecting it, while I have many old claims for work in other years which I will never collect. I have been astonished at the amount I had to give to the good cause. It is the best plan for the man and for the church."

I know something of what this brother has done. Who will go and do as he has done? Let the preachers give the instruction, and then expect the fruits. Accustom the people to give every Sunday or week-day, where you preach. Let it be understood that collections will be taken every time there is service, and the finances of the church will double in twelve months over the past.

Will the preachers consider this, and act at once and perseveringly? Let us see what we have to do this year. We have to collect—

1. For superannuates and widows. They are needy.

2. For the Bishops. They give their whole time to the work, and ought to be well supported.

3. To defray the expenses of the delegates to the General Conference. That ought to be done soon.

4. For domestic missions. A very important work, that the waste places may be occupied and made to bloom for the Lord.

5. For foreign missions, that the people who sit in darkness may receive light and walk in it.

6. Then the old missionary debt, that ought to have been paid before it was made, and would have been if we had given the Lord his part of what we made, and is now an incubus on us.

7. The Bible cause, that God's word may be in every house.

Now it will not do to let all these collections alone till the last half of the year. If we do we will come to Conference with very little money for these objects or for ourselves. If some steward should say, "You had better let these collections alone until you see how your own salary comes out," do you push on the harder, and tell him it is his duty to look after your salary, and that if he wants to get any money for that purpose he had better be at work, as you intend to get every dollar you can for these objects. That is the best way to get all that may be due you for your support. He that soweth shall reap. HELMS.

STONEWALL INSTITUTE.

Located 13 Miles North of Selma, Ala.

After a week's recess for Christmas the exercises of this School for Boys will be resumed on Monday, January 3, 1870.

It affords the Principal peculiar pleasure to announce three facts:

1. He has engaged the services of that thorough teacher and master of his art, with ten years' experience as an instructor, Mr. James J. Williams, to instruct in the study of the Mathematics usually taught, including Book-keeping and Field Surveying.

2. He has on hand at the Institute, and has had since October last, the most and most studious boys that for two years have been under his instruction.

3. Three of his pupils of 1868 have taken premiums this year at three different Universities—the first in the South—a fact furnishing the highest possible endorsement of his ability and skill.

Two features of this School distinguish it from most others: its teachers are on the ground all the time, and actually give instruction nine hours per day; and each instructor is limited to twenty pupils.

The habits and morals of its inmates are parentally cared for, all being treated as gentlemen, and all being required to meet the gentleman, the honor of young men being constantly elevated in all particulars. And to aid in establishing these results, the Bible is reverenced as authority, its truths being studied and taught in uniform lessons each Sabbath, with ministerial services regularly performed, and the feeling of home is infused into the mind and heart of every student.

Charges from January to July 1, 1870, for board, tuition and washing, will be \$175, paid on entering, or in a thirty days' accepted draft on Mobile or Selma, with \$10 on deposit for books. Payments may be made to W. S. Barrow, Selma, Alabama, or Foster & Gardner, Mobile, Alabama.

In the elementary parts of education, even in writing, spelling and reading, which are taught to all, this School defies comparison and invites emulation. Thoroughness in every department is the basis of progress.

The location of the Institute is in the quiet country, and is distinguished for its healthfulness. Here no clear shops or liquor saloons distract the mind or corrupt the morals of the students. This gives its pupils great advantages in learning books and acquiring habits of close thinking. Its patrons are at all times invited to visit and see for themselves the admirable daily schedule of duties and all here executed by both teachers and pupils.

As all are vitally interested in sustaining an institution whose standard of morals and thoroughness of scholarship are so unquestioned, the Principal confidently presents its claims to the public, pledging to that public to give the constant and undivided attention to the interests of the school.

As the number of students will be limited, those parties intending to send will please at once address the undersigned.

D. C. H. CUNNINGHAM, President, Near Selma, Alabama.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Pennsylvania, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. H. Walker, of New Orleans, has charge of the Mathematical department. Terms: Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address J. W. BLACKMAN, New Orleans.

WORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

will reopen SEPTEMBER 22, 1869. Provision will be made for all who apply for admission.

To send your daughter here will cost you \$20 for the term of ten months, or first weeks. This amount will pay for board, fuel, lights, washing, tuition in English, English text books, shoes, pencils, and all the stationery used in the school room. A deduction of \$50 will be made for ministers' daughters.

All the branches are taught. Our music teachers are believed to be unequalled. Music and the Languages are extra.

Send for circular.

SCHOOLS AND COLLEGES.

CENTENARY COLLEGE, JACKSON, LA.

was established by the State of Louisiana in 1828, and transferred to the Methodist Episcopal Church South in 1845. It is now under the joint patronage of the Mississippi and Louisiana Conferences.

The College exercises were necessarily suspended during the war, but were regularly resumed, after reorganization, on the first Monday in October, 1868. The approaching session will open on the first Monday of October next.

Tuition, \$15 per annum, payable semi-annually in advance. Boarding can be obtained at from \$20 to \$25 per month.

The Buildings, Libraries, Apparatus, Laboratory and Society Halls, the location in point of beauty, health, ease of access and good society, are all unsurpassed by those of any institution in the Southern States.

The past history of the College is the pledge of its future prosperity.

The Board and Faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the young men committed to their care, in both Preparatory and College Departments.

The old students, alumni, and friends of the institution are requested to give publicity to the full reorganization and opening of the College, as stated above.

W. H. WATKINS, President.

MARTHA WASHINGTON COLLEGE.

ABINGDON, VIRGINIA.

Spring Term opens FEBRUARY 16, 1870. Short recess in summer, and two months' vacation in winter.

As a great part of our patronage is from the Cotton States, we have made this arrangement to meet the convenience of our Southern patrons.

Young ladies remain during the summer. Parents who visit the Virginia springs and mountains retreat see their daughters here. They return to the Gulf States in winter.

College located immediately

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited more animation since our last issue. A fair business has been done in most branches of the wholesale trade in supplying the demand from the country for spring goods, and to replenish broken stocks. The receipts of molasses, which have been moderate, have sold readily on landing, at rather stiffer rates. The business in Western produce has been mostly confined to the local trade, but, with light stocks, prices generally have ruled more in favor of sellers. There has been some demand for export, but without resulting in sales of any magnitude.

We have no new feature to notice in our accounts from the interior, which still report considerable accumulation of cotton at the river landings and railroad stations, and, as the tributaries are still at a good navigable stage, the receipts continue liberal, with a fair prospect that they will prove considerably larger than was anticipated earlier in the season.

The river has fallen four inches since our last, and is now three feet four inches below high water mark.

CORRIG.—The following are the arrivals since the eighteenth instant:

Louisiana and Mississippi	bales	24792
Lake	"	163
Florida	"	119
Texas	"	385
Total		27469

On Saturday the demand was slack throughout the day, and with an accumulating stock factors were compelled to make further concessions, notwithstanding which the business was confined to 3,100 bales, at an irregular decline of $\frac{1}{4}$ to $\frac{1}{2}$ c, good ordinary closing at 22 $\frac{1}{2}$ to 23 $\frac{1}{2}$ c, low middling at 23 to 23 $\frac{1}{2}$ c, and middling at 23 $\frac{1}{2}$ to 23 $\frac{3}{4}$ c. On Monday, under the depressing influence of a marked decline at Liverpool and New York, together with a falling off in exchange and liberal receipts, factors met the demand still more freely, and 6,600 bales changed hands, at irregular prices, showing a further decline of $\frac{1}{4}$ to $\frac{1}{2}$ c. On Tuesday the market opened with a fair inquiry, and a considerable business was done early in the morning, partly at previous rates, but mostly at still easier prices, showing in many cases a decline of $\frac{1}{4}$ c. Later, however, encouraging telegrams from Liverpool inspired a better feeling, and quite an active business was done, mostly at Thursday's figures, the sales summing up 10,000 bales.

This makes an aggregate for the past three days of 19,700 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 784,035 bales, against 651,884 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest date, as compared with last year, is 453,877 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 219,843 bales to Great Britain, of 23,255 to France, and of 61,084 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	20 $\frac{1}{2}$ to 21 $\frac{1}{2}$
Good ordinary	22 to 22 $\frac{1}{2}$
Low middling	22 $\frac{1}{2}$ to 23
Middling	23 to 23 $\frac{1}{2}$
Strict middling	23 $\frac{1}{2}$ to 24

Flour.—The demand has again continued good, at still firmer prices, with a light supply and a scarcity of the medium and lower grades, the descriptions most in request.

Corn.—With continued light supplies and a good demand since our last review, prices have again advanced materially.

Monetary.—Gold opened on Tuesday at 119 to 119 $\frac{1}{2}$ (against 118 $\frac{1}{2}$ at New York, the rate published in the morning papers), and closed at 119 to 119 $\frac{1}{2}$. The movement in silver has been of limited extent, the only sales reported being \$1,200 in American half dollars on Saturday at 118, and \$5,000 on Monday at 117.

The sales of warrants include \$1,700 Metropolitan Police on Monday at 77 to 78, and \$2,500 on Tuesday at 78 $\frac{1}{2}$. Dealers buy at 76 $\frac{1}{2}$ for Metropolitan Police, and 72 to 75 for State, and sell the former at 78 $\frac{1}{2}$ and the latter at 74 to 77.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MARCH 5, 1870.

NO. 7.

NEWS OF THE WEEK.

DOMESTIC.

Washington, Feb. 25.—After five hours' discussion, in the presence of an immense audience, the Senate, by a strict party vote, admitted Revels, of Mississippi, to his seat. Revels was escorted to the Vice President's desk by Wilson, and took the iron-clad oath. There was considerable agitation in the galleries, but no open demonstration. Ames' credentials were presented and referred. There is considerable feeling against him in the Senate. Mr. Revels is seated next to Mr. Brownlow, and opposite the side chamber from the Democrats. The Mormon preachers have been driven from East Meadows, Long Island.

The Indians throughout the Lake Superior region are starving. Strassburg, N. Y., Feb. 25.—The Methodist Episcopal Convention in session here tabled a resolution favoring further overtures for reunion with the Church South.

Washington, March 1.—The Senate, in executive session to-day, finally confirmed Judge Strong to the Supreme Court, and dismissed the nomination of Mr. Bradley, but finally adjourned, with the understanding that the vote should be taken to-morrow.

The Committee on Foreign Affairs of the Senate had Cuban affairs again under consideration to-day, but no action was taken.

Jackson, Miss., March 2.—The examination in the Yergor case was waived, with the view of applying immediately for a writ of habeas corpus. There appears to be no doubt that Mr. Yergor will be bailed. The case will probably be tried to-morrow.

Jackson, Miss., Feb. 26.—The Louisville excursion train left Water Valley at three P. M. to-day for New Orleans.

Charley McCenico, one of the wounded of the Oxford catastrophe, died at Water Valley at ten o'clock to-night.

Grenada, Miss., Feb. 26.—The Southern bound mail train fell through a trestle, two miles south of Oxford, at about five o'clock yesterday afternoon.

Fourteen persons were killed and a great many wounded. The wounded and killed were taken to Water Valley this morning.

Have not been able to ascertain the names of the killed, as the wires are badly broken by the falling cars. Two ladies were killed.

The Northern bound train on the Mississippi Central road ran off the track south of Grenada, at ten o'clock last night.

The sleeping car was thrown from the track and rolled down an embankment, but no one was seriously hurt.

Water Valley, Miss., Feb. 26.—The following additional particulars of the accident on the Mississippi Central Railroad have been received: There were five cars precipitated through the Buckner trestle, two miles south of Oxford, Mississippi, by which fifteen or twenty lives were lost, and fifty to sixty wounded.

The following are the names of the killed: G. W. McDonald, round master, Bolivar, Tenn.; Colonel Alexander Speers, Bruden, Miss.; L. C. Morehouse, Elkhart, La.; Stephen W. Coon, Illinois; R. B. Moore, Brighton, Ill.; Thomas Watson, emigrant; Mrs. Ann Turner, Glasgow, Scotland; a woman unknown, and two children and two colored brakemen.

Wounded: Colonel Sam. Tate, Charley McCenico, E. Naudy, W. Taliferro, all of Water Valley; Sam. Frazier, Nashville, Tenn.; C. R. Boyd, Louisiana; H. C. McCarter, route agent, Jackson, Tenn.; S. Lehman, Jackson, Miss.; S. J. P. McDowell, Texas; Charley Young, C. Hildobrand, Illinois; Richard Bradford, Alabama; Captain A. B. Schell, Louisville, Ky.; James Moore, colored; W. J. Berryman, wife and child, from Glasgow, Scotland; a lady, name unknown, going to Texas, and an emigrant family of ten or twelve persons, all more or less injured.

The wounded are being well cared for by the citizens of Oxford and Water Valley. The bodies of most of the killed were sent to Oxford. There are many others injured whose names have not yet been ascertained, mostly emigrants.

Oxford, Miss., Feb. 26.—Colonel Sam. Tate was nearly suffocated under the mass of passengers thrown upon him, but he is now comfortable. The special train from Louisville was only half an hour behind the wrecked train, with a party of

Northern and Western railroad men, with their ladies and a few passengers. The party are all safe and assisted in securing the victims of the wreck. The wounded were chiefly brought to Oxford, where the citizens proffered every assistance possible. The Southern bound passengers will proceed to-day.

THE RECENT HORRIBLE ACCIDENT ON THE MISSISSIPPI CENTRAL RAILROAD.—Statement of one of the Passengers.—From Dr. Settle, a prominent railroad man, and a passenger on the Mississippi Central Railroad train, at the recent accident, we learn the following interesting particulars of that disastrous occurrence:

The train was run off the track at Buckner's trestle, crossing Buckner's run, two miles and three quarters south of Oxford, on the way to this city. It arrived an hour late at Oxford, and the conductor, according to the doctor's statement, received instructions from Colonel Tate, the president of the road, to run fast and endeavor, if possible, to make up the time lost. The trestle is about one hundred and fifty feet long and fifty feet high.

The doctor states that it has been frequently reported within the last three months as unsafe, and the section boss, who lives close by, has, on many occasions, flagged the up trains and directed the engineers to run slowly.

Colonel Tate did not believe these statements, and the train at the time of the disaster was running at the rate of between thirty and forty miles an hour. The locomotive passed over safely, but sprang the track apart at the north end of the trestle nearest Oxford. The baggage car struck the first bent, causing it to settle between eight and ten inches. It then jumped to the right of the road and fell over. The express and postoffice car followed, landing on the top of the baggage car. A second class car fell over, parallel with the stream. The forward coach followed, dropping to the bottom of the stream in a position parallel with the road. With one exception all the passengers in rear of this car were instantly killed. Among the number was Mr. McDonald, road master.

Two persons in the forward portion of the car were badly injured. The last coach fell on the end of the latter, crushing it in and resting at an angle of about forty-five degrees. Every seat, with one exception, was loosened from its fastenings, and all the passengers were thrown to the bottom of the car. Colonel Tate, the president of the road, was in this coach, standing just in front of the stove. Three persons were killed, and every other passenger more or less injured. Nineteen dead bodies were taken from the ruins, forty persons were badly wounded, and about one hundred others slightly. The passengers remained at the wreck until nine o'clock in the evening, when they were taken by another train to Water Valley. No one had been informed of the accident, and no provision whatever had been made for the comfort of the wounded. It was not until nine o'clock the next morning that any of the officers of the road made their appearance. At that time the treasurer called at the hotel and directed the proprietor to refund all money paid by passengers for entertainment. After that time every comfort was provided for the sufferers. The excursion train followed, being ten minutes behind at Oxford. But for the exertions of Mr. Edger, of the Burlington (Missouri) Railroad, it would have met a similar fate. Escaping from the wreck he succeeded in flagging the train a few hundred yards in the rear. It contained about one hundred delegates to the General Freight Agency Convention, with their families. Reaching the scene of disaster, each and every one rendered every assistance possible, men and women tearing up their underclothing to furnish bandages for the wounded. They remained with the sufferers until eight o'clock P. M., when they returned to Oxford. The next morning they resumed their journey, and were transferred over the break, reaching this city Sunday morning.

Prominent among those who rescued the dead and wounded: Captain Dave Campbell, of St. Louis, Mr. Henry Whemhomm, of Louisville, Ky., Mr. J. Gudgeon, of St. Louis, Matt. F. Brien, of the Southern Express. The section master and his family offered every assistance within their power.

Great depredations were committed by the negroes, who flocked from all directions and stole an immense amount of clothing and other property.—New Orleans Times.

THE COLORED VOTE.—The New York Sun says there are 850,000 colored voters, of whom 790,000 dwell in the sixteen late slaveholding States, leaving 60,000 for all the others. Of these 60,000, 7,500 are in New England, 41,000 in the five central States of New York, New Jersey, Pennsylvania, Ohio and Indiana, and 8,500 in the remaining ten Western States. In particular States there are in Delaware, 4,500; Maryland, 34,000, which are larger figures than the Democratic majorities in those States. In Connecticut there are 2,000; in New Jersey, 4,500, and in New York fully 12,000; in Pennsylvania, 13,000; in Ohio more than 8,000, and in Kentucky not far from 42,000, which the Sun thinks will seriously endanger or reverse the Democratic majorities in all those States, and therefore the Sun warns the Democratic party against making any fight against the colored brethren.

The fifteenth amendment is undoubtedly a nicely laid plan to insure permanent Radical ascendancy in the United States, but the proverb says such plans "gang at a angle." The plan to carry the South by negro votes, the Radicals themselves admit, will not be worth a bean straw unless supplemented by force and fraud. It is a water power good so long as you carry the water up hill and let it run down.

And in relation to the other States we imagine the scheme will be hardly fixed up before the Radicals will find that new issues—the tariff and labor questions, for illustration—have disarranged party organizations to an extent which will seriously confuse calculations based on a supremacy secured by the negro vote.—New York Bulletin.

FOREIGN.

HAVANA, Feb. 25.—Captain General De Rojas has issued a decree freeing two thousand negro prisoners of war who had been held out by the government. He is about issuing a decree to provide special courts for army, navy, churchmen and foreigners.

Eighteen members of the Cuban Junta that were at Santiago de Cuba have been executed.

WILHELM WACKERNAGEL.—Wackernagel, one of the greatest, if not the greatest, of "Germanists" after Jacob Grimm, was born in 1806. As early as 1827 he produced some of the first fruits of his studies, and in 1833 he published his history of the German hexameter and pentameter since Klopstock. In the same year he accepted a chair at the Basle University, and civic duties and honors were soon superadded to his professional calling. He became successively member of the Great Council and of the Stadtrath of that ancient city, which had first bestowed upon him the honorary citizenship when the Prussian authorities had, in the political terrorism of the period, withdrawn from him his Prussian citizenship. Wackernagel's activity was as restless as it was many-sided. Philology, history of literature, of art, of manners and customs, philosophy of art, comparative mythology, and jurisprudence—he has written on all these subjects, and on all of them as a master. Nor was he wanting in poetical genius. Many and charming are the contributions with which he has enriched the German song books of the present and future generations. He has died in the fullness of his powers and in the midst of many labors.

A LOTTERY SUIT in New York has just revealed some extraordinary facts, from which is shown the cause of much of the poverty and crime in that city. No less a sum than \$6,000,000 per annum is realized by the sale of lottery tickets, and mostly in small sums from the wretched and infatuated people, who cannot afford to spend even the smallest sum for anything but the necessities of life. The court was called into requisition in order to make an equitable distribution of the ill-gotten spoils.

A CORRESPONDENT of the Cincinnati Commercial states, upon alleged good authority, that every grocery and saloon in Nashville, except one, were drank dry of whiskey on Christmas, and were forced to suspend. Throughout the State there were about twelve murders, and one hundred and fifty drunken brawls, to commemorate the day.

MELANCHOLY falls upon a contented life like a drop of ink on white paper—which is not the less a stain because it carries no meaning.

LETTER FROM DR. LIVINGSTONE.

The Cape Argus of December 1 publishes the following letter from Dr. Livingstone:

MY DEAR FRIEND: I have not had an opportunity of sending to the coast since I left it till now, and this is by a party of Black Arab slave-traders from Bagamoro, near Zanzibar. They cannot give me time to write, as they have spent all their goods and are now eager to be off and are hungry. I cannot send anything to Mr. Mann, but I must say that I feel extremely thankful to him for all the trouble and work he has spent on my position. I have read his long letter twice or three times over, and will answer it all, and be ready for post at Tangaika. I have not taken my latitude here even, but reckon that I am about ten degrees ten minutes south, and thirty-one degrees fifty minutes east. We are probably four thousand five hundred feet above the sea, but I guess that from the barometer, which stood at 30.06 inches at the sea level, now showing 25.50 inches. By the way, I use Prof. Burges' tables for both barometer and boiling point, but I am not sure as to a multiplier for the difference of latitude and temperature other than thirty-two degrees. I have no other logarithms with me. I have come a long way about; could not go around the north end of the lake (Nyassa) partly from want of food, partly from fear that my Johanna men would bolt at the first sight of danger; and they did skedaddle, after all, at the south end, on the mere report of danger in front from the Maruts. Their eyes actually stood out with fear, as those of an ox sometimes do. I was then left with a following of only nine Africans. The Johanna fellows were such inveterate thieves, constantly stealing from their loads and from the gardens of the people, that it was a relief to get rid of them. I would have crossed at the middle of the lake, but the Arabs avoided me as if I had had the plague. No sooner did they hear that the English were coming, than off they scampered through bush and brake across pathless forests. "Do it the hindmost." Seven slaving parties did so, and the owners of two dhows, now on the lake, kept them well out of the way, lest I should burn them as slaves. The English name was for the first time an inconvenience. The Arabs see the advantage of vessels on the lake for promoting that which a vessel alone would check. The highlands of Bagamoro extend up parallel with the lake to an unknown distance. The water-shed is almost fifty miles east of the lake, and there we counted fifteen running burns in one day's march—the sources of the Rovuma. Here the same process of depopulation goes on. It is in the lands of the half-caste Arabs. It is Agawa against Manganya, or, as they are called, Walyan against Wanyana. It was on this high and cool country that Bishop McKenzie hoped to have his mission in time. At the town of Mataka, opposite the middle of the lake, and fifty miles east of it, we saw a great many patches of English peas in full bearing and blossom in July. The people understand the season to plant them in, and wheat would undoubtedly flourish if irrigated by one of the numerous springs which run among the hills. It is a land of plenty. But instead of the three weeks' easy canoe sail up the Zambezi and Shire, the other route took three and a half months weary treadmill trudging. I had, however, an intolerable drug in the Sepoys, and sent them all back from Mataka. I heard afterward that seven of them remained to let their pay run on. * * * I feel more and more that Africa must be civilized from within. No people can be more hopelessly bigoted than the coast-slaving tribes. Mataka is a better subject than any to be found within two hundred miles of the coast. (Here follows a description of a gang of slaves he met.) We visited the three most important Agawa or Wanyana chiefs near the south end of the lake, and they went to Katosa or Kroomansus, an old friend, who thought that plying us with huge baskets of beer was the proper way of showing respect. We wanted to go up to Kirk's Range and avoid the Mazetu, but the people below were afraid of those above, because they had driven back a party of slaving Arabs. Katosa at last turned out with his wives to carry our extra loads, rather than see his old friend at a standstill, and the fat ladies soon shamed the young dandies with their sharp tongues. Kirk's Range is just the

edge of a plateau, high and cold, and densely peopled by Manganya in their primitive state. They go by different names, as Kanthunda—these who live on mountains jutting out of the plateau; Chipeta—these who live more on the plains, but pure Manganya, spinning buaz and working iron. It is too cold, apparently, for cotton. Their huts are plastered inside and out—even the roofs—to defend themselves against the cold. One village was scarcely over a mile from another. They were extremely hospitable. I gave a cloth to the headman of the village where we spent the night, and he immediately gave us all a bountiful supper, and breakfast next morning. * * * They had never slaved, and I spent a good deal of time in trying to warn them against commencing it. We went westward till we imagined we were beyond the longitude of Mazetu, and then turned to the north, making for the point we left off in 1863. We came at length to parts where Mazetu had plundered the year before, and once nearly walked into the hands of a part of them out plundering. We had killed a hartebeeste, and were surprised to see two parties of villagers pass us at a trot. They had escaped from the villages to which we were bound, and the Mazetu were actually there. We turned westward again, but never came near the Portuguese route to Cazembe. The map-makers have placed it too far east. We passed the Leangwa in 12.45 and about thirty miles west of Nombume; then the great Leangwa valley—the bed of an ancient lake; then mounted the Babiro plateau in the southern borders of eleven degrees south. The water-shed between Chambeze (the Zambezi it is here called) and Leangwa rises to six thousand feet. Crossing the Chambeze in latitude 10.34, we found in flood with clear water, but the line of trees which showed its actual banks were only forty yards apart, and came here on the last day of January, 1867. If I am not much mistaken, we are on the water-shed we are in search of. Luapula is in front, but I hope to tell you better about it when we reach Tangaika in May next. The Barborn country is depopulated by their own slaving. Most of the central parts of the country are covered with forests. Sohisa we passed through when it was dripping wet, for this is the rainy season, and more water falls than I ever saw in Africa. The few people had no food to sell, no animals could be seen, and we had, my friend, hard times. The few people were living chiefly on mushrooms; they could collect a half hundred weight in a short time—good, of course, but only for producing dreams of the roast beef of by-gone days. Trudging through dripping forests and across sloppy, marshy places—the feet almost constantly wet, and gnawing hunger at the inner man—soon took the flesh off our bones. The want of salt made the gnawing sensation worse. Of sugar I scarcely remember the taste, but I am like a certain breed of pigs that take on fat kindly. We shall rest a fortnight here. Lost all our medicine, making me feel as if sentence of death by fever had, as in my poor friend McKenzie's case, been passed upon me. The black postman is at the door of my hut, and telling me to be quick. So I conclude, with much love to you all. From yours, ever affectionately, DAVID LIVINGSTONE.

THE GREAT AUTHORITY.—The mother of a family was married to an infidel who made jest of religion in the presence of his own children, yet she succeeded in bringing them all up in the fear of the Lord. She was asked one day how she preserved them from the influence of a father whose sentiments were so opposed to her own. This was her answer: "Because to the authority of a father I do not oppose the authority of another, but that of God. From their earliest years my children have always seen the Bible upon my table. This holy book has constituted the whole of their religious instruction. I was silent that I might allow it to speak. Did they propose a question, did they commit a fault, did they perform a good action, I opened the Bible, and the Bible answered, reproved or encouraged them. The constant reading of the Scriptures has wrought the prodigy which surprises you."

WHEN man revolts against the gospel he takes another master—himself; one who renders all inferior masters possible.

General Conference Daily Christian Advocate.

A daily paper, to be styled the General Conference Daily Christian Advocate, will be published in the city of Memphis, Tennessee, during the session of the approaching General Conference. Arrangements have been made with the office of the Memphis and Arkansas Christian Advocate for its publication.

No previous session of the General Conference of the Methodist Episcopal Church South has been invested with so much importance as the one to be held in Memphis, commencing May 4, and to none has the church looked with more anxious interest.

In order to place the daily in the hands of all who desire to keep fully and promptly advised of the proceedings of the General Conference, we offer it at the exceedingly low price of \$1 per copy.

Any preacher or other person who may send us ten subscribers shall receive an extra copy free.

Subscriptions and money may be sent to the editors of our church papers.

All the traveling and local preachers of the church are our agents.

We request the subscribers to be sent as early as possible.

A. H. REMOND, Agent.

LEARNING IN THE PULPIT.—Some of the Rev. Mr. Romaine's congregation, thinking his style of preaching too common and plain, requested him to exhibit a little more learning in the pulpit; accordingly, the next opportunity he read his text in Hebrew. "Now," said he, "I suppose scarcely one in this congregation understands that." He then read it in Greek, and added: "There may be one or two that understand me now. I will next read it in Latin." He did so, and said: "Possibly a few more may comprehend me, but the number is still very limited." He last of all repeated the text in English. "There," he continued, "now you all understand it; which do you think is best? I hope always to preach as that the most ignorant person in the congregation may understand me."

HOW INCALCULABLE would the tone of conversation be improved if it offered no exceptions to the example of Bishop Beveridge: "Resolve never to speak of a man's virtues to his face, nor his faults behind his back;" a golden rule, the observance of which would banish flattery and defamation from the earth. Conversation stock being a joint and common property, every one should take a share in it, and yet there may be societies in which silence will be our best contribution. When Isocrates, dining with the King of Cyprus, was asked why he did not mix in the discourse of the company, he replied: "What is reasonable I do not know, and what I know is not reasonable."

THE PERSON OF CHRIST.—Rev. William Arthur remarks that men who loved Christ with a love stronger than death wrote his life, but left no hint of his height, complexion, features, or of any point that could help the mind to a personal image. Others wrote long epistles, of which he was the Alpha and Omega; but his form was as much kept secret as the body of Moses, hidden by the Almighty in an undiscovered grave. The Christian toms and relics of the first centuries show no attempt to make an image of Christ. Too deep a sense of the divine rested upon the early church to permit any attempt to print the human as it appeared in him.

WE must never fall into the delusion that the purposes of God set aside the use of means. I have heard thoughtless or captious talkers say: "If God works out his purposes, then there is no need for preaching or any other means." Ah! simpleton that thou art, if we teach you that God works out his purposes by means, how mad must you be to charge us with thinking lightly of the means!—Spurgeon.

SINCERITY is speaking as we think, believing as we pretend, acting as we profess, performing as we promise, and being as we appear to be.

WONDERFUL pleasures are no more able to satisfy the soul than the light of a candle to give day to the world.

The Christian Advocate.

SATURDAY, MARCH 5, 1870.

TIME, THAT SHAPED THE SWELLING BUDS.

BY JOHN K. STATMAN.

Time, that shaped the swelling buds,
Plumped the grape and filled the grain,
Greened the fields and leafy woods,
Must undo it all again.

Every trace of bloom is shed,
On the vine is not a grape,
Fields are bare and leaves are dead,
Nothing maketh its escape.

Time, that gave a touch of grace
Unto growing limb, and then
Rounded forth the perfect face,
Must undo it all again.

Through the locks of gold and brown
Slip the shining threads of gray;
Form and fashion tumble down,
Beauty passeth quite away.

Thus it fares with flower and leaf,
Thus it fares with man and beast,
Though the miracle be brief,
Time repeats it all again.

CHINESE IMMIGRATION.—NO. II.

ANDERSON, VA., Dec. 28, 1869.

REV. C. K. MARSHALL, D. D.—Dear Brother: I am opposed to Chinese immigration not only because our country is not in a condition to receive with safety an influx of Chinese pagans, but also because I think the introduction of coolies into the South, at present, would be an act of injustice to the negro. For generations the negro has served us faithfully as a slave, and to crowd him out of the only position in the country which he is qualified to fill, before we have given him a fair trial as a freedman, would certainly be a great wrong. When we consider his condition as a slave—his habits of dependence, want of common providence, and general ignorance of business affairs—and then consider the sudden change which abrupt emancipation brought upon him—how radically, in a moment, all his relations were transposed—it astonishes us that he has done so well. The country was in ruins. The negro was the poorest of the poor—without money, without land or home, without the simplest knowledge of business—yet he managed to sustain himself. He was deceived by false promises, and encouraged to hope for impossibilities; but under all these circumstances he has conducted himself, as a general thing, quietly, and if properly treated will, I think, make a valuable laborer. If he was able as a slave, with no stimulus but fear, to do the work which the South required, why may he not still do it? What reason is there to believe he will not do it? It would be extreme cruelty to drive him off as worthless before giving him a chance.

If the Chinese coolie is brought in to take the place of the negro, what will be done with the negro? He must live. Either he must support himself or the public must support him. He is unfit for any position among us except that of a common laborer. If the white man refuse to employ him he cannot support himself; the public must therefore take care of him. Is the South prepared to take under its benevolent supervision three millions of paupers? This phase of the subject demands the serious consideration of every white man in the South. The government will not support the negro population of the South, or if it does it will tax the South to pay the expense.

Again, I doubt if the coolie can or will render the kind of labor the South is supposed to need. He is wholly ignorant of our methods of labor, and of course ignorant of our language. Who is to teach him? With all his native shrewdness, he is a slow scholar when set to learn our way of doing things. He labors all the time under the impression that his own way is vastly superior. The coolie is in no sense—that is, the common day laborer—superior to the common negro. He has no more intelligence, no more bodily strength, no greater powers of endurance, or activity of person. Nor has he any more invention or contrivance than the negro. He will learn to use machinery as slowly, and will be as unreliable. Some Chinese are very shrewd, active and skillful, but I presume none of this class will come as coolies to work in the cotton and sugar fields of the

South. The coolie, properly, is the lowest type of Chinaman, and is worked by guilds, under regulations which his superiors impose. There is no individual independence known to this class.

If I understand what the South needs in addition to the negro field labor, it is not muscle merely, but brains also—the capacity to use machinery. The improved implements of husbandry enable a trained, reliable hand, who can use them, to do as much work (and of a better quality) as ten common men, without machinery. Now, sir, men of our own color and creed, with European brains, capable of appreciating our institutions and ready to adopt our customs, can be procured in sufficient numbers to answer all the present demands for labor in the South. They will grow into good, intelligent citizens, and not only add to the material wealth of our Southern land, but also to its intellectual and moral forces. Would not such an addition to our population be infinitely preferable to a motley horde of Asiatics?

The Chinaman will not likely come to this country with the view of becoming a permanent citizen. He does not bring his family. I presume there is not a single Chinese family, properly speaking, on our shores. He comes to make money and return, as the European goes to India and China, and with no more intention of becoming naturalized. A Chinaman will not bury his dead among us, if he can raise the means to carry them back to his native land. They have been in India and the Indian Archipelago for more than a hundred years, and yet they remain a separate and distinct people to this day, as selfish and secluded as the Jews. Roaming and enterprising as the more intelligent and adventurous traders among them are, they never forget, except perhaps in some individual cases, the "flowery land" that gave them birth. In many instances—as a general rule—where they marry abroad, as in India, and have a family, when ready to return to China they leave wife and children behind them. I need not suggest the moral condition of such communities of emigrants. I dare not describe the beastly characteristics which mark the lives of men in such a state. Heathenism knows nothing grosser, nothing worse. Mormonism is a paradise of purity compared with it.

I hope to finish all I have to say on this subject in one letter more.

I am, as ever, yours truly,

W. G. E. CUNNINGHAM.

MORAL SCIENCE.

He who aims to form a system must, first of all, clearly understand what such a system should contain, as well as what it should exclude. According to the decision of two distinguished moralists, Dugald Stewart and Sir James Mackintosh, a theory of ethics embraces only two great questions: First, whence do we derive our notions of right and wrong, of virtue and vice? and, secondly, what constitutes the essence or nature of virtue and vice? But this is a definition of ethical science as it is, rather than as it should be; embracing, like the works which it describes, only some of the elements of a complete system of morals.

It is certain, however, that every scheme of ethics should at least discuss these two fundamental questions; especially should it clearly determine the nature of virtue, and set before us a radiant image of the morally good. But where shall we find this great idea, this great central light of morality, exhibited in such a manner as to preclude doubt and banish obscurity from the mind of the beholder? From the time of Plato down to the present day the moral philosopher has labored to determine this idea, or define the common property which "makes all holy things what they are;" and yet this is still a vexed question. Is it not melancholy, indeed, that such a question should have remained so long undetermined; that the clouds and smoke of controversy should still obscure this, the most important and most beautiful of all ideal forms?

Of all those philosophers who have treated the science of morals, it seems to us that Aristotle among the ancients, and Butler among the moderns, are the two great thinkers who have shed the most light on the nature of virtue, or the idea of the morally good. Yet even in the writings of Butler this idea has not been found at all by some of his most candid and enlightened fol-

lowers. Thus Mackintosh, for example, has said that "the most palpable defect of Butler's scheme is that it affords no answer to the question: 'What is the distinguishing quality common to all right actions?'" Now if this were so, then the exalted praise which is so freely lavished upon Bishop Butler, by the author of the *Progress of Ethical Philosophy*, could scarcely have been deserved, for a solar system without a sun would not be more defective or dark than a system of morals without an idea or definition of morality in action. But while we hold that Sir James has fallen into a very grave error on this subject, we do not suppose that the fault is wholly in himself, and no part of it in the great teacher for whom he entertains so profound a veneration. For, no doubt, if the master had given that scientific precision and distinctness to his own idea of the nature of virtue, which its transcendent importance demands, he would not have been so sadly misunderstood by the disciple. If he had freed this great idea from every obscurity, and caused it to shine forth with a keen, clear radiance, no such stricture would have found a place in the *Progress of Ethical Philosophy*. One thing, then, which a theory of ethics should aim to accomplish is to clear up Butler's idea of "morality in action" (for on this subject we hold his idea to be the true one), and set it forth in such a manner that it can neither be overlooked nor misunderstood.

According to Butler, all actions put forth in obedience to conscience are right actions, while those done in violation of conscience are wrong. Such is his criterion of *morality in action*; and how this could have been overlooked by a student and disciple of Butler may at first view appear very wonderful. But the reason of the oversight may be easily explained. For there is a question concerning virtue in the abstract, as well as in action; in regard to the external rule of right, as well as in regard to the heart of the moral agent. Now, in regard to the external rule of right, or to virtue in the abstract, the system of Bishop Butler is silent; and this silence truly constitutes its most palpable defect. Sir James having confounded these two ideas in his mind, the one relating to virtue in the abstract and the other to virtue in the heart of a moral agent, and, seeing that Butler is silent in reference to the one, has unwittingly pronounced him silent in relation to the other. McCosh, in his work on the *Divine Government*, repeating the stricture of Mackintosh, has missed the mark in a still more glaring manner; for he says: "What quality, then, in the mind of the agent, may be regarded as constituting virtue? Butler does not answer this question." In fact, this is precisely the question which Butler does answer, and shows that a conformity to conscience is that which constitutes virtue in the moral agent. He fails to answer the other question, however, as to what constitutes virtue, not as it is a quality of the mind, but as it is the characteristic of the external rule of right. Hence, although his work is the most magnificent fragment which any one mind has ever contributed to the science of morals, yet it cannot with propriety be dignified with the appellation of a system of ethics. It is at best but a one-sided or half scheme.

Even this most acute of moralists seems to have confounded the idea of virtue in the abstract with virtue in the concrete; and this appears to have been the source of the above named huge defect in his theory of ethics; for he says: "There are two ways in which the subject of morals may be treated. One begins from inquiring into the abstract relations of things; the other from a matter of fact, namely, what the particular nature of man is, its several parts, their economy or constitution; from whence it proceeds to determine what course of life it is which is correspondent to this whole nature." Now, as we shall hereafter more plainly see, these are not two methods of treating the same subject, for each relates to a different subject—the one to the abstract rule or standard of virtue, and the other to virtue in the life and conduct.

This confusion of ideas is by no means peculiar to Bishop Butler and Sir James Mackintosh. It is, indeed, common to most writers on moral philosophy. No other ambiguity can, perhaps, be mentioned, which has done so much to darken and perplex the whole science of morals. It explains the reason why Clarke, who treats of "the abstract relations of things," has given us only one-half of a system of morals; and why Butler, who considers the internal make and constitution of the human mind, has produced only the other half. It also explains the reason why each of these half schemes has so often been mistaken for a complete system of ethics, and why they have been supposed to conflict with each other. There is in reality no conflict between them; and until their mutual agreement

and correlation be seen, a system of ethics will be impossible.

The same confusion of ideas has also frequently led the advocates of expediency, or of the will of God, as the standard of right, to deny the supremacy of conscience, and *vice versa*. It is a great mistake of most ethical writers that they conceive a conflict to exist between the supremacy of conscience, as advocated by Butler, and the adoption of expediency, or the relations of things, or the will of God, as the rule of right; and that the one or the other of these hostile rules must be made to give way before our knowledge can be made to assume a scientific unity and symmetry of form. Whereas all these several schemes or doctrines relate to virtue in the abstract, or to the external standard of right, and do not touch the question respecting the supremacy of conscience over the actions of the mind within. Their office and function is not to supplant, but to enlighten the conscience. The external standard of right, be it what it may, the relations of things, or expediency, or the will of God, is a light for the intelligence, and not an immediate law for the will. Conscience is this law. Be that standard what it may, it can never annihilate, and should never be allowed to obscure, the indubitable facts of conscience, of this shining perception of right within us, and this felt approbation thereof. The external standard of right is, indeed, no more opposed to the office and functions of conscience than the light of the sun is to the organ of vision by which it is seen. Hence those who, out of a zeal for expediency, or the will of God, deny this doctrine of a conscience, act about as wisely as one who, from his admiration of the glory of the sun, should repudiate the functions of the eye. And, on the other hand, those who, from a devotion to the supremacy of conscience, overlook or undervalue the importance of an external standard of right, are very like those who, because they possess good eyes, should despise the light of the sun. As in the system of God's world both are found to exist, so in a system of ethics both should be fairly represented—the one as the eye, and the other as the sun, of the moral universe.

Such a system, then, should contain two things: first, it should show what is the distinguishing quality common to right actions, or, in other words, what constitutes virtue in the mind of the moral agent; and, secondly, it should exhibit the rule or standard by which the mind itself is to be enlightened in regard to duty. Having established the supremacy of conscience in regard to our own actions, it was an exceedingly dangerous error to speak as if this were an infallible guide, and that all we have to do is to attend to its monitions. For, indeed, instead of looking within upon our own minds with a sort of self-idolatry, we have to look without in order to behold "the light of the world." And how great soever may be our veneration for the dictates of conscience, we should never forget that it is not an enlightening principle, but a principle to be enlightened. We should never forget that, although by reason of conscience we are a law unto ourselves, yet there is a higher law, even a law unto the conscience itself, without attention to which conscience is but a dark, ignorant, crooked and perverse guide. We cannot say that Bishop Butler has been guilty of any such forgetfulness or oversight; but if he has not fallen into this great error, he sometimes seems to lean toward it, with a most alarming tendency downward. Thus, among other similar expressions, he says: "Man hath the rule of right within; what is wanting is only that he honestly attend to it." Again: "Let any plain, honest man, before he engages in any course of action, ask himself, Is this I am going about, right, or is it wrong? Is it good or is it evil? I do not in the least doubt but that this question would be answered agreeably to truth and virtue, by almost any fair man in almost any circumstances." Hence, if his doctrine be not tainted with the error in question, he has certainly not taken sufficient pains to guard his readers against so great a heresy in morals. On the contrary, his language seems frequently to countenance this heresy, and he nowhere raises a warning voice against it. Hence, even on the supposition that there is no defect in his doctrine, there is certainly a very great defect in his manner of teaching. But the truth seems to be that this defect in his teaching arose from the defect of his system, in having failed to reorganize an external standard of right. Having set up conscience as the rule of action, and demonstrated its supremacy over the little world within, he seems almost as prone to regard its oracles as infallible as if it were the light of the great world without.

Dugald Stewart, in his *Philosophy of the Active and Moral Powers*, has explicitly recognized the distinction between the internal or relative rule of right and the exter-

nal or absolute rule, as well as insisted upon its great importance. But neither the relation which the external rule sustains to the internal, nor the grand function it is designed to perform, seems to have been rightly conceived by him. His misconception on this point may be most clearly seen, perhaps, by considering the manner in which he decides one of the most fundamental and important questions in the science of morals, namely, that which relates to the criterion or test of morality in action.

What is this criterion or test, and how shall we apply it so as to determine whether an action be right or wrong? "An action may be said to be absolutely right," says he, when it is performed "with perfectly good intentions," and "under the guidance of an enlightened and well informed understanding." But suppose the understanding be not enlightened or well informed, still the action "may be said to be relatively right when the intentions of the agent are sincerely good," or, in other words, when it is performed in obedience to the dictates of conscience.

"According to these definitions," he continues, "an action may be right in one sense and wrong in another; an ambiguity in language which, how obvious soever, has not always been attended to by writers on morals." Thus, according to the author, there are two tests or standards of morality in action; and, as we judge by one or the other of these standards, the very same action may be pronounced right or wrong. If it be performed with "perfectly good intentions," and in obedience to the dictates of conscience, then it is relatively right, and the agent is free from all blame therein, for "it is the relative rectitude of an action which determines the moral desert of the agent." But if the dictate of conscience, in obedience to which it is performed, be erroneous, then is the action absolutely wrong, or wrong with reference to the external standard of right. Or, as some of the author's followers express it, such an act is right in the agent and wrong in itself! or relatively right and absolutely wrong!

Now, here the question arises, How can these things be? If an action be right in the agent, how can it be wrong in itself? or if it be morally right in one sense, how can it be morally wrong in another sense? Can light have any such communion with darkness? We agree with the author that "the distinction between absolute and relative rectitude" is "equally just and important," but yet, as managed by him, is not the distinction far from having answered the purpose for which it was introduced, namely, "to obviate the confusion of ideas arising from this ambiguity in language?" On the contrary, has it not introduced fully as much confusion as it has banished, and darkened the science of morals with fully as many enigmas as it has solved?

The all-important "distinction between absolute and relative rectitude" seems not to have been handled with any greater success by the followers of Mr. Stewart than it had been previously managed by himself. Dr. Wayland, for example, although he has strongly felt the importance of this distinction, has yet, from the want of sufficient clearness of insight, wrought it into a most elaborate piece of confusion. We refer, as the judicious student of his work may have anticipated, to his famous attempt to show that an action may be perfectly pure and innocent in the agent who performs it, and yet wrong in itself. If this be true, then we may trust that when the Almighty comes to judge the world he will punish such an action, not in the agent, but only in itself. We may trust that in all such cases He will lay the finger of his indignation not upon the innocent agent, but upon the criminal abstraction alone.

This is not all. Dr. Wayland, with Bishop Butler, maintains "the supremacy of conscience" as the rule of right. But if conscience be the supreme rule of right in action, then one would suppose that an act put forth in obedience to conscience should be deemed a right act. It may not be so, however, says Dr. Wayland; it may be conformed to this supreme rule of right in action, and yet be very wrong! Now, is not this to make conscience the supreme rule of right in action, and yet deny it to be such a rule? Is it not to make conscience supreme, and yet subordinate? to set that forth as the test of morality in action which cannot determine whether an act is moral or immoral? Or, in other words, is it not self-contradictory to affirm that conscience is the standard of moral rectitude in action, and yet pronounce an action wrong which is conformed to this standard? One would certainly suppose so, unless, like Stewart and Wayland, he should happen to have two rules or tests of morality in action. But with two such rules it is quite possible both to affirm and to deny one and the same proposition

in regard to one and the same action. This seems to be very clearly done by Dr. Wayland. He affirms, for example, the "supremacy of conscience" as a rule of right action, and yet declares that "the doing of right, and obedience to conscience" are not always equivalent terms.

In like manner, Dr. Alexander maintains the supremacy of conscience as the rule of right in action, and at the same time denies that we always do right when we obey its dictates. He begins his chapter, entitled the *Supremacy of Conscience*, with the words: "That the dictates of conscience should be obeyed is one of the most evident perceptions of the human mind." Surely, then, we shall always do right when we obey its dictates, or, in other words, if the dictates of conscience should be obeyed, then we should obey them. Surely we shall commit no sin in obeying that rule which we are under obligation to obey. Is not this clear? By no means, answers Dr. Alexander. "It is true," says he, "if a man's conscience dictates a certain action, he is morally bound to obey; but if that action is in itself wrong, he commits sin in performing it, nevertheless." That is to say, a man may commit sin in performing the very act which he is morally bound to perform!

The truth is, that this unintelligible way of talking, this perplexity and confusion of thought, springs from the circumstance that all these learned authors have adopted two rules of right in action; the one internal and the other external. Hence it is that an act is pronounced wrong in itself, when viewed in reference to one of these rules; while the agent, since the act is put forth in obedience to the other rule, is held to be innocent and free from blame. Or, on the other hand, it is declared to have "committed sin" in the perpetration of an act which is "morally bound" to perform. Surely no two such rules can exist in reality, and every attempt to legitimate such confusion of thought must originate in dark, undeveloped and unilluminated principles of ethics.

The rule of right in action is not and not two-fold. As the learned authors themselves teach, conscience is the supreme rule of right in action, and consequently every act put forth in conformity with its dictate is a right action. Thus conscience is the one supreme, universal and exclusive rule of moral rectitude; and if we introduce any other or higher rule of morality in action, we shall violate that unitary principle and disturb that harmony of thought which are so essential to the perfection and beauty of science.

What shall we do, then, with external or absolute rule of right? This is a rule, we reply, not for *will*, but for the *intelligence*. There are two rules of right, it is true; not two rules of right for the *act*—by one—that is, by conscience—try the net or the will; and by the other—that is, by the external absolute standard of right—we test the conscience itself. If the action be, is the act right? this is decided by a reference to conscience, which, as has been said, is the one supreme, universal and exclusive rule of rectitude for the agent. But if the question be, Is the judgment right, is the conscience error? then we appeal to the absolute standard of moral rectitude, which is the one supreme, universal and exclusive rule for the intelligence and conscience itself. Hence as we have not two rules or tests for one and the same thing, there need be no discordant utterances in our philosophy or lack of harmony in our views. We submit each thing by its own appropriate test, and pronounce it right, wrong, good or bad, according to what it agrees or disagrees with the standard to which it is referred.—*Scott's Review*.

CEMENT FOR POLISHED STEEL.—Turkish recipe has come to notice for a cement used in fastening diamonds and precious stones to metallic substances, which is said to answer equally well in strongly polished steel surfaces, even when they are exposed to moisture. To solve five or six pieces of gunmetal, each about the size of a pea, in as much alcohol as will suffice to render it liquid. In another vessel dissolve in brandy as much isinglass (previously softened in water) as will make a two-ounce quantity of strong glue, adding two pieces gum ammoniac, rubbing until dissolved. Mix the whole with beer and bottle for use.

A GERMAN has discovered a kind of printing ink, superior to now in use. The essential part of the discovery is that, by a peculiar process, the ink can be entirely moved from the surface of the type at a cost of half a dollar for each hundred pounds of printed paper, and the material is then ready for use again.

One solitary philosopher may be great, virtuous and happy in depths of poverty, but not a nation.

The Christian Advocate.

SATURDAY, MARCH 5, 1870.

FATHER TOM AND THE POPE,
OR A NIGHT AT THE VATICAN.

CHAPTER V.

THE REASON WHY FATHER TOM WAS NOT MADE
A CARDINAL.HURROO, my darlings!—didn't I
tell you it 'ud never do? Success
to build John Tuam and the old
similarity ov Pindarore! Oh, more
power to your grace every day you
rise, 'tis you that has broken their
boards into shivers under your
feet! Sure, and isn't it a proud day
for Ireland, this blessed feast ov the
choir ov Saint Pether? Isn't Car-
lisle and Whately smashed to pieces,
and their whole college ov swindling
teachers knocked into scineidreers.
John Tuam, your sowl, has tuck his
pastherd staff in his hand and
beaten them out o' Connaught as
fast as ever Patricke drove the sar-
pents into Clew Bay.Poor old Mat Kevanagh, if he
was alive this day, 'tis he would be
the happy man. "My curse upon
their gogginities and Bibles," he
used to say; "where's the use ov
perplexing the poor childre wid
what we don't understand our-
selves?" No use at all, in troth, and
no I said from the first myself.Well, thank the Blessed Virgin,
we'll have no more thrigonometry
nor scripther in Connaught. We'll
hold our lodges every Saturday
night, as we used to do, wid our
chairman behind the masther's desk,
and we'll hear our mass every Sun-
day morning afore the same.I'm off to Tullymacgarratt before
daylight in the morning, where I'll
tell whether a sod or two o' turf
can't constitute a cart load ov herys,
and whether a weekly meeting ov
the lodge can't produce a new
thavory ov rints.But afore I take my lave ov you,
I may as well finish my story about
poor Father Tom that I hear is
coming up to elate the heretics in
Adam and Eve during the Limit.The Pope—and indeed it ill be-
came a good Catholic to say any-
thing agin him—no more would I,
only that his Riv'rence was in it—
but you see the fact ov it is, that the
Pope was as ev'ous as ever he
could be, at seeing himself sacked
right and left by Father Tom; and
bade out o' the face, the way he was,
on every science and subject that
was started. So, not to be outdone
altogether, he says to his Riv'rence,
"You're a man that's fond ov the
brute crysation, I hear, Mither
Maguire?""I don't deny it," says his Riv-
rence; "I've dogs that I'm willing
to run agin any man's, ay, or to
match them agin any other dogs in
the world for gonted elication and
politeness," says he."I'll hold you a pound," says the
Pope, "that I've a quadruped in
my possession that's a wiser baste
nor any dog in your kound.""Done," says his Riv'rence, and
they stalked the money."What can this larned quadru-
ped o' yours do?" says his Riv'rence."It's my mule," says the Pope,
"and, if you were to offer her good
oats and clover off the meadows
o' Paradise, sorta taste ov either
she'd let pass her teeth till the first
mass is ever every Sunday or holi-
day in the year.""Well, and what 'ud you say if I
showed you a baste ov mine," says
his Riv'rence, "that, instead ov
fasting till first mass is over, only
fasts out the whole four-and-twenty
hours ov every Wednesday and Fri-
day in the week as reglar as a
Christian?""Oh, be asy, Mither Maguire,"
says the Pope."You don't b'lieve me, don't
you?" says his Riv'rence; "very
well, I'll soon show you whether or
no," and he puts his knuckles in
his mouth, and gey a whistle that
made the Pope stop his fingers in
his ears. The ayeo, my dear, was
hardly done playing wid the col-
webs in the cornish, when the door
flies open, and in jumps Spring.
The Pope happened to be sitting
next the door, betwix him and his
Riv'rence, and, may I never die, if
he didn't clear him, thrille crown
and all, at one spring. "St. Michael
defend us!" says the Pope, thinking
it was an evil spirit come to fly away
with him for the lie that he had told
in regairt ov his mule (for it was
nothing more nor a thrick that con-
sisted in grazing the brute's teeth);
but, seeing it was only one ov the
greatest beauties ov a greyhound
that he'd ever laid his opisthocal
eyes on, he soon recovered ov his
fright, and began to pat him, while
Father Tom ris and went to the
sideboard, where he cut a slice ov
pork, a slice ov beef, a slice ov nut-
ton, and a slice ov salmon, and put
them all on a plate together. "Here,
Spring, my man," says he, setting
the plate down afore him on the
heartstone, "here's your supper for
this blessed Friday night." No
word more he said nor what I tell
you; and, you may believe it or not,
but it's the blessed truth that the
dog, either just tasting the salmon,
and spitting it out again, lifted hisnose out o' the plate, and stood wid
his jaws wattering, and his tail
wagging, looking up in his Riv-
rence's face, as much as to say:
"Give me your absolution, till I
hido them temptations out o' my
sight.""There's a dog that knows his
duty," says his Riv'rence; "there's
a baste that knows how to conduct
himself either in the parlor or the
field. You think him a good dog,
looking at him here; but I wish't
you seen him on the side ov Sleeve-
m-Virni! Be my sowl, you'd say
the hill was running away from
under him. Oh I wish't you had
been wid me," says he, never letting
on to see the dog stale, "one day,
last Lent, that I was coming from
mass. Spring was near a quarther
ov a mile behind me, for the childer
was delaying him wid bread and
butter at the chapel door; when a
lump ov a hare jumped out ov the
plantations ov Grouse Lodge and
ran across the road; so I gey the
whilloo, and knowing that she'd
take the rise of the hill, I made
out the ditch, and up through
Mullaghcasheal as hard as I could
pelt, still keeping her in view, but
afore I had gone a perch, Spring
seen her, and away the two went
like the wind, up Drumrewy, and
down Cloonoon, and over the river,
widout his being able one't to turn
hor. Well, I run on till I come to
the Diffagher, and through it I went,
for the wather was low and I didn't
mind being wet shod, and out on
the other side, where I got up on a
ditch, and seen sich a course as I'll
be bound to say was never seen
afore or since. If Spring turned
that hare one't that day, he turned
her fifty times, up and down, back
and for'ard, throughout and about.
At last he ran her right into the big
quarryhole in Mullaghbawn, and
when I went up to look for her, find
there I found him stretched on his
side, not able to stir a foot, and the
hare lying about an inch afore his
nose as dead as a door nail, and
never a mark of a fooli upon her.
Eh, Spring, isn't that thrice?" says
he. Just at that minit the clock
struck twelve, and before you
could say thrup-sticks, Spring had
the plateful of male consaled—"Now," says his Riv'rence, "hand
me over my pound, for I've won my
bate fairly.""You'll excuse me," says the Pope,
"for we put the clock half an hour
back, out ov compliment to his Riv-
rence," says he, "and it was Saturday morning
afore he came up at all.""Well, it's no matter," says his
Riv'rence, putting back his pound
note in his pocket book. "Only,"
says he, "it's hardly fair to expect a
brute baste to be so well skilled in
the science ov chronology."In troth his Riv'rence was badly
used in the same bate, for he won it
dever; and, indeed, I'm afeard the
shabby way he was thrated had
some effect in putting it into his
mind to do what he did. "Will
your holiness take a blast ov the
pipe?" says he, drawing out his
thuddeen."I never smoke," says the Pope,
"but I haven't the best objection to
the smell of the tobacco.""Oh, you had better take a
draw," says his Riv'rence, "it'll
relieve the drink, that 'ud be too
hiscious entirely, widout something
to flavor it.""I had thoughts," said the Pope,
wid the last sign ov a hiccup on
him, "ov getting up a broiled bone
for the same purpose.""Well," says his Riv'rence, "a
broiled bone 'ud do no manner ov
harm at this present time; but a
smoke," says he, "and flavor both
the victels and the drink.""What sort ov tobacco is it that's
in it?" says the Pope."Raal nagur-head," says his Riv-
rence; "a very mild and salubrious
species ov the philosophic weed.""Then, I don't care if I take a
draw," says the Pope. Then
Father Tom held the coal himself;
till his holiness had the pipe lit;
and they sat widout saying any-
thing worth mentioning for about
five minutes.At last the Pope says to his Riv-
rence, "I dunna what gey me this
pluggy hiccup," says he. "Dhrink
about," says he—"Bogorra," he says,
"I think I'm getting merrier an's
good for me. Sing us a song, your
Riv'rence," says he.Father Tom then sung him Mo-
ntaigne and the Bunch o'
Rushes, and he was mighty well
pleased wid both, keeping time wid
his hands, and joining in the cho-
ruses, when his hiccup 'ud let him.
At last, my dear, he opens the lower
button ov his waistcoat, and the top
one ov his waistband, and calls to
Mather Anthony to lift up one ov
the windys. "I dunna what's
wrong wid me, at all, at all," says
he; "I'm mortal sick.""I thrust," says his Riv'rence,
"the pasthry that you ate at dinner
hasn't disagreed wid your holiness's
stomach.""Oh my! oh my!" says the Pope,
"what's this at all?" gasping for
breath, and as pale as a sheet, wid
a could swate bursting out over his
forehead, and the palms ov his
hands spread out to catch the airthey ought to do to establish a
Reformed Church, and the many
difficulties and persecutions they
had to encounter, concluded to
avail a more favorable opportunity
to carry out their plan.There was one of their number,
however, who determined to work
on, and he succeeded in gathering a
small congregation around him in
the capital, mostly from the poor.
I am told by an English Christian
(long a professor of English in this
city) who knew him well, that he
died from the debility brought on
by want. Shortly before passing
away, he said to some friends that
surrounded his dying bed: "In
this solemn moment, when there is
no further possible earthly interest
to bind me to falsehood, I want to
testify before you all, that, so long
as I remained with the Roman
Church my soul was ill at ease and
full of self-reproach. Since break-
ing away from it I have had peace
of mind." To a friend he said that
"his trust, and all his trust, was in
Jesus." He felt very sadly about
leaving his congregation, not know-
ing what they would do without
him. He died with the Bible in his
hand. They bore him to his grave
with deepest sorrow. He was a
man of fervent piety and deep learn-
ing, named Aguilar. His congrega-
tion yet continue, and have done
much for the cause of the gospel in
this republic.During the "French Intervention"
many leading Liberal Mexi-
cans, among them some of the
"Constitutional Presbyters," visited
the United States, where I became
interested in the cause. Specially
invited to come to this city, and
assist them to establish the gospel
and gospel churches in this republic,
I have spent over a year in so doing.
Through the dark, threatening
clouds that hang heavily in the
night of Mexico's misery, some stars
are shining that relieve the gloom
and inspire hope. About forty
Mexican evangelical congregations
now meet weekly in this republic;
many leading men, editors, lawyers
and some former Roman Catholic
presbyters, take an active part in
gospel work in this nation. With
deep Christian faith, purity of life,
and with the open Bible in their
hands, large numbers of evangeli-
cal native Christians are now work-
ing with intense zeal for the evangeli-
zation of their native land. Idols and
pictures of saints are being fre-
quently burned, and in their place
the "Ten Commandments," printed
off a large sheet and framed, may be
seen in many houses.A good church building has been
leased by the general government
in the capital. A private individ-
ual has given us a chapel building in
Puebla. One evangelical weekly,
called the *Evangelical Torchlight*, is
published in Cos, near Zacatecas,
and a very large number of Chris-
tian tracts have been published in
the capital and circulated through-
out the nation.I believe that the evangelical con-
gregations in Mexico might soon
number a thousand if the gospel
work were stood by and encouraged
by the American and English evan-
gelical churches. I have found
multitudes most earnest to learn
gospel truth, and have preached to
about seven hundred persons at one
time, and have the pleasure of seeing
new congregations formed con-
stantly. There are two evangelical
congregations composed of young
lads, and conducted by themselves,
in this capital. One of their num-
ber was recently locked up by his
mother for about twenty-four hours,
with the view of inducing him to
abandon the Bible and its teach-
ing. In the room, a chair, a table
with a skull on it, a loaf of bread
and a glass of water were all he
found, and he spent the time in
singing hymns and in prayer, until,
at last, his mother decided that he
was incorrigible, and set him free.The Puebla congregation was re-
cently attacked by a mob, led on by
two curates dressed as ordinary
citizens; and has now divided itself
into five meetings, and work on
bravely.A young man belonging to one of
the leading families of the capital
was locked in his room by his
mother, to keep him from taking
part in an evangelical service, after
having thrown herself at his feet,
kissing them, wailing and crying,
begging him not to appear in public,
in this gospel movement until after
her death; he is now engaged in
circulating Bibles and Christian
tracts, with great effect. He sends
them to governors of States, and
many other of the most influential
men of the nation. Take the Bible
from a nation and you have one like
Mexico; give it to a people and you
have countries like the United
States and Great Britain; give the
Holy Scriptures and a helping hand
to the Christians in Mexico, and
these will enable them to circulate
it widely among their fellow coun-
trymen, and thus sow peace, joy,
light and truth in this beautiful but
now benighted land.Let the American Evangelical
Church follow the example that the
British Christians are giving it in
Spain, with regard to the evangeli-

THE GOSPEL IN MEXICO.

We have received the following
very important communication from
the Rev. Henry C. Riley, now labor-
ing in the City of Mexico, through
a special messenger.The immense number of magnifi-
cent stone churches that are to be
seen in the cities and villages of this
republic remind the traveler of the
overwhelming power that Rome
once exercised over this land. The
convents, church buildings, jewelry,
gold and silver and real estate that
she once owned, won for the Mexican
Roman Church the title of the
"richest of churches." A large part
of the vast mineral wealth of Mexico
passed into the hands of the satel-
lites of Rome, that swarmed here,
and enabled them to fortify them-
selves, till they imagined their posi-
tion to be impregnable. Like a
vessel becalmed in mid-ocean, the
Roman Church seemed once to float
on an ocean of abject superstition,
ignorance and blind fanaticism, but
Mexico's bright skies. But a
hurricane struck her from the north,
and has sent her on her beam ends.The examples of the United States
led to the formation of the liberal
Mexican party, and has constantly
inspired it with the love of liberty
and progress. Far more than fifty
years has the Roman Church in
Mexico unscrupulously and murder-
ously fought the Liberal party, and
with the sword in her hand, stained
with the blood of Mexico's best sons,
has tried to destroy the hopes and
influence of the Mexican Liberals.The Liberal party gradually gained
strength and won victory after vic-
tory, until, by its Constitution of
1857, and laws of reform, it shat-
tered the political power of the Ro-
man Church in Mexico. In vain did
she bring about the French inter-
vention to recover her lost position;
that effort but branded her with the
name of traitor.The Constitution of 1857 and the
laws of reform, emptied all the
events and scattered their inmates
to the four winds, separated Church
and State, gave entire liberty of
worship, forbade religious process-
ions, the wearing in the streets of
ecclesiastical robes, and the carry-
ing about of the "so-called host,"
declared ecclesiasties ineligible to
hold offices in the government, es-
tablished civil marriages, nation-
alized the church property not used
for worship, and in many other ways
broke down the political power of
Rome in Mexico. In vain did the
Roman Church excommunicate those
who accepted the Constitution of
1857 and the "laws of reform,"
they have become the laws of the
land.The gigantic and protracted con-
tests waged by the Roman Church
against the Mexican Liberal party
have convulsed the nation, impeded
the education of the masses, and left
them poverty-stricken. That con-
test was condemned and opposed by
a few liberal and patriotic presby-
ters in the Mexican Roman Church;
several of these threw off the yoke
of Rome in consequence, and tried
to establish an Independent National
Mexican Church; while others, from
evangelical convictions, sympathized
with this effort. The clergy that
connected themselves with this
movement were called "The Con-
stitutional Clergy," and many of the
Liberal party sided enthusiastically
with them. Some church buildings
were placed at their disposal; but
they, after struggling against pov-
erty, in their ignorance as to whatthey ought to do to establish a
Reformed Church, and the many
difficulties and persecutions they
had to encounter, concluded to
avail a more favorable opportunity
to carry out their plan.There was one of their number,
however, who determined to work
on, and he succeeded in gathering a
small congregation around him in
the capital, mostly from the poor.
I am told by an English Christian
(long a professor of English in this
city) who knew him well, that he
died from the debility brought on

and a glass of water were all he
found, and he spent the time in
singing hymns and in prayer, until,
at last, his mother decided that he
was incorrigible, and set him free.The Puebla congregation was re-
cently attacked by a mob, led on by
two curates dressed as ordinary
citizens; and has now divided itself
into five meetings, and work on
bravely.A young man belonging to one of
the leading families of the capital
was locked in his room by his
mother, to keep him from taking
part in an evangelical service, after
having thrown herself at his feet,
kissing them, wailing and crying,
begging him not to appear in public,
in this gospel movement until after
her death; he is now engaged in
circulating Bibles and Christian
tracts, with great effect. He sends
them to governors of States, and
many other of the most influential
men of the nation. Take the Bible
from a nation and you have one like
Mexico; give it to a people and you
have countries like the United
States and Great Britain; give the
Holy Scriptures and a helping hand
to the Christians in Mexico, and
these will enable them to circulate
it widely among their fellow coun-
trymen, and thus sow peace, joy,
light and truth in this beautiful but
now benighted land.Let the American Evangelical
Church follow the example that the
British Christians are giving it in
Spain, with regard to the evangeli-ization of that land, and soon it may
become the champion of the gospel
in Spanish America.Most of the great liberal move-
ments in Mexico have commenced
among the poor, and multitudes of
that class are now enthusiastically
joining this gospel movement, and
are full of hope, expecting to gain
glorious victories for Jesus and his
truth in this land, so long and sadly
neglected by Evangelical Christians.The little effort already just put
forth in behalf of Mexico has
obtained marvelous results, and
ought to encourage the evangelical
churches to greater efforts in its
behalf.A Mexican, who had been con-
nected with the army, purchased a
Bible some time since, at his wife's
request, who was determined to find
the ten commandments, and by
them decide as to whether the
Roman clergy, in their teaching,
were faithful to the word of God.
When she read the second (which
the Roman Church suppresses, di-
viding the tenth into two,) several
times, then walked up to a picture
of the Virgin, that she was specially
fond of worshipping, took it down,
and put it into the fire. Her hus-
band, Ponce de Leon by name
(who was the hero of the defense
made by the Christians during the
late attack by the mob, at Puebla),
has established many congregations,
and expects to gather together a
hundred more in the next few
months. A more self-sacrificing,
heroic, devoted and faithful pair
would be difficult to encounter. That
one Bible that was purchased by
him has already been the means of
doing an immense amount of good.The Spanish publications of the
American Tract Society of New
York are intensely useful to us;
would they might keep us supplied
with what we need for the work.A Roman Catholic presbyter,
from deep conviction, abandoned
the Roman Church; his example
had great influence on his congrega-
tion, and he was cruelly persecuted
by the Roman clergy. During the
Intervention, on the pretext that he
was a Liberal, and after they had
—as they said—"degraded him"
by removing the skin from the
crown of his head and fingers,
through their influence he was shot
dead, exclaiming, the instant before,
"May Jesus reign."A father died, and left his two
sons (among other property) an
image which they both specially
valued; when they came to divide
the property, they quarreled about
this image furiously, and at the time
a member of one of our congrega-
tions happened to be passing, and
on ascertaining the origin of the
quarrel, seized a hatchet and split
the image in two. The sons then
burned on him, but he quieted them
and invited them to the Evangelical
congregation, advising them to seek
Jesus.There are many preparing for
Evangelists and pastors; some of
these are lawyers of wide influence
and learning; others are struggling
with poverty, but yet are pressing
onward, studying and working as
they can. One of these, the Timoth-
y of our church, works all day
long, preaching on Sundays and
during the week, to quite a congre-
gation, that himself has gathered
and organized. His father is only
in middling circumstances, but gives
his son a home; the latter is now
learning to engrave, and only earns
\$1 a week whilst so doing, but he
saves his dollars to buy chairs to
accommodate his congregation, little
by little. He studies till about mid-
night, and is as noble a little Chris-
tian as I have ever met, being only
sixteen years of age. I think before
two years are over that he will have
a large congregation and be one of
the best preachers in Mexico. His
father is a Romanist, but allows his
son to follow out his own conviction,
and he has the sympathies of his
mother.The Romanists have tried to break
down our congregations by chal-
lenging some of their number to
hold public controversies with them;
in which the latter have been most
disgracefully routed.A poor old Romanist who had
been sadly horrified because his son
had become a Protestant, with great
joy heard that he, with other Pro-
testants, was to hold a controversy
with some missionaries (one of
whom I believe was a Spanish
Jesuit), believing that his son would
surely be won back to the Roman
Church; the result was rather unex-
pected; the old man, after listening
to the controversy, decided that his
son was right, and he became a
Protestant Christian.Most striking and glorious con-
versions are frequently rejoicing us.
The Spirit of God is converting
many, many souls to Jesus in Mex-
ico.A very numerous and wealthy so-
ciety has been organized here since
my arrival, called "The Catholic
Society," who are spending their
money in an extravagant way, to
check the gospel work by means of
the press, schools, etc. One of their
leading men recently said to a
friend of mine that he not only de-
paired of checking this movement,but that, on the contrary, he ex-
pected that in ten years Mexico
will have become a Protestant re-
public.I believe that the Mexican Evan-
gelical Church will be one of the
purest, brightest, most zealous and
apostolic among the churches.—
Mexico under the influence of Rome,
and Mexico under the influence of
the Bible, will present a contrast in
favor of the latter that will be one
of the bright evidences of its divi-
ne origin that the church of Jesus will
love to cherish.

H. C. RILEY.

MEXICO, JANUARY, 1870.

P. S.—I earnestly ask any Chris-
tian who may read these lines to
faithfully pray for the church of
Christ in Mexico, and its work.
Any, also, who may wish to con-
tribute in aid of this important work
can do so by sending their gifts ad-
dressed to "The Foreign Mission
in the City of Mexico, care of Rev.
Dr. J. J. Butler, secretary of Ameri-
can and Foreign Christian Union,
27 Bible House, New York," or to
the care of "Rev. J. C. Keener, 112
Camp street, New Orleans."

H. C. RILEY.

THE VEGETABLE KINGDOM.—Which
ever way the eye is directed, it en-
counters an infinite multitude of the
most dissimilar forms of vegetation.
Some are cast ashore by the ocean
in the form of leathery straps or
things, or are collected into pelagic
meadows of vast extent; others
crawl over vines, and illuminate
them with phosphorescent gleams.
Rivers and tranquil waters teem
with green filaments; mud throws
up its gelatinous seam; the human
lungs, ulcers and sores of all sorts,
bring forth a living brood; timber
crawls to dust beneath insidious
spawns; corn crops change to fetid
soot, and all matter in decay teems
with vegetable life in the form of
mold. The bark of ancient trees is
carpeted with velvet, their branches
are hung with gray-beard tupestry,
and microscopic scales overspread
their leaves; the faces of rocks are
stained with ancient colors, coeval
with their exposure to air, all of
vegetable origin. Heaths and moors
wave with a tough wiry herbage;
meadows are clothed with an emerald
mantle, amidst which spring
flowers of all hues and forms;
bushes throw abroad their many-
fashioned foliage; twines scramble
over and choke them, and, above all,
wave the arms of the mighty trees
of the ancient forest. Their in-
dividual forms, too, change at every
step; with every altered condition
and circumstance, new plants start
up. The mountain sides have their
own races of vegetation, and the
valleys have theirs; the tribes of the
sands, the granites, and the lime-
stones are all different; and the sun
does not shine upon two degrees on
the surface of this globe the vegeta-
tion of which is identical; for every
latitude has its own plants. This
vast assemblage of diversified forms
is coeval with the existence of man;
and we cannot but feel that the
study of distinctions between one
plant and another must have com-
menced with the first day of the
creation of the human race. The
name, indeed, of botany is modern,
but its antiquity dates from the ap-
pearance of our first parents. We
may assume it as a certain fact that
the vegetable kingdom was the first
to engage the attention of man; for
it was more accessible, more easily
turned to useful purposes, and more
directly in contact with him than
the animal. Plants must have
yielded him his earliest food, his
first-built habitation, his utensils,
and his various tools and imple-
ments. This could not fail to pro-
duce experience, and especially the
art of distinguishing one kind from
another. This from the first would
involve the contrivance of names,
and the collection of individuals
into groups which would form the
first system of botanical classifica-
tion, recorded under the well known
names of "grass, the herb yielding
seed, and the fruit trees yielding
fruit."WORDS TO BOYS.—Come now, boys,
let us settle one or two things as
absolute certainties when you start
in life:He who never drinks never will
be drunk. That's so, isn't it? He
who sometimes drinks may be.He who never goes into a gam-
bling saloon never will gamble, and
he who never gambles never loses;
but he who goes to observe may gam-
ble, and he who gambles will surely
lose.In all these things is it not best
not to begin, and would not our coun-
try boys have done better to have
started with a firm, positive, "No!"
instead of the treacherous "We'll
see?" He has seen, and seen a great
deal too much; and, in nine cases
out of ten, that sort of seeing ends
in this way. Beware of innocent
beginnings in wrong ways, and re-
member the old text: "There is a
way that seemeth right unto a man,
but the ends thereof are the ways
of death."—Hearth and Home.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MARCH 5, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—Rev. J. C. KEENER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:
REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.
FOR MONTGOMERY CONFERENCE:
REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTRELL.
FOR MISSISSIPPI CONFERENCE:
REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.
FOR LOUISIANA CONFERENCE:
REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

SHORT AND SHARP WORK.

We wish our friends would make a decisive affair of it during the next two months in soliciting subscribers for this ADVOCATE. We see that the papers at Memphis, Macon and Nashville are straining all their agents in a grand ante General Conference rally. Probably they wish to make a good showing before that venerable body. Now if these things go wholly by strength we may fall somewhat behind; but if hard work, an honest purpose and a fair front have any eloquence in them, then the NEW ORLEANS CHRISTIAN ADVOCATE will not despair of standing side by side with any of our noble church papers.

We are persuaded that the preachers move too softly in bringing our people up to their duty in reading, and thereby keeping informed about the work of God on the earth. Without organization and unity of effort we can make no headway against the serried ranks of the Adversary. But without an intelligent and equal view of the events of the hour—the new shapes and forces of evil that are hourly discovering themselves, and also the increasingly active agencies of the Holy Spirit that are revealing in every part of the world the abiding glory of Christ's triumphing career—how can these people be brought into line? Ignorance is confusion. The preacher exhausts himself upon an audience that sit in a land of shadows, while he stands out in the clear sunshine of hope. If they had only read what he has, the past week, of what God is doing in Spain, in Mexico, and among the Catholics of this country, it would require only one-half the amount of preaching to produce twice the effect. No, every member of our church ought to be taken affectionately in hand, and kept on bread and water "inward" until he consents or chooses to read and think and open his eyes, as well as pray. In this matter our preachers ought to give "no quarter." The poor widows ought to be supplied with a Christian paper as with salt; and the wealthier members of each church ought to unite and get a weekly bundle of the ADVOCATE for this express purpose. As the battle thickens "knowledge will abound." Our people must be a knowing people, that the Enemy may not palm off upon them the knowledge of the world for the wisdom of the Spirit. How few of them are prepared to meet the adroit reasonings by which Satan would undermine the temple of Christianity!

The very instant a soul is awakened, his intellect, his consciousness, as well as his conscience, quickens into tenfold power, and lethargy of mind henceforth becomes to his new nature an incompatibility; he must know what is going on within and without. The new life is incapable of weariness. Love never tires: the heart, the hand, the mind henceforth become as the three pairs of wings upon the cherubim. Christian life and light go together. Therefore every fireside around which our members, with their sons and daughters, are sitting should be entertained weekly with the record of the news of Christendom. Our brethren must see to it that no household be left in darkness. Send us the names of some of these incorrigible, self-wrapped men, who would not pay three dollars for three hundred new ideas, and we will send their wives and children a few specimens of the paper experimentally, and try what can be done on that side of the house.

"THE SPANISH AMERICAN CHRISTIAN UNION."

Last week we gave to the public a notice of the organization of an "Independent Catholic Church" by Catholic priests in this country. Now we publish a movement of equal interest which is going on in Mexico among those who have heretofore been a part of the Roman Catholic Church in that country. The reader will find, by perusing the communication on another page, that this work is important both in its extent and character. We received this document direct by the hands of a special and duly authenticated messenger. It speaks for itself, and is another evidence of how wondrously the Spirit of God is at work among communities that have hitherto been hopelessly under the religious control of Romanists.

This "Christian Union" in the City and State of Mexico is composed entirely of native-born Mexicans, excepting one native Chilean and one English Wesleyan. Its object is the establishment of a Bible-reading "Church of Jesus, one, holy, Catholic and apostolic," in Spanish America. It is one with all the Protestant evangelical churches of this country and England, but it takes no distinguishing sectarian feature or name; so that Presbyterians, Baptists, Episcopalians, Methodists and Congregationalists are equally represented in the good work. The form of a church such as Norman McLeod presents as his beau ideal of what the Christian church should be, in its several mission-fields, is identical with that adopted by the Spanish American Christians. The president of the "Union" is Jesus Buen Romero. He was engaged in the practice of law when he felt called to the ministry of the Word. It was while studying the Scriptures for literary improvement and information that he was converted. He is now thirty-two years of age, and is constantly engaged in preaching to the congregations of Christians in the City of Mexico.

The treasurer is Mr. J. L. Evans, an English Methodist who has been in that country for many years. The secretary of the "Union," Senor Nicholas Yslas y Bustamante, is also a lawyer of fine ability. He, too, is constantly preaching. The corresponding secretary, and most influential member of the society, probably, is the gentleman who sends the appeal, Mr. H. Chauncey Riley. He was born in Chili, of American parents. He has perfect command of the Spanish language; is about thirty-eight years of age. The papers which the messenger brought were duly attested by the consular seal. We learned from him, further, that there are now sixteen preaching places in the City of Mexico, where the Bible is read and a pure gospel is preached several times each week—no trace of Roman Catholicism in their services, neither its saint worship nor its upholstery, excepting that the preacher wears an alb while preaching—his only official mark. The sacrament is administered as with the Presbyterians in this country. The whole of their worship is characterized by

zeal and warmth in singing and exhortation, surpassing that of the Methodists. In addition to those already named, there are other distinguished men at work in the same holy enterprise: Romero Arza Zane, D. D., formerly a priest, who once refused a bishopric; about sixty years of age; he preaches four times a week; Marciano Candanoza, a talented lawyer and zealous preacher, about thirty years old; Gabriel Ponce de Leon, fifty years of age; long of the army; "works and preaches as if each day was the last;" Urbano, a noble boy of sixteen years, has a congregation of forty or more boys, and is a great student. Senor Mendoza is the leader of the Evangelists in Puebla. Don Derroteo Jimenes and Don Antonio Morales are also there.

In the State of Zacatecas there are seven congregations, and indeed many others in other parts of the country. They are at work with the zeal of reformers, with the Bible in their hands. Indeed their documents speak of the movement as "the reformation now so happily inaugurated in this land." There are now before us two tracts printed in Mexico, issued by this "Union," one entitled "La Iglesia de Roma y La Evangelica por un Mexicano;" the other a small collection of "Himnos para aquella parte que la milita en la tierra de la Iglesia de Jesus Una, Santa, Catolica y Apostolica."

The machinery of life is at work in that country which has been drenched again and again in the blood of civil war, which has been debauched and prostrated by the uninterrupted sway of Romanism for three centuries. All that is needed now is the means of publishing and disseminating the Holy Scriptures, and for the supporting of evangelists in their labor of love. It is, to the Christian philanthropist, hope springing from the bosom of despair, as a light shining in a dark place. It may be that until there was an utter breaking down of the State, and of the proud ecclesiastical tyranny that held everything in its deadly grasp, all reform was an impossibility; but amid the utter prostration and ruin which Roman priests have brought upon Mexico in their efforts to sustain their own power, there may be presented an opportunity, for the first time, of preaching Christ crucified the only Saviour of men.

All who wish to contribute to this noble work of God can do so by forwarding their gifts to "Rev. J. C. Keener, No. 112 Camp street," and we will see that the gift is sent direct to Mexico, to the president of the "Union," J. Buen Romero.

CLASS MEETINGS.

Under this heading I propose to write a few thoughts that I think to be pertinent.

Class meetings arose incidentally out of a financial scheme to build a church at Bristol, England; but they have owed their efficiency and perpetuity to the social element in human nature. That religious people love to associate together, and interchange thought and feeling in regard to their common conflicts, joys and hopes, is not strange. It is only strange that those who profess and call themselves Christians should not desire to do this. Politicians meet to interchange views, business men compare notes and post each other up. Men have clubs, and ladies and young people various reunions to meet this social instinct common to our nature.

As we understand it, ordinary church convocations do not meet our religious social needs. They are too formal and too general in their character. Something that comes nearer to our personal experiences and individual needs seems to be demanded. "But cannot all that is needed in this direction be met by ordinary social life?" I think not. True, there are a few favorably circumstanced who can at pleasure select congenial associates, and take all the "sweet counsel" their spiritual necessities may require; but there are many young Christians, many quite "old disciples," and many in socially obscure circumstances, who cannot secure

such spiritual associations as their religious needs demand. Some have but little leisure and little access to books; yet they are those who most need the edification and comfort which judicious religious associations alone can give them. For this large class the class meeting seems almost a spiritual necessity.

"But does not the class meeting smack of and look in the direction of the confessional?" Not at all. At the confessional one person pours in secret, into one ear, all the sins of the heart and life—an obligation, as we understand it, due to God alone. The class meeting is an assembly of souls possessing or seeking purity of heart and life. Our Discipline suggests twelve as a convenient number. They meet at an appointed place and time; they read the word of God, they unite in holy song; they join in prayer, they converse of the things painful or pleasant that have befallen them in the "kingdom and patience of Jesus." Each in order narrates his present spiritual experience. How various have these been! Some have had affliction, some have suffered loss, some have prospered, some have been sorely tempted, and are in heaviness through manifold temptations, and some have been greatly blessed, and are happy in God. Now no earnest soul, seeking eternal life, can mingle in such a company without spiritual profit. These conversations and confessions to "one another" are suggestive, and call forth from the leader of the class—generally an experienced Christian or a minister—such quotations and applications of Scripture as enlighten the mind and comfort the heart.

If the divine rule is to obtain here, as elsewhere, that we are to judge the tree by its fruits, then we may pronounce the class meeting not only good, but very good. They have been nurseries of piety, they have kindled zeal, they have promoted brotherly love. Many, through natural diffidence and timidity, have refrained from attending on this precious means of grace, and sometimes it has been found difficult to secure men best adapted to the work of leading the classes to spiritual profit; but notwithstanding these abatements, they have been productive of vast spiritual good. We have known but few, in a somewhat long and extended experience, who have given class meetings a fair trial, who have not been benefited and pleased.

As a Christian and a Methodist, we profoundly regret that they have fallen so much into disuse. In nearly all of our towns and cities classes, more or less numerous, are organized, and regularly meet. But on the circuits there are but few classes; and of our membership, as a whole, perhaps not a third attend class meetings.

The class meeting occupies, since the last General Conference, the same attitude that the prayer meeting and the love feast do—that is, the Discipline speaks in terms advisory, and not mandatory. It is no more than attendance upon prayer meeting a test of membership. I would not have it so. I do not think it possible, in this country, to enforce such a rule. Could not the General Conference, at its approaching session, resolve to make it the duty of our Bishops to inquire of each pastor if he has used his diligence to promote class meetings by organizing classes, by leading classes, by encouraging the people to attend; in short, doing all that may be necessary to build up and maintain this excellent peculiarity of Methodism. Can they not make this duty imperative on the preacher? We think that some such action would go far toward maintaining the institution and increasing its efficiency.

W. LEARNING will accumulate wonderfully if you add a little every day. Do not wait for a long period of leisure. Pick up the book and gain one new idea, if no more. Save that one and add another as soon as you can. Says the old Scotch adage: "Many a little makes a mickle."

A CHRISTIAN should never plead spirituality for being a sloven. If he be a shoe-cleaner, he should be the best in the parish.

HEAVEN.

I know not that anything can afford more consolation in seasons of bereavement than the consideration of the blessed fact that there is a heaven—the future and glorious home of the good. In all ages and among nearly all people the idea has obtained, in some form, that there is a place and state of happiness beyond this world and after this life. The ideas that have prevailed have been very various, modified by their state of civilization, but always in harmony with their highest conceptions of happiness. It is only through revelation that we have certain information of the existence and character of the heavenly state. We repeat, "certain information," because the Bible declares it, and it is as well proved to us as anything can be. No information that rests upon evidence can be more satisfactory.

Much figurative language is employed to express the idea of heaven. Sometimes it is set forth under the notion of a "kingdom," called the kingdom of heaven. Here God is king—his throne is reared. His court is composed of heavenly intelligences, and the spirits of just men made perfect. In this kingdom order, peace and security reign forever undisturbed. Then it is presented under the figure of a "city" whose builder and maker is God. Its walls are precious stones, its gates are pearl, its streets are paved with gold, and it is illuminated with the radiant glory of God. Again it is described as a country—"a better country"—through which flows the river of life, clear as crystal, that makes glad the city of God, its verdant banks shaded with the tree of life, bearing twelve manner of fruits, and yielding them every month, and its leaves for the healing of the nations. We may sum up what we learn from the Bible under two general ideas: the evils we shall be free from, and the positive blessings we shall enjoy.

We shall be free from all the weary and exhausting toil that has resulted from the original curse—of barrenness, the growth of thorns and thistles, the eating of bread in the sweat of our brows. Not that heaven will be a place of monotonous idleness, but pleasurable activity, diligence without weariness. The curse upon our bodies—"dust thou art, and unto dust shalt thou return"—shall be removed. We "shall have a right to the tree of life." We shall be free from disease and pain. Now whole books are filled with the description of the thousand ills to which our frail flesh is heir. The wicked shall cease to trouble, and we shall be free from all the sorrows bad men cause us. There shall be no injurious and cruel actions, no dishonest, no covetous, no slanderous, no onivious men in heaven; no oppressors, no persecutors, no bad government with tyrannical rulers, no improvident and unjust laws; no wars, with their dreadful train of ills, no famine, no wasting pestilence.

But we shall not only be forever free from all that now pains and afflicts, but we shall have many positive blessings. We shall be forever associated with the lovely, the exalted and the holy—a glorious brotherhood, every shining one our friend, and all the children of our Father. Calm repose in the midst of joyful activities; peace with God, peace with all the millions of the blest, peace profound, unbroken and everlasting. There we shall have fullness of joy. Here our joys are ever-marred and mixed—the wicked trouble, and the good are not free from error and mistake. But in heaven nothing shall be wanting; we shall have all good things, have them all at once, and have them forever—"every longing satisfied with full salvation." And our happiness shall be forevermore; no sickness shall follow health, no youth turn to age, no hope end in despair; no satiety and no exhaustion; bliss without bound and without end—a crown of life that fadeth not away.

W. Most persons choose their friends as they do other useful animals, preferring those from whom they expect the most service.

LETTER FROM BISHOP ANDREW.

SUMMERFIELD, Feb. 20, 1870.

Mr. EDITOR: Your paper visits me with great regularity, and keeps me posted as to church matters in that very interesting portion of our Zion in the bounds of your circulation; and I am deeply interested in everything bearing on our prosperity there.

For some time past I have been planning a letter to you, but my trembling hands make writing quite a task for me, and I fear that it will be almost as great a task for you to decipher my hieroglyphics. Notwithstanding all that, I have determined this morning to attempt a letter. You must do the best you can with it. Well, then, to begin with the subject which is uppermost in every man's mind, viz: my own important self. I am yet alive, and through God's great mercy I am in better health than for several years past. I still try to preach almost every week, or address the children of the Sabbath schools wherever I go. 'Tis slim work, I know, but shows my willingness to do something for my Master. I travel off occasionally, and sometimes think I am almost ready for a district or circuit; but that delusion don't last longer than two or three sermons. But the best of all is, God is with me. Yes, blessed be God, I feel his presence daily. Oh, that I could feel that I was altogether the Lord's!

But my principal object in writing this scrawl is to tell you how much I am pleased with the notice you have bestowed on the Northern Quarterly Review. It is one of the best articles I have seen on that subject. Is it not passing strange that they should invite us to fellowship and union with them, and still assail us as they do in almost all their papers? I am greatly disappointed in the Review. I had thought that it was kindly disposed toward us from some of its earlier deliverances on the subject; but in the articles quoted it has completely thrown off the mask. Has it been all this time a wolf in sheep's clothing? If the South is such as it represents, why seek reunion with us? The language quoted from the Review is most bitter and insulting, and certainly proves that all this ado about union is insincere. But it is passing strange that they clamor for union while our property, which they have wickedly seized, is not restored, nor their many slanders against us have not been retracted. I don't know that they have the shadow of a claim on us. What have they done to deserve our love? Would it not seem that every effort they have made has looked to our injury and degradation? Former experience has taught us that we cannot trust our Northern friends. We beg them to let us alone; 'tis all we ask of them. They have done all they could to crush us, and have failed. We have held on our way, and God has been with us, so that our heads have been kept above the waters. Now we wish them all manner of success in winning souls to Christ, but none in sowing dissension, and in disintegrating the church which God has enabled us to gather in these Southern lands. But from the time when the Southern flag was struck the tone of Northern Methodism has been haughty—the tone of conquest, not of Christian love. But enough of this.

I see that your Conference has recommended the General Conference to place New Orleans in the same category with all other stations as to the time of occupancy of the pastorate. Perhaps it will be well. But we shall see. I see there is plenty of work cutting out for the General Conference. I hope that body won't do too much.

Very affectionately,

JAS. O. ANDREW.

ENGAGE not hastily, as a party, in a difference between others, but reserve thyself impartial and unengaged, that thou mayst moderate between them.

WE SPEAK evil of others; and should we not fear the evil they may say of us? Speak ill of no neighbor, if thou wouldst not hear what will trouble thee.

THE PUBLIC DEBT.

The speech of the Hon. D. W. Voorhees, of Indiana, delivered in the House of Representatives January 28, 1870, presents a digest of the national debt, as distinct from the national obligation, worthy of attention. At the close of the last administration the interest-bearing debt was \$2,049,977,700. The Secretary of the Treasury stated it, a few days ago, to be now \$2,100,000,000, an increase of \$50,024,300; so that notwithstanding the immense burden of taxation under which the country staggers, the debt is increasing. This is a stubborn fact.

Mr. Voorhees gives a series of tables, in which he shows how much money the bondholder actually lent the government, and then in another column how much he received as a surplus, for which he paid nothing. These two statements we give below for contemplation. The difference between paying the bonds, as Mr. Stevens, of Pennsylvania, said they should be paid, and paying them as the party in power say they must be paid; would, if paid down at once, amount to over \$800,000,000 in gold.

Sir, allow me now to recapitulate and place in a compact and distinct form the aggregate of the obligations, the bonds which were given as a bonus, as a bare gratuity, to the reluctant and unpatriotic capitalists of the country in order to win their support when our need was the sorest. Allow me to array together the items of an appalling account now in the hands of the tax-gatherer for collection, every farthing of which is a mere fabrication upon paper, and as completely devoid of merit as a forged check presented for payment. My former statements and calculations establish the following table, as showing the amount of the people's obligations which the bondholders obtained in the creation of the national debt each year for nothing—for absolutely nothing:

1861.....	\$72,293,918
1862.....	130,012,736
1863.....	421,508,154
1864.....	157,370,540
1865.....	79,009,787
1866.....	260,158,907
1867.....	247,758,457
Bonds and interest on five percent bonds.	216,546,394

Total.....\$1,550,558,956

Here stands, then, this stupendous total of \$1,550,558,956, which the party now in power says the people shall pay under inexorable penalties, not one cent of which I have proven ever left the coffers of the speculator or found its way into the treasury of a distressed and struggling country. I invoke serenity upon my statements, and shall at all times defend their substantial correctness.

But in this connection let us recapitulate also upon another point: let us see distinctly how much money the bondholders actually did loan, did advance upon the bonds of the government to aid the great cause of national unity. I have already established the facts, and now place them in tabular form. The payments of the bondholders were as follows:

1862.....	\$44,030,649
1863.....	101,890,854
1864.....	189,697,636
1865.....	208,214,090
1866.....	88,591,773
1867.....	303,215,503
1868.....	312,826,323
Amount paid for the five percent bonds.	122,957,410

Total.....\$1,371,424,238

Compare this amount of \$1,371,424,238, which the government did receive, with the amount for which our bonds are outstanding, which the government did not receive, and we find the following result:

Am't of debt which has no consideration.	\$1,550,558,956
Am't. which was paid for.....	1,371,424,238

Excess of bonds issued over actual debt.....\$179,134,718

Sir, you have known the parallel to this in the history of constitutional governments? Where shall we look for comparisons to this monstrous oppression? In what realm or land governed by written law will the explorer of other countries and other ages find such a wholesale and flagrant plunder of the people as here stands naked and confessed? Under what baleful sky, in what other quarter of the earth has such an awful visitation fallen upon human labor? Where else than in this land of professed equality has wealth over before committed a crime against industry and liberty of such huge proportions and in such an aspect as now towers up in our midst and darkens the honor of the people with its cruel and con-

less demands? Kings, it is true, unrestrained by law, have robbed their subjects. Despots who rule by prerogative have torn away the substance of their unfortunate serfs and lavished it upon the favorites of the throne. The pampered and lawless tyrants of Asia, Africa and Europe have seized the fruits of toil, the painful and precious earnings of the laborer, daily labor and wasted them in palaces of revelry and endless indulgence. The millions under imperial sway have been trodden down, beggared and held in servitude by the unbridled avarice of absolute monarchs. But in what region of the globe penetrated and influenced by the popular will, where the voice of the people was permitted to create their laws, has ever before in the annals of the human race such a giant extortion been fastened like a vampire of death on the resources of a nation?

AN EARNEST CALL.

MR. EDITOR: Will you allow me, through your columns, to call on those secretaries and treasurers of Annual Conference Boards of Domestic Missions who have not reported, to make their returns without further delay? All the Conferences have held their meetings except the Baltimore, and yet we have no reports from the following Conferences, viz: North Carolina, South Georgia, Montgomery, Mobile, Louisiana, Mississippi, Louisville, St. Louis, Missouri, East Texas, Northwest Texas, Trinity, and Columbia. Brethren will confer a special favor by reporting to me immediately at Nashville. My annual report must be made before the meeting of the General Conference, and this cannot be done satisfactorily without reports from Annual Conference Boards. If brethren be at a loss as to what should be embraced in their reports, I refer them to the Discipline, part 2, sec. 7, p. 266, beginning at the figure 2, immediately following article 13, in the Constitution of the Board of Domestic Missions. The treasurers of the following Conference Boards have not reported, viz: Baltimore (not yet convened), Mississippi, St. Louis, Missouri, East Texas, Columbia, Florida, Pacific, Illinois.

I greatly desire that our church should know what is doing in the cause of domestic missions. It may be that some brethren have reported and their letters failed to reach me; if so, please write again.

J. B. McFERRAN,
Secretary B. D. M.

SERVICE FOR ALL.—The Christian Secretary, in an editorial, quotes and indorses the following excellent sentiments:

The late Dr. Murray, so well known over the signature of "Kiran," said that in his youth he met an old disciple, ninety-one years of age, and in taking leave the venerable pilgrim left with his young friend a charge, which he had never forgotten: "Do all the good you can, to all the people you can, in all the ways you can, and as long as you can." If that rule, Dr. James Hamilton adds, were carried out by each Christian, it would soon change the face of society. If you, who are the Christian member of the family, were setting a watch over your lips, and were in all things wise, gentle, obliging, self-denying, high-toned, few in the household could withstand the quiet, persistent sermon; and if the Christian households of the land were as peaceful as they are pure—if the several inmates were fair-minded, kind-hearted, mutually helpful—if in the school, the market, the social gathering, the various members lived up to the level of their morning and evening worship—there would soon be poor chance for the infidel; apologetics might become an obsolete science; with such a church in every house the synagogue of Satan would disappear from the land.

Married.

February 24, by Rev. W. E. Glenn, Mr. C. C. CARPENTER to Miss C. E. SMITH, all of Jefferson county, Mississippi.

On the evening of the fifteenth of February, 1870, at the residence of the bride's father, in Washington county, Alabama, by the Rev. A. M. Jones, Mr. WILLIAM F. SMITH, of Mount Stirling, to Miss SARAH A. W. POWELL.

Washington county, Mississippi, on the fourteenth of February, 1870, by Rev. R. A. Davis, Mr. GEORGE ROBIN to Miss ELIZABETH J. LACY.

At the residence of the bride's sister, February 10, 1870, by Rev. A. R. Howell, Mr. JAS. E. FRIZELL to Mrs. CLARA E. CLARK, all of Holmes county, Mississippi.

On Sunday, January 16, at the residence of the bride's father, by Rev. H. P. Lewis, Mr. JACOB HOLLANDER to Miss N. A. BEATY, all of Covington county, Mississippi.

In Gainesville, Mississippi, by Rev. H. P. Lewis, on the thirtieth of January, Mr. ISAAC F. STANTON to Miss MISSOURI L. McCARTY.

At the residence of the bride's father, by the Rev. T. C. Clark, on the sixth of January, 1870, Mr. GEORGE D. FRANKLIN to Miss JOSEPH E. JONES, all of Rankin county, Mississippi.

At the residence of the bride's father, by the Rev. T. C. Clark, on the third of February, 1870, Mr. P. C. C. DONNELLY to Miss C. L. JONES; also, at the same place, by the same, Mr. J. L. FRANKLIN to Miss RUTH I. JONES, all of Rankin county, Mississippi.

Obituaries.

Mrs. CATHERINE L. CURRY, wife of Jacob H. Curry, died in Wilcox county, Alabama, on the tenth of September, 1869, in the forty-eighth year of her age, leaving her devoted husband, who survived her but a few days. She also left three little children, two girls and a boy, to battle with the sorrows and troubles of the world, while her sainted spirit rests in the bosom of that Saviour she served and loved so well on earth.

She joined the Methodist Episcopal Church South when a little girl, and lived a true and faithful member up to her death. Alas! for our church, she has lost one of her brightest stars. I visited her often, and always found her—what true religion makes a lady—cheerful, pleasant and happy. She was a most devoted wife, and a tender and affectionate mother. Her heart, hands and house were always open to the preachers.

In the morning before she died I went in to her sick room and asked her how she was. She said: "This tells me it is death," and told me to "call the family around her and pray for her; not for an evidence of my acceptance, but for dying and shouting grace. I want to go happy." After which she exclaimed: "Glory! glory!"

Then she most affectionately turned to her dear little ones, and said: "I hate to leave you. I would like to stay and raise you to be good members of the church." She also said: "Be good children, and meet your mother in heaven." She then repeated the following lines:

"Time, like an ever rolling stream,
Bears all its sons away;
They fly, forgotten, as a dream,
Dies at the opening day."

And when I saw she was making her last desperate struggle I asked her if all was well, and she said: "All is well!" As she seemed then to be gazing into eternity, her sister asked her what she saw. She said: "My Saviour!" Yes, he came to lead her across the dark valley of death; and a "convoy of angels" were ready to plume their wings and bear the sainted spirit home to God.

D. J. WRIGHT.

DR. DAVIS ON DEAFNESS.

Sent Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street; Eyrich, 134 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 399, New Orleans.

ONCE MORE.—Dr. D. has removed to No. 19 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention. f612 11

VOICE GARDEN AND FLOWER SEEDS.—My Annual Catalogue, containing a list of many novelties, besides all the standard vegetables of the garden (over 100 of which are of my own growing), with a choice list of Flower seeds, will be forwarded gratis to all. I warrant my seed shall prove as represented. I warrant all money forwarded shall reach me. Send for a catalogue. JAMES J. H. GREGORY, Marblehead, Mass. mh5 61P

DR. JOHN G. ANGELL, GRADUATE OF THE Philadelphia Dental College, has established himself at No. 109 Carondelet street, near Touro, where he will perform all Dental operations in a skillful and satisfactory manner. Teeth inserted upon Gold or Vulcanite base. Being familiar with all Appliances, he will extract teeth without pain, by the use of such as best suits the case. Particular attention given to the medical and surgical treatment of diseases of the mouth and teeth. oc31 1y

NEW ADVERTISEMENTS.

DU BOIS & CO.,

MANUFACTURERS OF COTTON GINS.

We now offer to the public a new and improved

COTTON GIN,

so constructed that stems and hulls will not be cut up by the saws, thereby preserving the teeth of the saws from injury by hard substances getting into the Gin, and consequently making a cleaner sample out of roughly picked Cotton. It is also constructed to run the Peeler and any other kind, except the Sea Island Cotton.

Wherever our Gins have been in use they are known to give

Faster than Other Gins

In common use, by the flange keeping the Cotton in contact with the teeth mill stripped of the fiber, and then preventing them, after being cleaned, from being carried up into the box by the upward motion of the roller. Thus, by keeping a free and white roll, as it is called, the amount of Cotton ginned is increased. They are not complicated and not easily put out of order.

CERTIFICATE.

Messrs. Du Bois & Co.: We signed the latter part of our crop of Cotton on the 5th Saw Gin bought of you, and in the presence of Captain J. A. Wemyss, Colonel L. D. Hatch, Edward Shackelford, Anderson Walker and E. T. Taylor a bale of Cotton, weighing 322 pounds, was ginned in one hour and thirty minutes. It makes a good sample, and carries a free and perfect roll.

GORDON & ROBINSON.

JANUARY 7, 1870.

This Gin will be on exhibition at the next Agricultural Fair.

All orders promptly attended to. Address

CHILDREN'S LIVES SAVED FOR FIFTY CENTS.—Thousands of children die annually of Croup. Now, mothers, if you would save your child, and always have a bottle of Dr. Tobias' Venereal Lincture in the house, you never need fear losing your little one when attacked with this complaint. It is now twenty-two years since I have put up my Lincture, and never heard of a child dying of Croup when my Lincture was used; but hundreds of cures have been reported to me, and many state it was \$10 per bottle that it would not be without it. Beside which it is a certain cure for Cuts, Burns, Headache, Toothache, Sore Throat, Swellings, Mumps, Cholera, Dysentery, Spasms, Old Sores, and pains in the limbs, back and chest. No one who once tries it is ever without it. It is warranted perfectly safe to take internally. Full directions with every bottle. Sold by the Druggists and Storekeepers in the United States. Depot, 10 Park Place, New York. f62 41P

CHURCH BELLS.

We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

	Weight.	Wt. of Bell	Price, and mountings.
24-inch Bell.	250 lbs.	400 lbs.	\$65 00
30-inch Bell.	650 lbs.	800 lbs.	135 00
40-inch Bell.	800 lbs.	1000 lbs.	175 00
48-inch Bell.	1200 lbs.	1500 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

Scientific.

AMERICAN AERONAUTICS.

A FLYING SHIP TO BE BUILT.

Our transatlantic friends have done a good deal of talking and writing, and not a little inventing, upon the art of navigating the air. From giant projects down to engines of the minutest size and minimum weight, with maximum power in proportion to weight, they have filled the air with the fume of their devices, if not with the devices themselves.

Our transcontinental inventors, on the contrary, have made little noise in the world; but if we are to credit statements coming from sources apparently entitled to credence, they are outstripping the rest of the world in this field.

Our readers will recollect the engraving of the aero-steamship Avitor, published in a recent number, with an account of a trial, the results of which as stated were not very encouraging. It now appears that the want of complete success in the experiment was, if we may credit our informant, attributable more to causes entirely disconnected from the machine than the apparatus itself.

A meeting of the shareholders of the Aerial Steam Navigation Company was held at San Francisco, and the secretary's report read on that occasion details the following particulars:

An experiment made with the Avitor had resulted in a triumphant demonstration of the capability of the machine to move against the wind, to ascend or descend, and to be guided to any desired course. To use his own words: "Enough has been demonstrated to convince the most skeptical, as well as to confirm the theory of the most scientific, that a machine has been constructed capable of moving in any direction according to the will of the engineer; capable also of moving against the wind; nay, more, by its system of planes utilizing the adverse winds for the purpose of elevation and progress. This was not all. The committee judged it for the best to remove the model Avitor to the then unoccupied Mechanics' Pavilion, which was accordingly done, at considerable expense and risk. Thousands visited it there, and all expressed themselves satisfied that aerial navigation was an established fact. Nevertheless, there were great difficulties to contend with. The numberless gas fixtures in the hall were obstructions to continuous flight, and absolute impediments to the machine soaring to the roof. Still, the easy, graceful, calm power of motion through space was eminently exemplified in this, the first Avitor that fulfilled all the requisites for aerial flight, viz: sustaining power, propelling power, guiding power. The first ascent obtained by a spindle cylinder filled with hydrogen gas, and by a system of planes, which, by their impingement on the air, materially aided the elevation of the machine when in motion; for whereas, when the model was at rest, it barely maintained its equilibrium in the atmosphere, the moment it was in motion, and consequently atmospheric resistance obtained, the machine rose, more especially if the breeze were adverse, as was shown on that morning, when it traversed the Shell-mound race track."

Naturally the public is skeptical of the truth of such statements as are here put forth, a skepticism which we not only think excusable, but in which we cannot help sharing. Not that we are wholly skeptical as to ultimate success in this field, but the thing has been so often to be done, and yet not done, that we are naturally shy of any sweeping announcements of success, fearing that they may prove premature. While, however, we may well be pardoned for entertaining some doubts, we must say that the action of the shareholders shows that their faith in the success of the invention is rather confirmed than weakened.

The construction committee having advertised for drawings and specifications, for a machine one hundred and fifty feet long, with a carrying power of two thousand five hundred pounds—the steam engine and boiler being already constructed and in possession of the company—have accepted those prepared by Messrs. Miller & Haley who offer to construct the machine for \$3,000 in gold. This bid has been accepted, and a committee appointed to raise the necessary funds.

The general opinion prevailed at this meeting that the new Avitor would prove a triumphant success, and our readers will doubtless join us in cordial good wishes to the enterprise.

There is perhaps no mechanical problem of modern times more absorbingly interesting than that of self-propelling air vessels, the solution of which has hitherto bid defiance to mechanical skill; and that the nineteenth century should add still another to its many glorious triumphs, is a consummation all

must greatly desire. Success, say we, to the Avitor.—*Scientific American.*

INTERESTING TO ANTIQUARIANS.—A cargo of antiquities has just been conveyed from Smyrna to Malta by H. M. S. Antelope. They consist of a large and interesting collection of sculpture, architectural marbles and inscriptions recently excavated at Priene, in Asia Minor, by Mr. Pullan, on account of the Dilettante Society; several cases of inscriptions, discovered by Mr. Wood (once a young architect of great promise in London,) at Ephesus, in the excavations carried on there under the direction of the trustees of the British Museum; a curious urethane head of colossal size, discovered by Mr. Consul Dennis, near Smyrna, together with some fragments of very ancient pottery, the fruit of his diggings in the tumuli near the lake of Gyres, in the neighborhood of Sardis. All these antiquities will shortly be forwarded to England.

A NEW SPECIES OF FOSSIL SERPENT. Prof. O. C. Marsh, of Yale College, who has, for some time past, been investigating the character of the vortebate remains, found in the tertiary green sand of New Jersey, describes a new and gigantic sea serpent, to which, on account of its size, he has given the name *Dinophis Grandis*. This remarkable animal, belonging to a new genus, as well as species, is represented by a single dorsal vertebra, now in the college museum. From this specimen Prof. Marsh concludes that the animal must have been not less than thirty feet in length, and was probably a sea serpent, allied to the boa constrictor of modern times. The vertebra was found in the eocene green sand, near Shark river, Monmouth county, New Jersey.

THE STUDY OF BOTANY.—Cleghorn, the president of the Edinburgh Botanical Society, in his annual address, gives an account of the progress of botanical research and the principal centers of information. The museum and herbarium at Kew, England, is the recognized head of botanical science. In Paris there is the Jardin de Plantes, presided over by Prof. Decaisne; in Florence, Prof. Parlatore works in the Orto Botanico; Prof. Alphonse de Candolle at Geneva, and at Calcutta Dr. Thomas Anderson. He says: "I am more and more convinced that the elements of botany, zoology and physics should be acquired before the student commences the study of the learned professions."

VENOM OF TOADS.—Shakespeare says that "the toad, ugly and venomous, wears yet a precious jewel in his head." In our day we have come to believe that the venom is as mythical as the jewel; but several foreign savans have been looking into the subject, and assert that the matter exuding from the parotid region of the toad acts as a poison. Some of the savages of South America use the toad poison instead of the curara.

STONEWALL INSTITUTE.

Located 13 Miles North of Selma, Ala. After a week's recess for Christmas the exercises of this School for Boys will be resumed on Monday, January 3, 1870.

It affords the Principal peculiar pleasure to announce three facts: 1. He has engaged the services of that thorough teacher and master of his art, with ten years' experience as an instructor, Mr. James A. Whitman, to assist him in imparting to his pupils a perfect knowledge of all the Mathematics usually taught, including Book-keeping and Field Surveying.

2. He has on hand at the institute, and has just received October last, the manifest and most studious boys that for two years have been under his instruction.

3. Three of his pupils of 1868 have taken premiums this year at three different Universities—the first in the South—a fact furnishing the highest possible endorsement of his ability and skill.

Two features of this School distinguish it from most others: its teachers are on the ground and teach; and the pupils are actually engaged in their studies. The hours per day, and each instructor is limited to twenty pupils.

The habits and morals of its inmates are parentally cared for, all being treated as gentlemen, and all being required to act as gentlemen, the honor of young men being carefully cultivated. This gives its pupils an advantage in learning books and acquiring habits of close thinking. Its patrons are at all times invited to visit and see for themselves the admirable daily schedule of duties and labor executed by both teachers and pupils.

As all are vitally interested in sustaining an institution whose standard of morals and thoroughness of scholarship are so unimpaired, the Principal confidently presents its claims to the public, pleading in that public the aid of the student and multiplied attention to the interests of his charge.

As the number of students will be limited, those parties intending to send will please at once address the undersigned.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

then day and evening the entire year.

Pennsylvania, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1845. For circulars, giving terms, etc., address—

J. W. BLACKMAN, New Orleans.

METHUEN FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

Under the Patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Primary department, per term.....\$20 00

College department, per term.....25 00

Latin and Modern Languages, each.....10 00

Music on Piano and Guitar.....25 00

Use of Instrument.....5 00

Drawing and Painting.....\$20 to 25 00

Continental fee.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Idleness and tardiness charged no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keener.

For information address the President.

nos 1y

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, MAON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scientific Apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously taught.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Object Lesson System adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

Music Department.—Dr. S. M. Bartlett, principal. Dr. Bartlett has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

BOARDING DEPARTMENT. Capt. J. H. Pooser, steward; Mrs. E. R. Whitehead, housekeeper. The gentleman in charge of this department is late of Marianna, Florida, and is of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, toilet soap and lights. Fees for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, twenty weeks each.

CHARGES FOR YEAR OF FORTY WEEKS.

Primary department.....\$25 00

Academic department.....40 00

College department.....50 00

Music department.....20 00

Art department.....\$20 to 40 00

Languages, each.....20 00

Diploma fee.....5 00

Board per month, without lights.....20 00

No incidental charges of any kind. Fees for each term in advance. Total expense, without extras, about \$250.

REV. GEORGE W. F. PRICE,

Pres. Tuskegee Female College,

Tuskegee, Macon Co., Ala.

SHARON FEMALE COLLEGE,

SHARON, MADISON COUNTY, MISSISSIPPI,

will reopen on MONDAY, the 27th of September, under the presidency of

REV. J. M. PUGH, A. M.

The course of study is extensive and thorough, and no student will be spared to give to the student a solid education.

Rates of tuition per session of ten months:

Primary division.....\$30 00

Preparatory department.....40 00

College department.....50 00

Continental fee.....5 00

Music at usual rates.

Board can be had at from \$14 to \$20. For further information address the President.

H. H. MONTGOMERY,

President of Board of Trustees.

NOTE.—My friends in the counties of Madison, Yazoo, Holmes, Carroll, Sumner, Attala, Adams, Newton, Rankin, Hinds, and elsewhere, will please consider this notice as a personal application for their patronage, as it will be out of my power to pay them a special visit.

The daughters of the preachers of the Mississippi Conference, and the orphans of deceased preachers, and also the orphans of deceased Masters, on application, shall have their tuition free of charge.

nos 1y

J. M. PUGH, President.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI,

will reopen SEPTEMBER 22, 1869. Provision will be made for all who apply for admission.

To send your daughter here will cost you \$200 for the term of ten months, or forty weeks. This amount will pay for board, fuel, lights, washing, tuition in English, English text books, slates, pencils, and all the stationery used in the school room. A deduction of \$50 will be made for ministers' daughters.

All the branches are taught. Our music teachers are believed to be unexcelled.

Music and the Languages are extra.

Send for circular.

nos 1y

H. F. JOHNSON,

President.

MANSFIELD FEMALE COLLEGE,

Mansfield, De Soto parish, La.

OWNED BY THE LOUISIANA CONFERENCE.

The Fall Session of this institution, now entering upon the sixteenth year of its existence, will open on WEDNESDAY, the 20th day of September, with a corps of experienced teachers, and enlarged facilities of instruction.

Terms unchanged. For catalogues containing full particulars, address—

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited rather less animation since our last report, but still a fair business has been done in most branches of the wholesale trade. The receipts of sugar have been liberal, and met a rather better demand at steady prices, while molasses has come forward sparingly, and has been dull and drooping. We have no new feature to notice in Western produce, which continues in limited supply and good local demand at firm prices, with the exception of pork and bacon, which are dull and drooping.

The accounts from the country are similar to previous reports. The tributaries are still at a fair navigable stage, but steadily falling. The receipts of cotton continue liberal, and are in excess of previous anticipations. Public opinion has now settled on 1,000,000 bales as the probable receipts, proper at this port, which is 100,000 bales over the popular estimates at the commencement of the season, and 200,000 bales, or twenty-five per cent., in excess of last year.

The river has fallen six inches since our last, and is now four feet below high water mark.

COTTON.—The following are the arrivals since the twenty-fifth ultimo:

Louisiana and Mississippi	271,655
Lake	53
Mobile	401
Florida	50
Texas	105
Total	277,771

On Saturday the movement commenced with a good inquiry, and some few sales at rather fuller prices, partly at figures indicating an advance of $\frac{1}{8}$ or even $\frac{1}{4}$ ¢ from the lowest point on Friday, but after the receipt of the New York dispatches, reporting a material fall in gold, factors were compelled to give way, and the day's business summed up 7,200 bales, mostly at previous rates, but closing dull and drooping.

The only dispatches received from Liverpool were those of Friday, which reported a decline of $\frac{1}{4}$ ¢, and increased the general depression. On Monday factors were decidedly more stringent at the opening, and in some cases realized stiffer rates, but under a further decline in gold at New York to 115 $\frac{1}{2}$ ¢ prices were subsequently unsettled, and ruled for the rest of the day at a falling off of $\frac{1}{8}$ to $\frac{1}{4}$ ¢. The sales were of moderate extent, embracing only 4,600 bales.

On Tuesday the market opened with a fair inquiry, buyers, however, being reluctant to go on unless at further concessions, which factors were unwilling to admit; but after the rally reported in gold the former came forward more freely, and although prices exhibited some irregularity, yet the sales, which comprised 7,500 bales, were mostly at Monday's rates. There is a good deal of low cotton—inferior to low ordinary and ordinary—dusty and otherwise undesirable, which it is difficult to sell at the ruling rates, and can be forced off only by concessions from inside figures.

This makes an aggregate for the past three days of 17,500 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 829,071 bales, against 669,260 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 493,575 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 211,629 bales to Great Britain, of 34,807 to France, and of 61,239 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	194 to 200
Good ordinary	214 to 224
Low middling	224 to 234
Middling	234 to 244
Strict middling	244 to 254

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	27,771
Arrived previously	845,235-873,012
	673,752
Exported past three days	10,467
Exported previously	607,920-618,387
Stock on hand and on shipboard	255,395

Flour continues in good request at full prices.

MONEY.—Gold opened on Tuesday at 115 $\frac{1}{2}$ to 115 $\frac{3}{4}$ (against 115 at New York), and closed at 115 $\frac{1}{2}$ to 115 $\frac{3}{4}$.

The movement in silver has been of limited extent, and no sales have been reported.

The only sales of bonds reported are \$1,000 and \$3,000 Jackson Railroad first mortgage bonds on Tuesday at 85 $\frac{1}{2}$ ¢.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MARCH 12, 1870.

NO. 8.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, March 4.—The *Tri-une's* Havana correspondent writes that the horrible massacre committed by Major Carlos Boet, acting under orders from Valmaseda, upon some twenty-two persons, has been fully confirmed. The details are disgustingly horrible. One of the twenty-three individuals seized for the purpose of vengeance alone escaped. His name was Sanchez. Under the pretext of being brought out to make a declaration or protest of innocence, as to the charge of treason preferred against them, they were ordered into the presence of Boet, who, without causing any examination whatever to be made, gave orders that they should be immediately shot. The execution took place in his presence. When the Governor of Santiago de Cuba, Otero, who is said to be a better man than Boet, learned that the presence of these men was desired, he ordered at once a body of marines to go out and take the prisoners in charge, but when the detachment arrived the unfortunate men had been shot.

Boston, March 4.—Captain Haffres, of the bark E. A. Kennedy, from Liverpool, reports that at three A. M. February 12, latitude 48, longitude 35, he passed a long, low, propeller, apparently lying still, heading west, northwest. She showed only one bright light at her masthead. No other lights were visible in the cabin or about her decks. She had three masts and was square rigged forward, with top-sails yards. To all appearances the steamer was in good condition and bore no evidences of having met any disaster. Captain Haffres stated that he passed near enough to receive any communication if it had been desired, and heard the steam escaping.

A report is current here that the steamer was the City of Boston, and the agent of the insurance company is of opinion it may have been her, as the description corresponds to her rig etc., but there is considerable doubt, as the captain did not observe her very particularly, and the general appearance of the steamer was like others employed in the Atlantic trade. The steamer seen was also heading in an opposite direction from that the City of Boston would take on her voyage. It is possible it may have been her, and she had lost her rudder or was injured in her machinery, which would account for her temporary stoppage in midocean.

WASHINGTON, March 7.—The Venetian minister died suddenly today. His secretary went to the State Department to make arrangements for his reception, and on returning found him dead.

The following occurred to-day between Goodlove S. Orth, a member of the House Committee on Foreign Affairs, and Mr. Sumner, chairman of the Senate Committee:

Mr. Orth—We had Cuba up to-day, but came to no conclusion.

Mr. Sumner—Do you know what is in the wind?

Mr. Orth—No.

Mr. Sumner—Well, in a few days there will be no necessity for action regarding Cuba. (Here the colloquy was interrupted. It occurred in a street car.)

The House Committee on Railroads and Canals have agreed to report favorably on the bill authorizing a road from Norfolk (Va.) to St. Louis, via Cincinnati.

It is stated that the Ways and Means Committee have agreed to report in favor of abolishing the income tax.

In the case of the United States vs. Grossmayer it was held by the United States Supreme Court to-day that after the commencement of the war, a creditor of the North could not authorize a debtor at the South to invest the amount of the indebtedness in cotton for the benefit of the creditor, and that if such a purchase was made at the request of the creditor, through an agent, no title was thereby vested in the creditor, and he could not claim the proceeds of the cotton, it having been seized and sold under the captured and abandoned property act.

Senate.—Mr. Harlan presented a joint resolution from the Iowa Legislature in favor of the removal of the capital of the United States from Washington to the Mississippi valley, and protesting against further appropriations for public buildings.

Mr. Norton presented a bill declaring Texas entitled to representation.

Referred to the Judiciary Committee.

Funding bill resumed. Senate still in session at ten P. M.

House.—Resolutions of the Mississippi Legislature were presented requesting the speedy removal of political disabilities.

Mr. Wells introduced a bill to reclaim the swamp lands of the Mississippi valley, and to promote the commerce of the Northwest.

The House refused to allow Gal-laday, of Kentucky, to withdraw his resignation, notwithstanding the Governor of Kentucky refuses to accept it.

Consideration of Georgia matters resumed, and, after seconding the previous question, the House adjourned. It will vote to-morrow.

New York, March 8.—Cotton has declined to-day. Sales for April are reported at 20c for low middling; for May at 20½; for June at 20½.

WASHINGTON, March 8.—Quesada, the accredited envoy of the so-called Cuban Republic, arrived this morning.

The President to-day telegraphed to Alcorn that he had signed the bill for the removal of political disabilities, and intimates that Alcorn may at once convene the Mississippi Legislature. *Pirapine.*

Presidential proclamation, declaring fifteenth amendment adopted, awaits official advice of its adoption by Texas.

LIVAMORE CITY, March 8.—The grand jury here is composed partially of women.

WASHINGTON, March 8.—It is reliably stated that an American steamer, commanded by an English captain, was fired into and seized by a Spanish gunboat, and taken into Nuevitas, where she is still detained. There is evidently something in the wind regarding Cuba, but nothing authentic has transpired.

CINCINNATI, N. H., March 8.—The election to-day is progressing quietly. The temperance candidates received but five votes in four wards.

WASHINGTON, March 8.—Private dispatches from New Hampshire report that fifty towns show that Stearns is elected by the people, and that the Legislature is overwhelmingly Republican.

New York, March 8.—The gold excitement to-day is without a parallel since September last. As the day wore along, the anxiety to sell assumed a mania, the equal of which had never been witnessed heretofore. The fluctuations were unusually frequent everywhere, and in financial and commercial circles the gold question was the main topic of conversation. The continued downward tendency of prices was felt throughout all the ramifications of trade. The excitement in the gold room was intensified by the many telegrams from Washington—one to the effect that Mr. Williams had introduced a bill in Congress to receive part of the customs in currency; another that Mr. Fowler wanted the government to sell all the surplus gold.

These dispatches started the frantic crowd to selling, and the prices fell to 110½. At this juncture a telegram was received that the Banking and Currency Committee had agreed to report a bill in favor of selling \$50,000,000. The price then went up to 111½. Here the report was denied, and the price fell to 111. At this point reports were received that the changes in the funding bill were less favorable, and back went the price to 111½.

In the mercantile circles the decline in gold had a tendency to further unsettle the business.

The stampede to sell gold to-day continued, and there was cheering at the announcement of every decline.

Many business firms here have resumed specie payments.

New York, March 9.—12.50 P. M. Gold stiffened from the opening, but the disposition is still largely bearish. There is intense excitement in the gold room, and the streets are crowded about the indicators.

Cotton is sympathizing with gold, and the market is fully ½c lower. Sales of deliveries are light this forenoon.

WASHINGTON, March 9.—There is much talk in political circles concerning the resumption of specie payment. The faith is strong in the ability of the government to resume.

Boutwell is much questioned, but is very reticent as to his intentions. It is believed that he will adhere strictly to his published programme.

Many of the retailers here are giving silver in change for greenback purchases.

Supervisor Cordling reports the collections in the first district of New Orleans to be one hundred per cent. greater last month than in the preceding month. *Times.*

General Quesada and party visited the President to-day, and subsequently visited Secretary Fish. The interviews were of an unofficial character.

The President has nominated W. R. Hardy as internal revenue assessor of the third Louisiana district, and Mr. Enmons as United States district attorney for the northern district of Florida.

Secretary Portman, of the American Legation in Japan, writes that the investigation relative to the Onoda disaster is proceeding at the English Consular Court. Lady Parker, wife of the British minister to Japan, was a passenger on the steamer Bombay, and will be one of the witnesses. The most intense feeling has prevailed during the investigation.

WHEELING, W. Va., March 9.—A body of armed men in daylight released the prisoners from the jail at Charlestown, the future capital of West Virginia. The Governor proposes calling on the Federal government for aid.

LOUISVILLE, March 9.—General Breckinridge, in a criminal argument to-day, denounced the members of the Ku Klux Klan as villains or idiots.

THE LEGISLATURE.—The impeachment trial of G. M. Wickliffe, late auditor of the State of Louisiana, was concluded yesterday. The vote for conviction was unanimous, thirty-two Senators voting "guilty" of the charges embodied in article four of the articles of impeachment.

Evening Session.—Both houses assembled last evening, at seven o'clock and remained in session until midnight, when the President of the Senate and Speaker of the House announced their respective bodies adjourned sine die.

Several bills of an important character passed.

A message from the Governor was received, calling an extraordinary session for ten days, to commence on Monday next. The message is published in another column.

The special committee appointed to investigate the charges made by Mr. Wickliffe against the Governor, report unanimously that after examining all the witnesses named, no proof was obtained substantiating the same. The report was unanimously adopted by the House. *Pirapine, March 4.*

SHRINKAGE IN PRICES.—Nearly all kinds of commodities have undergone a marked decline during the last few months, more particularly since the September gold panic. Cotton has fallen two or three cents per pound, pork seven or eight dollars per barrel, breadstuffs to a lower point than for many years, while nearly every other staple is materially cheaper than one year ago.

The effect of our vicious monetary system, for several years after its adoption, was not only to raise the nominal scale of values proportionately with the depreciation of the currency, but to infuse business with a speculative spirit, precisely adapted to stimulate prices considerably above the point at which a merely nominal increase would have rested.

But an ultimate reaction from this feverish state of things set in, after it became apparent that a steady decline of the gold premium was inevitable, or what amounts to the same thing, when a marked appreciation in the commercial quality and purchasing power of the currency was assured.

The effect of this reactionary movement is a pause, hesitation and dullness in all departments of trade. There is at present a conspicuous lack of one essential element of commercial stability—confidence. The mercantile classes may for the time being be likened to the mariner at sea without chart or compass. They do not fully understand the commercial bearings, and are, therefore, moving with extreme caution. But this state of affairs, although entailing many hardships upon the trading classes, has its impending compensations which should go far toward the mitigation of the present evils.

The shrinkage in prices must anon lead to a renewed confidence, and a free distribution of commodities. With diminished cost of living, and diminished cost of the materials of industry, much of the enterprise that has been occupied with gambling upon the vicissitudes of an unhealthy and spasmodic money market will be again turned into productive channels.

The gap between the currency and gold has become so narrow that it is safe to say that most of the difficulties of a return to specie payments have already been overcome, and, with conservative action on the part of Congress, there is no doubt

the goal could be reached without a greater shock to commercial interests than has already been sustained. But those who are carrying large stocks of high-cost goods think it for their interest for gold to react, and it is not improbable, where so many vast interests are at stake, that it will react. In that event, the trials and tribulations of the business world will simply be prolonged for a period, to the positive disadvantage of the country at large. If business men desire the return to specie payments and commercial stability, it is safe to say there will be no better time in the future to make the transition than now, when the difficulty has been so heavily discounted. *New York Price Current, March 2.*

FOREIGN.

PARIS, March 8.—The Americans in this city will hold a meeting on Wednesday to pay honor to the memory of the late Mr. Burlingame. Mr. Washburne will preside.

Prince Pierre Bonaparte has been notified to appear before the high court to answer for the homicide of Victor Noir.

The sessions of the Ecumenical Council will be resumed next week. The Pope is confident of the success of the doctrine of infallibility.

BRUSSELS, March 3.—A dispatch from Rome states that every effort is being made to induce the American bishops to declare for the papal infallibility, but so far the ultramontanes have been unsuccessful in securing their adhesion.

PARIS, March 8.—M. Ollivier made a speech to-day, urging all political parties to give the ministry their assistance and advice, and notwithstanding some possible errors he predicted its success.

Eight hundred conscripts to-day formed in line, and with a draped banner at their head marched through the streets to the publication office of *La Marseillaise*, where they halted and sang the "Marseillaise," after which they quietly dispersed. The police made no attempt to interfere.

The religious organs here have advised from Rome, which represent that the Pope, in response to a request from a great majority of the bishops, has distributed among the members of the council a scheme proposing the definition of the dogma of infallibility, with a notice that the suggestions of the fathers on the same will be received until the seventeenth instant.

Dispatches from another source add to this intelligence that in consequence of the introduction of this scheme, the French government had made a demand on the papal court that a special envoy of France be permitted to assist at the council.

LONDON, March 8.—The *Times* of to-day denounces the captain of the steamer Bombay for abandoning the United States steamer Onoda, after running her down.

PARIS, March 9.—France and other nations will demand special representatives in the Ecumenical Council.

LONDON, March 9.—The German and Austrian bishops have agreed to oppose the infallibility dogma. It is generally hoped the Pope will not precipitate a collision with the European powers.

St. Petersburg, March 9.—Mr. J. M. Brown is provisionally successor to Mr. Burlingame.

PARIS, March 9.—In the Corps Legislatif to-day Jules Favre demanded that the affairs of Algeria be regulated through legislation in both houses, and not by *Senatus Consultum*. M. Ollivier replied that the minister desired to place the other departments of the administration under the control of the legislative bodies, and they were now consulting with the emperor on the best method of effecting such changes.

PROCLAMATION.

STATE OF LOUISIANA.
Executive Dept., N. O., March 3, 1870.

Whereas, an extraordinary occasion has arisen requiring further legislation in behalf of the interests of the State upon subjects and matters unfinished or not acted upon by the regular session of the General Assembly terminating this day:

Now, therefore, I, Henry C. Warmoth, Governor of the State of Louisiana, under the powers vested in me by article sixty-four of the Constitution of the State, and by act No. 19 of the acts of 1870, entitled "An act relative to extra sessions of the General Assembly, and defining the duties of the Governor in reference thereto," do issue this my proclamation convening the General Assembly of the State for

the transaction of business, at the city of New Orleans, on Monday, the seventh day of March instant, at twelve o'clock M., in the building known as the Mechanics' Institute; and I do hereby notify all members of the Senate and House of Representatives to assemble at the time and place above mentioned.

And I do hereby specify the objects for which the General Assembly is convened in extra session, and which shall take precedence of all other business, to wit:

To provide for the assessment and collection of the revenues of the State.

To make appropriations for the support of the State government.

Amendments to the present law relative to public education.

To provide for the debt of the State.

The militia laws, the registration laws, and amendments to the charter of the city of New Orleans.

Reorganization of the Land Office of the State, and to make provision for the survey of unsurveyed lands of this State.

An act is needed to restrict the powers of the courts to issue writs of mandamus against the officers of the city of New Orleans, for the object of collecting demands for money against the corporation.

To provide for the organization of the district courts of the parish of Orleans, defining the jurisdiction of the several courts relative especially to injunctions, mandamus, etc.

Unfinished business relative to the floating indebtedness, and other matters important to the good government of the corporation of New Orleans.

And I do hereby indicate as the length of said session herein called, the term of ten days, commencing with said Monday, March 7.

Given under my hand and the seal of the State, this third March, 1870, and of the independence of the United States the ninety-fourth.

H. C. WARMOTH.

By the Governor:
Geo. E. Bovey, Sec. of State.

CANONES DE ECLESIA.

POSITIVE PART OF THE SYLLABUS LAID BEFORE THE ECUMENICAL COUNCIL.

The Augsburg *Universal Gazette* has published the Canones de Ecclesia, being that part of the Syllabus in the new dogmatic scheme laid before the Ecumenical Council, expressed in a positive form. These canons, as translated from the German, are as follows:

OF THE CHURCH OF CHRIST.

Canon 1. Whoever says the religion of Christ consists and is expressed in no particular community established by Christ himself, but is only observed and exercised by individuals for themselves without regard to any community which is the true church, of Christ—let him be accused.

Canon 2. Whoever says the church has received from Christ no defined and unchangeable constitution, but, like other communities of men, has been subjected to changes and alterations in different times, or can be subjected to them—let him be accused.

Canon 3. Whoever says the church of the divine promise is not an external and visible community, but altogether an internal and invisible—let him be accused.

Canon 4. Whoever says the true church is not a single body, but consists of the different and scattered communities of Christian name, and is poured out over the same, or the different communities diverging from each other in their confession of faith and separated from the union form, as members or parts, the one and universal church of Christ—let him be accused.

Canon 5. Whoever says the church of Christ is not a community altogether necessary to eternal salvation, or man can be saved through the exercise of any religion—let him be accused.

Canon 6. Whoever says that intolerance with which the Catholic Church regards and condemns all religions sects that have separated from her is not prescribed by divine law, or as to the truth of religion only speculations, and not certainly exist, and consequently all religious sects should be tolerated by the church—let him be accused.

Canon 7. Whoever says even this church of Christ can sink in darkness or be polluted by errors through which she may go astray from the blessed truth of the faith and depart from her original state, or corrupt and degenerate, may cease to exist—let him be accused.

Canon 8. Whoever says the exist-

ing church of Christ is not the best and highest institution to obtain salvation, but that another is to be waited through a new and more perfect pouring out of the Holy Ghost—let him be accused.

Canon 9. Whoever says the infallibility of the church is limited to that which is contained in the divine revelation, and does not extend to other truths which are necessary that the treasure of the revelation remain perfect—let him be accused.

Canon 10. Whoever says the church is not a perfect society (*societatem*), but a collegiate body (*collegium*), or she is placed in the general community or in the state in such a way as to be subject to temporal authority—let him be accused.

Canon 11. Whoever says the church consecrated by God is a community of equals (the bishops, indeed, have an office and a duty, but not a power of governing in themselves, conferred upon them by holy consecration, and which can be freely exercised by them)—let him be accused.

Canon 12. Whoever says from Christ our Lord and Saviour power has only been granted to his church to counsel and persuade, and not compel the erring and stubborn by means of external condemnation and whole penalties—let him be accused.

Canon 13. Whoever says the true church of Christ, out of which no one can be saved, is another than the Holy Catholic and Roman Apostolic Church—let him be accused.

Canon 14. Whoever says the Holy Apostle Peter has not been consecrated by Christ as the first of all apostles and the visible head of the militant church, or he has only received the dignity of a primate, and not the primacy, with actual power in himself—let him be accused.

Canon 15. Whoever says it is not through the consent and will of Christ himself that Peter has continual successors in the primacy over the entire church, or the Roman Pope is not by virtue of divine right the successor of Peter in his primacy—let him be accused.

Canon 16. Whoever says the Roman Pope has only the office to superintend and conduct, but not full and supreme authority over the entire church, or that his authority is not regular and immediate over all churches—let him be accused.

Canon 17. Whoever says an independent ecclesiastical authority like that which, according to the dogma of the Catholic Church, has been imparted to her by Christ, and a sovereign civil authority cannot exist side by side in such a way that the rights of both be preserved—let him be accused.

Canon 18. Whoever says the authority which is necessary for governing the civil state is not from God, or no submission to the same is due according to the laws of God, or the same is opposed to the natural freedom of man—let him be accused.

Canon 19. Whoever says all laws existing among men are derived from the political state, or no authority exists outside of that so imparted—let him be accused.

Canon 20. Whoever says the sovereign rule for public and social actions in the laws of the political state or in the opinion of public men, or the claims of the church do not extend to these actions whereby she can express herself upon that which is allowed and that which is not allowed, or something can be allowed by virtue of civil right which is not allowed by divine or ecclesiastical right—let him be accused.

Canon 21. Whoever says the laws of the church have no abiding force except so far as they are confirmed by the sanctions of the civil authority has by virtue of its sovereign jurisdiction, right to judge and condemn in case of religion—let him be accused.

BENEVOLENCE is always a virtuous principle. Its operations always secure to others their natural rights, and it liberally superadds more than they are accustomed to claim.

To rejoice in the happiness of others is to make it our own; to produce it is to make it more than our own.

I NEVER knew how it was, but I always seemed to have the most come in when I gave the most away.

Our prayers and God's mercy are like two buckets in a well—while the one ascends the other descends.

The Christian Advocate.

SATURDAY, MARCH 12, 1870.

TO THE NIGHT-BLOOMING CEREUS.

BY JOHN K. STAYMAN.

O miracle of beauty, why dost thou,
Quickened and nourished by the warmth
and light,
Hide from the sun the lustre of thy brow,
And show thy splendor only to the night?

Fear not lest the garish glare of day
Disclose some flock upon thy snowy cup?
Or is it pride, when other flowers are gay,
That makes thee hoard thy peerless beauty
up?

Or, out of kind regard and modesty,
Withdrawst thou until the day is done,
That illies may not die of jealousy,
Nor roses blush to see themselves out-
shine?

Or dost thou choose, for thy selectest hour,
The season when the stars look down on
earth,
That they may know, by thy resplendent
power,
What beauty in this lowly place has birth?

Through all the livelong day, like a fair
bride
Who could not quit her coy and maiden
side,
When the night comes, thou drawest veils
aside,
And then the dusk grows lustrous with thy
glaze.

But why so transient? Tarry till the dawn,
Or darest thou to stay and be despoiled,
Knowing that what is often looked upon
Is apt, alas! to be but lightly prized?

Then let me view thee, touched by no regret,
And bathe me with the fragrance of thy
breath;
Shine in thy rich array while I forget
How near approach thy splendor and thy
death.

O short-lived glory! most transcendent
bloom!
The beauty of thy flower is more to me,
Because thou wilt be sought for in the gloom,
And most, because of thy fragility.

CHINESE IMMIGRATION.—NO. III.

ABINGDON, VA., Dec. 29, 1869.

REV. C. K. MARSHALL, D. D.—Dear

Brother: The friends of Chinese im-

migration seem to look only at one

side of the Chinaman, and that, as

it respects the lower classes, decid-

edly the best side of him. I am far

from wishing to depreciate him. He

is a good laborer, as a general

thing. Necessity has forced him to

acquire habits of industry and per-

sonal economy; and he has a natu-

ral quietness and docility of manner

which a stranger easily attributes to

amiable qualities of mind, but finds,

on better acquaintance, to be the

result of a phlegmatic temperament

and the force of national habits.

Under this placid exterior smolder

the fierce fires of a turbulent and

seditious nature, which, when rous-

ed, is exceedingly violent and re-

vengeful. As an Asiatic he is im-

aginative, subtle and shrewd, and,

as a consequence, superstitious,

treacherous and cruel; or, if the

word consequence be questioned, I

will say, as a general rule. As a

Chinese Asiatic he is supercilious,

avaricious and profoundly cunning.

His shrewdness is so characteristic

that he has been called the Yankee

of Asia. These general features of

character may, I think, be safely

predicated of the Chinese as a peo-

ple, modified, of course, by indi-

vidual peculiarities. I do not un-

dertake to say that every Chinaman

is treacherous and cruel, but that

these are national traits of char-

acter.

Among the higher classes in Chi-

na education has done much to ele-

vate and refine the character; but

wanting a pure standard of social

ethics, we must regard even the

best circles of society as corrupt.

But it is the lower classes, or, more

properly, the lowest class of Chi-

na men with whom we now have to do.

If education has done something to

improve the higher classes, they are

by that so much better than the un-

educated. In all countries the peas-

antry exhibit the national charac-

teristics in their strongest types. In

China this is emphatically true, and

in the coolie we have the unadorn-

ed, unadulterated Chinaman. In

him the prevailing vices of his coun-

trymen have their grossest develop-

ment. In him we have the worst

specimen of Chinese character.—

What I shall further say, therefore,

concerning the Chinese must be un-

derstood as applied to the coolie

emigrant.

Suppose, then, contrary to what

I have presumed to assert as likely

to occur, the coolies imported into

the South become permanent resi-

dents, bring their families, or amal-

gamate with the negro, and form a

part of our national population.—

What have we gained? I do not

dare to suggest amalgamation with

the whites, for to a Southerner such

a suggestion would be an insult.

They will mix with the negro if they

mix at all. Now, sir, contemplate

for a moment such a state of things.

These millions of debased pagan

Asiatics, compounded with three

millions of Africans, and these pro-

ducing a third race in our midst!

They would all be freemen, invested

with the privileges and powers of

citizenship! Every male mongrel,

twenty-one years old, would have a

vote. If the enfranchised negro is

an element of danger to our liber-

ties, what would be our condition in

such a state of things?

Again, what would likely be the

character of the material improve-

ments in the South with such a popu-

lation upon its soil? These peo-

ple must have homes. What kind

of improvements would they make?

We know where the soil is fertile

and the suns warm, indolence and

improvidence are encouraged, and

native poverty contents itself with

the bare supply of daily wants. A

heavier curse could not rest upon

our soil than such a population.

Our most spiteful enemies could

wish us nothing worse.

If a serious proposition—and the

thing were possible—was made to

introduce Asiatic cholera as a per-

manent plague, to become perennial

and universal throughout the land,

I could not regard it with more

concern than I now do the proposi-

tion to fill our beautiful South with

the heathen scum of China. Noth-

ing, I conceive, but the insatiate

greed of commercial avarice could

ever have induced intelligent men

to consider such a scheme in any

other light than that of a national

misfortune.

I have nothing to say in answer

to those who profess to favor emi-

gration because it will bring the

heathen to our door, where they

may be converted with little trou-

ble. That is altogether an after-

thought, and too near akin to "pious

fraud" to deserve respect. We are

not to do evil that good may come.

And now, sir, I am done. I have

tried to answer your question. I

thank you for the kind and flatter-

ing manner in which you made the

request. I am sensible how imper-

fectly I have responded. I trust all

to your charitable indulgence, and

grant the liberty you ask, to use

what I have said as you think best.

Yours truly,

W. G. E. CUNNINGHAM.

MISSISSIPPI CORRESPONDENCE.

Vicksburg, Feb. 25, 1870.

MR. EDITOR: Delayed hereby not

making a connection with a boat,

has given an opportunity for some

reflections upon the present condi-

tion of our church around the old

Walnut Hills, and throughout south-

west Mississippi, which was once the

first battle-field of Methodism and

true religion with vice and immor-

ality.

In the early history of this State,

while it bore a territorial relation,

the immigration to it was a thought-

less people on the great subject of

their soul's salvation, although they

were thrifty, enterprising and care-

ful about the things of this world.

They were, however, susceptible of

religious impressions, and the zeal-

ous advocacy of repentance for sin,

and the new birth, by the pioneers

of the Cross, met a hearty response

in the hearts of these earnest seek-

ers after the true faith. Hundreds

joined the church, and by their de-

votion built up Christianity through-

out these regions. Through the in-

strumentality of the early preachers

these hills and valleys once resound-

ed with the glad tidings of the gos-

pel. The open wood campgrounds,

old Center and Bethel, once were

the "great temples" where God met

his people and blessed them, and

shouts of praise and thanksgiving

went up to heaven from thousands

of true converts. Noble, faithful,

self-sacrificing Christians stepped

forward in the church's early days,

and if a church was to be built or

a camp ground gotten up, and a min-

ister to be supplied, they did not

stop to know what others were do-

ing, but did the work.

There is no such zeal and devo-

tion now; and why? What is the

real cause? Where the seat of this

lukewarmness and dearth in the

church? Why has religion, a pious

walk and godly conversation ceased

to be the rule, instead of the excep-

tion? I mourn over these things,

and long once more to hear the songs

of Zion borne up, upon wings of

faith and prayer, to our heavenly

Father, from these waste places of

our land. Once immorality in pub-

lic places hid its deformed face, but

now the gambler, the drunkard, the

horse racer, the defiled, publicly

boast of their crimes. Let the

church, with one accord, rally to the

defense of our holy religion, to the

defense of our domestic altars, to

the building up of true piety and

holiness, and reforming public opin-

ion, and work until our statute laws

are executed, our law-makers are

the leaders in virtue and purity, and

our religion is once more glorified

in our midst. Let there be no drones

in the church, much less stumbling

blocks. Oh! ye ministers of God,

pray for the spirit of an Elijah, the

zeal of a Paul, and the eloquence of

an Apollos. Let there be no half-

hearted or half-working men at the

gospel plow. Be in earnest; exem-

plify the trite saying that "Method-

ism is Christianity in earnest."

Who among the ministry are

praying for the mantle of the pio-

neer Gibson, the beloved Lane, the

logical Winans, the eloquent Bur-

russ, the zealous Drake, and the

faithful Father Mullins. Their voices

once resounded throughout all

these lands. Thousands hung upon

their eloquent and God-inspired

words, and many still remember,

with gratitude to God, the zealous

and feeling manner in which they

urged them to "taste and see that

God was good."

But I have written you a longer

letter than I expected. Let me say

another word: Be encouraged, my

dear brother, in your effort to build

up Centenary College. We want

educated men.

Yours, R.

THE PEABODY FUNERAL.

[The following extract from a private

letter has been furnished us for

publication. It will be read with

interest, as coming from the pen of

a lady who was present at the im-

posing ceremonies.—Editor.]

The whole city has been in a

continued state of excitement, ex-

pecting and receiving the Peabody

fleet. All due honor was paid the

good man—great only in the true

charity that faileth not. Genera-

tions yet unborn will bless the

name of America's most beneficent

benefactor. We visited the Mon-

arch on the first day of reception.

As we neared the fleet every yard-

arm was manned to receive the ad-

miral—not only the Monarch, but

her consort, the Plymouth, our two

monitors and the revenue cutter.

It was a grand sight, though the

men looked like small bronze statu-

ettes, with their arms raised in salu-

te.

The exterior of the Monarch is

only beautiful in strength—any-

thing but graceful. She seems a

great sea monster. As we sailed

across her stern the monster ap-

peared sleeping. Two dead-lights

were the closed eyes; while a band

with "Monarch" in gilt had the ap-

pearance of banding the forehead.

Her decks were very cleanly. Every

officer, marine and seaman, was in

full dress.

We followed the stream which

turned toward the chapel in which

laid all that remained of the once

active, good man. All voices hush-

ed, each footstep trod lightly, as

they entered. The entire room was

draped in cloth and velvet, with

silver fringe, and monograms ("G.

P.") In the center, on a raised

platform, stood the casket, covered

with black cloth, studded with brass.

Over it was thrown a black velvet

pall, lined with white satin. At

either corner stood a sentinel or

guard, resting on his gun, reversed,

his head down, giving a solemn ef-

fect. Beautiful wreaths and crowns

The Christian Advocate.

SATURDAY, MARCH 12, 1870.

LINES TO THE MEMORY OF LIZZIE.

AFFECTIONATELY DEDICATED TO REV. J. WILKINSON, PASTOR OF THE METHODIST CHURCH AT SHREVEPORT.

We mourn not that our loved one has gone
To regions blest and fair;
But we are desolate without
In the cold, ungenial air.

Still, though the mists of death be thick
Before our mortal ken,
We feel that with the glorified
Lost Lizzie lives again.

The early daisies bloom 'e'en now
O'er hands crossed 'neath the sod,
And spires of vernal green look up
With loving trust to God.

Then let her sleep. The soft, warm light
Shall nestle o'er her head,
When evening draws across the plains
A rainbow o'er the dead.

Far, far away, we'll think of one
Whom death's arms enfold,
When evening draws across the plains
Its bars of red and gold.

The clouds above her tomb shall drop
Warm tears in summer rains,
And wintry moonlight glisten in
Its long and icy chains.

But cloud-drops, not warring storms
Above thy peaceful head,
Shall not molest thy quiet rest,
Dear, blest and honored dead.

We say farewell, because on earth
Thy voice is heard no more;
But angels listen one more strain
Upon the better shore.

OPHELIA, Louisiana. S. M. W.

MORAL SCIENCE.

CONCLUDED.

With Butler, and Reid, and Stewart, and Wayland, and Alexander, as well as with a host of others, we maintain that conscience is the supreme rule of moral rectitude in action. But although conscience is the supreme rule of right for the will, it is not the supreme law of the moral universe. If we mistake not, there is in the divine government of the world a higher and a holier law than this, even a law for the conscience itself.

By viewing conscience thus, in due subordination to the external, absolute rule of right, its supremacy over the will is fortified and secured against abuse. For the doctrine, thus organized, allows no one to imagine that he is free from blame, because his acts or volitions are conformed to the dictates of conscience. On the contrary, it shows that he may have been criminal in the highest degree, just because he has failed to bring his conscience into conformity with the absolute rule of right, with the supreme law of the moral universe. The first thing he has to do is to see that his conscience is right, or in conformity with the external standard of moral rectitude; and the second is to obey its dictates. Hence, if this first great fundamental duty be neglected, he cannot absolve himself from guilt by performing the second. Thus, although conscience may justify particular acts, yet, however dark and perverted, it can never justify an evil life.

The above view secures the supremacy of conscience not only from being abused by its enemies, but also from being deserted by its friends. Conscience is the supreme rule of right in action, say they; and yet if we ask, Is it always right to conform to its dictates, they frequently answer, no we have seen, in the negative! That is to say, they frequently teach that it is not always right to act in conformity with the supreme rule of right in action; that although a man is "morally bound" to obey conscience, yet he may commit a most grievous sin by such obedience! This inconsistency, this denial of their own doctrine concerning the supremacy of conscience, arises from the fear that it may be used as a cloak for an evil life. But, as we shall see, the remedy is not adapted to the evil, and only introduces disorder and confusion into the science of morals.

Suppose, for the sake of illustration, that a man is really disposed to follow the dictates of his conscience, but that its dictates are wrong; what is the remedy in such a case? Should we tell him, that although conscience is the rule of right in action, yet he does very wrong to follow its dictates? Should we tell him that he is "morally bound" to obey it, and yet that he commits sin in so doing? Should we thus pull down with one hand what we had so industriously reared with the other, because he seeks to shelter an evil life beneath it? By no means. The remedy for such an evil is far other than this. The true remedy is, not to deny one truth when we should teach another, but to set each truth in its place, and clearly exhibit the immutable relations they sustain to each other. In this way each will impart additional light and strength to the other, and neither can be made a hiding-place for the criminal.

We would not say to such a one, then, that he does wrong in obeying the dictates of conscience, that he

commits sin in doing what he is morally bound to do. For how else shall he act? What other guide can he follow? We may set up expediency, or the relations of things, or the will of God, as the external rule of right; but how can he follow any one of these, except so far as it is understood by him or manifested in his conscience? Can he follow a light which he does not see? It is evident, we think, that conscience is, and of necessity must be, the immediate rule of right, or the moral rule for the will, from the utter impossibility of conceiving of any other.

As in the case supposed, the evil consists in a want of light for the conscience; so we should direct the will to the external standard of absolute rectitude, in order that it may be illuminated by the rays of truth. So far from telling such a one that he should cease from obedience to the dictates of conscience, or what is the same thing, that such obedience is sinful, we should urge him to persevere therein. We should urge him to obey them in all cases, and under all circumstances. We should never cast a doubt on the rectitude of his conduct, in following the supreme rule of rectitude in action. We should never exhort him to forsake allegiance to the authority of conscience, or warn him that such allegiance is sinful. As his mistake and his sin consist not in obeying the dictates of conscience, not in following the only guide he has, but in not having taken sufficient pains to inform his conscience aright, so we should bring the external rule of right into contact with his conscience, so as to correct its erroneous decisions. This would be to adapt the remedy to the evil, and not to deny one truth when the case merely requires us to teach another. We should even call in the aid of conscience itself, whose authority is never to be disregarded, in order to show him that it is a duty to use all the means in one's power to enlighten the understanding, and bring it into conformity with the standard of absolute moral rectitude.

As we have a law or guide for the conscience as well as for the will, so should each be allowed to perform its own appropriate functions, and neither be thrust into the office of the other. In this way alone can that disorder and confusion, which has so long disgraced the science of morals, be excluded from the minds of men, and the beautiful harmony of moral truth revealed to them.

Hitherto we have merely spoken of the existence of an external rule of right, or rule for the conscience, and of its relation to the internal rule. But now the question arises: What is this rule or standard of right for the conscience? What is this guide, or enlightener, of the moral faculty? Is it expediency, or the relations of things, or the will of God? No question in the whole science of morals is more important than this; and yet, strange as it may seem, in regard to no other question has the discussion been left in a more incomplete and unsatisfactory condition. Some of the causes which have contributed to this defect in the state of moral science may be briefly noticed.

Neither Aristotle nor Cicero, as might have been expected of heathen philosophers, have even attempted to do justice to the will of God, as the great absolute standard of rectitude for the universe of created intelligences. Their claims are entirely overlooked by them. The shortcoming of Bishop Butler, in this respect, seems to have been little less deplorable than that of the heathen philosophers of antiquity. He has dismissed the rule of relative right with the most admirable ability, with the most wonderful sententiousness and power; but having supposed this to be all that is necessary, he is silent in regard to the other, and equally important, branch of the twofold rule of right. Having supposed that "a man has the law of right within, and all that is necessary is for him to attend to its motions," he does not dwell on the importance of seeking and attending to the great law that is without and above himself.

Dr. Paley holds that "the will of God" is the ultimate standard of right and wrong. But so far from having developed this doctrine, and caused it to appear in a clear and convincing light, he has almost entirely obscured its luster by an interposition of the doctrine of expediency. Nor is this all. For although he holds up the will of God as the ultimate standard of right, yet is this so presented by him as to cause a total eclipse of the moral perfections and glory of the Divine Being. If the will of God be the rule of right, says he, then what do we mean when we say that his will is holy, righteous and good? Do we mean anything more than the silly assertion, that his will is as his will? His answer to this question is one of the most wonderful things in the history of moral science. From the benevolence of God, says he, we infer that he enjoins whatever is expedient, or for the good of his creatures. By means of expediency, then, as a test, we determine what rules are right; according to

which rules moral judgments are formed. We even come, in process of time, to apply them to the divine will itself, without recollecting that "the rules themselves are deduced from the divine will." But suppose that, instead of "stopping at the rules," we should happen "to observe at the time, that the rules, according to which we pronounce the divine will righteous, were actually deduced from that will itself, what must be our conclusion? The conclusion would be inevitable, that we merely imagine the Divine Being to possess a holy will, because we have "established the habit," by custom, "of stopping at the rules," deduced from his will; and that, in reality, there is no such moral perfection belonging to his nature. We only seem to ourselves not to go around in this circle; whereas, in reality, we judge of the divine will merely by comparing it with itself. When we say "that God acts right," we think we are saying something; but if we would observe the process more closely, we should discover that we only advance the identical proposition that he acts as he does act, and not otherwise. Thus, in Paley's attempt to vindicate the divine will as the rule of right; in the glory of God's moral perfections made to disappear, and absolute omnipotence will is all that is left upon the throne of the universe.

No writer, so far as we know, has ever made the attempt to refute this remarkable passage in the work of Dr. Paley. His doctrine of expediency has been labored on all sides, and more than a hundred times refuted; while this virtual denial of the moral attributes of God, which forms by far the most objectionable feature of his work, has seldom, if ever, been assailed by his opponents. It has been noticed by David Stewart, but he seems to think that such is the legitimate consequence of making the will of God the ultimate standard of right; and hence, with Cudworth, Clarke, and others, he seeks that standard out of and beyond the divine will itself. And as the diligently mentioned by Paley appeared indisputable to such minds as those of Cudworth, Clarke and Stewart, so, if it be not removed, it will continue to cloud the minds of thousands of others, and cause them likewise to deny that the will of God is the ultimate rule of right. Hence, the system of morals which holds the will of God to be the absolute standard of right, should place that doctrine on a solid foundation, clear up the difficulty by which it is obscured, and cause it to shine with a clear and convincing luster.

"Nothing can be more meager than what is said in favor of this doctrine, even by its most recent advocates. Dymond, for example, alleges that 'he who says that the understanding is to be our moral guide, is not far from saying that we are to be guided by the divine will; because the understanding, however we define it, is the offspring of the divine counsel and power.'" In like manner, Dr. Alexander says: "That theory which considers conformity to the will of God to be virtue, is undoubtedly correct; for that faculty in us which approves of virtuous actions, was implanted by him, and is an indication of his will." Thus, it is argued that the will of God is the rule of right, because the conscience, which was implanted by that will, is so. Now, supposing this argument to be valid, it only proves that the will of God has made conscience the rule of right; and that, consequently, we may be said to obey his will when we obey the dictates of conscience. It sets forth the will of God, not as the rule, law or standard, for the guidance of the conscience; but, as a rule of right, it identifies the will of God with the conscience itself. It is true, that when we obey conscience, we obey the will of God; because it is his will that we should obey the vicegerent which he has set up in our hearts. But in a very different sense from this, should the terms be understood, when it is said that the will of God is the rule of right. This is a rule for the conscience itself, and not the same with the conscience as a rule for the will. If we identify these two rules, then we shall have only one rule of right, namely, the rule of conscience, for acts of the will; a doctrine which, as we have seen, can scarcely stand alone even among its friends. A doctrine which Dr. Alexander himself has deserted at times, however strenuously he may have asserted it at others; lest, in teaching that "we always do right in obeying the dictates of conscience," he should be found to sanction what is "wrong in itself," or contrary to the will of God. Nor can such unsteady, vacillating, and self-contradictory views ever be avoided, unless both rules of right be introduced, and the relation they sustain to each other exhibited, as well as the function each is designed to perform. Such an adjustment of the great principles of moral science seems to be exceedingly desirable, inasmuch as it is believed that it will unite the one-sided views of apparently conflicting schemes in one harmonious whole,

and secure them against that liability to abuse which is incident to all half truths. For no truth, if detached and isolated, can possess either the stability or the luster which it derives from being firmly fixed in its own appropriate place in a well-articulated system of doctrine. In such a system each truth will be found to impart additional support and beauty to the others, as well as derive an additional support and beauty from them. It will be thus, we trust, in regard to the great truth concerning "the supremacy of conscience," and the authority of the divine will as the ultimate standard of morality, as exhibited in a true system of ethics.

A theory of ethics should also aim at another object, which is either not considered at all, or at least not steadily and successfully considered. It is this: those precepts of morality, which are usually found under the head of "Practical Ethics," should have a place in the body of the science itself, and an organic connection with its great central truth. As they now exist, they appear like so many detached principles, destitute of a scientific unity or import, and having no connection with what has been laid down in the theory. On the contrary, it seems to us that, after having exhibited the great idea of the morally good, these several precepts should be shown to emanate from this idea as rays of light from the sun. In other words, these separate lights should not be left in this apparently loose and scattered condition; but, so far as possible, they should be organized into one great light to rule by day.

Hence, after having expounded the twofold rule of right, the internal rule for the will, and the external rule for the conscience, we should endeavor to show that the latter embraces and contains all the essential elements of morality. If some of these elements be omitted, it should be remembered how very numerous they are; and also, that it is not so much the object of the science of ethics, to teach us what things are right, as why they are so; that it aims, as Plato truly tells us, not so much to inform us what things are holy, as to point out the common idea in which all holy things agree. Such a reduction of the precepts of morality to its fundamental principle, it seems to us, is essential to anything like a complete reconstruction of the body of the science. Nothing appears more unsightly, indeed, than a meager half-construction of the science, while its *disjecta membra* are loosely scattered over what is usually called "Practical Morality."

But if in pursuing this course we should omit some of the minor points of morality, we would bring before the mind the discussion of certain great principles, which are usually left out of every division of works on ethical philosophy. For example, we would consider man's accountability for his belief, a doctrine which lies at the foundation of all morality and religion, and without the consideration of which no theory of ethics can be complete. Since no man can follow the external standard of right, except so far as it is understood by him, or revealed to his conscience (just as no eye can be guided by a light which it does not see), so it is truly wonderful that the great duty of forming correct opinions on moral subjects, or of informing and enlightening the conscience, should have been so little insisted on by moralists. And this is the more wonderful, inasmuch as this has been so zealously denied to be a duty at all by some very eminent writers; by a Bailly, a Mackintosh, a Brongham, and a host of others. All that a man has to do, say these writers, is to attend to and follow his own conscientious belief, while for this belief itself he is not responsible. Hence, the moralist who overlooks this question not only fails to present a complete system of ethics, but he is also inattentive to the best interests of mankind. For, as we shall see, every man has first to inform his conscience aright, and then to follow its dictates. Otherwise he will follow a blind or a false guide. He may be a law, but he should not be a God, unto himself.

But, if he so unspeakably important to form correct opinions for ourselves, in regard to morals and religion, surely the training and cultivation of the intellectual powers by which they are formed, cannot be neglected with impunity, nor even without incurring great guilt. Right here, then, another duty of vast magnitude rises before us, and demands a place in a system of ethics. Though few duties possess greater claims than this upon the attention of mankind, yet, somehow or other, it seems to have escaped the notice of ethical writers. The right of private judgment, which, as Christians and as men, we should all hold dearer than life itself, has, indeed, been abundantly discussed by theologians, and by the champions of the most sacred rights of human reason. But it seems to have been forgotten, or at least not sufficiently attended to, that this is a right coupled with a duty, even the duty

of every man to think for himself, and to form those opinions for which he alone is responsible to the Author of his being. That the question of right has been drawn into the whirlpool of theological controversy, is no reason why the question of duty should be permitted to escape the attention of the moralist. On the contrary, it seems to furnish a very powerful reason why the great duty on which so much depends, should be placed on its true grounds, circumscribed within its appropriate limits, and vindicated against the plausible objections of the sophist. If this view be just, it thence follows that no system of ethics can be complete which overlooks the great fundamental duty, not only of thinking for ourselves, but also of training the intellectual powers by which such thinking is conducted. Hence, in a treatise on moral science, it should be pointed out that it is every man's duty to think for himself, as well as to prepare himself, by the proper culture and training of his mind, for the due discharge of this all-important obligation. For as this duty lies at the very root of all individual excellence, and of all interests of mankind require that a place should be vindicated for it in the science of ethics.

We are also clearly of opinion that a complete system of ethics should contain a vindication of the sanction of the moral law. Indeed, a law without a sanction is no law at all; it is merely a request, or counsel, or advice. It is only when a sanction, either of promised good or of threatened evil, is attached to an injunction, that it becomes a law. Hence, every theory of moral law must be radically defective, which merely sets forth and illustrates its precepts, without an exposition and vindication of its sanctions. In a complete system of ethics the sanctions of the great law of virtue or moral goodness should be discussed, and especially the doctrine of the eternity of future punishments.

But, although the science of ethics really embraces, as the sun does its beams, all the principles and precepts usually arranged under the head of practical ethics; yet is the branch of practical ethics, properly so called, an essential part of moral philosophy. This branch of the science, however, is something very different from what is usually intended by the expression, practical ethics. The theory of ethics sets forth the pattern, model or radiant image of moral goodness; practical ethics teaches the art or method of transforming the mind and character, and bringing them into a conformity with that model or image. This view of the nature of practical ethics opens, it is true, a wide field for investigation; and if this should, in certain directions, trench on the domain of theology, this is no valid objection to its scope or design. For moral science, whether written by a heathen sage or Christian divine, is not a godless philosophy.

No other method, we believe, can be found for the restoration of the soul to its original rectitude and purity, than that made known by Christ and his apostles. For, although these teachers had no thought of philosophy, yet is there in their plan for the restoration and perfection of the soul a depth of insight, and a wonderful beauty of adaptation, toward which none of the conceptions of human wisdom make the most distant approximation. As this revealed method has been found, in practice, the only efficient one, so, in theory, it may be shown to be the only rational or philosophical one; and to show this is the high office of the philosophy of practical ethics. Every system of ethics is, indeed, radically defective, which does not teach the art, as well as the theory, of virtuous living; or, in other words, which does not show how the human mind may be raised and sustained in the practice of moral goodness, as well as set before it the perfect idea or image of such goodness.—*Southern Review*.

ORANGE MARMALADE.—Cut the oranges in half, then take out the pulp and juice, separating all the skins and pips. Put the rinds into salt and water for a night; the next morning put them into a stewpan with fresh water. Let them stew until soft, so that a straw can run through them easily. Cut the peels into thin strips. To every pound of fruit add one pound and a half of coarse white sugar. Put the juice, pulp and peel, with the sugar, into the stewpan, and let it boil twenty minutes. Seville oranges must be used, and the marmalade is better if kept six months. The juice and grated rind of two lemons to every dozen oranges is a great improvement.

You can't prevent the birds of sadness from flying over your head, but you may prevent them from stopping to build their nests there.

TRANSITS OF VENUS.

THE GRAND PROBLEM DEPENDING ON THE NEXT TRANSIT FOR SOLUTION.

Transits of Venus are as rare as they are important. They occur in couples in June and December, about eight years apart, and then not again for several generations. Kepler was aware of the phenomenon, and as early as 1604 announced that one would take place in 1761, but young Horrocks, of Liverpool, with better tables and additional data, calculated that there would be a transit on the fourth of December, 1639. He let a friend into the secret, and they two, on the day named, for Venus was pinhead, were the first ever known to observe it. It was soon ascertained that one must have taken place on the sixth of December, 1631, and another in June, 1726, and that the next would not occur till the fifth of June, 1761. But of all the transits, past and to come, the climax would be that of the eighth of June, 1769, when Venus passed across the disc of the sun very near the center. The next one, but not visible in this country, will take place five years hence, on the eighth of December, 1874, which will be a grand one for science, considering the great advance of scientific instruments, but far inferior to the last. If, however, it produces only a half dozen Cursors, it will be a godsend to this rapid century. Let young folks take note of the date—1874. Another will occur on the sixth of December, 1882, but not again till nearly five-quarters of a century later, on the seventh of June, 2004; to be followed eight years after, on the fifth of June, 2012; to be repeated in December, 2117, and so on. The last transit of Venus was a conjunction of planets coincident with the birth of twelve imperial men of nature, more renowned than the twelve Caesars. No other single year, probably, before or since, ever produced such men as Napoleon, Wellington, Soult and Ney; Brunel, Mehmet Ali, Turner, Sir Thomas Lawrence, Chateaubriand and Castlereagh; Cuvier and Humboldt—men who upturned the world, and set it right again; who revolutionized science, art, politics, States, and the affairs of mankind.

On this subject the Providence Journal says:

"In order to give an idea of the extraordinary interest that is attached to the next transit, we give the results of the two last in regard to the sun's distance. In Ferguson's astronomy, written about the middle of the last century, the earth's distance from the sun is given as eighty-two million miles. The transit of 1763 gave a result of nine-fifty million miles. The same result was obtained by the transit of 1769. We are now dependent alone upon the transit of Venus. The base-line system has been applied to Mars, and even the velocity of light has been made to bear on the problem. The result of modern investigation shows an error of four million miles.

"This might appear to be a great fault in astronomical calculations; but even this error in the sun's angular diameter, if it be an error, is no greater than the breadth of a human hair seen at the distance of one hundred and twenty-five feet. Moreover, a Mr. Stone, of the Greenwich Observatory, has discovered a mistake in the calculations of the transit of 1769, which brings the sun's distance down to ninety-one million. For his research a gold medal has been awarded to him by the Royal Geographical Society. The next transit of Venus will therefore be anticipated and observed in every inhabited quarter of the globe with an intensity of interest which no natural phenomenon has ever excited.

"Distant stations have already been chosen; the most accurate instruments are being constructed; arrangements for the outfit of expeditions have been commenced; it is nearly time for those designed for the antarctic regions to commence their long journey. The English astronomers have selected their stations, and have petitioned Parliament for a grant of \$50,000; the French Academy is vigorously at work; the German 'bunds' are zealously in the field, and the other European societies will contribute their share to the great object. The wonderful agencies of the spectroscopic and photographic as indicators of time will be brought into requisition, and four years remain to perfect the arrangements which are being made for the purpose."—*Washington Chronicle*, February 14.

Improve your talent in song as a means of worship, health and enjoyment. For every moment this spent you will be amply and abundantly blessed.

Don't be afraid of the storms of time, knowing that God holds the moral as well as the physical ocean in the hollow of his hand.

As it sometimes rains when the sun shines, so there may be joy in a saint's heart when there are tears in his eyes.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MARCH 12, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. J. C. KREMER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KREMER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remittance the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

JEFFERSON CITY CHURCH.

Special attention is called to the notice, in another column, of the fair to be held in Jefferson City, for the benefit of our church in that place. The worthy pastor, Rev. P. M. Goodwyn, is industriously and successfully laboring to build up the congregation, and our city friends must rally to his aid. The proposed entertainment will be conducted on Christian principles, and the proceeds will be applied to the repairs and improvement of the church.

CONFERENCE MINUTES.

The Minutes of the Louisiana Conference have been published, and a number of copies have been mailed to every member. I have in reserve a few copies, which will be forwarded to preachers who may desire more than they have received. If any have failed to receive those mailed to their address, I can still supply them with a limited number.

EXPENSE OF DELEGATES.—The attention of the preachers is called to the resolution of the Louisiana Conference, requiring them to take up collections in March for the expense of the delegates to the General Conference.

BISHOP MARVIN sends us his sermon on "God in the Old Testament Scriptures," a pamphlet of thirty-eight pages. He sets out with the statement that the "godward consciousness of man is universal, but dim and distorted where men are left to the light of nature, or to traditional reminiscences of limited revelations." He proceeds to show that the design of the Old Testament revelation is "to set God in the true light in thought, to enthroned him over the conscience, and to prepare the world for the coming of Christ." It is profound in thought, clear and strong in argument, abounding in fine passages and many felicities of expression.

DEATH OF REV. WILLIAM A. SMITH, D. D.—The Baltimore Episcopal Methodist announces the death of this distinguished and venerable minister of our church:

Just as we go to press we have received the sad intelligence of the death of this distinguished minister of the Methodist Episcopal Church South. This painful event occurred at Richmond, Virginia, on the first instant. We shall give particulars in our next number.

"Howl, fir-tree, for the cedar is fallen."

SELF-EXAMINATION.

This is not less a duty than reading the Scriptures and secret prayer. The object is to determine the fact of our own acceptance with God, "whether ye be in the faith," whether converted or not, and also to ascertain the character of the experience when the state of pardon is already clear. The privilege to know our real state is assumed, the result contemplated is clearness as to the acceptance or condemnation of the soul, and a just conception of the state of grace as it exists. Presumptions and probabilities should not be aimed at, but such certainty as accords with the scriptural doctrine of assurance.

The importance of habitual self-examination is manifest in the Christian's danger and liability to go astray and to fall from grace, and in the tendency to self-deception. Both of these evils are contemplated in manifold declarations and warnings of the word of God. We may be mistaken about our religious state, and we may gradually decline and finally fall from our steadfastness. Here are abundant reasons for the utmost vigilance, honesty and thoroughness in the frequent inspection of our hearts and lives. It is, besides, a needful means of grace to the healthful and growing believer, working in harmony with the study of the Bible and prayer, and not of less moment than either. Self-examination is the corrective and guard against deception and backsliding, and an essential means of maintaining a lively and progressive spirituality.

Important as the duty is, it is often most difficult and disagreeable. Difficult it is because of the corruption of the heart and its special tendency to deception. If the heart is, indeed, "deceitful above all things and desperately wicked," it is not matter of surprise that the act of introspection should be exceedingly difficult. True self-knowledge is the rarest and highest achievement of divine grace. "Who can understand his errors? Cleanse thou me from secret faults." To seek this self-acquaintance is as disagreeable to most people as it is difficult. The secret consciousness that all within is not right, and the conviction that humiliating and uncomfortable disclosures will follow investigation, cause the sinner and the backslider to shrink from the ordeal. "For every one that doeth evil hateth the light, neither cometh to the light, lest his deeds should be reproved." The sluggish Christian may also avoid the heart-searching process because it demands the severest exercise of thought and the utmost tension of all the powers of the soul. There is probably no religious duty so difficult, so disagreeable, and consequently so much neglected.

While self-examination is of universal and habitual obligation, there are occasions when it becomes specially important. Wordly prosperity demands it, because it is a time of peculiar danger, and "the deceitfulness of riches" is calculated to choke the good seed of the kingdom. The Christian who is growing rich needs to press this matter home continually if he would escape the idolatry of covetousness and the evils to which it leads. Times of coldness and worldliness in the church should make the believer more watchful in reference to the state of his own soul. There is danger that the prevailing atmosphere and the common infection will poison his spiritual life. When there is doubt in our own minds respecting the fact of our conversion, we should take the alarm and prove our own selves with the most searching earnestness. True, it may be but a temptation, and not necessarily implying the loss of grace; but still it may be the symptom of a most serious and dangerous condition. When our piety is questioned by others, by the church, the world, by friends or by enemies, it should lead us to examine afresh the grounds of our hope, and thoroughly to test the soundness of our faith. All are liable to be unjustly suspected and condemned, and many of the holiest people are subject to uncharitable censure; but a safe

improvement of the doubts of others is to redouble our efforts to, examine and to "prove our own selves."

There is but one safe method of conducting religious self-examination; and that is by divine direction and assistance. The Bible is the only standard, and the real question of the honest inquirer is: "Am I a Bible Christian?" The aid of the Holy Spirit is essential to this examination. None can understand his errors without His reproving and enlightening offices. With the open Bible and with the promise of the Holy Spirit the prayerful soul need not fail of reaching a correct conclusion. But in order to successful self-examination the prayerful dependence upon God must be absolute. False methods must be avoided. One of these is to compare ourselves with others, rather than to bring ourselves to the infallible test of the inspired law. Paul declares most suggestively in this connection: "But they, measuring themselves by themselves and comparing themselves among themselves, are not wise." Other false methods there are, such as resting in the outward forms and duties of religion, in freedom from great sins, and in works of benevolence. Many determine their present state by a painstaking investigation of the experience of the past. This is inconclusive and misleading as to the present state of the soul. The shorter and better way is to come directly to the point of present acceptance, and communion with God. Is there an indwelling Christ? Are the marks of holy living, heavenly tempers, and the comfortable assurance of the Spirit, now apparent?

SOUTHWESTERN BIBLE SOCIETY.

We are indebted to Rev. Dr. Doremus, general agent, for a copy of the twentieth annual report of the Southwestern Bible Society, presented December 18, 1869. It is a neatly printed pamphlet of nearly fifty pages, containing full information concerning the affairs and work of this useful institution. We have space for the following interesting extract:

BRIEF DETAIL OF THIS YEAR'S WORK.
Actual sales..... \$5,188 55
Actual grants..... 1,173 01
Total..... \$6,361 56

Detail: Sales, House..... \$2,327 53
Sales by colporteurs..... 267 45
Sales by Agent Mims..... 775 36
Sales by Agent Harmon..... 632 25
Sales by Ag't Alexander..... 1,125 98

Grants, House, etc..... 5,188 55
Grants by Mr. Mims..... 185 32
Grants by Mr. Harmon..... 96 43
Grants by Mr. Alexander..... 7 20
Grants on life memberships..... 58 15

Amount in value of Scriptures now in the hands of the auxiliaries..... 12,681 12
Total amount sent forth..... 19,042 68

The receipts were as follows:
From sales: House and colporteurs \$2,376 67
From sales by the agents..... 2,593 67
From collections, general agency, including rents..... 3,324 30
From bequest of William Stillman, of East Feliciana..... 10,000 00
From collections, Mr. Mims' agency..... 174 17
From collections, Mr. Harmon's agency..... 630 50
From collections, Mr. Alexander's agency..... 1,203 45
From private distributors and expenses refunded..... 27 02

Twenty-three life members have been constituted.
The number of families visited was 30,000.
The number of Sunday schools gratuitously supplied, a large number of which were colored Sunday schools.
The number of miles traveled by the agents..... 13,050
The number of Bibles and Bible addresses delivered..... 450
The number of new auxiliary societies organized..... 36
The number of new Bible committees organized..... 14
Total number of auxiliary societies and Bible committees..... 100

The districts assigned to the agents were as follows: To Rev. J. H. Mims, southwest Louisiana; to Rev. B. F. Alexander, northwest Louisiana; and to Rev. J. W. Harmon, east Louisiana and south and central Mississippi.

Two colporteurs canvassed the city of New Orleans; Francis Curran and Adam Jones, colored. Some of the auxiliaries have employed their own agents; Rev. Thomas Franklin, in Sabine parish; Rev. H. M. Booth, in Jefferson county, Mississippi, and the region surrounding. Many private distributors have also been engaged in the work of distribution.

GENERAL REVIEW.—The beginning of the current year was marked by a continued determination to carry on the work extensively needed and already projected. Although the funds on hand did not afford the means for a single month's expenses, yet the

destitution of copies of the Scriptures was known to be so great as to forbid the curtailment of operations. Besides, the credit of the Southwestern Bible Society with the American Bible Society was so well assured that there was no hesitancy in ordering the Bibles and Testaments needed. We have received from that great and benevolent publishing house Scriptures to the value of \$17,710 76. There are now \$12,681 12 worth of books in process of distribution in the field; add to which the stock in the depository at the Bible House, estimated at \$4,500, there results the sum of \$17,181 12, which represents the amount of stock on hand. While the stock account is thus shown to be healthy, the same cannot be said of the cash account. The board are indebted in the amount of \$3,000; and the deficiency of income this year was \$3,000. The amount of money needed to preserve the society from the embarrassments of an empty treasury is, accordingly, just \$6,000. To ease this burden we must go to the Christian and general public with a most urgent appeal.

II.—COLPORTAGE.

It has been established by experience that colportage is the best agency to reach the mass of the people, especially those whose homes and habits are secluded. A most important work of colportage is commended to the attention and support of the Board, of Directors, by the Rev. B. F. Alexander, the agent in the field of its proposed operation, northwest Louisiana. To assist in this undertaking, a work which seemed impossible of performance by the local auxiliaries, the American Bible Society, with their usual liberality, have granted, upon our application, \$1,000 worth of books which await our orders.

The two colporteurs for the city have kept steadily at work throughout the year. The mission of one of these colporteurs has been to the colored people exclusively. Our city colportage embraces all the accessible, charitable and penal institutions. The inmates, that is to say, their widows, orphans, the sick and the suffering, have been supplied with the Scriptures. The sailors have been attended to—the seamen's chapel, under the supervision of the Rev. Mr. Pease, supplied with Bibles and Testaments.

Our precious book has been offered to many a wayfaring man on the levee. Through private distributors a constant stream of the sacred literature, with its instructions, warnings and consolations, has flowed into channels dried by sin and sorrow. It is the assigned and acknowledged work of the auxiliary societies to canvass and supply their own fields; but it is found that, in consequence of apathy, which seems in the human breast to be the correlative of a merely impulsive benevolence, and in consequence of hindrances arising from poverty of means, failures of good intentions have been more frequent than the performance of duty expected.

It is to be hoped that a renewed zeal will be awakened, simultaneously with the enjoyment of a more hopeful ability to raise the money needed for this, as well as for every other work of benevolence. In fact, these societies need, and, in the working of our plans, receive more or less frequent visits from our agents, and bear their appeals with more or less appreciation of the necessity of exertion. We count largely upon their co-operation during the coming year. The Sabine Parish Bible Society, of which Rev. N. H. Bray is president, has fulfilled all just expectations; and, through its local agent, Rev. Thos. Franklin, canvassed the whole parish, and part of Natchitoches parish. The same may be said of Jefferson County Bible Society, Mississippi; under whose zealous president, Thomas Reed, Esq., and by their local agent, Rev. H. M. Booth, they have accomplished a like good work for two or three counties.

III.—THE AGENTS' WORK.

In Mr. Mims' field (southwest Louisiana) the work has been partly that of a colporteur. He had, already, the previous year, organized auxiliary societies in every important locality. He has been "returning" upon his work; and, in detail, attending to the thorough circulation of the Scriptures. Reference is made to his report subjoined, which will show that his labors have been those of a messenger of glad tidings in many a by-way, and through many remote corners of his field. The French Creole population have all been visited, and with gratifying results, viz: the frequent cordial reception by them of the word of God.

In the field of the Rev. B. F. Alexander there has been attained a thorough public canvass of nearly all the central communities, so far as was necessary to arouse the attention of the people to the expediency of local organizations. He has thus secured the establishment of many depositories in Louisiana, around Shreveport and above Red river, to the Mississippi river,

through which the vast need of copies of the Scriptures will be met. Mr. Harmon's agency has embraced chiefly the railway thoroughfares of Louisiana and Mississippi, in a region of which Jackson is the center. He has performed valued service, before many congregations of people, in the presentation of the Bible cause. His labors, as a zealous gospel minister, have constituted a large element of his usefulness.

IV.—PECULIAR BENEVOLENCE OF OUR WORK.

The ministerial labors of our agents, at times, with the congregation on the Sabbath—daily by the wayside, or in the household—exhibit a feature of our operations as a society, which affords a token for good, like the sign of the preaching of the gospel to the poor, when John the Baptist's disciples asked the Master if the Messiah had come. We send forth the word which the Master spake, and carry the gospel with the warm, living message of entreaty to sinful and sorrowing man.

Our agents, colporteurs and private distributors, all offer the word of God in the name of the Southwestern Bible Society, or, which is the same thing, in the name of those who contribute funds, to many a person who would otherwise lack the opportunity or the desire of obtaining it. Our Bible men pass and repass everywhere, through all the public and private roads of their travel, proclaiming the value of this Book of books. They are intent upon a singular employment. They carry the Book—the oldest, wisest, best, that man ever read, or can read. It is the story of God's compassion—it is the history of human redemption—it is the very law of God, which Moses brought down from the Mount—not graven on ponderous stone, but printed side by side with the gospel of peace, upon a leaf, with infinite healing on its wings. It is the wondrous story of a cure for sorrow. It is the guide to the lost. It points the way and leads to heaven. The work of distributing copies of the sacred Scriptures to every inhabitant of the land who lacks this treasury of divine wisdom is simply an enterprise of Christian benevolence whose purpose is that the voice from heaven may by every ear be heard, and glad tidings of salvation to every heart conveyed. The contributions to our society are meager, in comparison with the claim we advance before the public, of doing a noble charity to our fellow-men. With these representations of our plans and wants this cause again invokes the aid of every individual who rightly estimates the value of public virtue—of every Christian professor who realizes the worth of the Bible to himself.

FAIR FOR THE BENEFIT OF THE METHODIST CHURCH, CADIZ STREET, CITY OF JEFFERSON.

This church is much in need of repairs. To raise means to meet this necessity the ladies of the congregation, in connection with other friends, have determined to hold a fair during the fourth week in March, commencing on Monday evening, the twenty-first, and ending on Saturday, the twenty-sixth. The programme for the last evening to consist of an exhibition in the shape of a variety of magical views, scenes, representations, etc., to be exhibited by a skillful operator, and which never fail to entertain highly all those who have an eye and a mind for the artistic, the beautiful and the humorous. The fair is to be held at the hall of the Home Hook and Ladder Company, corner of Magazine and Marango streets, City of Jefferson.

Tickets will be found at the book establishment, R. J. Harp, agent, 112 Camp street. To the fair, twenty-five cents. The exhibition, fifty cents for adults; twenty-five cents for children.

P. M. GOODWYN, Pastor.

BISHOP EARLY.—The Lynchburg Republican says that the condition of Bishop Early, which has recently been quite critical, has so far improved that he is enabled to move about the house, and the prospect of his entire recovery seems favorable.

BISHOP MARVIN has received and accepted an invitation to deliver the annual address before the literary societies of Washington College, Virginia, General R. E. Leo president, at the commencement in June next.

THOU MAYEST gain a lease of an estate, but the Lord of time issues no grant for any certain term of future years. Thou hast a charge to occupy till he come, but thou must remain tenant at will.

NEW PUBLICATIONS.

THE ANDES AND THE AMAZON, OR ACROSS THE CONTINENT OF SOUTH AMERICA. By James Orton, M. A. New York: Harper & Bros., publishers, Franklin Square, 1870.

A 12mo of 356 pages, finely bound and illustrated, and containing a map of considerable value.

Prof. Orton gives a fresh and recent view of the great valley and mountains of South America, and his book contributes considerably to our knowledge of the mineral, vegetable, animal and human products of those regions. The work is written in a popular style, and will be read with interest and profit.

ADVENTURES OF CALED WILLIAMS.—By William Godwin, Esq., author of St. Leon, Clarelley, etc. Complete in one volume. New York: Harper & Brothers, publishers. 1870.

Bound in paper. One of Godwin's most popular productions, and first published in 1794.

T. MACI PLAUTI, CAPTIVI, TRINITY ET REDEUS. With English notes, critical and explanatory. By C. S. Harrington, M. A., professor of Latin in the Wesleyan University.

This work, from the press of Harper & Brothers, has been sent us by George Ellis, opposite the post office. Students of the Latin language and literature have presented to them, in this work, three comedies of Plautus, in an edition which leaves nothing to be desired in the matter of mechanical execution. The binding is neatly done in muslin, and the type is large and clear. We doubt not, from the high position of the editor, that the critical and explanatory notes will prove of assistance to those who may have to deal with the antique forms and expressions of the Plautinian age.

NEW ADVERTISEMENT.

The attention of our readers is called to the advertisement of Mr. D. J. Wasson, builder. This gentleman has been long and favorably known in New Orleans, and those having business in his line will do well to submit their contracts to him. Mr. Wasson's office is No. 254 Carondelet street, New Orleans.

THE OLD BALTIMORE CONFERENCE.—This venerable and time-honored body of Methodist ministers met at St. Paul's Methodist E. Church South on Wednesday morning, the second instant, Bishop McTear presiding, assisted by Bishops Marvin and Doggett.—Baltimore Episcopal Methodist.

To the Members of Mobile Conference.

DEAR BRETHREN: The Minutes of our Conference were published in Selma. Brother Armstrong kindly mailed them for me, as I instructed him, but I learn that some of the preachers have not received them. They ought to have reached all the appointments by the middle of February. If the brethren who have not received them will write me at Clifton, Alabama, I can supply them partially, as I have some surplus copies.

J. M. BROWN.

HAMPDEN, ALA., March 2, 1870.

COUNT OVER THE MERCIES.—Count the mercies which have been quietly falling in your history. Down they come every morning and evening, as angel messengers from the Father of heaven. Have you lived these years wasting mercies, renewing them every day, and never yet realized whence they came? If you have, heaven pity you. You have murmured under afflictions, but you have heard you rejoice over blessings. Ask the sunbeam, the rain drop, the star, or the queen of the night, "What is life but mercy? What is health, strength, friendship, social life? Had each the power of speech, each would say, 'I am a mercy.' Perhaps you have never regarded them as such. If not, you have been a poor student of nature and revelation. What is the propriety of stopping to play with a thorn bush, when you may just as well pluck sweet flowers, and eat pleasant fruits?

GOD IS LOVE.—God is ready to pass by all thy former rebellions, and thy deep-deyed transgressions, and to sign an act of oblivion for all that is past, if now, at last, thy heart repents for sin, and thy will bows in obedience to the great commands and calls of the gospel.

The poor have little; the beggar none; the rich too much; enough not one.

THE CALL TO PREACH.

It is not true that God calls only "those who are fit" to his service. The call is, as often, to become fitted for it, and then to perform it. Moses thought he was fit to begin the redemption of Israel at forty—but God sent him into Midian after he had begun the work on his own impulse (see Stephen's speech in Acts,) to tarry forty years, until study, contemplation, and the wisdom of a ripe age had prepared him for the work—and an entire generation perished meanwhile. Samuel was called from birth to be a judge in Israel; and yet years passed before he was one. And the prophets of later days were educated in the "school of the prophets." David was anointed in early youth, but he had to undergo the severest sort of training in court and camp, and was forty years of age, before he was counted fit to become a king of Israel. The apostles were called early in Christ's ministry; but the gospels show in many places how long they were for their high calling, until after the day of Pentecost. Fitness for any thing comes by natural means—though the call to the duty may be supernatural. God calls a man in frail health, or a man in debt, or a man enmeshed in many ways, to be a minister. We all have known of such cases; and our churches sometimes license such men, expecting them early to disentangle themselves, and then obey the call; and our Conferences sometimes receive them, and allow them opportunities to free themselves before they hold them to be fit for all the work of a Methodist preacher. And why should we not be as patient in waiting on ignorance and immaturity before we exact of them full work, as we are in waiting on infirmity and poverty? If God calls only those ready at once to go into the field, and he is expected to give the supernatural aid of his Spirit to atone for ignorance and want of mental discipline, we may expect that when he calls an invalid, he will restore him to health, or one in pecuniary embarrassment, that he will pay his debts, by some supernatural interference.

But while these young men are at their books, sinners are dying, says an objector. Even so. And sinners will be dying till the judgment day—and many will die, if the young men leave their books and go to preaching—and the probabilities are that, first and last, more will die if they take the latter course than if they remain at their studies;—and the thought is of value, in determining how long they shall tarry at their books; for study, either in the ministry or before entering it, is of value only as it increases the soul-saving power of the minister. And that study does this, is the ground of all the requirements of the church respecting it; and also the ground upon which our Bishops and Conferences are urging the education of ignorant young preachers.

Yet while they are studying, say some, souls are being lost—and God has called them to go out at once, all unprepared as they are, to save these souls. That is the idea—if not so worded. This looks very much like "particular election." God calls a man to save souls—but does he call one to save special sinners, or to save as many as he can? and to study and learn much, that he may save the more—save as many as he can, during his whole life, not merely during the first two or three years he might devote to study? This is what we conceive God's call to the ministry means.—*Southern Christian Advocate.*

LOST STEAMSHIPS.

The New York Times, in an article on the missing steamers City of Boston and Schmidt, gives the following particulars of similar losses at sea:

The President, which left New York March 11, 1831, having among her passengers Tyrone Power, the comedian, a son of the Duke of Richmond, and other noted persons, is in this dismal catalogue, and so is the City of Glasgow, lost in 1854, and the Pacific in 1856; but we recollect no other vessels of similar character that have so vanished and "left not a rack behind." Consequently the chances would seem to be that as in the cases of the troopship Birkenhead, and the packets St. George, Central America, Sarah Sands, Anstria, Anglo-Saxon and London, a greater or less number of the passengers of the two missing craft may have been saved. Such it will be remembered, was also the fact as regards the Lady Elgin, sunk by collision on Lake Michigan, September 8, 1860. Of her three hundred and eighty-five passengers two hundred and eighty-seven perished, among whom were Mr. Herbert Ingram, M. P., the founder of the *Illustrated London News*, and his son. Of the passengers and crew of the Hungarian, on the other hand, which was wrecked on the coast of Nova Scotia, February 19, of the same year, all on board were lost.

The Birkenhead, wrecked off Simon's Bay, South Africa, February 26, 1862, lost four hundred and fifty-four and saved one hundred and eighty-four. The St. George, which was bound from Liverpool to New York, and was destroyed by fire at sea, December 24, 1862, lost fifty-one, while seventy were rescued and taken to Havre by the American ship Orlando. The Central America, which foundered on her way from Havana to New York, September 12, 1857, carried five hundred and seventy-nine persons, of whom only one hundred and fifty-two were saved. Of the five hundred and thirty-eight on board the Anstria—burned in the middle of the Atlantic, September 13, 1858—but sixty-seven survived.

The Sarah Sands, which sailed from Portsmouth for Calcutta in August, 1867, took fire in November, and afterward experienced a tremendous gale, carried all on board safely into port. The Anglo-Saxon, wrecked on a reef off Cape Race during a dense fog, April 27, 1863, lost two hundred and thirty-seven out of four hundred and forty-six individuals. The London, which foundered in the Bay of Biscay, January 11, 1866, on the passage from England to Melbourne, lost two hundred and twenty lives, among whom were Dr. Woolley, principal of the University of Sydney, and Mr. G. V. Brooke, the tragedian.

Two instances have befallen during the past few years, when the romantic incident, so much used by novelists and dramatists, of a single life being saved from among all on board a lost ship, has really been exemplified. These were in the cases of the Dalhousie, wrecked off Benchy Head, October 19, 1853, and the Dunbar, wrecked off Sydney, August 20, 1857.

In the latter instance the survivor was thrown by a gigantic wave into a tiny aperture high up in the face of a precipice—the chance of such a thing occurring being about the same as that of throwing a pea into a nail hole in the side of a wall—where he lay insensible, for many hours, but was finally discovered and saved by a daring fellow, who caused himself to be let down from the top of the acclivity by ropes.

Married.

By Dr. C. K. Marshall, March 3, near Vicksburg, Rev. W. W. BOLAR to Mrs. N. J. WARRIOR, both of Warren county, Mississippi.

In Madison county, Mississippi, February 24, 1870, by Rev. H. H. Montgomery, Mr. LEWIS G. SACRIS and Miss MARGARET S. EWING.

In Canton, Mississippi, March 1, 1870, by the same, Mr. VICTOR DELEZOS and Miss SARAH MELISSA BARLOW, daughter of Rev. A. D. Barlow.

February 24, 1870, on Deer Creek, Washington county, Mississippi, at the residence of the bride's father, by Rev. W. W. Drake, Rev. J. DUDLEY MCNEE to Miss MATTIE A. RIVES.

On Thursday, February 10, 1870, at the residence of the bride's father, in Garlandville, Mississippi, by the Rev. John D. Hays, Rev. THOMAS WEST, of Wayne county, Mississippi, to Miss MARY C. WATTS, daughter of the Hon. John Watts.

On Wednesday evening, March 2, 1870, at the residence of the bride's father, by Rev. George W. Boyles, Mr. RICHARD P. CLARK to Miss ANNIE E. HUNTER, daughter of — Hunter, Esq., all of Scott county, Mississippi.

Obituaries.

Died, in Holmesville, Pike county, Mississippi, on the eleventh of February, 1870, Brother SIMS FISK, aged twenty-nine years, ten months and sixteen days.

The subject of the above sketch professed religion and was received into the Methodist Church, last summer, by Rev. R. B. Downer, of which he lived a consistent and exemplary member until his death. He was esteemed by all his associates. He bore his affliction with Christian fortitude, and bowed in humble submission to the dispensation of heaven. He died in the full triumph of a gospel faith, and has doubtless gone to the paradise of God to meet his mother, who preceded him a few years to the port of heaven.

G. M. L.

—MR. JOHN W. GEORGE was born in North Carolina, and moved to the State of Alabama when quite a child, where he commanded the respect of all who knew him, by his amiable character, generous heart and liberal soul. He embraced the Christian religion in the year 1854, and attached himself to the Methodist Episcopal Church South, in which he lived a consistent and useful member, taking a deep interest and an active part in all the interests of the church, by his pious walk and godly conversation training the youth and young people generally for God and heaven, till he was seized with a pulmonary disease, and in the lapse of some twelve months fell asleep in the arms of his Saviour on the twentieth of January, 1870, in the thirty-fifth year of his age, at the residence of his venerable father-in-law, Richmond Allen, in Choctaw county, Alabama.

Brother George left an affectionate wife and one child, and also a devotedly pious, loving mother, brother and sisters to mourn his loss. But they "sorrow not as these who have no hope."

He is gone
"Where the weary are at rest."
"He is gathered to his God;
Yes, his pain of life is past,
And all his warfare's over;
Let the world bewail their dead,
Fondly of their loss complain;
Death to thee is eternal gain—
Thou art entered into joy."

N. F. M.

Died, near Mazon, Mississippi, on the seventeenth of February, 1870, Mrs. M. C. ELLAND, youngest daughter of Rev. Leroy Massengale. The subject of this notice was born on the seventeenth of September, 1838.

She professed religion and joined the Methodist Episcopal Church South in the twelfth year of her age, from which time to her death she was a consistent Christian, a strict observer of the Sabbath, and a constant reader of her Bible, making it her daily study. She was dutiful to her parents, respectful to the aged, and kind to all with whom she had intercourse.

In her twenty-second year she married Mr. C. C. Elland, a member of the Baptist Church, with whom she lived in perfect harmony, each remaining in their respective denomination without discord. The father of her husband remarked to me at her grave that she had for some years lived in his house and presided at his table; that he had never seen her temper ruffled, or noticed anything in her conduct or conversation inconsistent with the Christian character. An affectionate wife and a fond mother, when death drew nigh she manifested a strong desire to live, inasmuch that her afflicted father feared her peace was not made with God. Perceiving his distress, she said to him: "Father, I am not afraid to die, but am loth to leave my husband and children. If God sees fit to take me away, I am prepared, and shall go safely."

But while we rejoice in the triumph of Christian faith, our sympathies are strongly enlisted in behalf of our bereaved Brother Massengale. He raised a large family, but only one remains. They have all preceded him to the better land, for all died in the faith of the gospel. So the bitterness of grief is mitigated by the hope of reunion with an unbroken family.

JOHN WESLEY CHEVIE was born in King George county, Virginia, January 12, 1822, and died in St. Landry parish, Louisiana, January 24, 1870.

"Mark the perfect man, and behold the upright, for the end of that man is peace." Such was the character and such the end of the subject of this obituary. Dedicated to God in infancy, and trained in the ways of piety by religious parents, as soon as he was conscious of his own responsibility he redeemed the parental pledge of baptism by giving his heart to God and joining the Methodist Episcopal Church, and under its fostering influence his mind and character were developed, happily combining all the elements of a Christian life.

As a physician he ranked high in his profession. He was cautious, skillful and successful in his practice. As a preacher he was not eloquent, but earnest. Piety and good sense pervaded his discourses. The pastor of his church ever found in him a prudent counselor and a fast friend. He was a pure man, unostentatious and generous. The calm, quiet spirit which ruled his life, governed in death—while others wept he was composed, assuring them that he reposed in the promises of Christ.

His little son Harry came to his bedside and whispered: "My pa, are you going to leave us and go to heaven?" He answered: "Yes, my son." Again he inquired: "Pa, do you see heaven?" The father answered: "No, my son; but I hear its sweet music." After invoking the divine blessing on each of his children by name, he resigned his soul to God.

Calm the good man meets his fate,
Gladly celestial round him wait
As he breaks his mortal chains,
And o'er death the victory gains.

J. D. ADAMS.

DR. DAVIS ON DEAFNESS.

BOHEMIAN COTTON.

NINE MILES SOUTH OF BUREN, TEXAS.

December 28, 1869.

DR. J. L. DAVIS—Dear Sir: You asked me for my experience with the Bohemian Cotton. I have planted no other for three years, and know it to be superior to any other Cotton grown in the South. It yields more from the same area, matures three weeks earlier, and the wood of the boll is so hard that the worm cannot bore into it, and when other Cottons are eaten up this is untouched. It does not shed its bolls as has other Cotton. It does not fall out. Three pounds of Seed Cotton make one pound of lint, and the lint is long, strong, firm and heavy.

MANUFACTURERS OF COTTON GINS.

We now offer to the public a new and im-

proved

COTTON GIN.

so constructed that stems and hulls will not

be cut up by the saws, thereby preserving

the teeth of the saws from injury by hard

substances getting into the gin, and conse-

quently making a cleaner sample out of

roughly picked Cotton. It is also constructed

to gin the Seed and any other kind, except

the Sea Island Cotton.

Wherever our Gins have been in use they

are known to gin

Faster than Other Gins

In common use, by the flange keeping the Cotton in contact with the teeth until stripped of the fiber, and then preventing them, after being cleaned, from being carried up into the box by the upward motion of the roll. Thus, by keeping a free and white roll, as it is called, the amount of Cotton ginned is increased. They are not complicated and not easily put out of order.

CERTIFICATE.

Messrs. De Bois & Co.: We ginned the latter part of our crop of Cotton on the 55-Saw Gin bought of you, and in the presence of Captain J. A. Wemyss, Colonel L. D. Hatch, Edward Shackelford, Anderson Walker and E. T. Taylor a bale of Cotton, weighing 332 pounds, was ginned in one hour and thirty minutes. It makes a good sample, and carries a free and perfect roll.

The Child's Corner.

ONLY TWO LITTLE DARLINGS.

Only two little darlings,
Welcome me home at night;
Only two little prattlers
With faces sweet and bright.
They are very tiny creatures
In this big world of ours,
But the chirp of their merry prattle
Gladdens the evening hours.
So many wondrous stories
To pour in papa's ear,
So many wants to care for,
Such boundless faith to cheer,
Confiding joys of childhood,
With hopes so pure and bright,
This is the happy greeting
Welcomes me home at night.

History of Celebrated Women of China.

TRANSLATED BY REV. J. W. LAMBETH.

HISTORY OF THE WIFE OF KING SHAW, OF THE TSEE KINGDOM, WHOSE NAME WAS MUNGKE.

Mungke was the eldest daughter of the Wo family. She was strict in the observance of all the rites and ceremonies of her ancestors, and did everything according to strict order. She was not married until considerably advanced in age. On one occasion messengers came from the Tsee kingdom, soliciting her hand in marriage with a noted citizen of that country. But she refused.

She was very particular about approaching near the place of strangers, and in her conversation she never spoke of matters out of the family. She always conversed at a distance, in order to avoid even the appearance of evil. It soon became known that the citizen of the Tsee country was unsuccessful in his efforts, though he had used every available means in his power, and she was pronounced by every one who knew her as possessed of all excellence and virtue. King Shaw, hearing this, prepared himself in the observance of all rites necessary, and went in person to seek her hand in marriage. On his arrival at her father's residence she was introduced into the parlor by her father and mother, although they did not go beyond the threshold. It was not long before it was arranged that she should return with the king to his kingdom, to become his wife.

Her mother then went to her room with her, took one of her garments and made in it a slight fold, and charged her to be careful and not disobey any of the rites or customs of the Tsee kingdom. Her father, coming to the eastern entrance of their dwelling, charged his daughter to "retire late and rise early. Do not disobey my command." He then said: "I forbid your going where it is improper to go, even though the king should desire you to do so." All her relations stood in the entrance to her father's residence, and said: "We charge you to be watchful, and careful to obey the commands of your father and mother. Fail not, morning and night, to look upon the fold made in your clothes by your mother, that you may ever have in mind the commands of your father and mother." Her sisters and cousins stood within the entrance of the residence, and as she was departing they urged her to "be careful not to commit any wrong; remember the fold made in your garment, that you may keep in mind the commands of your father and mother."

Shaw, the king, then advanced and met her, and went thrice around her father and mother, and then received her as his bride. She was then seated in a carriage, and Shaw, the king, thrice wheeled her around her father and mother. He then went with her to his own residence. For three months she dwelt alone in her own private apartments. At the end of that time Shaw, the king, accompanied by Mungke, went to the temple of their ancestors and there performed the rites of ancestral worship, after which they became man and wife.

Some time after this Shaw, the king, went on a pleasure excursion to Longyar, in company with his wife Mungke. The carriage in which Mungke was riding made a sudden spring and broke into several pieces, when she fell to the ground. King Shaw immediately ordered his four-horse carriage to be placed at her disposal, that she might be conveyed home. Mungke ordered her attendants to take two

of the curtains and cover her person. She sent messengers to say to the king: "I have heard that when the king's wife passes the threshold of the palace she should be accompanied by women of advanced age and in honor. Also in going out and coming in she should have the usual tinkling sound of rings and jewels, in order to be recognized. Within the palace their dress should be in perfect order, and nothing out of its place. When going into the country curtains and veils should be used to cover her person. Then the heart shall be kept pure, the desire single, and she shall be able to govern herself."

When the king's carriage arrived she found it was formed differently from the carriages used by ladies, and for this reason she would not receive it. Secondly, she was unwilling to remain in the wilderness without a protector. "In these two respects you have not observed the strict rule of propriety. If I am to live without the observance of these rules of propriety and discretion, it were better that I should die at once."

The king's messengers then mounted their horses, and made all haste to inform him of what they heard. As soon as he heard this he immediately dispatched a carriage used by ladies of high rank, but when they arrived on the spot she had already attempted to commit suicide. Her maids were fortunately near her, and preventing her, said: "The messengers have arrived from the king, and a suitable carriage has been provided for you." She then revived, took her seat in the carriage, ordered her person to be covered with screens, and was thus brought back to the palace. The Literati say: "She was a person who would not, under any circumstances, violate one of the rules of strict propriety, and that all women should imitate her example in the observance of such rules."

JANUARY 10, 1870.

WHAT A BOY OAN DO.

About two hundred and sixty years ago a poor lad of seventeen was seen traveling on foot in the south of England. He carried on his shoulder, at the end of a stick, all the clothing he had in the world, and had in his pocket an old purse, with a few pieces of money given him by his mother when, with a throbbing, prayerful heart, she took her leave of him on the road a short distance from their own cottage.

And who was John? for that was his name. He was the son of poor but honest and pious people, and had six brothers and five sisters, all of whom had to labor hard for a living. He was a godly lad, and at fourteen was disappointed in getting a place as parish clerk, and with his parents' consent set out to get employment.

At the city of Exeter, where he first went, he met with no success; but as he looked on the beautiful cathedral, and in the booksellers' windows, a strong desire sprang in his mind to become a scholar, and at once he set out for the university at Oxford, some two hundred miles off, walking the whole way. At night he sometimes slept in barns, or on the sheltered side of a hay stack, and often met with strange companions. He lived chiefly on bread and water, with occasionally a draught of milk as a luxury.

Arrived in the splendid city of Oxford, his clothing nearly worn out and very dusty, his feet sore, and his spirits depressed, he knew not what to do. He had heard of Exeter College in Oxford, and thither he went, and to his great delight was engaged to carry coal into the kitchen, to clean pans and kettles, and that kind of work.

Here, while scouring his pans, he might be often seen reading a book. His studious habits soon attracted the attention of the authorities, who admitted him into the college as a poor scholar, providing for all his wants. He studied hard, and was soon at the head of his class. He rose to great eminence as a scholar, and many years before his death, which took place when he was seventy-two, he visited his father and mother, who were delighted to see their son not only a "great scholar," but a pious bishop. Such was the history of Dr. John Prideaux, who used to say: "If I had been parish clerk of Ugborough, I should never have been a bishop of Worcester." He left many voluminous works as fruits of his industry and learning.—*Youth's Instructor*.

Scientific.

TRANSFUSION.

AN EXTRAORDINARY FEAT IN SCIENCE SUCCESSFULLY PERFORMED.

The second annual meeting of the alumni of Rush Medical College was held at the college in Chicago a few weeks ago. The hall was newly filled. It was announced that Dr. J. W. Freer, professor of physiology and microscopical anatomy, would exhibit to the alumni the experiment of the transfusion of blood. A muzzled dog was led into the room and placed upon the table. A bottle of chloroform, a syringe, a thick earthen mortar, India rubber hose, and two frames containing upright tubes from a foot to six feet in height, were the prominent objects. Dr. Freer stated that he was about to present two experiments. The first would show the force exerted by the heart and the walls of the arteries upon the blood. This would consist in opening the carotid artery of the dog, and allowing the blood to flow into the upright glass tubes. The height of the blood in the glass tubes would indicate the force. The second experiment would consist in removing the blood from the animal until it became apparently exsanguinated, and then restoring the dog to life again by injecting the fluid back again through the jugular vein.

Chloroform was administered to the dog in order to render it insensible; and after about fifteen minutes had elapsed the beast was in a condition to be operated upon.

An incision was made in the neck, and the carotid artery laid bare. Two ligatures were tied around the artery, about two inches apart, between which an incision was made into the artery, and a glass tube fitted in the incision. The tube was connected by the rubber hose with an upright glass tube, about seven feet long. As soon as the ligatures were unbound the blood flowed rapidly into the tube, rising to a height of about six feet, where it stood, with a small oscillating movement of about an inch, caused by the beating of the heart of the dog.

A small amount of carbonate of soda, in water solution, had been placed in the tube in order to prevent the coagulation of the blood. While the red column remained in this position for a few minutes the experimenter explained the phenomenon. If there was no pressure of the heart and arteries, the blood would not rise at all. Therefore the height to which it rose in the atmospheric pressure would indicate the amount of force exercised by the organs mentioned.

It should be mentioned that the operator separated carefully from the artery the pneumo-gastric nerve before the former was opened, as if the nerve should be injured, the dog would cease to respire. During these experiments a double impulse was apparent in the oscillation of the fluid, which was said to be due to the combined forces of the heart and the arteries.

The experiment of transfusion was then performed. The blood from the opened artery was permitted to flow through the rubber hose into a thick earthen mortar, which was itself sunk in a warm water bath of about one hundred and three degrees, to preserve the temperature of the fluid. The sanguinary stream flowed with considerable force at first, and in spurts which were synchronous with the beats of the heart. One of the operators stirred the fluid and removed the fibrin or clot, as it was necessary to the success of the experiment that the mass should be preserved in liquid form.

When the lecturer had arrived at this point the blood from the dog had ceased to flow through the hose; the dog was apparently but just alive. The heart had ceased to beat, so far as could be observed. The beast lay upon the table motionless, and all its muscles relaxed. The tongue and jaws were bloodless, and there was nothing but the slightest respiratory motion that showed any life left. The experimenter stated that within a short time, if left alone, the dog would die. Then he began the second and last part of the experiment: the restoration of the animal by the injecting of the fluid in the mortar back into the veins.

For this purpose the jugular vein was opened. A cannula, or short tube with a stop-cock, was inserted into the vein, the stop-cock being for the purpose of preventing the ingress of air. A syringe, holding about an ounce, was filled with the defibrinated blood and discharged into the vein. The effect was immediately perceptible in the perspiration of the dog; at the third syringe the heart began to beat perceptibly, and shortly afterward the dog winked; when about half of the extracted blood had been restored the beast astonished the audience by getting up on his four feet and looking about the room.

It was supposed by some persons present that the experimenter would repair the severed artery, stitch up

the dog's neck, and let him convalesce, and remain a monument of inductive science. Dr. Freer intimated that the dog would live if properly cared for; but as it was not of much account, and science could be advanced by the death of the brute, he would proceed to put it to death in the most scientific manner possible; in truth, he would give a specimen of murder as a fine art, which even De Quincey never imagined.

Dr. Freer proceeded to explain the deleterious effects of air in the blood. Air in the lungs was necessary to the performance of the life functions, but air in the blood was deadly poison. The cannula had been used to prevent air from getting into the veins; the syringe had been carefully filled to the very point, so that no air could possibly be injected. Introduce a few globules of air into the blood and syncope, and death would follow. The blood, after death from this cause, is found in a frothy condition. The experiment was tried; air was forced into the vein, and the dog was soon in extremis.

But before the victim of science was permitted to die the professor introduced a bellows into the trachea, and produced artificial respiration. The dog revived, and finally had to be dispatched by the division of the medulla oblongata!

The fame of this exploit having reached the parents of a consumptive young lady in Iowa, they sent to Dr. Freer, requesting him to try the transfusion experiment upon their daughter. Dr. Hunt, of the Rush College, acted in the matter. He found the girl in a very exhausted condition—in fact dying. Immediately he took sixteen ounces of blood from a sixteen-year old brother of the young lady, and injected it into her system. The patient then went into a comatose state. Another drain of the vital fluid was resorted to, and a third, from a ten-year old brother of the patient, until thirty six ounces were introduced into the exhausted veins of the consumptive by this extraordinary experiment. No result, favorable or otherwise, has so far attended the operation. The issue of the affair is looked forward to with great interest, especially by the medical faculty.

THE SYMPATHY OF RELIGIONS.—Mr. T. W. Higginson recently lectured on this suggestive subject in the Horticultural Hall. The following passage occurs in the report of the Boston Post, and the lines which we have italicized stand in rather amusing contrast with the impressions of a recent tourist among the Himalayas, which we find in the last number of Lippincott's edition of *Good Words*.

Here is Mr. Higginson's poetical flourish:

"As with individuals, so with communities. The great historic religions of the world are not so many stranded hulks left to perish somewhere. The best of them are all in motion all over the world. The inward influence moves them. There is a sympathy in religions. I have worshiped in our evangelical church when thousands rose to their feet at the motion of one hand. I have worshiped in a Roman Catholic church when the lifting of one finger broke the motionless multitude into twinkling motion till the magic sign was made, and all was still once more. But I never for an instant have supposed that that concentrated moment of devotion was more holy or more beautiful than when at sunset the low murmur, 'O, the gem in the lotus; O, the gem in the lotus,' goes across the vast populations of Thibet."

Now for the *prosaic* account of the actual tourist:

"Three peaks form this group—Raal Dung, in the center, twenty-one thousand feet, and on either side the greater and less Khyllas, both over nineteen thousand. The Khyllas is regarded by the Paharis as the dwelling place of the Great Spirit, chief of all the gods, whom they reverence greatly, and serve with exceeding fear, as a being of infinite terror. As to anything in their faith that can gladden life—anything like love or companionship, or daily help—that is utterly unknown and quite incomprehensible. The only idea is fear of a mighty power that will send all manner of famine and disease, unless they are forever striving to propitiate it. One means hereto is the perpetual offering of prayers by machinery. The priests and many of the people walk about always with a small prayer-mill in their hand, turning it as they go. It is engraved with the words, 'O name pad me han' (to him of the Lotus and the Jewel), an inscription which is carved all over all sacred places."

Christian Witness.

BEAUTY.—Every trait of beauty may be referred to some virtue, as to innocence, candor, generosity, modesty and heroism.

The gospel is a box of the most precious ointment. By preaching it the box is broken and the fragrance diffused.

STOVES AND TINWARE.

THE BEST COOKING STOVE FOR WOOD NOW IN USE.

THE FASHION.

We call especial attention to this Stove, which has been produced at great expense, combining all the new and important improvements; also to the extra height of the oven under the fire chamber, the Patent Air Chamber, Front Doors and Patent White Enamel Iron Knobs, the improvements in the covers and centre pieces, all of which are used in no other Stove. They are warranted to stand fire, or others sent free of charge in all cases. We have all sizes of this justly celebrated Stove, both

PLAIN AND EXTENDED BACKS,

The Extended Back with cast-iron Enamel Reservoir and Fuel, Tin Ware, Cast Gridiron Cover, etc. The part of the top supporting the Reservoir is raised so that the fire is above the top plate, instead of below, as in the case in most of the Stoves now used, and the heat is forced directly against the whole surface of the bottom of the Reservoir. The Reservoir, being detached from the plate, can be removed in pleasure, thereby forming a six-hole Stove—the best in use, as the heat will be more uniform, or better than the milk-die oven. For sale by

G. W. W. GOODWIN,

JAN 17

STOVES, GRATES AND HOUSE FURNISHING GOODS.

The undersigned would call the attention of city and country buyers of Cooking Stoves to the following list of Stoves manufactured by Mr. M. L. Filley:

The Philanthropist.

A first class Cooking stove, having all of the latest improvements that have so far been invented. Has a new arrangement for boiling; also an Ash-pan. The casting is heavier than any Stove sold in this market. Sold under a full guarantee in every respect.

The Diamond Rock.

A Stove well known in this market. Thousands of this Stove are in constant use throughout the country, which is a very good recommendation. Sold under a full guarantee. Besides the above named Stoves, I have on hand the celebrated Cotton Plant, Charcoal Oak, True Kentucky, Mail of Orleans, Queen of the South, Bells and others, all of which I offer at a low price.

J. H. CAMPBELL,

No. 133 Poydras St., New Orleans.

MISCELLANEOUS.

CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell.	Price.
25-inch Bell	250 lbs.	\$65 00
30-inch Bell	350 lbs.	135 00
40-inch Bell	500 lbs.	175 00
48-inch Bell	1200 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BOILEY & CO.,

No. 9 Perdido St., N. Orleans.

BELL'S BELL FOUNDRY.

Established in 1837.

Church, Academy, Factory, Farm, Fire Alarm Bells, etc., made of pure Bell Metal (copper and tin), warranted in quality, tone, durability, etc., and mounted with our Patent Improved Hanging Hangers. Illustrated catalogues sent free.

VANDUZEE & TIFT,

102 and 104 East Second street,

Cincinnati, Ohio.

BELL'S STEEL COMPOSITION.

For Churches, Schools, Etc.

These celebrated Bells (not Cast Iron or "Amalgam") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular.

The Farm and Garden.

A SUCCESSFUL PEAR ORCHARD.

There are, as yet, in the country but few notable instances of the successful culture of dwarf or standard pears on a large scale. In the neighborhood of Boston, where pears thrive almost as naturally as the grass of the soil, we call to mind the special pleasure the goodly sight of the fine orchards of C. M. Hovey and Marshall P. Wilder. But west of there, one of the finest examples of real practical success in pear culture over a series of years, that we can call to mind, is that of the Mapes farm, Newark, New Jersey.

Here, upon a high ridge and running over the top and sloping on each side, is a pear orchard of over five thousand trees, containing sixty varieties of fruit, and of varying ages from ten to eighteen years, which, at the time of our visit, were nearly all in fine productive condition. Our friend P. T. Quinn, whose life is associated with the history of the farm, and has been its manager since the death of Prof. Mapes, long ago was thoroughly familiar with all the arts and appliances necessary to make the practice of agriculture as well as horticulture constantly and eminently successful. From a poor rocky soil the ground has been brought up into extraordinary fertility, while by the admirable system of choice crops and methods of cultivation, results have been obtained, year after year, such as would astonish those not familiar with the subject. Mr. Quinn is a champion of deep plowing; for the life of the place and its great success are attributable to no other cause, while the very health and beauty of this noble pear orchard depend greatly on the system of deep culture, so well practiced, and which has reduced the soil to excellent tilth. Mr. Quinn believes that the best bank is a bank of earth, plowed and subsoiled eighteen inches deep, and then manured right; given that, there need be no fear of rain or drought, for a well-prepared soil is independent of the weather.

Mr. Quinn has made pear culture a thorough study for more than ten years, watching with interest all the various modes of propagation, culture, pruning, the choice of varieties, and popular preferences in the market; and, like many other sensible men, has waited until he knew something before giving his experience to the public in book form.

Summer pruning is one of the prime causes of his success. During the last two weeks of July a thorough examination of the entire orchard is made with the pruning knife. All shoots of new growth are trimmed back two-thirds, leaving only a short, stout stem. The wounds made with pruning are very soon healed over, while the strength of the tree, being confined to only one-third its original space, tends not only to mature the wood fully, but to develop fruit spurs over the entire surface. This system has been practiced for years, and is the first point of success. The tendency of the tree to wood growth is checked and turned to producing fruit; while strong, sturdy lower branches are developed, capable of bearing up almost any weight of fruit. This system of summer pruning not only makes a more symmetrical shape, and a sturdier, stouter tree, but doubles the yield of the fruit. In standard trees, left to grow at their will, observers notice that the fruit is borne away out toward the center or tips of the limbs; and, as the fruit begins to mature, the weight bends over limb and almost breaks it. But on any of Mr. Quinn's trees any limb will sustain the same weight without a curve, and stand erect, as it were, with sturdy sinews, neither bending nor breaking.

Nearly all the trees of recent planting are trained as pyramids, branching close to the ground, and reaching from ten to twenty feet in height. If allowed to grow as usual, with trunks trimmed for five or six feet, the branches would have occupied more lateral space, and yet have yielded no more proportionate fruit. The pyramid form is, practically the easiest, most economical and most productive method.

The rows, as a rule, are placed twelve feet apart by ten feet in the rows. Nothing is grown between the rows of pears; which are gradually reduced to one row in the center as the trees approach bearing condition. — *Horticulturalist.*

THE PEANUT AS A MONEY CROP.—Land that will produce half a bale of cotton (value, twenty-five cents per pound; say \$56 25 per gross) should produce fifty bushels of peanuts, at \$2 50 per bushel—\$125. The labor, if anything, is in favor of the peanut, though the gathering requires more haste, and can't be postponed, as cotton picking. A good hand writes us, offering us a half interest in a machine, *proved*, to be a failure, with a man and horse, equal to five hands.

The work is simple. Prepare land with one-horse plow; put and

in flat ridges; select light land which has been well cultivated in cotton the previous year; rows laid off three and a half feet apart; drill in about two inches deep, a week before planting—at time of cotton planting—about one hundred and fifty pounds of Rhodes' superphosphate. Procure sound seed—Carolina seed is best—weighing twenty-eight pounds to the bushel; hull carefully, not breaking the skin of the nut; drop two to every eighteen or twenty inches, in a furrow made by bull tongue, about two inches deep; cover with a board fastened to "chip" of shovel plow. When up, bar off and scrape, as is done for cotton. In a few days hill with shovel plow. Keep clean; stir the earth frequently; surface culture; do not displace the branches; don't cover any portion of the plant; keep earth in a slight ridge shape.

Better plant a few more seed than needed, so that a missing plant can be earlier filled by transplanting than replanting. Gather as early after the frost kills the vine as possible. Dry thoroughly, in house or on scaffolds protected easily from rain and dews. Keep the hull bright, as these sell better. More money in the peanut than in cotton. — *Southern Farmer.*

HOUSEKEEPERS' DEPARTMENT.

VENISON STEAKS.—Cut them from the neck; season them with pepper and salt. When the gridiron has been well heated over a bed of bright coals, grease the bars and lay the steaks upon it. Broil them well, turning them once, and taking care to save as much of the gravy as possible. Serve them up with currant jelly laid on each steak.

A CHEAP AND GOOD PIE.—To half a teaspoon of vinegar put one tablespoonful of butter, one teaspoon of molasses, one teaspoon of dried currants, one egg and a little nutmeg. Roll two soda crackers fine, and add to the above, and you will have material enough for two pies. Try them, and you will make more.

WASHING FLANNELS.—Make a hot suds with good soft soap; put in the flannels and let them lie a few minutes; then wash thoroughly with the hands. Have ready some boiling water; dissolve a little blue or indigo, and pour on it sufficient of the hot water to prove the goods; put them in, and let them remain until cold enough to ring. Dry in the air, and iron when slightly damp. Iron on the right side.

GRAPE MARMALADE.—Put green grapes, when full grown and clear, into a preserving pan, with only sufficient water to cover them from burning; spinach juice may be added if you wish to give the jam a more decided color. Boil them gently until soft enough to mash; run the pulp through a sieve sufficiently fine not to allow the seeds to pass through. To each pound add a pound and a half of the finest sugar, and boil to the consistency of jelly.

STONEWALL INSTITUTE.

Located 13 Miles North of Selma, Ala.

After a week's recess for Christmas the exercises of this school for boys will be resumed on MONDAY, JANUARY 3, 1870.

It affords the Principal peculiar pleasure to announce three facts:

1. He has engaged the services of that thorough teacher and master of his art, with ten years' experience as an instructor, Mr. DONALD J. WILLIAMS, to assist him in imparting to his pupils a perfect knowledge of all the Mathematics usually taught, including Book-keeping and Field Surveying.

2. He has on hand at the Institute, and has since October last, the most and most studious boys that for two years have been premiums this year at three different Universities, the first in the South in fact furnishing the highest possible endorsement of his fidelity and skill.

3. The location of this school distinguishes it from most others; its teachers are on the ground all the time, and actually give instruction four hours per day; and each instructor is limited to twenty pupils.

The habits and morals of its inmates are carefully cultivated, all being treated as gentlemen, and all being required to act as such. The honor of young men being constantly cultivated in all particulars. And to aid in establishing these results, the Bible is received as authority, its truths being Sunday and taught in uniform lessons each Sabbath, with ministerial services regularly performed; and the feeling of home is infused into the mind and heart of every student.

Charges from January to July 1870, for board, tuition and washing, will be \$175, paid on entering, or in a thirty days' accepted draft on Mobile or Selma, with \$10 on deposit for books. Payments may be made to W. S. Sells, Selma, Alabama, or Foster & Gardner, Mobile, Alabama.

In the elementary parts of education, even in writing, spelling and reading—which are taught to all this school—differences comparison and invites scrutiny. Thoroughness in every department is the basis of progress.

The location of the Institute is in the quiet country, and is distinguished for its healthfulness. Here no clear shops or liquor saloons distract the mind or corrupt the morals of the students. This gives its pupils great advantages in learning books and acquiring habits of close thinking. Its patrons are at all times invited to visit and see for themselves the admirable daily schedule of duties and toll here executed by both teachers and pupils.

As all are vitally interested in sustaining an institution whose standard of morals and thoroughness of scholarship are so unequalled, the Principal confidently presents its claims to the public, pleading to that public to give its constant and undivided attention to the interests of its charge.

As the number of students will be limited, those parties intending to send will please at once address the undersigned.

D. C. B. CONNELLY, President.

SCHOOLS AND COLLEGES.

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year.

Pennmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Terms, Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1841. For circulars, giving terms, etc., address J. W. BLACKMAN, New Orleans.

no 11 y

METHODIST FEMALE COLLEGE,

TUSCALOOSA, ALABAMA.

Under the patronage of the Mobile Conference.

The regular scholastic year will begin on the first Monday in OCTOBER next, and end the last of June. It is divided into two terms of four and a half months each.

EXPENSES.

Board, including washing, lights and fuel, per month.....3 00

Board, including washing, lights and fuel, per month.....22 00

Young ladies must furnish their own towels, sheets, pillow cases, and table napkins.

Payments for each term in advance. Pupils entering within the first month will be charged from the beginning. Rhinoceros charges no tuition in the Literary Course.

Strict attention given to the manners and morals of the young ladies, and to their habits of study.

Refer to Dr. Keener.

For information address the President, no 31 y

C. D. OLIVER, Principal.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, MACON COUNTY, ALABAMA.

REV. GEO. W. F. PRICE, PRESIDENT.

1. Institution permanent and successful.

2. Full faculty of experienced teachers.

3. Music made a special feature.

4. Art taught thoroughly and cheaply.

5. Fine Scientific Apparatus in good order.

6. Boarding department excellently kept.

7. Pupils under control of President.

8. Attention to health, manners, morals.

9. Vocal music gratuitously to all.

10. Languages taught, ancient and modern.

11. Particular care given to Primaries.

12. Direct Lesson System adopted.

13. Discipline thorough and efficient.

14. Literary culture unsurpassed.

MISS DEPARTMENT.—Dr. S. M. Bartlett, principal, has been a successful teacher of vocal and instrumental music for nearly twenty years, much of the time in female colleges in Alabama. The institution has excellent instruments for instruction. Pupils practice under the professor's eye. Vocal music is a gratuitous daily exercise. Vocalization taught thoroughly.

BOARDING DEPARTMENT.—Capt. J. H. Pooser, steward, Mrs. E. R. Whitelaw, house-keeper. The gentleman in charge of this department is one of Maryland, Florida and of elevated character and social standing. The President resides in the college, and has charge of the boarders. Young ladies must furnish one pair blankets, one pair sheets, towels, pillow cases, table soap and lights. Fees for each term in advance. Four weeks make a scholastic month.

Next year begins September 15, 1869. Two terms, twenty weeks each.

CHARGES FOR YEAR OF FORTY WEEKS.

Languages, each.....20 00

Boarding, per month, without lights.....5 00

Board per month, without lights.....20 00

No incidental charges of any kind. Fees for each term in advance. Total expense, without extras, about \$200.

REV. GEORGE W. F. PRICE,

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited only a moderate degree of animation since our last issue. The wholesale trade has shown but little activity, although a fair business has been done in some branches in filling country orders. Sugar and molasses have continued dull and drooping, and with more ample supplies. Western produce has sold at easier prices generally, without much activity in any branch.

The accounts from the interior report that the upper Red river, the Ouachita and the Arkansas, with their tributaries, are steadily falling, and indicate that if our receipts of cotton are not curtailed by an actual exhaustion of the supply, they will be by an interruption to navigation.

The river has again risen, and is now three feet six inches below high water mark.

COTTON.—The following are the arrivals since the fourth instant:

Louisiana and Mississippi	16839
Arkansas	2921
Lake	700
Florida	16
Texas	178
Total	20715

On Saturday, in response to a marked rally in gold at New York, the demoralization of the previous day was followed by renewed confidence among factors, and a better feeling generally. The conclusion hastily drawn from the reaction in gold seemed to be, that for the present, at least, it had touched its lowest point, and that the anticipations of those who had expected an early resumption of specie payments would be disappointed. Under these views the demand improved, and although factors were more stringent in their pretensions, especially for low middling and good ordinary, yet the sales summed up 10,850 bales, at stiffer prices for the above grades, without any notable variation in other descriptions. The general impression with regard to gold was shown by a large sale of francs late at night at 4.64½, against the closing quotation at four P. M. of — to 4.65.

On Monday this cheerful feeling was dispelled by telegrams reporting a material decline in the New York gold market. The business at the same time was of moderate extent, embracing 6,500 bales. On Tuesday the market opened with a good inquiry, but at prices in proportion to the decline in gold and foreign exchange, or at a fraction less, in accordance with the New York market, and, as factors found it necessary to give way accordingly, 7,550 bales changed hands, at irregular prices, showing a decline of ¼¢ in middling and the higher grades, ½¢ to ¾¢ in good ordinary, and ½¢ to ¾¢ in the poorer qualities. The higher grades maintained their position better from their comparative scarcity.

This makes an aggregate for the past three days of 24,900 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 850,609 bales, against 682,628 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 525,051 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 241,075 bales to Great Britain, of 43,900 to France, and of 67,319 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	16 to 17
Good ordinary	19 to 19½
Low middling	20 to 20½
Middling	21½ to 22
Strict middling	22 to 22½

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	20715
Arrived previously	884891-905606
Reported past three days	906378
Reported previously	64988-68002
Stock on hand and on shipboard	238284

MONEY.—Gold opened on Tuesday at 112½ to 112½ (against 112½ at New York), and closed at 111½ to 111½.

The movement in silver has been of limited extent, the only sales reported being a small amount in American half dollars on Monday at 111, and \$500 on Tuesday at 112.

The sales of warrants include \$1,500 State on Saturday at 70½, and a moderate amount at 76; a small amount of Metropolitan Police on Monday at 83, and \$17,000 at 84; and \$1,000 on Tuesday at 84. Dealers buy at 82 to 84 for Metropolitan Police, and sell at 84 to 86. State warrants are quoted nominal at 68 to 76, according to size.

Special Notices.

Meridian District, Mobile Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Meridian	Jan. 15, 16
Enterprise	22, 23
Pearce's Springs, at Pearce's	29, 30
Shubuta and Clarke, at Lib-	erty Camp Ground
Gaston, at Coke's chapel	Feb. 5, 6
Butler, at Ebenezer	12, 13
Belmont, at Belmont	19, 20
Livingston	Mar. 5, 6
Bladen Springs, at Bethel	12, 13
Enterprise et. at Jacob's ch'l	19, 20

A full attendance is requested.

JOSHUA T. HEARD, P. E., Shubuta, Mississippi.

Lake Providence Dist., La. Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Waterproof, at Waterproof	Feb. 12, 13
Illawarra, at Illawarra	19, 20
Lake Providence, at Lake	26, 27
Providence	Mar. 5, 6
Carroll, at Oak Grove	12, 13
Dell and Floyd, at Floyd	19, 20
Winnboro, at Magnolia	26, 27
Richland, at Horne's ch'l	Mar. 5, 6
Bastrop, at Bastrop	12, 13
Linn Grove, at Linn Grove	19, 20

B. F. ALEXANDER, P. E., Monroe, Louisiana.

Opelousas District, Louisiana Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Washington circuit	Mar. 5, 6
Opelousas	12, 13
Grand Cheniere	19, 20
Vermilion and Bellevue	26, 27
Lake Charles	Mar. 5, 6
New Iberia	12, 13
Abbeville	19, 20
Franklin	26, 27
Phlegme Bruce	Mar. 5, 6
Bayou Mallet	12, 13

J. D. ADAMS, P. E.

Union Springs Dist., Montgomery Con.

FIRST ROUND OF QUARTERLY MEETINGS.

Troy circuit, at Troy	Jan. 1, 2
Mc. Millard circuit, at Far-	riouville
Union Springs station	8, 9
Brundidge et., at Brundidge	15, 16
Brundidge et., at Brundidge	22, 23
Rocky Mount circuit, at Bri-	ar Hill
Greenville station	Feb. 5, 6
Fl. Deposit et., at Fl. Deposit	12, 13
Sandy Ridge et., at Sandy	19, 20
Line Creek et., at Hopewell	26, 27
Pine Level et., at Pine Level	Mar. 5, 6
Rutledge et., at Mt. Ida	12, 13
Elba circuit, at Bethel	19, 20

A full attendance of the members is solicited.

J. W. SHORES, P. E.

Brookhaven Dist., Mississippi Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

Georgetown et., at Bathesda	Jan. 8, 9
Martinville et., at Pinegrove	15, 16
Boguo Ohitto et., at Bogue	22, 23
Chitto	29, 30
Summit circuit, at Summit	Feb. 5, 6
Magnolia et., at Magnolia	12, 13
Scotland and Brandywine	19, 20
Circuit, at Sweetwater	26, 27
Pleasant Val. and Rehoboth	Mar. 5, 6
at Pleasant Valley	12, 13
Burtonton circuit, at Zion	19, 20
Brookhaven station	26, 27
Wesson and Beauregard, at	Beauregard
Crystal Springs and Hazle-	hurst, at Hazlehurst

The preachers will please be careful to publish their Quarterly Meetings as early as possible, that they may secure a full attendance of the official members. If convenient, it will be received as a great favor if the brethren could provide conveyance for me to get from the depot to their respective Quarterly Meetings.

G. F. THOMPSON, P. E.

Mobile District, Mobile Conference.

FIRST ROUND OF QUARTERLY MEETINGS.

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, MARCH 19, 1870.

NO. 9.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, March 6.—There was an exciting debate in the House yesterday on the Georgia bill, in which the Democrats participated quite freely. Mr. Beck, of Kentucky, in reply to Ben. Butler, spoke as follows of the proposed new policy of the Radical party:

"Dangerous as was the avowal of the gentleman from Massachusetts that he intended, by this bill, to give a new lease of power to the Governor, the Legislature and the present State officers of Georgia, revolutionary as was that announcement, it is as nothing compared with the other avowal of a purpose which I know the Radical leaders of the Republican party are rapidly approaching. That avowal of the gentleman was, in substance, that he wanted to pass this bill as a precedent to show to the people of this country that Congress has the right to exercise the same power over any State, no matter where, that in its opinion does not properly protect life, liberty and property within its borders. That Congress claimed the right to seize that State by the throat and compel it to do what Congress chooses to say it should do. He pointed to the State of Tennessee, and announced that if his friends would stand by him he would seize her as he now proposed to seize Georgia. I knew that the more radical men of the Republican party were rapidly approaching that point, but this is the first time that I have ever heard the purpose deliberately avowed upon this floor. It required a bold man, like the gentleman from Massachusetts, to avow it now, and it is well that it has been avowed. It is well for the country now to understand it. It is not particularly because the Republican party want to retain power in the State of Georgia that this bill is to be passed, but because they want a precedent established which will authorize Congress to seize any State that does anything that Congress may think is wrong in the treatment of the citizens of that State within her own borders, in regard either to the persons, liberty or property of her citizens."

WASHINGTON, March 14.—Senate.—Mr. Sumner introduced a bill to strengthen the legal reserves of the national banks, and the resumption of specie payments by the first of January, 1871.

WASHINGTON, March 15.—House.—The House debated at length whether to refer the funding bill to the Banking and Currency Committee, or to the Ways and Means Committee, and finally voted to refer it to the latter.

Mr. Butler reported a bill for the admission of Texas, stating it was identical with the Virginia and Mississippi bills, with the exception of an additional provision that the passage of this bill shall not affect the conditions under which Texas was originally admitted.

In response to an additional provision offered by Mr. Wood, that the State be admitted without qualification except as stated in the bill, Mr. Butler said he had no objection except that it was useless. Mr. Beck also offered a substitute bill, reciting that Texas had a constitution which is republican in form, and she is therefore entitled to representation. Both Wood's and Beck's amendments were rejected by a strict party vote and the bill then passed.

New York, March 15.—Cotton has advanced to-day. Middling uplands rule 22c. Sales for April are reported at 21c. for low middling.

Money 5 to 6. Sterling steady. Gold closed heavy at 111½.

FOREIGN.

LONDON, March 15.—Letters received from Zanzibar say that the expedition sent in search of Dr. Livingstone is detained by the prevalence of the cholera.

The German ship Carrio and Jano was run down by a steamer of the Peninsular and Oriental line, off the coast of Japan. No details received.

PARIS, March 14.—Dispatches received from Rome confirm the report of a demand made by France for representation in the Ecumenical Council.

The publication of the twenty-one canons of the church renders inevitable a change in the attitude of France, as in the abstract they violate the principles of modern government and society, and are hostile to the wishes expressed by the Emperor Napoleon in his speech to the chambers.

LONDON, March 14.—The party at

Rome who are adverse to the infallibility dogma is getting strength daily.

PARIS, March 14.—A dispatch received from Rome states that six hundred and ten votes are now sure for the infallibility dogma.

France has at last taken a very decided stand upon the question of the papal infallibility. The minister of foreign affairs, Count Napoleon Daru, has written an official note to the French representative at Rome, declaring that if the obnoxious dogma is proclaimed, France will withdraw her troops from the Holy City. This is emphatic. The Pope must now choose between disappointment and revolution. What he will do in this dilemma is uncertain; but we learn, direct from Rome, that he is still confident of his ability to carry the proposition for infallibility. The London Times says that Spain and other Catholic powers have forwarded notes similar to that of Count Daru. It is reported in Brussels that so far the ultramontanes have been unable to induce the American bishops to declare for the dogma. The sessions of the Ecumenical Council will be resumed next week, when this important question, which seems to threaten the peace of the world as well as the church, will receive some solution.

While the Italian kingdom, with a population of 24,000,000, is represented in the Ecumenical Council by 133 members, and the Papal States, with a population of 700,000, by 143, France is represented by only 84 members, Austria by 48, the German Confederation by 19, Great Britain by 35, and the United States by 48. The Italian members of the council, in fact, form considerably more than a third of the whole.

The correspondent of the Pall Mall Gazette, writing from Rome, February 9, says: "For some days past the Pope has been very unwell. He has been twice attacked in the night by his old complaint, and obliged to ring for help. He looks very haggard; but it is his custom, when he receives strangers, to rouse his cheeks, so that the traces of illness are not seen."

PAULS, March 15.—Forty members of the Ecumenical Council have signed a demand for a change in the order of deliberations, and that the schism relating to the infallibility of the Pope be immediately discussed.

Events in Rome are daily becoming graver. It is reported the French ambassador left to-day for Paris, and that the Austrian ambassador has received directions to sustain the demand of Count Daru for the admission of French representation to the council.

LONDON, March 16, 5 P. M.—Reports are still current in this city of the arrival of the steamer City of Boston. The Globe this evening publishes a dispatch, dated Dublin, announcing her safe arrival at Queenstown, but the agent of the Associated Press at that port telegraphs that she had not been seen or heard of there. The Globe's dispatch is undoubtedly false.

MADRID, March 16.—There is a fierce controversy, on the best disposition of the Cuban question, going on. Some journals urge the abandonment of the island to the United States, but a majority of the journals bitterly denounce this proposition as cowardly and unpatriotic.

General Prim, in the Cortes to-day, alluding to the attack made upon him with shouts and volleys of stones, said the government would hereafter deal promptly with disorders.

The funeral of Henri De Bourbon was conducted by the Freemasons. The priest, seeing the emblems of Freemasonry on the coffin, refused to perform the religious ceremonies. The troops took no part in the funeral.

LONDON, March 16.—The union of Scottish and English Presbyterians approaches realization.

PARIS, March 16.—The Pope is again reported very ill.

LONDON, March 14.—An arrival from Fayal brings no news of the missing steamer City of Boston.

Cairo, Egypt, March 14.—New fortifications have been commenced in the harbor of Alexandria.

God would have us pray with earnestness. The best proof of earnestness is simplicity. Better in God's sight are the broken but heartfelt utterances of some than those who think themselves wonderful in prayer.

EXTINCTION OF THE NEGRO RACE.—Statistics in the United States have shown that it is only a question of time to extinguish the free negro.

In Massachusetts there were about ten thousand in 1863, the greater portion of whom were in or near Boston. From 1858 to 1863 the births among them were one hundred and thirteen, and the deaths three hundred and seventy-six in Boston. In all the Northern States, from 1840 to 1850, the accretion from natural increase, runaway slaves, manumitted, etc., was only three per cent, two hundred and fifty-eight, increasing in ten years to two hundred and twenty-three thousand three hundred and forty-eight. The estimate is made that the race has diminished in the United States at least one-third since 1860. And it is not surprising when one sees the total want of foresight which pervades the entire race when attacked with illness. It was the master's interest to enforce prompt attention in all medical cases. The habit was thereby engendered in the negro of being attended to and cared for, and notified when he ought to be physicked.

Now, in many cases, unfortunately, they have no money to pay for medicine nor a physician's prescriptions, and often neglect themselves until it is too late to cure them. In the case of children and the aged it is far worse. They are neglected and they die. There are not one-fourth of the average number of children from one to four years old in negro families that there were in 1860 or previous years. I speak from personal observation, as well as from cumulative testimony. This is sufficient fact upon which to figure out their utter extinction, irrespective of other causes. It is the current belief throughout the South, though a feeling of kindness and pity exists for the unfortunate race. But preparations are being made for all the contingencies, which betoken the utter destruction of the former laboring class, and the substitution in its stead of another.—Blanton Duncan.

NEW ORLEANS SCHOOL OF MEDICINE.—Commencement Exercises.—The commencement exercises of the New Orleans School of Medicine took place yesterday afternoon, at Lyceum Hall. A large audience, among whom were many of our prominent medical men and quite a large number of ladies, were present.

After prayer by Rev. Dr. Palmer, Dr. Samuel Logan, the dean of the faculty, conferred degrees on the following graduates:

Graduates in Medicine.—J. O. Bertin, D. H. Bryant, F. E. Butler, S. Bowers, F. N. Cowdin, W. A. Cook, W. W. Culpepper, O. Dulany, W. F. Flewellen, W. W. Farr, E. Gandy, J. F. Gladney, H. W. Harrington, J. K. McGregor, J. N. James, J. F. Joor, T. D. Manning, F. C. Manning, E. Martinez, J. W. Meek, G. M. D. Patterson, J. Roldan, J. C. Ferry, J. T. Tate, A. B. Welfelsburg, J. Wirth, S. O. Young.

Graduates in Pharmacy.—R. Sauvage, J. Steensen, A. Wirth. A valedictory address, in behalf of the faculty, was then delivered by William Hinton Ford, professor of physiology; and another in behalf of the class, by Dr. Sam. O. Young.

The exercises closed with a performance by the band of the overture to "William Tell."—Piquette, March 16.

Mr. DAVID PATTERSON, of the Medical Mission in Madrid, has just sent out a class of fourteen young Christians, who have been under instruction for four years at his hospital and dispensary, and who are now qualified to act as medical missionaries. They have been examined by the professors of the government medical college, and pronounced thoroughly competent for all the ordinary duties of the profession.—They return to their native districts in South India, determined to make their medical skill subservient to the work of Christian advancement.

M. Guizot, now nearly eighty-three years old, is coming into prominent active life again in France. He has accepted the presidency of an extra-parliamentary commission to remodel the system of superior education. A few nights ago Guizot was present at Emile Ollivier's reception, and was quite the lion of the evening. He is said to stand as upright and looks as vigorous as he did thirty years ago.

BALTIMORE CONFERENCE.

APPOINTMENTS.

BALTIMORE DISTRICT.—J. S. Martin, P. E. Central, J. H. Linu, J. N. Hank, sup.; St. Paul's, L. D. Huston, John Poissal, J. W. Bull, sup.; South Baltimore, George G. Brooke, D. H. Parish, sup.; Howard chapel, L. C. Miller; Baltimore circuit, J. P. Etchison, S. W. Haddaway; Hookstown, J. H. Dulaney; Frederick City, M. G. Balthis; Lincolnton, J. T. Maxwell; Rockville, D. Bull, J. A. Kern; Montgomery, B. F. Ball, one to be supplied; Howard circuit, R. H. Wilson; Beltsville, W. A. McDonald; Laurel, R. S. Shreve; South River, F. A. Mercer; Bladensburg, W. H. D. Harper, W. J. Perry, one to be supplied; Hillsboro, J. Landstreet, one to be supplied. Secretary of Board of Foreign Missions, W. E. Munsey. President Maryland Agricultural College, Samuel Register. B. W. Dougherty transferred to Virginia Conference.

EAST BALTIMORE DISTRICT.—S. S. Roszell, P. E. Trinity, S. Rogers, R. A. Holland, sup.; East Baltimore station, T. B. Sargent; North Baltimore station, S. Kepler; Emmanuel, I. W. Carter, J. C. Hummer, sup.; Taylor's circuit, W. K. Boyle, L. R. Jones, J. N. Spangler, sup.; Harford, A. A. Eskridge, R. Smith, S. H. Griffith, sup.; Talbot, J. L. Shipley, R. B. Frampton, sup.; Trapp station, W. C. Malloy; Kent, L. H. Crenshaw; Queen Anne's, J. M. Grandin, J. P. Hall; West River, W. G. Eggleston, J. W. Duffey; Calvert, A. B. Dolly; Prince George, C. G. Linthicum; Severn, G. T. Tyler; R. M. College agent, D. Thomas.

WASHINGTON DISTRICT.—A. W. Wilson, P. E. Washington City, Mount Vernon Place, William V. Tucker, J. W. Botcher, sup.; Alexandria, R. R. S. Hough, F. M. Mills, sup.; Alexandria City mission, G. W. Lightner; Loudoun, D. Shoff, G. Kramer; A. R. Martin; Leesburg, N. Head; Farmwell, L. V. Hoyle; Fredericksburg, E. R. Smith; Fauquier, E. H. Henry; Fairfax, Wesley Hammond; Falls Church circuit, P. B. Smith; Prince William, C. L. Dameron; Stafford, A. Robey; Edmonth, L. H. Baldwin; Charles, W. W. Watts; St. Mary's, L. G. Martin.

WINCHESTER DISTRICT.—W. S. Baird, P. E. Winchester station, J. E. Armstrong; Winchester circuit, W. H. Wheelwright, G. Stevenson; Frederick circuit, L. Butt, E. F. Hetrick, sup.; Front Royal, J. H. March, P. Furr; Warrenton, H. E. Johnson; Berryville, P. H. Richey, J. P. Hyde, sup.; Martinsburg, J. L. Clarke; Berkeley, A. A. P. Neal; Jefferson, J. W. Ewan; Shepherdstown, W. G. Cross, one to be supplied; Gainsboro, H. A. Gaver; Morgan, S. Smith; Shandonale, T. W. Brown; Hagerstown, B. S. Highley; Salem and Bethel, F. C. Tebb.

ROCKINGHAM DISTRICT.—J. H. Wagh, P. E. Stanton, H. H. Kennedy; Harrisonburg, J. S. Gardner; Shenandoah Iron Works, A. P. Boule; Mount Sidney, J. W. Wolff; Churchville, J. J. Eagle, G. R. Jefferson, sup.; Bridgewater, J. M. Follasbee; East Rockingham, L. S. Reed, H. D. Bishop, J. F. Liggett, sup.; Rockingham, W. O. Rose; New Market, W. R. Stringer; Woodstock, J. W. Tongue, J. S. Hutchinson; Luray, J. E. Wasson. President Western Female College, at Staunton, W. H. Harris.

ROANOKE DISTRICT.—E. T. Busey, P. E. Salem, W. A. Wade, L. H. Davis; Christiansburg, D. Bush; Blacksburg, P. H. Whisner; Finckle, J. B. Fitzpatrick, J. D. Nalley, W. H. Mason; Lexington circuit, J. H. Temple; Buchanan, A. Q. Flaherty; New Castle, G. Manzey; Catawba, William T. Quinn; Sinking Creek, E. G. Jamison; Lafayette, H. M. Strickler; Montgomery, L. B. Madison; Jacksonville, C. C. Wertebaker.

LEXINGTON DISTRICT.—J. L. Gilbert, P. E. Lewisburg, G. G. Smith, P. S. E. Sixens, sup.; Frankfort, J. L. Porter; White Sulphur, J. F. Clarke; Blue Sulphur, E. T. R. Frapp; Leveiton, C. A. Joyce; Edray, M. A. Taylor; Green Bank, S. F. Butt; Centerville, S. B. Dolly; Union, J. N. Gray, Jehu Hank, sup.; Peterstown, J. Chickenberger, one to be supplied; Gap Mills, J. J. Edwards; Warming and Healing Springs, S. S. Ryder; Alleghany, A. Boone.

LEXINGTON DISTRICT.—W. G. Coe, P. E. Lexington station, I. R. Finley; Colliersown, S. Townsend; Covington, A. Walker; Monterey, J. R. Vauhorn; Doe Hill, W. R. McNeer; Crab Bottom, J. M. Carter; Highland, S. R. Snapp; Jackson's River, W. G. Hancock; Fairfield, W. H. Wilson; Augusta, T. Briley; Millboro, to be supplied.

MOORFIELD DISTRICT.—J. C. Dice, P. E. Moorfield station, T. E. Carson; Petersburg, L. W. Haslap; Franklin, J. Hildebrand, T. H. Shipley; South Branch, J. Higgins; Springfield, J. Beatty; Wardsville, William Hedges; North River, L. D. Nixon; Piedmont, G. H. Zimmerman; Swanton, J. H. Wolff; Cumberland, to be supplied; Flint Stone, C. L. Torreyson; Rainsburg, R. Ross.

The Conference will assemble on the first Wednesday in March, 1871, at Salem, Roanoke county, Virginia.

DELEGATES TO GENERAL CONFERENCE.

The following are the delegates elected to the General Conference, which assembles at Memphis, Tennessee, on the first day of May next: Clerical.—John S. Martin, D. D., Samuel Regester, D. D., Samuel S. Roszel, D. D., Rev. A. W. Wilson, J. H. Waugh, William S. Baird, Dabney Ball.

Clerical Reserves.—William V. Tudor, E. F. Busey, Samuel Rodgers, James S. Gardner.

Lay Delegates.—Joseph Hendrickson, E. W. Mussey, T. J. Magruder, P. Conway, S. Bradley, A. L. Pitzer, T. E. Bond.

Lay Reserves.—J. H. Figgot, S. H. Williams, T. Berry, T. J. McCoy, Dr. J. F. Petherbridge, J. S. Carson, L. W. S. Hough.—Baltimore Episcopal Methodist.

ADVICE TO THE PRINCE OF WALES. Remarking on the evidence of the prince, the London Times concludes an article as follows:

The case of his royal highness stands by itself. It is evident that the prince's error was simply this—that he had been too careless of his reputation. He had acted as a young man who does not understand the passion too many have for scandal, and has given occasion to misconception through simple heedlessness. It is, indeed, not easy for the young, even though they may be next the crown, to remember and guard against "the fierce light that beats upon the throne."

Those who know Marie Antoinette, as we have now the power of knowing her, through all the relations of her checkered life, know how baseless are the calumnies which were persistently heaped upon her name when living; but she—gay, brilliant, charming, the radiant vision treasured in Burke's memory—recked nothing of the malice of the base, and her indiscretion accelerated at least the catastrophe which caused her own unhappy death and the destruction of the French kingdom.

The Prince of Wales has learnt, by a painful experience, how watchfully he must walk whose life is the property and the study of the world. If royalty has many privileges, it must suffer not a few privations, and the charm of personal intimacy is one that must be almost denied to the inheritors of crowns. The prince has had, indeed, before him the pattern of a life, not surely devoid of innocent pleasures, yet so carefully regulated that it was, in the eyes of all men, dedicated to domestic purity.

The life of the Prince Consort was marked by the strictest regard to the conditions under which it has passed. Every one will remember the rules of social conduct the prince prescribed for himself, and how faithfully they were observed. We do not doubt that the future years of the heir apparent will show, by their fidelity to this example, the influence of the lesson he has to learn, and that Englishmen will see exemplified in their king that is to be a life purified from the semblance even of levity.

A child playing near Drogheda, in Ireland, found some time ago a curious piece of metal, which her mother sold to a dealer in old iron for a shilling. The dealer sold it to somebody else for two guineas, and it has now been bought by the Royal Irish Academy for \$2,000. It proves to be the celebrated Tara brooch, made of white bronze, overlaid with filigree work of gold. Besides its value as a historical relic, it is declared to be so beautiful in workmanship that the most accomplished goldsmith of the present day, with all the advantages of modern implements and craft, could not surpass it. That lucky little child ought to be sent out to play again.

THERE is no more fatal error—some one has well said—than that which the man commits who thinks the constant use of alcohol is not injuring him because he never staggers under it.

DEATH OF REV. WM. A. SMITH, D.D.

This distinguished minister of the Methodist Episcopal Church South departed this life in this city, at the residence of Rev. John C. Granberry, D. D., this morning at four o'clock. As the paper is just going to press, we make this solemn announcement. The widespread reputation of Dr. Smith will render it deeply impressive. He died in the assured hope of a blessed immortality. Further details will hereafter be given. D. S. DOUGGETT.

RICHMOND, VA., March 1, 1870.

The Bishop announces the death of his revered preceptor in the years of his early life and ministry. It has fallen to Dr. Lee, of the Richmond Advocate, to appropriately record in its columns, memorial comment upon the sad announcement. He says:

"The announcement of Bishop Doggett will carry sorrow to thousands of Christian hearts. In the death of Dr. Smith the church has lost one of its most gifted and devoted sons. For forty-five years he has been engaged in 'preaching peace by Jesus Christ.' From 1825 to 1866 he was a member of the Virginia Conference. At the close of 1866, at the earnest solicitation of friends in St. Louis, he removed to Missouri, and there, as pastor of Centenary church in St. Louis, and as president of Central College, he has been engaged with his wonted zeal and industry in building the fortunes of Methodism, as it represents the character and reflects the spirit of the church of God, bought with the precious blood of our Lord and Saviour Jesus Christ. The lifelong ministry, the commanding talents, the laborious zeal, the success of his pastoral labors in 'winning souls to Christ,' have not only given him fame in the church, but secured for him, in every period of his public life, its respect, its confidence, and its love. In the great public events in the history of American Methodism since 1836, no man has occupied higher ground or had a wider influence than William Andrew Smith. In 1869, after, by almost superhuman labors, succeeding in raising a subscription of nearly \$100,000 for the endowment of Central College, he returned to Virginia to recover, among its mountain scenery, its medicinal waters, and the associations of old and loving friends, the worn and wasted energies of his once robust and powerful physical system. It was too late. He had taxed his frame and powers to their extremest point. Each friend that greeted his return, and grasped his hand, and looked on his wan and weary form, felt he would find a grave where he sought health and strength and life. His presence at our late Conference in this city was as the return of a father to a family of sons. All loved him; each sought to do him honor. And when he parted with them, at its close, he and they felt it would be until the reunion in the presence and before the throne of the Great Redeemer.

"The writer, who may call himself Dr. Smith's 'own son in the gospel,' after a close and loving association of nearly forty-three years, finds relief to the sorrow of parting in the last interview. We had been sitting silent and sad, for an hour or more, near his bed. Having to leave, we said: 'I will see you again in the morning.' The reply was: 'If I am living. If I die I will leave my dying blessing for you.' Then turning his eyes to Bishop Doggett, standing at our left side, he said: 'And on you, Brother Doggett,' and to Rev. J. E. Edwards, on the right, 'and on you, Brother Edwards.' There, father and sons in Christ parted; one has gone; the other follows!"

To the Members of Mobile Conference.

DEAR BRETHREN: The Minutes of our Conference were published in Selma. Brother Armstrong kindly mailed them for me, as I instructed him, but I learn that some of the preachers have not received them. They ought to have reached all the appointments by the middle of February. If the brethren who have not received them will write me at Clifton, Alabama, I can supply them partially, as I have some surplus copies. J. M. BROWN.

HAMPDEN, ALA., March 2, 1870.

What the world now more especially wants is a marriage of science and faith.

The Christian Advocate.

SATURDAY, MARCH 19, 1870.

A SONG OF SPRING.

BY JOHN E. STAYMAN.

The light of spring begins to fling
Soft shadows where the cloudlets pass;
And music floats from warbling throats,
And notes are thick in leaves and grass.

When morn' awakes the dewy brakes
Are filled with ringing minstrelsy;
And evening goes to sweet repose,
Drowned by the song from dusky tree.

The bobolink sings by the brink
Of willow brook that glides along;
And the oriole gives forth his soul
In sudden flash of flight and song.

From topmost bough the thrush pours now
Full-throated song in pushing flood;
And the meadow-lark strills clear, and bark
To the dove that flutes within the wood.

The chattering wren is back again;
The catbird mocks by the garden wall;
The robin fills the grove, and trills
The earliest, loudest lay of all.

"Why is the air pulsed everywhere
By bird that flits and builds and sings;
This song and rout, what is't about,
This gush of throats and flash of wings?"

asked; and then, by hill and glen,
A hush came o'er the startled throng,
Until the dove made answer: "Love,
Love builds the nest and sings the song."

Then, far and high through all the sky,
The notes rose doubly sweet and loud,
Till Echo heard each warbling bird,
And passed the song from cloud to cloud.

A light shot through the heaven of blue,
The parted clouds grew warm and red;
A low breath shook the rippling brook,
And something stirred my soul, and said:

"Shall only voice of bird rejoice,
And love and gladness fill the grove?
Shall all the Spring thus love and sing,
And I not sing my Song of Love?"

LOCAL PREACHERS.

Mr. Edron: It seems to me that our coming church congress should take some action to increase the efficiency of our local preachers. True, we have already in all parts of our connection faithful and fervent men in the local ranks, doing good service as able ministers of the New Testament, preaching almost as often and as regularly as the itinerant pastors. While we rejoice to make this statement in relation to many, we are sorry we cannot make it in regard to all. There are, alas! many local preachers who appear to make preaching the word a mere incidental business. They sell goods, make cotton, practice law and medicine, and carry on various manufactures. They seem to be as much devoted and engrossed with these callings as other men, whether in or out of the church. They appear to devote almost no time to study and pulpit preparation, to make themselves workmen that need not to be ashamed. Some local preachers do not preach more than four or five times in an entire year. The clear and distinct impression they make is, that preaching is not their peculiar and most important work. We know that Paul, when among heathens as a missionary, made tents toward his own maintenance; but we know also that Paul did a vast amount of work in the vineyard of the Lord, and that he won multitudes of souls to Christ. Let us not excuse his secular life by Paul's example, and then ignore all Paul's studiosness—his prayerfulness and quenchless zeal in preaching Christ as much as in him was. To do this is mere trifling and gross inconsistency.

We are unable to understand how professedly good men can profess that they are called of God, and moved by the Holy Ghost to take upon them the office and work of the ministry, and yet this "office and work," so far as we can see, is the least part of their concern, certainly the least portion of their time or labor. Especially does this want of harmony between profession and practice strike us in the example of ordained ministers. They make solemn promises—as, for example, "diligently to read and expound the Holy Scriptures to the people;" to apply all diligence to frame and fashion their lives and their families according to the doctrine of Christ; to make themselves wholesome examples of the flock of Christ, "so that as much as lyeth in them they will apply themselves wholly to this one thing, and draw all their cares and studies this way." Now, if ministers can lightly regard and almost ignore these solemn obligations and

holy vows, what must be the effect upon the laity, especially upon the young? and what must be the effect upon their own ministry? Really something ought to be done. Cannot the General Conference make it the duty of Quarterly Conferences to demand a more faithful observance of ministerial vows of our local preachers than is now done? It should not suffice, in the case of a minister, to say that he is a sober, honest and amiable man. His holy office and solemn vows demand more.

The last General Conference, we think, took a step in the right direction when they enacted that all votes in the Quarterly Conference for licensing, renewing and recommending ministers should be by ballot. This will doubtless promote discreet and independent action in this business. But we must think that some more needs to be done. Let our wise men, as they gather from the East, West, North and South, exert their wisdom and diligence to improve and increase the efficiency of our local ministry. We have not itinerants enough for the demands of the work, and ministerial work is needed.

We have many kind friends and kind relations with the local ministry, and would not be regarded as an accuser of the brethren; but there is no use mincing matters. This local preacher business has been in a slipshod condition long enough. Hold men to their ministerial vows, or else refuse to license them. So thinks W.

BALTIMORE CONFERENCE OF THE M. E. CHURCH SOUTH.

The session of our Conference commenced on Wednesday morning, March 2, at St. Paul's church, West Fayette street. There was a full attendance of the members. Bishop McTear presented.

Our conferees of the Richmond *Christian Advocate*, Rev. Drs. Lee and Bennett, were both present during the session of Conference.

THE SABBATH OF THE CONFERENCE.

This was a day of more than ordinary interest. Besides our own churches, the pulpits of many other churches were occupied by members of the Conference and our distinguished visitors. Bishop McTear preached and ordained the deacons at St. Paul's church in the morning, and the Rev. William Martin, of Columbia, South Carolina, preached in the same church at night. Bishop Marvin occupied the pulpit at Central church in the morning, and Rev. Dr. Redford at night. Bishop Doggett preached at Trinity church in the morning, and the Rev. Dr. Duncan at night, on which occasion the ordination of elders took place.

Our institutions of learning were ably represented by their respective presidents. Dr. Wiley, of Emory and Henry; Dr. Duncan, of Randolph Macon; Rev. Mr. Arbogast, of Martha Washington; Rev. Mr. Harris, of the Wesleyan Female College at Staunton, and Rev. Mr. Whisner, of Preston and Olin, were all present.

METHODIST PROTESTANT CHURCH.

The following resolution was offered by Rev. Dr. Munsey, and adopted:

Resolved, That we appoint two preachers and one layman of this body to bear our fraternal greetings and messages of love to the Maryland Annual Conference of the Methodist Protestant Church, at its next session, which meets on Wednesday, the ninth instant, in Westminster, Maryland.

The committee consists of Revs. S. S. Roszell, W. V. Tudor and Dr. J. Petherbridge.

FOREIGN MISSIONS.

The annual meeting of the Board of Managers for Foreign Missions has been well attended. Dr. A. L. P. Green, of Nashville, Dr. Deems, Dr. Cunningham and others from a distance were present during its sessions. The annual report of the corresponding secretary, Rev. Dr. Munsey, gave great satisfaction, an abstract of which we shall present to our readers in our next issue. Rev. A. W. Wilson and John S. Harden, Esq., were elected members of the Board of Managers to fill vacancies.

OUR BOOK AGENT.

Dr. A. H. Redford made a very gratifying statement of the condition and prospects of the Publishing House at Nashville. His address to the Conference was in the finest vein. He is surely the right man in the right place; and by his unexampled success has shown himself one of the first business men of the age. But Brother Redford is an able minister of the gospel as well as an incomparable book agent, as his sermon at Central church on Sabbath evening abundantly proved.

FRATERNAL MESSENGERS FROM THE BALTIMORE ANNUAL CONFERENCE.

The following letter from Revs. Henry Slicer and John Bear, of the Baltimore Conference of the Methodist Episcopal Church, fraternal messengers from said Conference, was read:

To the Baltimore Annual Conference of the M. E. Church South—DEAR FATHERS AND BRETHREN: The undersigned having been appointed a committee by nomination of the Bishop and the vote of the Baltimore Annual Conference of the Methodist Episcopal Church, now holding its annual session in Frederick City, do tender to you the fraternal greetings of the last named body. We beg leave to ask at what time it will suit your convenience to receive us, as our Conference is still in session, and we desire to return to this place as early as practicable. If it should suit your pleasure and convenience to devote a few moments of the morning session of Monday to this object, we should not only consider it as an act of Christian courtesy, but should feel ourselves personally obliged thereby. Very respectfully and fraternally, HENRY SLICER, JOHN BEAR.

FREDERICK CITY, March 5, 1870.

On motion of Rev. A. W. Wilson, a committee of four was appointed to receive said communication and report during the morning session.

The Bishop appointed the following ministers and laymen, viz: Revs. A. W. Wilson and S. S. Roszell, and laymen W. Peyton Conway and E. W. Massey.

The following paper was read, and also referred to the above committee:

"To the Bishop and members of the Baltimore Conference of the Methodist Episcopal Church South, now in session in Baltimore:

"DEAR FATHERS AND BRETHREN: The Baltimore Conference of the Methodist Episcopal Church, now assembled in Frederick City, have this day resolved as follows:

"That in view of the former intimate relations existing between ourselves and the brethren composing the Baltimore Conference of the Methodist Episcopal Church, the Bishop be and hereby is requested to appoint, as fraternal visitors, two of our brethren, to convey to them our assurance of Christian fellowship and good will. 'In accordance with the foregoing resolution, which was adopted unanimously, Bishop Ames appointed Rev. Henry Slicer, D. D., and Rev. John Bear, to convey to you our assurance of Christian fellowship and good will. Yours, truly and fraternally, JOHN H. C. DORN, Sec."

REPLY OF THE BALTIMORE CONFERENCE, M. E. CHURCH SOUTH.

Rev. A. W. Wilson, chairman of the committee to whom the communication of Revs. H. Slicer and John Bear was referred, made the following report:

"The committee to whom was referred the papers relating to fraternal intercourse with the Baltimore Annual Conference of the Methodist Episcopal Church respectfully report the following preamble and resolutions, viz:

WHEREAS, A written communication has been received from Rev. Henry Slicer and John Bear, informing us that they have been appointed a committee of the Baltimore Annual Conference of the Methodist Episcopal Church to tender to this body the fraternal greeting of that, wishing to know at what time it will be convenient for us to hear them for this purpose; AND WHEREAS, The General Conference of the Methodist Episcopal Church, to which the ecclesiastical body now approaching us by committee is amenable, has declined to receive fraternal greetings or to enter into fraternal intercourse with the General Conference of the Methodist Episcopal Church South, under whose jurisdiction we are; AND WHEREAS, This attitude on their part is still maintained toward us, and for which history shows we are not responsible; therefore,

Resolved by the Baltimore Annual Conference assembled, That it is not proper or competent for the Baltimore Conference of the Methodist Episcopal Church South to enter, at this time, into any official correspondence and recognition as is proposed or implied in the communication before us.

Resolved, That in view of the constitutional form of government of both Methodisms, we consider the General Conferences of the two churches the proper and only competent authorities to initiate and arrange terms of official intercourse between the Annual Conferences, and to these chief judicatories we remit the subject.

Resolved, That while we cannot, as matters now stand, by the act and choice of the constituted authorities of the Methodist Episcopal Church, receive officially the delegation announced, yet that personally we hold Rev. Henry Slicer and Rev. John Bear in high esteem as Christian men and ministers, and as such this Conference will be pleased to receive them at any time.

Resolved, That we desire peace and harmony with all, and especially with those who are called Methodists, and we regret the failure of those legitimate measures which have been used for this end by the Methodist Episcopal Church South toward the Methodist Episcopal Church, and that our overtures of peace and fraternity, on terms alike honorable to all, have been rejected by them and stand rejected still.

Resolved, That in making this disposition of the aforesaid communication, we are actuated by no feelings of personal hostility to the ministers or members of the Methodist Episcopal Church, but by what we sincerely consider to be pre-existing questions of primary and fundamental importance in the present relations of the two great bodies of Episcopal Methodism of the United States. Those being settled between the proper authorities of the two churches respectively, we shall rejoice to cultivate those reciprocities which our common Christianity and our common birthright require.

Resolved, That as a Conference we fully indorse the reply which the Bishops of the Methodist Episcopal Church South made to the Bishops of the Methodist Episcopal Church at their interview in St. Louis in the month of May last.

Resolved, That a copy of this preamble and these resolutions, duly authenticated by the secretary of the Conference, be forwarded by him to Rev. Henry Slicer and Rev. John Bear.

A. W. WILSON, Ch'man.
S. S. ROSZELL,
E. W. MASSEY,
W. P. CONWAY.

On motion of Rev. John S. Martin, it was resolved to take the question on this report without debate, and by yeas and nays. It was also, on motion, determined that preachers and lay delegates not present be allowed to record their votes.

The vote on the above resolutions was quite unanimous, all the ministers and laymen present voting in the affirmative, viz: Clerical, 142; lay, 23; total, 165.

After reading the result of the vote the Bishop invited Revs. Henry Slicer and John Bear forward to be introduced to the Conference, according to the resolutions adopted, but it was found that they had retired.

DELEGATES TO THE GENERAL CONFERENCE.

Up to the hour of going to press the election of delegates had not been completed. John S. Martin, D. D., S. Regester, D. D., S. S. Roszell, D. D., and Rev. A. W. Wilson were elected on the first ballot. Three more clerical delegates are necessary to complete the delegation.

The lay delegates are as follows: T. E. Bond, E. W. Massey, T. J. Magruder, J. Hendrickson, W. P. Conway, S. Bradley and A. L. Pitzer. Alternates: J. H. Figgot, S. H. Williams, T. Berry, T. J. McCoy, J. S. Carson, L. W. S. Hough and Dr. Petherbridge.—*Baltimore Episcopal Methodist.*

CONVERSION OF D'AUMIGNE.—The great historian of the Reformation gives the following account of his being convinced of his depraved condition:

When Mr. Monod and I attended the University at Geneva there was a professor of divinity who confined himself to lecturing on the immortality of the soul, the existence of God, and similar topics. As to the Trinity, he did not believe it. Instead of the Bible he gave us quotations from Seneca and Plato; St. Seneca and Saint Plato were the two saints whose writings he held up to admiration.

But the Lord sent one of his servants to Geneva, and I will remember the visit of Robert Haldane. I heard of him first as an English or Scotch gentleman, who spoke much about the Bible, which seemed to be a very strange thing to me and other students, to whom it was a shut book. I afterward met Mr. Haldane at a private house, with some other friends, and heard him read from an English Bible a chapter from the Romans, about the natural corruption of man, a doctrine of which I had never before heard. In fact I was quite astonished to hear of men being corrupt by nature.

I remember saying to Mr. Haldane: "Now I see that doctrine in the Bible." "Yes," he replied, "but do you see it in your heart?" This was a simple question, but it came home to my conscience. It was the sword of the Spirit, and from that time I saw that my heart was corrupted, and I knew from the word of God that I can be saved by grace alone.

TWO-SIDED PEOPLE.—Many a person has two distinct and different selves—one that promised and lied, and one that believed the other. After awhile they both lied to each other, and neither believes.

THE SCHOOL QUESTION.

Within a fortnight the school question has formed the subject of a decision in the Supreme Court of Ohio, and has been introduced into the Legislature of New York.

The majority of the former have agreed to make the injunction upon the School Board of Cincinnati perpetual, and the effect of this decision is to continue the use of the Bible in the schools. The defeated party threaten to appeal to the Supreme Court. Judge Hagan and Judge Stover were the consenting judges, and Judge Taft rendered a dissenting opinion. We present Judge Stover's view as the most decided, and as that upon which the advocates of the Bible in the schools must eventually rest.

Judge Stover began by a brief statement of the case, making prominent the fact that the practice of reading the Bible in the schools began in the city fifty years ago, and had continued ever since; but provision had been made in this time to excuse from that exercise any pupil whose parent or guardian desired it. He continued:

To this rule no offense was taken until in 1869, when the School Board passed these resolutions. The defendants justify this action of the School Board on the ground, that many taxpayers are not believers in the Bible; that the members of the Catholic Church do not believe the St. James version is correct and complete, and that others are, by disbelief, precluded by conscience from attending the schools. We will dismiss all references to the past history, and all discussion of authenticity and authority of the Scriptures. Nothing is gained by the assertion that the Bible is not the revealed will of God. This is the same weapon that is always used by the disciples of unbelief in the plenary inspiration of the Holy Scriptures. We dismiss, also, references to persecutions by Christians. There never can be any just denial of the truth by showing the inconsistency of those who profess to know and teach it. Separated from all irrelevant matter, the propositions are: Had the defendants, in the exercise of their discretion, the legal right to declare that the Bible should not be read in the schools? If no such power existed, may this court restrain the board? The provision of the constitution recognizes the existence of the Supreme Being, but gives no preference to sects. The protection it gives to religious worship, we may well conclude, is not intended to apply to those who, like the Athenians, worship the unknown God. It is the Christian religion that is recognized by the constitution. The Legislature sustained this view by exempting the family Bible from execution, by providing that each apprentice shall be provided with one; that a Bible shall be in the hands of every inmate of a jail, penitentiary and reformatory institution. All this is at the public expense, and it is now claimed that the Bible cannot be read in the common schools. Nay, more, our halls of legislation and our courts of justice are supplied with copies of the Bible, and it is only from the common schools that it is sought to be expelled, thus making them the only exception to the general recognition of the Bible as the exponent of morality and religion. The lowest view we can take of the religion contemplated and recognized by the constitution is that which acknowledges a Supreme Being; not literature of the imagination, but as revealed in our consciences, and the worship of that Being. We conclude that the revealed religion of the Bible is that which is meant by the constitution, and has been recognized by the constitution and legislation of the General Assembly. On no other ground can blasphemy be made criminal.

THE TRUE RELIGION.—The defendants claim that the instruction referred to in this bill of rights means the cultivation of the sense of right and wrong, and that the only religion meant by that instrument is written on human nature. This was a bold proposition, and hard to sustain on any other ground than that which justifies the juggernaut, the sacrifice of the Hindoo widow, or the cannibalism of the South Sea Islanders. Without the teachings of the Bible we have no unvarying code of morals or of human duty; but the defendants say the natural conscience is to be developed. What is the process, what high and holy motive is presented to the pupil who is deprived of the teachings of the Bible? By this rule there would be no standard, and every man would be a law unto himself. The strife of opinion would be uncontrolled, and the moral power of the country would be dependent on individual caprice. We do not admit the assertion that the Bible lends to sectarianism; this is the work of man, not of God. The Scriptures teach we are all of one origin; but the human lesson is different. We learn from the Bible to forgive injuries; not so in the profoundest systems of human philosophy. A volume that teaches immortality cannot teach exclusiveness.

IS READING THE BIBLE WORSHIP? The reading of the Bible is not an act of worship. The lessons chosen are naturally those tending to elevate the mind and soul and heart. Its object is to calm the mind and give wholesome lessons in moral rectitude. No religious test is required, no act of worship, no sectarianism. These resolutions are a sweeping edict, and leave the pupils not only without a hope, but without a God. Not even natural religion may be taught. If a pupil asks about his origin he may be referred to geology, but not to Genesis. If one asks why the Sabbath is observed the teacher must ask permission of the Board of Education before the question can be answered. In the whole case we conclude that the case presents equitable grounds for our interference; that the powers of the defendants have been transcended; that their action is ultra vires and void, and the injunction must be made perpetual.

REV. JOHN MCCLINTOCK, D. D.

Dr. McClintock, president of Drew Theological Seminary at Madison, New Jersey, died on Friday, March 4, aged fifty-six. He was born in Philadelphia in 1814, and his death occurs at an age whose few years will surprise most who know his reputation. The doctor's absence will begin to more fully illustrate his value to the church. The general minutes show that he was admitted on trial in the Philadelphia Conference in 1835, and stationed at Jersey City. He had previously in this year graduated at the University of Pennsylvania. Among his surviving classmates are C. H. Whitecar of New Jersey, J. D. Ooms of West Virginia, J. A. Roche of New York East, I. T. Cooper of Wilmington, and Penned Coomb of Philadelphia Conferences. Soon after he was professor, first of mathematics and next of ancient languages in Dickinson College. Here his literary labors were not confined to his classes for he joined Prof. Blumenthal in translating Alexander's life of Christ, and Dr. George Crooks in preparing the four volumes so well known as *McClintock and Crooks' first and second books in Latin and Greek*. A file of the *Methodist Quarterly Review* shows that he was editor from 1858 to 1866. He was, in 1856, co-delegate to foreign Wesleyan conferences, and served as a member of the World's Evangelical Convention in Berlin, in 1857. Returning, he was elected president of Troy University, where for some years he conferred the degrees. Not the least or the least brilliant of Dr. McClintock's services, was his pastorate of the American chapel in Paris at the opening of our recent rebellion. He was distinguished as an elegant preacher, and won for himself a high place in Paris social circles, and for his church high regard as a representative of the eloquence and influence of the evangelical pulpits of the New World.

Death cut off his labors which bid fair to be the most important of his life; for he was engaged with Dr. James Strong in preparing a theological and biblical encyclopedia, but three volumes of which have appeared. It will be remembered that he was chairman of the General Centenary Committee, and that he was foremost in organizing the plans for that eventful enterprise.

Doubtless Dr. McClintock was not above all criticism, but in his death he has no successor superior in acute extensive scholarship or in the elegant attainments of language and literature. The church owes him a debt of gratitude, the interest upon which each passing year will the more correctly estimate.

CHARACTERISTICS OF LUTHER.—

The following characteristics of Luther are given by Froude, the historian: Men of Luther's stature are like the violent forces of nature herself—terrible when roused; and in repose majestic and beautiful. Of vanity he had not a trace. "Don't call yourselves Lutherans," he said; "call yourselves Christians. Who and what is Luther? Has Luther been crucified for the world?" I mentioned his love of music. "Music," he called "the grandest and sweetest gift of God to man." "Satan hates music," he said; "he knows how it drives the evil spirit out of us." He was extremely interested in all natural things. Before the science of botany was dreamt of Luther had divined the principles of vegetable life. "The principle of marriage runs through all creation," he said; "and flowers as well as animals are male and female." A garden called out bursts of eloquence from him—beautiful sometimes, as a finished piece of poetry.

OUR MORRO—"And ye shall know the truth, and the truth shall make you free."

The Christian Advocate.

SATURDAY, MARCH 19, 1870.

PERE HYACINTHE AS AN ORATOR.

Pere Hyacinthe delivered an address in the Academy of Music, in New York, an edifice whose vast size makes ordinary halls seem like inferior appendages to some larger building. At eight o'clock it was filled by the most brilliant audience which I had ever seen in this country. Every intelligent Frenchman, many French-speaking Europeans, and numbers of French-speaking Americans were there, and many literary characters of both races, well known to fame. Wealth, beauty, fashion, intellect and culture were there in larger representation than I had ever seen in our democratic audiences. Shoddy and petroleum were not conspicuous, as they cannot speak French. Horace Greeley was on the platform, and apparently very much interested, but from the peculiar expression of his countenance, and the fact that he applauded generally after a brief conversation with a gentleman by his side, I inferred that he does not understand French quite as well as the language which he has used with such effect in the *Tribune*. Indeed, I doubt if he understands it at all.

There was a delay of nearly half an hour before the father appeared. When he came in he was accompanied by one of the officers of the society, a French gentleman, who had formerly been a journalist in France, but for a number of years has been a merchant in New York. He is a man of remarkable personal appearance, possessing a rich and musical voice, and delivered a very appropriate and fitting introductory speech, laudatory of Father Hyacinthe, thanking him for consenting to speak, and congratulating the audience that as the English and the Germans had often heard their great orators of world-wide fame, the French present would that evening have the privilege of listening to one of their most eloquent countrymen.

This being ended, he whose voice had thrilled the most brilliant audiences in the most brilliant capital in the world, arose and calmly surveyed the immense assembly before him. And as he stands before us, I will try to describe him, and this will be done in a few words. He is a little man, scarce five feet three inches in height, rather stoutly built, indeed very rotund, with short neck, round, large head, smooth face, short hair and ruddy complexion. He was dressed in a plain suit of black, the contour of his head and face was rather that of an Italian than of a Frenchman, and were it not for his vast intellectual power and brilliant reputation, we should conceivably describe him as a little, healthy looking, well dressed Frenchman.

What a power there is in a history! The vast, expecting audience looked not at the small man who stood there, but at the ideal character who had attained such celebrity, and kindled such an interest. We were ready to be thrilled away. After a moment occupied in surveying those to whom he was about to speak, a soft, mellow, yet wonderfully distinct voice fell upon our ears, saying: "Messieurs et Mesdames! What was there yet? Only a little man leaning slightly forward, and talking in a low, melodious conversational tone of voice; the rate of motion increasing greatly for the space of two or three minutes, when the first gesture was made. But after that his fluency became utterly unparalleled, and each sentence, almost each word, was accompanied by a distinct gesture. And every gesture was the perfection of grace. The rhythm of his motion was exquisitely beautiful. Some orators will make a beautiful and appropriate gesture so far as the hand or arm is regarded alone, but there is a want of harmony with the trunk or other members of the body, as the position of the head or limbs, but I could think of nothing, while this orator of matchless grace was speaking, except a musical instrument played by a master, and accompanied by a voice of melody, as when Thalberg played and Jenny Lind sang. Any gesture in that address might have been caught by an artist and placed upon canvass as a "line of beauty," and any attitude would have formed a model for a statue. And yet while all was the perfection of grace, it was apparent that there had been no premeditation of gesture for particular passages. It was the result of the highest art and the closest practice, flowing spontaneously and unconsciously from the orator. In other words, he had prepared, so far as delivery is concerned, on general principles as an orator, rather than for that particular effort. His voice is a beautiful baritone, inclining rather toward the tenor than the bass. There is a rich pathos in its lower and a clarion-like force in its tender utterances, rarely attained by a voice of the same quality. In the enunciation of passages designed

to be of the nature of a climax, he possessed wonderful powers. If we suppose the whole passage to consist of ten sentences of varying length, he uttered the first we will say, on the letter C of a musical scale; the second on C sharp; the third on D, the fourth in D sharp, and so on, rising a half a tone with each sentence until the climax was reached, when the sentence rang out clear and melodious as the blast of a trumpet. Woe to the man who dared to whisper or move while one of those passages was being delivered. A thoughtless young man, a few seats to the rear of that which I occupied, whispered to the gay damsel by his side, when a hiss, that had a menace in it, leaped from a hundred lips, and the fop "hung his diminished head."

The following is an instance of consummate self-possession and skill. From the beginning it was apparent that Father Hyacinthe had a severe cold, and at the close of one of his sublimest passages, while the audience were applauding, he took up the tumbler which was on the table before him, for the purpose of drinking a little water. But it was empty. That would have been fatal to many speakers, for there is an irresistible propensity in human nature to giggle at anything of that kind. But with a courteous bow the orator handed the glass to the gentleman who introduced him, and folding his arms, remained standing for a minute, until the water was brought. His perfect repose and dignity were such that the audience were as quiet and their eyes were as attentively fixed on him as if he had been speaking. The water having been brought, and the sip taken, the orator recommenced. How to begin after such an interval requires no ordinary skill. He had closed on a high and strong key, and the assembly had reached corresponding enthusiasm. To begin on the same key would not do, for the feelings of the people had diminished in intensity; to drop to the key on which his discourse was begun would be to hazard all that had been gained. This is what the father did: Leaning slightly forward, and placing the tips of his fingers on the table, with the palms of his hands turned toward his body, he began in a tone of voice, about midway of his register, and continued to speak on that key, gradually increasing in volume, until in the course of five minutes he had reached the degree of fervor which he had attained before the occurrence, the audience never having felt a jar during the several transitions. If any one supposes that this is but a little thing to do, I meet him with the unqualified assertion that he who thinks it a little thing cannot appreciate what is to be done, and therefore is of all men least competent to do it.

The effect of Father Hyacinthe's eloquence upon the audience was of a character to be produced only by the highest order of utterance. Intense interest, profound attention, perfect stillness, the countenances of the people reflecting every emotion of the speaker. When there was applause, it was not the tumultuous vociferation and pummeling of hands, or the flow which buffoonery may excite, or which indicates as the predominant sentiment, admiration of the orator, but that modulated expression beginning in a spontaneous outburst of genuine admiration and delight, and claudered by a sense of the gravity and beauty of the truths unfolded, and the power of the emotions evoked. So perfect was the gestation, so natural the modulation, and so completely did the audience yield to the control of the speaker that a gentleman present, who did not understand French, was, as he remarked on leaving the hall, able, by observing the gestures and modulations of voice and the people, to obtain a tolerably correct idea of the general tenor of the discourse.

The brilliant success of Pere Hyacinthe shows that a grand personal appearance—the proportions, for example, of a Webster—are not necessary to the highest success. Nor yet a deep sonorous voice, nor that wild roaring about the platform which so many affect. The orator, on this occasion, did not move a step during the whole effort. But self-possession, grace, fervency and ideas will secure for their possessor, though he be homely and diminutive, what he who has them not could not attain with the personal beauty and majesty of Apollo.

The only approximation to the grace of the father, which I have seen, is in Wendell Phillips, but there is a great difference between them. Mr. Phillips makes very few gestures, and has not a fervid style. And between Mr. Beecher and Father Hyacinthe there is the same kind of difference, and as great as between New York and Paris, albeit Father Hyacinthe has studied New York ideas, adorned with more than Parisian finish. —*Central Advocate*.

Fortune is never more deceitful than when she seems most to favor. He who is rich to-day may be poor to-morrow.

H. W. BEECHER ON SLEEPING.

There are thousands of busy people who die every year for want of sleep. It may be that too much sleep injures some; but in an excitable people, and in our intense business habits, there is far more mischief for want of sleep than from too much of it. Sleeplessness becomes a disease. It is the precursor of insanity. When it does not reach that sad result, it is still full of peril, as well as of suffering. Thousands of men have been indebted for bad bargains, for lack of courage, for ineffectiveness, to loss of sleep.

It is curious that all the popular poetical representations of sleeping and waking are "the reverse of the truth." We speak of sleep as the image of death, and of our waking hours as the image of life. But all activity is the result of some form of decomposition in the body. Every thought, still more every motion, any volition, wastes some part of the nervous substance, precisely as flame is produced by wasting the fuel. It is the death of some part of the physical substance that produces the phenomenon of intelligent and voluntary life.

On the other hand, sleep is not like death, for it is the period in which the waste of the system ceases or is reduced to its minimum. Sleep repairs the wastes which waking hours have made. It rebuilds the system. The night is the repair-shop of the body. Every part of the system is silently overhauled, and all the organs, tissues and substances are replenished. Waking consumes, sleep replaces; waking exhausts, sleep repairs; waking is death, sleep is life.

The man who sleeps little repairs little; if he sleeps poorly he repairs poorly. If he uses up in a day less than he accumulates at night, he will gain in health and vigor. If he uses up all that he gains at night, he will just hold his own. If he uses more by day than he gathers at night, he will lose. And if this last process be long continued, he must succumb. A man who would be a good worker must see to it that he is a good sleeper. Human life is like a mill; sometimes the stream is so copious that one needs care but little about his supply. Now, often the stream that turns the mill needs to be economized. A dam is built to hold a larger supply. The mill runs the pond pretty low through the day, but by shutting down the gate the night refills the pond, and the wheels go merrily around again the next day. Once in a while, when spring rains are copious and freshets overflow, the mill may run night and day; but this is rare. Ordinarily the mill should run by day, and the pond fill up by night.

A man has as much force in him as he has provided for by sleep. The quality of action, especially mental activity, depends upon the quality of sleep. If day-time is the loom in which men weave their purposes, night is the time when the threads are laid in and the filling prepared.

Men need on an average eight hours of sleep a day, or one third of their whole time. A man of lymphatic temperament may require nine. A nervous temperament may require but seven, or six, and instances have been known in which four hours have been enough. The reason is plain. A lymphatic man is sluggish in all his functions. He moves slowly, thinks slowly, eats slowly, digests slowly and sleeps slowly—that is, all the restorative acts of his system go on slowly, in analogy with his temperament. But a nervous man acts quickly in everything, by night or by day. When awake he does more in an hour than a sluggish man in two hours; and so in his sleep. He sleeps faster, and his system nimbly repairs in six hours what it would take another one eight hours to perform.

Every man must sleep according to his temperament. But eight hours is the average. If one requires a little more or a little less, he will find it out for himself. Whoever by work, pleasure, sorrow, or by any other cause is regularly diminishing his sleep, is destroying his life. A man may hold out for a time, but nature keeps close accounts, and no man can dodge her settlements. We have seen impoverished railroads that could not keep the track in order, nor spare the engines to be thoroughly repaired. Every year the track and equipment deteriorated. By and by comes a crash, and the road is in a heap of confusion and destruction. So it is with men. They cannot spare time to sleep enough. They slowly waste appear. Premature wrinkles, weak eyes, depression of spirits, failure of digestion, feebleness in the morning, and overwhelming melancholy—these and other signs show a general dilapidation. If, now, sudden calamity causes an extraordinary pressure, they go down under it. They have no resources to draw upon. They have been living up to the verge of their whole vitality every day.

There is a great deal of intemper-

ance beside that of tobacco, opium or brandy. Men are dissipated to overtax their system all day and under-sleep every night. Some men are dissipated by physical stimulants, and some by social, and some by professional and commercial. But a man who dies of *delirium tremens* is no more a drunkard and a suicide than the lawyer, the minister or the merchant who works excessively all day, and sleeps but little all night. —*New York Ledger*.

Execution of Mary, Queen of Scots.

She laid her crucifix on a chair. The chief executioner took it as a porphyritic, but was ordered instantly to lay it down. The lawn veil was lifted carefully off, not to disturb the hair, and was hung upon the rail. The black robe was next removed. Below it was a petticoat of crimson velvet. The black jacket followed, and under the jacket was a body of crimson satin. One of her ladies handed her a pair of crimson sleeves, with which she hastily covered her arms; and thus she stood on the black scaffold with the black figures all around her, blood-red from head to foot.

Her reasons for adopting so extraordinary a costume must be left to conjecture. It is only certain that it must have been carefully studied, and that the pictorial effect must have been appalling.

The women whose firmness had hitherto borne the trial, began now to give way, spasmodic sobs bursting from them which they could not check. "Ne criez-vous," she said; "j'ay promis pour vous." Struggling bravely, they crossed their breasts again and again, she crossing them in turn and bidding them pray for her. Then she knelt on the cushion. Barbara Mowbray bowed her eyes with a handkerchief. "Adieu," she said, smiling for the last time, and waving her hand to them; "Adieu, an revoir." They stepped back from off the scaffold and left her alone. On her knees she repeated the psalm, "In te Domine confido. In thee, O Lord, have I put my trust." Her shoulders being exposed, two scars became visible, one on either side, and the ears being now a little behind her, Kent pointed to them with his white wand and looked inquiringly at his companion. Shrewsbury whispered that they were the remains of two abscesses from which she had suffered while living with him at Sheffield.

When the psalm was finished she felt for the block, and laying down her head muttered: "In manus Domine, tuas, commendo animam meam." The hard word seemed to hurt her, for she placed her hands under her neck. The executioners gently removed them, lest they should deaden the blow, and then one of them holding her slightly, the other raised the ax and struck. The scene had been too trying even for the practiced headsman of the tower. His arm wandered. The blow fell on the knot of the handkerchief, and severely broke the skin. She neither spoke nor moved. He struck again, this time effectively. The head hung by a shred of skin, which he divided without the ax; and at once a metamorphosis was witnessed, strange as was ever wrought by wand of fabled enchanter. The coil fell off and the false plaits. The labored illusion vanished. The lady who had knelt before the block was in the maturity of grace and loveliness. The executioner, when he raised the head as usual, to show it to the crowd, exposed the withered features of a grizzled, wrinkled old woman.

"So perish all enemies of the queen," said the Dean of Peterborough. A loud amen rose over the hall. "Such end," said the Earl of Kent, rising and standing over the body, "to the queen's and the gospel's enemies."

Orders had been given that everything which she had worn should be immediately destroyed, that no relics should be carried off to work imaginary miracles. Sentinels stood at the doors, who allowed no one to pass out without permission; and after the first pause, the ears still keeping their places, the body was stripped. It then appeared that a favorite lapdog had followed its mistress unperceived, and was concealed under her clothes; when discovered, it gave a short cry, and sent itself between the head and the neck, from which the blood was still flowing. It was carried away and carefully washed, and then beads, paternoster, handkerchief—each article of dress which the blood had touched, with the cloth on the block and on the scaffold, was burnt in the hall fire in the presence of the crowd. The scaffold itself was next removed; a brief account of the execution was drawn up, with which Henry Talbot, Lord Shrewsbury's son, was sent to London, and then every one was dismissed. Silence set down in Fatheringay, and the last scene in the life of Mary Stuart, in which tragedy and melodrama were so strangely intermingled, was over.

A spectator, who was one of her warmest admirers, describes her

bearing as infinitely transcending the power of the most accomplished actor to represent. The association of the stage was, perhaps, unconsciously suggested by what was in fact, notwithstanding the tremendous reality with which it closed, the most brilliant acting throughout. The plain gray dress would have seduced, had she only to go through with simplicity the part which was assigned her. She intended to produce a dramatic sensation, and she succeeded. The self-possession was faultless, the courage splendid.

The Farm and Garden.

MANURES.

The following remarks were made by Mr. Wesson before one of the Ellsworth farmers' clubs:

"Tillage is Manure." The farmer when plowing and harrowing is as really and effectually manuring as he is when carting animal voidings to the fields. To the unthinking farmer this may not be obvious. Let us examine. Let us investigate and see. We plow and harrow to make the soil fine and divisible. But why make it fine? There must be an intelligent reason for so doing. There is.

Plants taking up their food only in a soluble or liquefied condition, the soil particles can be no more available as plant food than a block of granite. Soil particles may as well be as large as peanuts as to be reduced to the size of pigeon shot, as far as either can feed the plant.

Chemists divide the soil into two classes, soluble and insoluble. Soluble, that is in that condition in which the food contained therein is available, and fusible, or in that condition which cannot feed the plant. Another classification that suits us better, is to consider the soil as active and dormant, or fine and coarse. A soil made fine, impalpably fine, reduced to a suitable condition to feed vegetation, it then becomes active or fertilizing. While dormant it is inactive, furnishing no food or fertilization whatever. Here, then, is the value of tillage, which tends to change the dormant soil constituents into active ones. The more we plow and harrow, and the more with the plow and harrow the soil is exposed to the action and influences of the weather, the more is dormant soil changed into active or fertile soil. Many a crop refuses remunerative returns, many an acre becomes impoverished, not because the lime, nitrogen, potash, phosphates and elements of nutrition have been cropped out, but because the active elements have been taken out in the crops faster than the farmer with his plow, harrow and the hoe has ground or reduced the coarse or dormant elements into fine or active ones.

Farmers talk about an exhausted soil. Exhaustion is a myth, an impossibility. No soil can be exhausted of its dormant, nutrient elements. Those are deposited in the soil in inexhaustible measures; yet the soil may be forced into barrenness by too much manure and too little plowing. Right here is the first and grand mistake of unscientific farmers—those who by bone and muscle dig hard-earned products from an unwilling soil—those who complain that their manure heaps are insufficient to keep up the fertility of the farm—those who regret their inability to purchase commercial fertilizers like porgie-chum and superphosphates. Let me say to such, trust to patent manures less, and to the plow more; there is money, there is success, in so doing.

WHY SCALDED MEAL IS MORE NUTRITIOUS.—The nutriment afforded to animals by roots and seeds depends upon the rupture of all the globules which constitute their meal or flour. These globules vary in different roots, tubers and seeds. Those of potato starch, for instance, are usually from fifteen ten-thousandths to four-thousandths part of an inch; those of wheat rarely exceed the two-thousandths part of an inch, and so on. From experiments made on these globules by eminent chemists of the French Academy of Sciences, the following conclusions have been drawn:

1. That the globules constituting meal, flour and starch, whether contained in grain or roots, are incapable of affording any nourishment as animal food until they are broken.
2. That no mechanical method of breaking or grinding is more than partially efficient.
3. That the most efficient means of breaking the globules is by heat, by fermentation, or by the chemical agency of acids or alkalis.
4. That the dextrine, which is the kernel, as it were, of each globule, is alone soluble, and therefore alone nutritive.
5. That the shells of the globules, when reduced to fragments by mechanical or heat, are therefore not nutritive.
6. That though the fragments of these shells are not nutritive, they are indispensable to digestion, either

from their distending the stomach, or from other causes not understood; it having been found by experiment that concentrated nourishment, such as sugar or essence of beef, cannot long sustain life without some mixture of coarser or less nutritive food.

7. That the economical preparation of all food, containing globules or fecula, consists in perfectly breaking the shells, and rendering the dextrine contained in them soluble and digestible, while the fragments of the shells are rendered at the same time more bulky, and so as to more readily fill the stomach.

USE OF LIME IN AGRICULTURE.—The action of lime is twofold—first, physical; and second, chemical. As a mechanical agent it opens stiff clays, rendering them friable, mellow and more easily worked; chemically, it acts upon the vegetable matter of the soil and sets free those stores of valuable substances, which, without the action of this agent, must have remained inert and useless. It also enters directly into the composition of plants, and in many varieties forms a large proportion of the weight of their inorganic constituents. It neutralizes certain acids which are often present in soils, rendering them useful to vegetation instead of being positively injurious, which they are in their original state. The existence of water in the soil, however, affects the action of lime very considerably. If the land is wet and undrained, lime will not exert the same influence which it would do in the case of thoroughly drained land. A greater quantity of lime is necessary to produce a given effect, and thus the neglect of thorough drainage entails a considerably greater expenditure in liming, than would have been necessary if the land was either naturally or artificially dry.

THE MARK LANE (England) Express reports that the yield of both corn and oats are far below the average. Barley also proves to be much under the general estimate, and only winter beans are favorably reported. Of the five hundred returns received, one hundred and forty-eight only returned an average of fifty-three above and three hundred and seven under. Taking these returns as fairly representing the whole acreage grown, and deducting fifty-three over an average from three hundred and seven below, we have two hundred and forty-four left, or nearly one-half in this position, which, representing one million one hundred and seventy-one thousand five hundred and seventy-three acres at one-fourth each, shows as many acres short of an average crop. This brings the yield to the low estimate of eleven million quarters.

EDUCATION OF THE AGRICULTURIST. Daniel Webster said: "No man is so high as to be independent of the success of this great interest; no man is so low as not to be affected by its prosperity or decline. The cultivation of the earth is the most important labor of man. Man may be civilized, in some degree, without great progress in manufactures, and with little commerce with his distant neighbors, but without cultivation of the earth he is, in all countries, a savage. Until he gives up the chase and fixes himself to some place and seeks a living from the earth, he is a roaming barbarian. When tillage begins, other arts follow. The farmers, therefore, are the founders of human civilization."

BEES BENEFICIAL TO FRUIT.—Dr. A. Packard replies to a query in regard to the effects produced upon fruit by the agency of honey bees, that all the evidence given by botanists and zoologists, who have specially studied the subject, shows that bees improve the quality and tend to increase the quantity of fruit. They aid in the fertilization of flowers, thus preventing the occurrence of sterile flowers, and, by more thoroughly fertilizing flowers already perfect, render the production of sound and well-developed fruit more sure. Many botanists think if it were not for bees and other insects, many plants would not bear fruit at all.

The estimated expenses for the government of New York city for the year 1870 are set down at \$12,054,349 06. This amount, less \$2,200,000—the estimated revenues of the general fund—leaves \$9,854,349 06 to be raised by tax. The largest estimated expense for one purpose is \$2,382,000 for public instruction. The next heaviest expenditure is for public charities and correction, the sum of \$1,159,765 23 being set down for this purpose. Lamps and gas are also expensive items, their estimated cost for the year being \$1,106,300, while the fire department fund for the same time is put down at \$951,300. The expense of cleaning the streets is estimated at \$502,500, and of keeping Central Park in order, \$280,000.

The desire for happiness is natural; the desire for holiness is supernatural.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, MARCH 19, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.Address—Rev. J. C. KEEPER, 112 Camp street, New Orleans, La.
Agents—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. WILLIAM A. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEEPER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

WHERE WE ARE.

Some of our agents have already this year sent us over twenty subscribers. We have in each of our patronizing Conferences a few friends who are as staunch as we could possibly desire. They have a strong will, and are active to put the Advocate in the hands of every Methodist that can read; and they are doing it. It must be terrible work to preach to people who read nothing of God's work in the world—men who lag behind, and constitute a corps of stragglers that are never seen until after the fight.

How is it that some preachers can get the last member on the circuit to take a paper, and others absolutely do not succeed in securing one single subscriber? We should like some one to solve that problem. And how is it that a man can sit at home all day on Sunday, when there is no preaching at the church—may be three Sabbaths in the month—and feel no longing for religious books or papers? What a dreamy, drowsy Methodist that must be, and what an immense effort it must cost him to furnish up for that one Sunday's service!

Well, despite all these things, we are getting on. The young preachers are coming finely up to our support, and some of the most venerable and able ones too. We are hoping for enough new subscribers to have a rather bold expression at Memphis; and if we can get as much help from every quarter as we have received of late from Homer, Kosciusko, Canton and Smithville, we shall step about among the brethren quite at ease.

SACRED CONCERT.

A sacred concert, for the benefit of the German Methodist Episcopal Church South, will take place at the church building, Craps street, between Post and Engheim, on Wednesday, March 23, 1870, at half-past seven P. M., under the supervision of P. P. Werlein. Admission, fifty cents.

This is for the purpose of collecting certain amounts which have been advanced by Captain Robinson as trustee, and which are still due for the finishing of the said church.

GOLD PENS.—We are indebted to Rev. R. J. Harp, 112 Camp street, for an excellent pen, manufactured by Fairchild. We can recommend the quality of gold pens, which he has for sale as being the very best.

QUIET CONSCIENCE gives quiet sleep.

THE SUPPORT OF THE MINISTRY.

In some remarks upon the constitution of the next General Conference we find some important financial suggestions in the Baltimore Advocate. There was a time in the history of God's people when the support of the ministry was secured by specific law; but now the "law of liberty" gives neither weight, measure nor description for determining these offerings from which those who wait in the sanctuary are to be maintained. True love knows no measure. The fullness or emptiness of God's storehouse answers truly to the spiritual condition of the church; and it is a mistake to suppose that faith and love abound in a society or breast that is devoid of generous impulses, or wanting in the practical devotion of substance to holy and pious uses. The question how to equalize burdens and enforce obligations is almost convertible with how to distribute love in the New Testament church. Barrenness and declension of spiritual power may prove a swifter cure than the more stringent remedy of legal enactment. The old system had its trial, and has passed away—in fact, everything that has not love, pure and simple, for its basis, must pass away; now that remains which must remain forever; that charity which never faileth.

There are two questions of prime importance for the action of the Conference, and they are very closely allied. These are: To provide suitable preachers for the church, and to provide a suitable support for the preachers. Enthusiasm, or rather that zeal that is utterly inconsiderate of self, will no longer supply the ministerial ranks with the quality of men required. If we persist in the old assumption that God supplies the ministry by a special draft upon the young men of the church, forcing them into unwilling service by the "woe is me if I preach not the gospel," we will find more and more occasion to cry, "woe is me if the gospel is not preached." We believe fully that God inclines the hearts of good young men to preach; but as he has ordained that men shall love to have it preached as well as desire to preach it, we have no doubt that the "call" to do the one is eminently contingent on the call to do the other. The church must fill itself by attraction, not be filled by repulsion from other occupations. Young men take business-like views of this matter now, though they take them in the fear of God. They see that we have never been able to practice upon our own theory. In Mr. Asbury's day a young man with "a call to preach" was admitted to the itinerancy; but his preaching "woe" was wonderfully comforted as soon as he got married, when he located in obedience to the more imperative call to support his wife. Even now hundreds of good preachers leave the work to find some more remunerative employment to enable them to support families or pay debts; and it certainly is not unreasonable that a young man called to the ministry should nevertheless consider beforehand the probability of other calls which he finds more potent upon the minds of older and more experienced preachers. The demand for a more highly educated ministry is premature until we shall have found some rational system of finance, by which the really very small expense can be distributed over the membership and congregations of our church. Education increases a man's cost, because it increases his expenses. There is no disguising the matter. The more we educate people the more refined will be their tastes, the more they will shrink from manual drudgery, the more they will marry into expensive circles, and generally the more wants they will have. If we must have a cheap ministry we ought to provide the church with preachers much less educated than those we have; for education is what is the matter with us. The material from which our preachers ought to be drawn is too much educated already for our price. The Shakers and Hardshell Baptists have a ministry that cost the minimum price; but these denominations are not absurd enough to require their preachers to expend educated thought on their frugal hearers. Our people are abundantly willing to support their ministry. Many of them give very liberally for the purpose; but the few are made to do what would be little for the many. We sincerely hope the General Conference will find a system of finance that will save the church.

The gospel prepares the saint for heaven, and fits every power of his soul for the business and blessedness of those happy regions. —Watts.

REV. WILLIAM A. SMITH, D. D.

The death of Dr. Smith is the most serious loss that our church has been called to sustain since the death of the venerable Bishop Soule. For the latter we were all prepared by his age and the slow decay of his physical powers; but the labors of Dr. Smith, up to a very recent period, in advancing the interests of education in Missouri, implied much vitality. It may be that those very exhausting efforts—to bring the church up to a support of the Missouri College were the immediate cause of his death. He "ceased at once to work and live." We have always thought of his sturdy activity of mind and soul as the true ideal of the Methodist itinerant. For forty-five years he has stood up with a bold front against evil, and with such a spirit as we can imagine might have fitted him for "judging Israel," had he lived in those days. Never was there a truer man to his Master and his friends. He was a fine expression of the logical element that enters so largely into the genuine Wesleyan minister. He could wrestle with more than "flesh and blood," and wore the expression of a soul in armor, ready to engage principalities, powers, the rulers of the darkness of this world, and spiritual wickedness of highest rank. As with brave minds generally, he was transparent as well as true. The very way in which he carried the standard rallied noble hearts to it; no cant, no mannerism, but a straightforward, honest human soul baptized into the Spirit of Christ: believing in Jesus, admiring Jesus; and loving Jesus because he saw in Jesus of Nazareth the noblest, purest, greatest manhood of which his heart and brain could possibly conceive. Every one who knew him well must have felt that his faith was genuine, that all the systems of earth and all the opinions of men combined could not have induced him to declare for any truth that he did not profoundly believe.

It was not our good fortune ever to have heard this eminent minister in the pulpit. Only on the floor of the General Conference and in social intercourse we had opportunity for estimating his rare powers of intellect. He was a disputant of extraordinary acuteness and force. And it was at the General Conference of 1840, in the city of Baltimore, that we first felt the impress of his great faculties. He was, if we remember rightly, prominent in an appeal case which involved the then great issues of opinion and sentiment between the North and South. His calmness, intrepidity and immovable strength, against the ragings of Abolitionists, was that of a lion among the Hotentots. It is possible that the prominence of his position in that Conference afterward resulted in his treatise upon the general question of slavery.

He held all things in subordination to the one true calling of a Methodist preacher; and it was in the pulpit, the pastorate, in revivals and love-feasts, that he was preeminently faithful and efficient. Abundant in labors and always about his Master's business, he was a fine model for the contemplation of every young minister of our church.

Elsewhere we give some notice of his death by those who were blessed with the good fortune of knowing him intimately, of growing up under the immediate influence of his example, and of witnessing the last precious moments of his earthly career.

JEFFERSON CITY FAIR.

On the twenty-first instant a fair will be opened at the Hook and Ladder Hall, in Jefferson City, for the repair of the Southern Methodist church in that place, and will continue six days.

The Magazine cars run directly by the door.

True faith makes the sinner humble, native and self-denying; false faith leaves men proud, insolent and selfish.

The great error of scholars is, that they think too much of words and too little of things.

BALTIMORE CONFERENCE, SOUTH.

According to the Baltimore Advocate, the Southern Methodists must have been greatly strengthened in soul by the session of their Annual Conference in that city. And no wonder: three Bishops present, and other great men like silver in Jerusalem. We wonder why it is they all flock that way, while down here, on our feast days, we only see a solitary, stray editor or secretary, come from those remote regions where greatness dwells. Is it the ancient hospitality of those people that, gathering fame with age, now reaps an endless harvest of angels and strangers? Or is it the wish to breathe the atmosphere of those heroes who, in 1866, came out of Egypt twelve thousand strong, and to see those champions of the faith who made their way to the better land in about the time Israel ought to have made it from Kadesh, that draws everybody, from everywhere, to a Baltimore Conference? It may be; but we somewhat suspect that that city of white marble, so full of beautiful and well-favored people, has some creaturely attractions for the brethren. Ah, they had better beware, and remember what St. James says about such transitory satisfactions! We dare say some few lion-hunters go to see where those marvelous editorials of oil and thunder are manufactured. We only fear that those good people will come to think of themselves more highly than they ought—which would be a dangerous state of things—when they see themselves to be objects of such distinguished attention. To these reflections we might add the hope that some of these days the whirling fortunes of an itinerant may throw us within that fascinating circle of the "old Baltimore."

The following report on the publishing interests of the Conference and the church passed unanimously:

The committee on the publishing interest report as follows: They cordially indorse the management of the Publishing House at Nashville, and highly commend the agent, Dr. A. H. Redford; they heartily indorse the Nashville Christian Advocate and Sunday School Visitor, and promise to sustain them; they also recommend the Home Monthly, edited by Prof. Stark, and ask the General Conference to publish a first class monthly, combining the features of a review and a magazine. They further say, "That we continue to commend the Baltimore Episcopalian Methodist, published by Rev. Dr. Poial, as worthy of the patronage of our people, and to acknowledge our indebtedness to Dr. Poial in assuming the pecuniary responsibility of its publication at a time when we needed just such a medium of communication; and, also, they commend to our people as worthy of their patronage, the Baltimore Christian Advocate, recently established in this city by Rev. Dr. Bond and Rev. Robert A. Holland, and that we take pleasure in acknowledging the very valuable services rendered by Dr. Bond in defending us against the assaults of our enemies in the past, and to express not only our undiminished confidence in his ability as a writer, but also in his fidelity to our cause." S. KEPLER, Chairman.

We give elsewhere the names of the delegates to the General Conference and the appointments for 1870.

THE CHRISTIAN INDEX.

Dr. Samuel Watson gets up a fine paper at Memphis for our colored friends. Excellent type, easily read; full of the right kind of news, and abounding in ideas and suggestions suited to a body of people just coming out of the wilderness. Every colored Methodist stands in his own light who does not take the Index. We know that it's not the money, because colored people don't mind spending a dollar for information, or any other thing that is good for a man and his family; but they have so many calls that they hardly know what to make stand aside. Well, we advise them to take the Index and make the others wait. Think of it—only one dollar! Put the money in a letter, and get some one who writes a good hand to back it, drop it in the office, and in almost no time you will be reading the paper.

If you would have the Lord love you be a cheerful giver.

CONVENTION AT SYRACUSE, N. Y.

A convention, consisting of twenty delegates from each presiding elder's district in the State of New York, was recently held in Syracuse, of that State. Half of the members were lay and half clerical. It was a State convention of all citizens who are Methodists. There were eight sessions, two on the first day of its meeting, and three on each subsequent day. A specific subject was presented for discussion at each session by a special committee. Each committee was allowed one hour for the presentation of its subject, and after that was discussed in ten-minute speeches. There are nine Conferences in and partly in the State, one thousand four hundred and fifty-seven traveling preachers, eight hundred and seventeen local preachers, one hundred and eighty-two thousand four hundred and thirty-eight communicants, one thousand six hundred and ninety-two churches, of the value of \$10,200,595; parsonages to the value of \$1,815,900; Sunday school scholars, one hundred and sixty-seven thousand and sixty-six; two thousand two hundred and sixty-five Sabbath schools, supported at an annual expense of \$78,057 35. The table of its strength in the State, as compared with other denominations, is as follows:

Churches.	Ministers.	Members.
1869.—Prot. Episcopal.....	570	603
1868.—Baptists.....	734	795
1869.—Presbyterians.....	734	899
1869.—Meth. Episcopal.....	1,692	1,457

The Rev. Jesse T. Peck was elected president. The whole is an organized action of New York Methodism to meet and defeat the Roman Catholic conspiracy against the public schools. The purpose and spirit of the convention is set forth in the following items of its action:

We do not question the right of sectarian education by those who are willing to meet the expense and bear the responsibility.

We insist upon equal privileges of education for all future American citizens in common schools as a public charge.

A refusal to enjoy these common privileges furnishes no ground of exemption from equal taxation, or right to special appropriations.

It is according to the common law of the United States of America, as well as of England, that civil liberty and modern civilization are grounded in the Christian religion.

We propose, therefore, to maintain our rights as citizens by an undiminished defense and fearless propagation of vital Christianity.

Not sectarian education, but secular learning and moral culture, based upon reverence for God and his holy word, are indispensable to good citizenship, and hence the proper charge of the State.

The Bible was given to man as a man. There is, therefore, no legitimate power in any man or combination of men to deny its use for any length of time to any human being. It is our national Book, and we will firmly and unitedly resist all attempts to remove it from our common schools.

In the above named principles the American republic had its origin; it cannot survive their destruction.

When, as at this time, under the promptings of Romanism in the name of religion, measures are in progress which are directly at war with the fundamental principles of our government, it is the duty of all true citizens to stand up firmly and together in defense of everything valuable in "life, liberty and the pursuit of happiness."

We do not propose to form a Christian nor even a Protestant political party, but we take the position that good men throughout the State and the nation should be thoroughly organized, and prepared to act promptly and unitedly in support of these principles, and in opposition to everything that endangers our free institutions; as

The Roman Catholic conspiracy against our public schools, and

The endorsement and support by the State of sectarian institutions.

This convention will appoint a Methodist State Committee of men, who shall be charged with the duty of disseminating these principles and rendering them practical.

We strongly indorse the petition now in circulation asking the Legislature of New York to repeal a law appropriating moneys to the support of sectarian schools, and will sign said petition as members of this convention.

Whether we shall act with existing organizations or independently must be determined by future developments, and especially by the manner in which our principles and honest endeavors to arrest political corruption are treated. This question is referred to a State Convention of citizens agreeing in the views herein set forth, to be held under the auspices of the above named committee and other co-ordinate committees.

After disposing of the Catholic matter the body took hold of the educational interests of Methodism in the State. And we cannot but admire the effective and prompt method by which it established, as it were in an hour, a university. A paper was read on the "Foundation, Character and Future of the New University," by Dr. Latimer. A subscription paper was opened on the spot. "Dr. Steele followed with a convincing paper, showing that the mission of Methodism in intellectual as in religious instruction is to the high and low, rich and poor, and that its field is the world." The subscription ran up to \$200,000! The patrons of Methodism in Syracuse had previously pledged \$125,000, and the city had bonded itself to the amount of \$100,000, besides which the citizens are to erect the buildings of the university; so that there are nearly half a million of dollars put down, besides the buildings, for a first class Methodist university. That is the way to do business. It furnishes a striking contrast to the poor rate at which we are just now compelled to crawl in an effort to refit and put in operation our noble colleges of Alabama, Mississippi and Louisiana.

To be sure we are not handling the immense sums which are now in the hands of the people at the North, but we are handling money enough to secure to our church and our children the vital advantages of scholastic training. Vast sums of money are flowing into the South, and our own people no doubt handle a fair share of it. May we not reasonably expect them to invest some millions in securing and establishing their own colleges and seminaries? If these people of New York, where institutions of learning already abound, do so highly appreciate the importance of university influence and power as to put down half a million of dollars at a single effort for increasing that power, how much more should we come forward to the support of Greensboro, of Auburn, and of Centenary.

DR. MCCLINTOCK.

The Methodists North have been recently called to mourn the decease of the foremost minister in that church—the Rev. John McClintock. We copy a brief summary of his appointments and labors in this number. He had powers which, without being genius, were something better. His capacity for acquiring, retaining and using knowledge of all kinds was never surpassed. He was exceeding quick in his perceptions, yet plodded with all the continuous patience of one slow to learn. He was a student, a metaphysician, an orator, an able minister, a faithful pastor, highly gifted as a writer, and of wondrous charm in conversation. He was early and intense in his anti-slaveryism, but of greater breadth of soul and of a more catholic spirit than any of that school. "He was perpetually," says one, "making a diligent use of all his faculties and opportunities. He seemed to be one of those few men who succeed in making as much of themselves as Nature originally designed them to become." He no doubt shortened his days by excess of labor, and by not giving due attention to his physical being.

STANCO, VERY STANCO.—Monsieur Mermillod, Bishop of Geneva and Suffragan of Geneva, in his sermon delivered in the Church of Saint Andrea della Valle, on Sunday before last, said that

"Our Saviour had gone through three incarnations—that first he came down in the flesh; then, in his ineffable condescension, he chose the medium of bread and wine; and that he is once more on earth—in the vatican—in the person of an aged man."

This sermon of the Bishop of Hebron must have been as "advanced" as any statement of the infallibility doctrine as yet made even in Rome. Can the Catholics of this country gulp it?

The terms of salvation are the same in all ages.

NEW PUBLICATIONS.

Good Words.—March number, with twenty-two illustrations. This monthly magazine of literature, art, science and travel contains Carlinio, a story, by the author of "Dr. Antonio," "Lorenzo Benoni," etc., part three, three illustrations; Waiting, a poem by G. H. Simeon; An Apostolic Missionary, by H. A. Page, illustrated; A Visit to the Country of the Vaudois, by Samuel Smile, author of "Self-Help," part three, two illustrations; Cottage Homes for Workhouse Children, or the Boarding-out System, by M. Botham Edwards; Days in North India, by Norman McLeod, D. D., part two; From Allahabad to Lucknow, twelve illustrations; A Conversation and a Story, part two; The sad Story of Ashvati, by Arthur Helps, author of "Friends in Council"; Half Hours in the Temple Church, by C. J. Vaughan, D. D.; Master of the Temple, part two; Go and Sin no More; Ascent of Snowdon, a poem, by the Rev. C. (Teinysen) Turner, illustrated; Letters from the Tropics, by the Rev. Charles Kingsley; Ontward Bound, part one; Three Sonnets, by John Ingelow; An Ancient Chess King, part two; Comfort in the Night, part three; Though at Great Deeds, illustrated; Dorothy Fox, a novel by the author of "How it Happened," part three, illustrated. Price, \$2 75 a year.

Good Words for the Young.—This capital youth's magazine for March, contains Ronald, Banner-man's Boyhood, by George McDonaid, part five, three illustrations; The Whales' Ball, by C. H. Synnot; The Dwarf's Forest, by the author of "Stone Edge," two illustrations; A Week Among the Olives, by the Rev. C. A. Johns, nine illustrations; At the Back of the North Wind, by the author of "Dealings with the Fairies," part five, four illustrations; Yarns by a young Sea Captain, two illustrations; Hymns for the Young, number five; Morning Hymns, with music by John Hallah; The Last News of the Fairies, by the author of "John Halifax, Gentleman," two illustrations; The Village School, by the author of "Child Nature," four illustrations; What the Green Lizard Told Me, by Helen Zimmern; Lili-pup Revels, by the author of "Lili-pup Levee"; The White Princess, illustrated, part two; Chessy Chalk and Her Baby, by Edward Howe, illustrated; Even, a poem by Francis Bennoch; Our Barbara, by Mrs. George Cupples; The Welcome Guest, by J. E. Bendall. No monthly is better for the young folks.

NEWS FROM THE CHURCHES.

The Rev. T. Moody writes from Cross Plains, Alabama, March 8, 1870: "I humbly trust I see signs of improvement with some of our members. We wait for revival seasons; between times we get into a cold, indifferent state. There is a want of gradual, consistent piety. We never can succeed as desired until we can get our membership into a gradual growth in all the graces of the Spirit. This will keep them in a peaceful, happy state of mind and heart—having communion with God, and pleasant fellowship one with another. In this happy state we shall be enabled to shed a gracious influence among our associates. They will take knowledge of us that we have been with Christ, and be won to Christ by our good conversation and pious life. This is what we need at Cross Plains. Pray for us."

How bow before talent, even if associated with goodness; but between these two we must make an everlasting distinction. When once the idolatry of talent enters, then farewell to spirituality; when men ask their teachers, not for that which will make them most humble and godlike, but for the excitement of an intellectual banquet, then farewell to Christian progress. Here also St. Paul stood firm. Not wisdom, but Christ crucified. St. Paul might have complied with these requirements of his converts, and then he would have gained admiration and love; he would have been the leader of a party, but he would have been false to the Master—he would have been preferring self to Christ.

Globe Mutual Life Insurance Company, New York.

All the New York Life Insurance Companies are compelled, by wise and stringent laws, rigidly enforced, to conduct their business upon the mathematical requirements of safety to the insured; and are required to keep on hand, securely invested, a fund sufficient to secure the payment of all their policies at maturity. This fund or "reserve" has been well styled the "sheet-anchor of Life Insurance," and it is, by the law of New York, required to be computed each year, for every company, by special experts, under the superintendent of Life Insurance for the State, and no company is allowed to continue business if this fund is in the slightest degree impaired.

The Globe and its principal officers are the originators and organizers of the non-forfeiture principle in Life Insurance. Its president, Mr. Pliny Freeman, some twenty years ago procured the charter and organized the New York Life Insurance Company; and soon after instituted the examinations which resulted in his introducing the ten-year non-forfeiture plan in that company. The New York Life confiscated, during the war, a large number of Southern policies. Mr. Freeman severed his connection with it. The Globe was soon organized, with Mr. Freeman as its president, and the company at once adopted practically the principle of making all its policies non-forfeitable.

Other companies have now "found it expedient" to follow the non-forfeiture example set them by the Globe, and felt compelled to abandon the former liberal and unjust rules by which they declared a policy forfeited upon the failure of the insured to pay every year, or a given day, the stipulated annual premium as long as he lived. By this harsh and unfair rule, if a man from misfortune found himself no longer able to pay his annual premium, although the value of the policy, which of right belonged to him, may have been accumulating for fifty years or more, life insurance companies, previous to the improvements and ameliorations introduced by Mr. Freeman, unhesitatingly declared the policy forfeited whenever the insured failed to continue to pay, and meekly pocketed the value thereof. The extent to which this process of confiscation was formerly carried is not generally known. Some of the oldest and most "respectable" companies in the country have been made enormously rich by this source of profit, and have thus been able to make splendid dividends upon the policies that remained.

To Mr. Freeman, the president of the Globe Mutual Life Insurance Company, of New York city, is due all the credit for breaking down this injustice, so long universally practiced by life insurance companies. To him belongs the honor of introducing, while connected with the New York Life, the ten-year non-forfeiture plan, and of extending the principles of the organization of the Globe, immediately after he withdrew from the New York Life.

Similar sound practical and just views influenced the president of the Globe in arranging the terms of the contracts made by his company with the insured. Acting upon the principle that a sane, healthy man, such as they insure, can take as good care of his own life as the company could take for him, they resolved to trust policy holders in this respect, and not to concern themselves with the place of residence, route or travel, or to decide what the insured should eat or drink; and since no man is likely to take his own life for mere money, and looking upon suicide as a disease, they accepted the risk of it as fully as that of accident or disease. A close reading of the restrictive specifications contained even now in the contracts made by some of the companies with those whom they insure, would almost convince a person that such companies were in advance preparing grounds upon which to contest the payment of the policy after the death of the policy holder.

The founders of the Globe Mutual have improved the business of life insurance, and gone further than any preceding institution in divesting it of everything that endangers injustice to one class of investors in order to bring exorbitant advantages upon another. The Globe Mutual Life was organized in June, 1861, and up to the first of this year, 1870, have issued 1,818 policies, and have over \$2,251,000,000 not assets, having commenced with a cash capital of \$100,000. Policies issued during last year (1870) 4,813, insuring \$12,549,062 00. The progress of the company is unprecedented. It has met with the success fairly due to the ameliorations and improvements it introduced into the system of Life Insurance. The company has no secrets, no mystifications, deals in no delusions, no jugglery in business, by which, through a "note" or a "loan," a man is induced to believe that he will get something certain without even running the risk to pay.

MISSIONARY INTELLIGENCE.—Probably the oldest missionary in India is Rev. George Pearce, who has for forty-three years been laboring for the English Baptist Society. He says, in a late address, that idolatry was never more vigorous than when he entered India—even the English supported it. The East India Company met the expense of "idol festivals." Government officers headed idol processions. Lord Clive offered \$1,200 at an idol temple. Juggernaut was annually decorated with three hundred yards of broadcloth sent from government stores. The governor general, Lord Auckland, though brother of an English bishop, presented offerings with the Hindu rajah to the temple at Unrisaur. The processions were crowded, and public obscene orgies were shamelessly indulged in. The suttee was regularly practiced, and government provided police to protect it, no less than one thousand six hundred widows being burned every year in Bengal, that part of India most under the eye of the government. Since that time, almost entirely under religious influences, all bloody rites have been suppressed, superstitions have been torn away, and the dawn of a new era has certainly risen.

The theological school at Marash, Central Turkey, recently held its annual examination, which was a season of unusual interest. "Over one thousand visitors were present during each session of two days, and on one afternoon as many as fifteen hundred, including the Pasha and many of the principal men of the American and Catholic communities. The students did nobly, and a deep impression was made on the community. Native helpers were stoned out of Marash sixteen years ago, while now there are five hundred church members."

HEROIC FAITH.—Said a clergyman in the Fulton street prayer meeting: "There is such a thing as great faith. Christ said there was, when he said: 'O! woman, great is thy faith.' Be it unto thee even as thou wilt." There is, also, such a thing as heroic faith. This is the faith that overcomes all obstacles, and holds on when all things oppose. It believes and trusts in God as giving faith by the inspiration of the Holy Spirit. Elijah could not tell why he believed that fire would come down from heaven and burn up the sacrifice, when the altar had been built and the sacrifice had been laid upon it and the trench around it had been filled with water. But he did believe it when it seemed the most impossible thing in the world, and the fire came according to his faith."

Obituaries.

S. E. HIGGINS, consort of R. A. Higgins, was born in Jackson county, Mississippi, May 21, 1830; was married by the writer November 20, 1850.

They moved to Newbern, Alabama, in January, 1866. She departed this life February 22. She was taken with meningitis about eight o'clock in the morning, and died about eleven P. M. She had been for a long time a member of the Methodist Episcopal Church, and her house was a home for the Methodist preachers. She maintained a good religious character up to her death, and just before she died she said that she would like to live longer, to do more good.

SAMUEL DICKSON STEINBACK, son of Mr. E. B. Steinback, of Holmes county, Mississippi, died in the city of Vicksburg, February 16, 1870, in the ninth year of his age.

He was in many respects a remarkable child—sensible above his years. His eagerness to acquire knowledge and his retentive memory had elicited the high expectations of his fond father and friends. When very young his mother (a truly devoted Christian) died, leaving him deprived of a careful training.

I know that little Dick thought of death and of the grave, of the resurrection and of the judgment, for I have answered his childish inquiries upon these subjects. Though he was in feeble health—his father having sent him for able medical treatment—he was hopeful of his health, when the first intimation of his death was the sound of the ambulance which brought the corpse of his dear child to his door.

J. D. N.
Died, February 17, 1870, in Tensas parish, Louisiana, WILLIE B., son of Thomas A. and Sarah M. James, aged sixteen years.

Willie James was a kind, good boy, beloved by his associates while he lived, and now that he is gone from them, lamented.

He seemed to have a presentiment of death. He said, when speaking to his aunt about having a birthday dinner with his young friends on the fourteenth, that he would never have another birthday dinner. On the same

evening, after he had enjoyed this pleasure, he was taken sick. On the following day he told his aunt and his old nurse that he was going to leave them; that he was going to die, but that he was not afraid; that he was ready to die. He said his mother—who died three years ago—had come for him; that she was then present, and he was going with her home. Two days afterward his sufferings ended, and he went home. The mother and three children are there; only the father and one little son survive. May grace cheer the heart of our bereaved brother in his deep affliction, and may he and his little Charlie, after while, join the "circle reunited."

"At home once more."
W. F. A.

JOSEPH H. WATSON was born in Jones county, North Carolina, September 18, 1818, and died February 21, 1870.

Brother Watson removed from the State of his birth, and, after living at different places, finally settled in Holmes county, Mississippi, where he ended his earthly pilgrimage. He joined the Methodist Episcopal Church about the year 1851. His first permanent convictions seemed to have been received while keeping a drum-shop. He felt that it was not respectable, and that it was opposed to religion and all that was good. He abandoned the business, and was finally led to seek the Lord. He was not a demonstrative Christian—quietly shedding his tears while others rejoiced aloud. His soul was readily stirred under an earnest discourse, a lively song or a pathetic prayer; but weeping was all that betrayed his feelings. He was a man of stern integrity, and upright in all his dealings—unpretending in everything; just what he pretended to be—that and nothing more, that and nothing less.

For a number of years he suffered from a disease of the heart. Again and again it had passed in its office; but remedies had as often restored him to his family and friends. On the morning of the twenty-first of February, at three o'clock, the alarm was given of an attack. Every effort was made to relieve him, but before seven the heart had ceased its motion altogether, and the good man was dead. J. D. N.

SIMEON M. ANDERSON was born September 19, 1843, in Tensas parish, Louisiana; embraced religion and joined the Methodist Episcopal Church South in 1854, and died January 5, 1870, in Calhoun county, Mississippi.

In the early part of my connection with Hernando Street church, of which he was a member, I was frequently associated with him, and in his domestic and church relations ample facilities were afforded for forming a correct estimate of his moral worth. But few of the laity manifested as deep interest in theology, or the economy of Methodism; nor was the knowledge thus obtained misapplied, but used in the accomplishment of religious ends. Possessed of a good mind, he readily analyzed the doctrines of the Bible, turning them to practical account, and demonstrating them by a consistent Christian walk. His religion was not a titillating, that gave signs of life only under the influence of exciting circumstances, but based upon right conceptions of his relationship, thus engendering firm, settled principles as rules of action, and exhibited in strict conscientious regard to church requirements.

After leaving Memphis, two years past, his Christian integrity and industry were tested in assuming the responsible task of sole guardian and protector of his mother and sisters, to whom he was strongly attached, and for whose support and comfort he labored with untiring assiduity; and while thus engaged his interest for their safety led him to undue exposure, from which originated congestion, and after a brief illness death relieved his sufferings. In reply to a question propounded by his sister, he said: "I have a deep Christian feeling in my heart."

He was a good man, and labored to do his duty, and doubtless reaps his reward in heaven, and has joined a sainted father, who but recently preceded him. The loved ones left behind may imitate his virtues and reap the same reward, and form an unbroken family in the land where separations are unknown. May this be their heritage.

F. S. PRITWAY.
—Memphis Christian Advocate.

DR. DAVIS ON DEAFNESS.

Send Forty cents, and get the NOTES ON DEAFNESS, by W. L. Davis, M. D. To be had of Steel & Co., 72 Camp street; Eyerich, 130 Canal street; Ellis, opposite the Post Office; also, by mail, of the author, Glass Box 399, New Orleans.

OBSEQUIE.—Dr. D. has removed to No. 19 Baronne street, where he holds himself in readiness to attend to the treatment of persons in cases of Deafness—a special branch of his profession, to which he gives his whole attention.
